Congressional Record

PROCEEDINGS AND DEBATES OF THE 101st CONGRESS, SECOND SESSION

SENATE—*July 19, 1990*

(Legislative day of Tuesday, July 10, 1990)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

The PRESIDENT pro tempore. As we reverence God, who created man in His own image out of the dust of the ground and breathed into his nostrils the breath of life, the Senate will be led in prayer by the Senate Chaplain, the Reverend Richard C. Halverson.

Dr. Halverson.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

*Beloved, let us love one another * * *.*—1 John 4:7.

*Love suffereth long, and is kind; love envieth not; love vaunteth not itself, is not puffed up, doth not behave itself unseemly, seeketh not her own, is not easily provoked, thinketh no evil; rejoiceth not in iniquity, but rejoiceth in the truth; beareth all things, believeth all things, hopeth all things, endureth all things. Love never faileth * * *.*—1 Corinthians 13:4-8a.

Eternal father, infinite in love, help us understand that love is more than emotion—love is a command to be obeyed. "He that loveth another hath fulfilled the law." "* * * everyone that loveth is born of God. He that loveth not, knoweth not God; for God is love." 1 John 4:7-8. Forgive us, gracious God, when we reduce love to weak sentiment and irrelevance. Help us realize that love is the most powerful force in life—the power by which righteousness conquers in history. Patient Father, grant us grace to understand that our response to love is obedience, not just a warm feeling. In the name of Jesus who is love incarnate. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. Under the standing order, the majority leader or his designee is recognized for 10 minutes.

The Senator from California, the majority leader's designee.

JOURNAL

Mr. CRANSTON. Mr. President, I ask unanimous consent the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. CRANSTON. Mr. President, this morning following the time for the two leaders, there will be a period for morning business not to extend beyond 11 a.m., with Senators permitted to speak therein for up to 5 minutes each.

At 11 this morning, the Senate will begin consideration of S. 2830, the farm bill.

RESERVATION OF LEADER TIME

Mr. CRANSTON. Mr. President, I ask that the time for the majority leader be reserved for his use later in the day.

The PRESIDENT pro tempore. Without objection, the remaining time of the majority leader will be reserved.

Mr. CRANSTON. I also ask the minority leader's time be reserved.

The PRESIDENT pro tempore. Without objection, the time of the minority leader under the standing order will likewise be reserved.

PRIVILEGE OF THE FLOOR—S. 2830

Mr. CRANSTON. Mr. President, on behalf of the Senator from Maine [Mr. MITCHELL], I ask unanimous consent that Mr. Robert June, a congressional fellow who serves as a legislative assistant through the National Sea Grant Marine Policy Fellowship Program, be accorded the privilege of the floor during consideration of S. 2830, the Food, Agriculture, Conservation, and Trade Act of 1990.

The PRESIDENT pro tempore. Without objection, it is so ordered.

MORNING BUSINESS

The PRESIDENT pro tempore. Under the order for today, there will now be a period for the transaction of morning business until the hour of 11 a.m., with Senators permitted to speak therein for not to exceed 5 minutes.

The Senator from South Dakota [Mr. PRESSLER] is recognized for not to exceed 5 minutes.

Mr. PRESSLER. I thank the Chair.

(The remarks of Mr. PRESSLER pertaining to the submission of Senate Resolution 310 are located in today's RECORD under "Submission of Concurrent and Senate Resolutions.")

Mr. PRESSLER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been noted. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KERREY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered. The Senator from Nebraska is recognized for not to exceed 5 minutes.

WE ARE STILL COURTING DISASTER IN CAMBODIA

Mr. KERREY. Mr. President, the administration's change of policy toward Cambodia yesterday was a welcome change. I spoke on it yesterday, and today I would like to suggest to the administration and to my colleagues that, though we have had a change in policy, and it is welcome, we are still courting disaster with the continuation of the balance of our policy.

I observe and urge my colleagues as well to stay with the phrase "courting disaster" a bit because the expression does not simply mean that a disaster

● This "bullet" symbol identifies statements or insertions which are not spoken by a member of the Senate on the floor.

might occur. It means that we are actually courting it, sending flowers, singing serenades, and writing letters trying to win the commitment of someone or something which will prove to be our worst nightmare rather than the answer to our dreams.

I fear, Mr. President, that in Cambodia we are still courting that very disaster. My observation of the central elements of our policy is that they will lead to continued success of the Khmer Rouge and the denial of freedom to the people of Cambodia.

I believe that the administration genuinely desires to keep Pol Pot, who is probably still leading the Khmer Rouge forces, from returning to power. I do not doubt the sincere desire of the administration to see the people of Cambodia enjoy free and fair elections. However, I genuinely, sincerely, and sadly conclude that a continuation of the current policy will not get the job done.

First, let me say the change of policy announced by Secretary Baker after a meeting with Soviet Foreign Minister Eduard Shevardnadze contains good things. It shifts the United States away from its decade-long support of seating a coalition government that includes the Khmer Rouge in the United Nations. It eases licensing restrictions on humanitarian projects in Vietnam and Cambodia. That, for me, is a wonderful change. It should help save some lives. It also implements a program to aid Cambodian children who are victims of war.

Mr. President, all of these are good and need to occur. However, with respect to those who convinced the administration to make these changes, allow me to say again, we are still courting disaster in Cambodia. We are doing two things, Mr. President, which will bolster the Khmer Rouge militarily and which will bolster them politically as well.

First, our support of an insurgent war against the current Government of Cambodia is not strengthening the hand of the non-Communists.

It is strengthening the military hand of the Khmer Rouge. This situation should not be seen as comparable to the issue of aid to the Contras or other such insurgencies which have battled governments that the United States did not like in the past.

In this case, Mr. President, the Khmer Rouge are also battling against the government, and their military capacity vastly exceeds that of the KPNLF or the Sihounist forces. American policymakers who believe we should continue to support the non-Communist resistance should consider this question: Who do you expect to take power if the Hun Sen government is overthrown by force?

The answer I give, Mr. President, is the Khmer Rouge, precisely the opposite of what we are trying to accomplish. It is a difficult issue because the non-Communists do deserve our support. However, even if the People's Republic of China were to end all support to the Khmer Rouge, which is unlikely, the Khmer Rouge is likely to be the principal beneficiary of a successful guerrilla campaign.

Thus we are courting disaster, Mr. President, because the continued support of the principle of using insurgent warfare to destabilize the Government of Hun Sen legitimizes the Khmer Rouge effort. Potential for a tragic outcome is very great.

Second, our announced intention of opening discussions with the Vietnamese about Cambodia, ironically and tragically, strengthens the political message of the Khmer Rouge. They have been organizing around a fierce nationalist, anti-Vietnamese, anticorruption message. The Cambodian people have intense negative feelings, to say the least, about the Vietnamese, and so our sort of collaboration with the Vietnamese will become a battle cry for a committed Khmer Rouge.

Let me make it clear, Mr. President, that I welcome this dialog with the Vietnamese Government for other reasons. I believe it may help us with other problems that we have, I sincerely believe it will court disaster in Cambodia.

A large part of our problem is that we have placed most of the information about what is going on in Cambodia under that rug called national security. It is classified information and unless you have gained a special security clearance—or have been elected to Congress which is a frightening thought for those concerned about genuinely important secrets—American citizens do not have a right to know what is going on. As a result of being kept in the dark, Americans have a difficult time reaching good, independent conclusions of their own.

Another problem for Americans is that we still tend to believe we can solve other people's problems from thousands of miles away. If we'll just have a meeting with other world leaders, we ought to be able to work these things out. We put meetings and conferences and summits at the top of the list when we are trying to decide what should be done.

We forget to do the most important thing first: Declare those truths that we hold to be self evident that we believe people have a right to form their own government and to be free from the dictates of that government. Our values and our experience of forming democratic institutions along with the experience of world leaders like Vaclav Havel, who can teach us again what it means to be imprisoned for political beliefs, must be laid upon the table before any other offers are made.

I believe we must do two very important things, as I said yesterday, in addition to what has been done. It is not incompatible with the administration's objectives. First, we should lift the Trading With the Enemies Act economic restrictions that prevent American businesses from forming partnerships and investing in Cambodia. Nothing spreads our values more than this kind of activity. Understand that I am not advocating most-favored-nation status. We are not expressing our support for the Government of Cambodia with this action. We are merely saying we do not regard them as an enemy.

Second, I believe it is important for us to exchange some kind of interest sections with the Government of Cambodia. Again, this does not mean we are recognizing the Government of Cambodia. It does not legitimize the Government of Cambodia but it sends a nationalist message that I think is important for that particular government, and it provides us with the opportunity to pressure them for political reforms including free and fair elections.

These are not ends in themselves, Mr. President, these two moves that I suggest. I do not have some sense that as a consequence of these two things we are going to have peace immediately as a result. There is apt to be fighting for some considerable period of time.

But I do believe it is going to permit these two actions of the United States to influence Cambodia and the people of Cambodia in our most positive way, which is with our values, by saying to them that you can have political freedoms, that you can have economic freedoms, that you can have protection from your own government in the way we have in the United States of America and we can help you get that done if you in fact want that kind of help. It enables the United States to stand upon its principles which, for me, is our strongest point. It is the strongest moment that we have in saying these are the things that we believe human beings ought to struggle to achieve. I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BURNS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. LIEBERMAN). Without objection, it is so ordered.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,951st day that

Terry Anderson has been held in captivity in Beirut.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is now closed.

EXTENSION OF MORNING BUSINESS

Mr. BURNS. Mr. President, I ask unanimous consent that morning business be extended for no more than 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Montana is recognized.

Mr. BURNS. I thank the Chair.

(The remarks of Mr. BURNS pertaining to the introduction of S. 2880 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. BURNS. Mr. President, I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DASCHLE). Without objection, it is so ordered.

The Senator from Connecticut is recognized.

Mr. LIEBERMAN. I ask unanimous consent to proceed as in morning business for no more than 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

DIESEL POLLUTION

Mr. LIEBERMAN. Mr. President, we learned today what many of us have suspected for a long time and that is that the dirty smoke coming out of trucks and buses is bad for human health. In the short run, overexposure to bus and truck fumes can lead to headaches, nausea, wheezing, and tightness of the chest. Over the long term, bus and truck fumes may actually cause cancer.

The particles in diesel fuel are absorbed deep in the human lung and they carry volatile organic compounds which are the cancer-causing agents.

Those are the unfortunate conclusions of a major report issued by the Federal Environmental Protection Agency just yesterday. Studies that are documented in that report indicate that truck drivers and others routinely exposed to bus and truck fumes and other emissions from heavy transportation equipment may actually have a higher risk of contracting cancer of the lung, liver, or bladder.

Unfortunately, it is not just those who work with such vehicles who are at risk. Millions of Americans in cities across the Nation breathe the dirty air every day. It is important to note it took far too long for this information about this dangerous situation to come to light. For most of the 1980's, the administration opposed efforts to control diesel emissions. It was only after environmental groups successfully challenged the EPA in court that the agency undertook the task of drafting regulations that govern diesel fuel.

Mr. President, today's news should serve as a graphic reminder to those who are working as conferees on the Clean Air Act that the diesel fumes are not just dangerous—they actually can kill. I hope the conferees will accept the tough standard established in the Senate Clean Air Act for regulation of diesel trucks and off-road vehicles, including construction equipment, and to phase in safer fuels for use in buses at the earliest possible date.

In the meantime, I think the result of this EPA report should suggest to any driver who pulls up behind a bus or a truck and sees that dark cloud churning out of the tailpipe as it accelerates to hold your breath and get out of the way. That dirty air not only looks bad, it is dangerous.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. LIEBERMAN). Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is now closed.

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT

The PRESIDING OFFICER. Under the previous order the Senate will proceed to consideration of S. 2830. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 2830) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The Senator from Vermont is recognized.

Mr. LEAHY. I thank the Chair. For those who have been listening with half an ear back in their offices, who may be wondering just what is going on, this is indeed the farm bill (S. 2830) that is now before us. As my colleagues can see, it is a somewhat weighty tome. But for those who may have any difficulty in going through this, we do have a summary in green. If they do not want to read the whole bill, we have this handy, pocket size 1,300-page summary, pocket size for those who have large pockets.

Mr. President, we are now beginning floor debate on what has become a-once-every-5-year-ritual—consideration of the farm bill. In some ways, the name of the bill is a misnomer. It incorrectly implies that the legislation only concerns farmers.

It has a far broader impact.

True, it affects every farm family's budget and the farmer's decisions about what crops to plant, where to sell, and how much to borrow.

But each day, it also affects every man, woman, and child living in this country.

It affects each of us every time we sit down to eat or get dressed in the morning. It improves our balance of trade each time we export a ton of wheat, corn, or soybeans overseas.

It protects the water we drink and the wetlands our wildlife depends on. It protects the safety of our food supply from dangerous pesticides. It preserves the rural character of our States threatened by urban sprawl.

Yes, this bill affects farmers. But it also affects all of us, every day, by making sure our domestic agriculture produces reasonably priced food for the Nation's dinner tables.

It is for these reasons that the Agriculture, Nutrition, and Forestry Committee named the bill to reflect its broad scope: The Food, Agriculture, Conservation, and Trade Act of 1990.

The bill is the result of hard work and tough decisions. During the hearing phase of the farm bill, the committee traveled nearly 28,000 miles to 13 States to meet firsthand with those who are most affected by the laws Congress passes. In Washington, we set a rigorous schedule for ourselves—33 hearings in an 8-week period. All told, these 180 hours of hearings generated over 5,000 pages of testimony.

During the markup phase of the bill, we had countless meetings and 20 public markup sessions.

In the end, we passed a good bill, supported by the committee on a 15–4 vote. The bill had bipartisan broad support, ranging from the senior Senator from Indiana and the minority leader, the committee's most senior member, to its newest member, the Senator from Nebraska.

In preparing this legislation, the committee was guided by several important principles:

That our farmers need programs that give them a fair return on their crops and a secure future;

That the food Americans eat must be safe and nutritious;

That our farm programs must make sense and meet budgetary constraints;

That sound farm programs must protect the source of our abundant food;

That our farm programs must provide safe water and fertile soil; and

That farm programs must be consistent with our environmental objectives.

To achieve these goals, this legislation has 19 titles, encompassing a host of complex issues, ranging from target prices to planting flexibility, from food safety to consumer protection, from forest management to wetlands conservation, and from foreign food aid to trade.

These are some of the highlights of the commodity titles of the bill:

Stops the decline in target prices and loan rates;

Creates mandatory marketing loans on wheat and feed grains;

Increases planting flexibility;

Establishes a new targeted option program [TOP] that allows farmers to design their own farm program to meet their own specific farm needs;

Establishes a new oilseeds income protection program; and

Improves quality and cleanliness of U.S. grain.

These are some of the highlights of the other farm bill titles:

Breaks the "circle of poison" by prohibiting the overseas export of pesticides banned from U.S. farm use;

Continues protection for fragile wetlands swampbuster;

Creates major new incentive program to help farmers prevent contamination of ground and surface water on 10 to 20 million acres;

Helps farmers meet environmental laws;

Helps farmers use less pesticides and monitors hazardous chemical use;

Establishes first-ever national organically grown label;

Makes major revisions in Food for Peace Program—the most significant changes in 25 years; and

Makes most important revision of national forestry laws in 14 years.

There is one title missing from the farm bill—a nutrition title. Initially, we have planned to base this title on the Mickey Leland Memorial Domestic Hunger Relief Act which Republicans and Democrats from the Agriculture and Budget Committees introduced to combat hunger in this country.

Unfortunately, due to the lack of a final congressional budget resolution, we do not know at this time if the budget will contain adequate funds for the Mickey Leland bill. For this reason, the farm bill, as reported by the Agriculture Committee, does not contain a nutrition title.

Time and time again, I have reaffirmed my commitment to supporting a nutrition package that is within budget. However, time is running out. Because these programs will soon expire, Congress may have to act without a final budget resolution. If, on the other hand, the budget is resolved before the close of the farm conference, I intend to have the Mickey Leland bill attached to the farm bill.

The committee is dedicated to providing adequate nutrition to those in need. I am personally committed to seeing the Mickey Leland bill pass this year, either as part of the farm bill or as separate legislation. I urge the budget negotiators to keep a bipartisan consensus and fund the Mickey Leland bill.

Finally I want to say a word about the budget. I have told the members of the committee from the beginning that this farm bill must be consistent with our budget responsibilities. It is a very hard goal to meet for a committee with so many farm constituents with so many pressing needs. Our members joined me in that commitment. For that they deserve our thanks.

Budget scorekeeping, however, is arcane. When it is applied to agriculture programs it is a particularly byzantine. Thus when we reported the bill, we thought it would be acceptable to the Budget Committee, however a scorekeeping problem has arisen involving the transfers of funds between fiscal years.

Senator LUGAR and I will soon offer an amendment to fix that problem and produce a bill acceptable to the Budget Committee.

What further savings will the budget summit require? I don't know and we do not attempt to prejudge the summit agreement in this bill.

But this much is certain. The Senator from Indiana and I are committed to making the necessary budget savings. In the last two reconciliation bills we have saved $3.5 billion while the cost of the farm programs was falling by $16 billion.

This committee and American agriculture is prepared to do its share to address our budget crisis.

Writing a 5-year farm bill is not easy. Since becoming a member of the Agriculture Committee in 1975, we have had several farm bills. I have grown old on farm bills in the last 16 years. I know how difficult it is to write a farm bill. We must deal with regional differences, commodity differences, and philosophical differences.

In putting this bill together, I have had tremendous cooperation from Senators on both sides of the aisle, Democrats and Republicans. But it would have been impossible to have written this bill without the help of the distinguished senior Senator from Indiana [Mr. LUGAR]. He is not only one of the most knowledgeable Members in this Chamber on this and so many other subjects, but his willingness to work with us to fashion a bill that could get some broad support was absolutely essential.

As I have stated over and over again, I do not want a budget-busting bill, and we will not have one. I want a bill that has broad geographical, philosophical, and bipartisan support. I think we have done that, Mr. President, in the bill before us today.

Not everybody will agree with everything in this bill. Nobody expects that. Had I been able to write a farm bill solely by myself, I would have written a number of titles differently. I am also certain that if Senator LUGAR was left to write a farm bill solely by himself, his would be written several titles differently. My good friend and an expert on farm policy, Senator DASCHLE of South Dakota, is with us. If Senator DASCHLE wrote a farm bill solely by himself, his would be different. And the same would be true for every Agriculture Committee member.

But to pass a bill from the Senate, a majority of this Chamber must agree. Each of us has had to give up something.

Finally, when this bill goes to conference, I will commit to not finishing conference if there is a budget summit underway and close to reaching an agreement. I will abide by the agreement reached at the summit that is approved by Congress.

Mr. President, I ask unanimous consent that a summary of the major provisions of S. 2830 be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

COMMODITIES

Planting Flexibility: Allows 25% planting flexibility tied to a program crop base. Producer may plant up to 25% of program crop base to other crops and receive base protection. Loan eligibility is extended to program crops planted under this flexibility option, except program crops planted on oilseed acres.

Deficiency payments are not available on program crops planted on "flexed" acres. The Secretary may provide additional flexibility to producers having trouble meeting conservation compliance requirements and cross-compliance provisions are eliminated.

Acreage Reduction Programs: Maximum ARP programs established as follows: 20% maximum for wheat and feed grains; 25% maximum for cotton; and 35% maximum for rice.

Secretary may establish an ARP percentage of 0. For feed grains, Secretary is given discretion to make ARP determinations of excess stocks on an individual feed grain basis.

Target Prices for 1991 through 1995 crops: Wheat=$4.00 per bushel.

Feed Grains: Corn=$2.75; grain sorghum=$2.61; barley=$2.36; oats=$1.55 for 1991, with an increase each year of 10 cents up to a maximum of $1.85; cotton=$0.729

per pound; and rice=$10.71 per hundredweight.

Targeted Option Payment Program: Producer may choose to increase or decrease ARP percentages and receive a corresponding increase or decrease in the target price level. Allowed increase in ARP is different for each crop, but decrease in ARP requirement is limited to ½ of ARP announced by Secretary.

For every 1 percentage point increase or decrease in ARP, Secretary shall increase or decrease the producer's target price by between .5% and 1%. The Secretary shall determine the exact level in a manner designed to make this option production and participation neutral.

Price Support: Wheat and Feed Grains:

Secretary may select from two options:

Plan A: Marketing Loan with loan rate established at 1990 base loan rate.

Plan B: Marketing Loan with loan established at 1990 actual loan rate; however, for every 1 cent the Secretary reduces the loan rate below the base loan rate, the Secretary shall provide an Advance of 0.75 cents to the producer at sign-up. This Advance shall be repaid

The level for cotton and rice is the same as current law.

Cotton Marketing Loan consolidates plan A and plan B and current law and contains provisions authorizing adjustments in prevailing world market price in order to ensure competitiveness.

Dairy: Stops decrease in dairy prices. Price is frozen at $10.10 per hundredweight.

Requires Secretary to implement supply management if government purchases become excessive.

Establishes promotion program to make fluid milk product compete with other beverages.

Sugar Provisions: Extension of current program.

Oilseeds Provisions: Nonrecourse marketing loan for oilseeds is established at following rates:

Loan rate for soybeans set at $5.50.

Secretary has authority to reduce soybean loan rate if Secretary estimates excessive stocks as follows:

If stocks to use ratio exceeds 20%, loan rate may be reduced to no less than $5.25; and

If stocks to use ratio exceeds 25%, loan rate may be reduced to no less than $5.00.

Loan rate for sunflower seed, canola, flax and safflower set at 9.7 cents. Secretary shall adjust rate in accordance with adjustments made in the loan level for soybeans. Secretary authorized to establish programs for other oilseeds as Secretary deems necessary.

Bases and Yields Provisions: Producers eligible to receive deficiency payment for any program crop in any crop year may not use acreage planted or considered planted to any program crop or oilseed to increase crop acreage bases in subsequent years.

The calculation of farm program payment yields is unchanged. The Secretary shall allow producers to provide actual yield data to ASCS county committees.

Modification for irrigated yields—any producer expanding current irrigated acreage planted to program crops shall not be assigned an irrigated yield for any new irrigated land.

Grain Quality: Grain standards: For the first time, establishes a framework for future changes in grain standards including economic value of grain. Improves cleanliness of grain: provides authority to preclude blending clean grain with contaminated grain.

Other Provisions: Establishes a separate wool payment limitation at $50,000. Revises and updates provisions concerning CCC sales price restrictions. Provisions concerning adjustments to support prices for quality, location, etc., are revised and updated.

Pilot Bushel Based Program for Wheat and Feed Grains: Producers will be able to meet ARP requirements by limiting marketings instead of amount of acreage. Option to be offered to producers in 15 counties in each of 4 states.

Farmer Owned Reserve Program: Farmer Owned Reserve modified to provide for the more gradual accumulation and exit of wheat and feed grains into and from the reserve.

FOOD SAFETY AND CONSUMER ISSUES

Circle of Poison: Prohibits the overseas export of pesticides banned from U.S. farm use but found in many imported foods.

A loophole in current law allows U.S. chemical companies to manufacture here and ship overseas pesticides that the Environmental Protection Agency considers probable carcinogens and too dangerous for domestic farm use. Because the Food and Drug Administration waives through virtually all imported food without inspection, these chemicals often end up on America's dinner tables.

Organic Labeling: Sets first-ever national standard for a "organically grown" label to help eliminate consumer confusion, provides food alternatives, and gives farmers market incentives to use less chemicals.

ENVIRONMENTAL AND CONSERVATION ISSUES

Wetlands Protection ("Swampbuster"): Extends 1985 farm bill protections for 60 to 80 million acres of fragile wetlands.

Also, for first time, farmers may protect and restore their wetlands by enrolling them in a reserve program and selling the federal government a conservation easement.

Clean Water: Creates major new incentive program to help farmers prevent contamination of ground and surface water on 10 to 20 million acres of land. Also, for the first time, USDA must help farmers meet state and federal environmental standards.

Protection of Fragile Land: To reduce off-farm enviornmental threats and mitigate soil loss on adjacent lands, enrolls a total of 40 million acres by 1995 a reserve program.

Includes new "Farms for the Future Program," allowing states to permanently protect farms from conversion to other uses.

Conservation Compliance: Improves the implementation of 1985 farm bill requirement that farmers meet conservation objectives to remain eligible for federal farm program benefits. Farmers must now implement plans to prevent soil erosion.

Recordkeeping for Dangerous Pesticide Use: To help monitor chemical use, requires farmers to keep records of hazardous pesticide use.

FORESTRY

First Time a Forestry Title: The most significant revision of national forestry laws in 14 years, this sets up the first-ever public/private partnership to protect 25 million acres of private forestland. Through conservation easements and other incentives, protects forests for the future, the legislation targets 8 million private forest owners—who manage 482 million acres of forest covered by an estimated 200 billion trees.

RESEARCH

Reduce Pesticide Use: Authorizes a ten-fold funding increase ($250 million over five years) for Low-Input Sustainable Agriculture (LISA) to help farmers use less chemicals.

New Priorities for Agricultural Research Facilities: For the first time, requires USDA to consider environment, nutrition, water quality, and competitiveness when awarding research grants.

New Initiatives in Agricultural Research: Increases authorization ($1.5 billion over five years) in competitive grants.

University Research: Increases formula funding for land grant colleges and 1890s institutions.

Global Warming: Authorizes $67 million over five years to study the effects of global climate change.

TRADE

Food for Peace: Makes the most significant revision in our food aid and trade laws in 25 years.

"Food for Freedom" Program: Gives the United States powerful new tools to help the emerging democracies. Gives the president authority to donate food and spend up to $50 million for agricultural necessities such as fertilizers and transportation.

Commercial Trade: To increase competitiveness abroad, requires USDA to develop long-term trade strategy to expand overseas markets.

The PRESIDING OFFICER. The Chair recognizes the Senator from Indiana [Mr. LUGAR].

Mr. LUGAR. Mr. President, I thank the distinguished chairman of our committee for his thoughtful comments about my work and the work of the other members of the committee. He has offered extraordinary leadership in a very complex matter. He has characterized the bill faithfully and truthfully as complex, covering 19 titles. He has described very well the travel of the committee and the number of meetings. It has been an important discussion for all of us. The product of our labors is now before the Senate as Senate bill 2830. I commend the chairman for his leadership and commend the members of the committee for a very straightforward look at the problems of agriculture in this country and their very constructive response.

I rise today, Mr. President, in support of our bill, S. 2830. It was reported with strong bipartisan support by the Senate Agriculture Committee. Some aspects of this legislation should be improved before final action in the House-Senate conference and I have confidence they will be during this debate.

Nevertheless, I believe this legislation tracks closely with the provisions of the 1985 farm bill and is worthy of support at this time.

Despite strong criticism by some of our colleagues at the time, I believe Congress made the right choices in 1985. We chose market-clearing loan rates, aggressive export promotion, and a gradual but real reduction in

income guarantees. In 1985, we passed a good farm bill.

Since enactment of the 1985 farm bill, net farm income has increased from $32 billion in 1985 to $48 billion in 1989 and shows a 30-percent gain even when adjusted for inflation. Total farm debt fell by an average of nearly $10 billion a year between 1985 and 1989. Farm real estate values, which eroded by $57.2 billion a year during the 1981 farm bill, have turned around under the 1985 law and increased by an annual average of $46.9 billion since then. The farm sector's debt-to-asset ratio, which had reached a troubling 23.5 percent in 1985, has now declined to a more normal 16 percent.

Another benchmark of better times is the growth in U.S. farm exports. From 1981 to 1985, our exports declined 8 percent a year. But since 1986, export value has grown by over 10 percent a year, on average, and has now risen 44 percent from its low point.

Now, Mr. President, we have another farm bill before us. The Agriculture Committee passed a bill that, in many ways, continues the policies of the 1985 Food Security Act. To this extent, it is a good bill. In a few ways, the legislation before us even improves upon the 1985 law. To that extent, it is also a good bill. In other areas, however, the bill now before the Senate contains provisions that could frustrate good policy—that could risk a return to the failed policies of earlier decades. And to that extent, some improvement might still be made.

The task of the Senate, therefore, is to make a reasonably good bill better: Where it is sound, to leave it alone; where it is deficient, to improve it.

Many people have come to believe certain myths about farmers and farm programs. One myth is that all farmers are eagerly looking for more and more subsidies. This is untrue. A 21-State survey conducted by land grant universities asked farmers what their general preferences were for future agricultural policies. The survey found that 35 percent wanted a gradual phaseout of all farm programs. Another 33 percent wanted to keep the present program, while 8 percent wanted decoupling, a system of direct payments which would imply much less government manipulation of markets. In other words, 76 percent of farmers wanted either the status quo or significantly less government involvement in agriculture. Only 11 percent of farmers in the 21-State survey favored mandatory production controls, a system of strict government quotas and acreage controls.

A second myth is that nearly all farms are receiving government payments, and therefore nearly all have a vested interest in farm bills. The 1988 farm costs and returns survey, conducted by the U.S. Department of Agriculture, found that only about one-third of all farms received direct government payments. That means two-thirds did not. Now, some portion of that two-thirds receive subsidies in other ways—for example, tobacco and peanut growers are subsidized, but not through direct payments—but the fact remains that a very substantial segment of American agriculture prospers without the web of acreage controls, target prices, and price supports that have unfortunately come to characterize U.S. grain and cotton policy.

There is no price support program for potatoes, but we do not seem to hear the potato growers complaining very often. The Federal Government does not stand ready to guarantee the price of hogs, yet the pork producers are not clamoring for handouts. One is tempted to observe that the commodities Government tries to help seem to have worse problems, while the commodities Government leaves alone seem to prosper.

A third myth of farm policy is that our farm programs are designed to help small, family farmers. For good or ill, this is not true either. U.S. agriculture today is dominated by farms with over $100,000 in annual gross sales. About 323,000 farms are in this category, and while they account for only 15 percent of U.S. farms, they represent 77 percent of all sales volume, 85 percent of all net farm income, and 57 percent of Government payments. This is not an impoverished group of people; their net farm income averaged $70,825 in 1988.

The smaller farms, grossing between $40,000 and $100,000, are more numerous but less profitable. Their net farm income, on average, was only a little over $17,000 in 1988. Yet each farm in the $40,000 and $100,000 sales class received less than half as much money in direct Government payments, on average, as did farms that grossed more than $100,000. In short, our farm programs are not based on need and never have been. This may not even be a bad thing, but whether it is good or bad we should be open about it.

Mr. President, we shall hear a great deal in the next few days about how important it is to preserve the family farm. Some will make the case that if we do not fork over many more billions of dollars, thousands of farms will fail and we shall all probably have to pay a higher percentage of our disposable income just to keep food on the table. Some of my colleagues may paint a picture of agriculture today so grim, so foreboding, so fraught with gloom, doom and despair, that the more naive among us will ask why on earth anybody would want to farm in the first place.

I hope that the Senate will look beyond mythology, and beyond the emotional rhetoric that often accompanies farm bills, and look at facts instead. For example, before we are through with this farm bill, some of my colleagues are going to propose increasing target prices, the basic income guarantees for so-called program crops. These Senators will adapt a populist tone when they call for spending more money; they will argue that the family farmer just cannot make it without the extra money they propose to send him.

When that time comes, I will note for my colleagues that for every new dollar in target price payments they legislate, they are sending 90 cents of it to fewer than 20 percent of the farms in American. I will point out that, of that same new dollar in payments, 57 cents will go to farms with more than $100,000 in annual sales, while only a quarter will go to mid-sized farms with sales between $40,000 and $100,000. And I will then point out what a curious brand of populism it is that talks about the little guy, and then proceeds to siphon off most of the cash to the big guy.

One of the things I find interesting is that sometimes politicians want to give farmers more than farmers apparently want. For example, the Senate Agriculture Committee was tied up in knots for weeks because some people wanted to raise loan rates. Frankly, it surprised me that we were forced to go through long debates over loan rates, since the 1985 farm bill's loan rate policies have worked well.

What surprised me even more was the dogged determination of some people to raise loan rates even though there is no discernible demand in the countryside for higher loan rates. Let me cite, again, that 21-State survey of farmers: In that poll, only 18 percent of American farmers wanted to raise loan rates—82 percent did not. Indeed, 34 percent wanted to eliminate loan rates altogether. Yet some people think they must be higher.

Mr. President, S. 2830 is, as yet, an unfinished product. Among other things, it remains too expensive. The Congressional Budget Office advises us that this bill, without further adjustment, will increase Federal spending by $3.5 billion over the next 5 years. Obviously, the bill's cost must be brought within the boundaries of what we have available to spend.

The chairman has already indicated his agreement with this point, and I would say, Mr. President, that the estimates of the expensive character of the bill are to some degree, in the eye of the beholder, and vary accordingly to the differing guidelines that are offered.

I am committed with Chairman LEAHY to make certain that this bill remains within our Budget Committee's guidelines, to make certain that in no way could it be characterized as spending more money at a time when

the summit conference is meeting and, obviously, is heading for spending less money. I commend the summit. I commend those who will work with this bill.

But, Mr. President, we have had moving targets and moving goalposts throughout this situation. As Chairman LEAHY has pointed out, fairly shortly he and I will join to offer an amendment which we believe brings this bill into conformity with the budget so there is no new set cost over the 5-year period of time.

We believe this can be done relatively simply. If further reductions are required, they will be met. I make this point explicit because I would not want the debating point to lie that in some way the Senate Agriculture Committee has attempted to fashion a bill that spends more money on agriculture than the Budget Committee or the summit or anyone else wants to spend. We clearly are in conformity with that. I believe we have a good working majority within our committee, and I presume the rest of our colleagues will likewise join us with that.

Mr. President, let me mention a few highlights of the bill. The bill, as I pointed out earlier, generally freezes target prices for program crops, with the exception of oats where some increases are proposed to bring this crop structure into line with other feed grains.

I make this point because in the notice to us by the Office of Management and Budget, OMB, it appeared to me that there was a characterization of our bill as one in which some target prices were raised. Indeed, one of the large debates we had within our committee over several weeks was on this very point—freezing target prices. I would not want any other characterization by OMB or anyone else.

I would suggest that in a technical way. We have made the oats exception to achieve some equity, to bring oats into line with other feed grains. Clearly, the committee has spoken with regard to freezing target prices.

The bill adopts the acreage reduction programs suggested by the Bush administration in the Green Book earlier this year. For some crops like wheat, these provisions will likely mean significantly lower ARP's than in the recent past.

Loan rates for cotton and rice are, essentially, extended in their current form. For wheat and feed grains, the bill continues the current dual loan rate structure—a basic loan rate and an actual loan rate 20 percent lower—but sets a floor for these loan rates at 1990 levels, mandates a marketing loan of the type now in use for cotton and rice, and provides for advance payments if the Secretary chooses to utilize the fully reduced loan rate, as he has done in recent years. Once again, cost considerations may compel us to reexamine these provisions, since they are the single largest reason for the $3.5 billion increase in projected spending during 1991–95.

The chairman and I will shortly offer an amendment which, through payment of these dollars at a more normal time puts them in the proper budget year. We believe that alleviates most budget-related criticism.

A new marketing loan program for oilseeds, with soybeans supported at $5.25 to $5.50, is part of the committee's bill, as are numerous provisions intended to give farmers more flexibility. For example, farmers will be able to increase or decrease their idled acreage, with corresponding offsets in their deficiency payments; they will be able to plant soybeans or other oilseeds on formerly idle acres, again with payment offsets; they will be able to shift 25 percent of their program crop acreage into other commodities without losing their entitlement to future program benefits. These provisions, taken together, will give farmers more planting choices than they have today. That is good in my judgment. They do not represent nearly the degree of planting flexibility that an original bill. S. 2292 that I authored provided, or that the Bush administration proposed, and further discussion of this may occur during this debate.

Several programs like peanuts, sugar, honey, and wool are extended with relatively little change. Dairy price supports are also continued, but unlike the last farm bill there is now a floor beneath which price supports cannot fall, namely the current support rate of $10.10 per hundredweight.

Finally, the bill will make significant reforms in the Farmer Owned Reserve for wheat and feed grains. Our policy will be that these reserves will no longer be held off the market as they now are, but will be more readily available when farmers wish to take advantage of good prices and sell them on the market.

The bill also generally retains current limitations on direct payments to producers.

One of the most exciting aspects of this legislation is the conservation title. The conservation title of the Food Security Act of 1985 tied soil and water conservation to farm program participation. For the first time, Congress enunciated the basic principle that the United States will not subsidize irresponsible stewardship of our natural resources. A recent poll of farmers' attitudes showed significant support for the conservation provisions in the 1985 act. For example, 60 percent supported conservation compliance requirements.

S. 2830 puts agriculture in the forefront of wetlands restoration. This bill would allow former wetlands converted to crop production to be restored to wetland status. Producers would be offered permanent easements on the land. This Wetlands Reserve Program, similar to my bill S. 1063, would make agriculture a leader in the national effort to achieve President Bush's goal of no net loss of wetlands.

One of the major components of the 1985 bill was the Conservation Reserve Program. In S. 2830, the CRP is renamed the Environmental Conservation Acreage Reserve Program, since additional types of environmentally sensitive lands are made eligible. Incentives are provided to encourage hardwood tree planting, windbreaks, and shelterbelts on ECARP land. Because of the higher amount of land eligibility for entry, the Secretary is given the authority to accept contracts with the greatest public benefit.

One of the more controversial portions of the 1985 bill was the so-called swampbuster provision. That provision stated that any person who drained and planted a crop on a wetland would be ineligible for Federal farm benefits.

S. 2830 clarifies current law by providing that wetlands may be drained if such draining will have a minimal effect on the functional hydrological and biological value of the wetland.

Our bill allows valuable wetlands to be drained if they are mitigated by restoring a wetland of an equivalent value on a former wetland that has been drained in the past.

S. 2830 reforms the current swampbuster penalty so that a farmer who, in good faith, drains a wetland is subject to a reduction in his or her Federal farm benefits on the first violation, rather than a total loss of program benefits. The farmer must restore the drained wetland and can use this graduated penalty on each farm only once in any 10-year period.

Finally, the trigger for determining if a swampbuster violation has occurred is changed. Current law states that a violation has occurred if a person drains a wetland and plants that land to an agricultural commodity. S. 2830 provides that a violation is deemed to have occurred if a wetland is drained and the land is left in such a condition that crop production is possible.

CREDIT

S. 2830 makes substantial reforms in the operating rules of the Farmers Home Administration. The committee responded to abuses in FmHA lending practices by limiting the amounts and number of times any one person can write down debt. The bill also establishes for the first time a statutory requirement that FmHA borrowers graduate to commercial lenders within certain periods of time. The committee strongly believes that FmHA should return to its traditional role as a lender of last resort to borrowers who cannot obtain credit elsewhere, but also believes that federally subsidized

lending should at some point come to an end. To encourage borrowers to move to commercial credit, the bill increases the amount of FmHA resources dedicated to guaranteeing commercial loans. S. 2830 also contains new lending authority for Farm Credit System institutions and incorporates a request by the administration to permit the Federal Agricultural Mortgage Corporation to pool FmHA-guaranteed loans.

INTERNATIONAL PROGRAMS

The international title of S. 2830 has two main elements: a reform of food aid programs and a continuation of our export and market development efforts.

Food aid, commonly known as Public Law 480, now makes up less than 4 percent of all U.S. commodity exports, but its impact in the world is much greater than its size. For nearly 40 years the United States has been the largest provider of food aid to the poorest people of the world. Many of my colleagues have seen some of these programs firsthand: nutrition programs for mothers and infants in India, famine relief in eastern Africa, or food aid to create jobs in Indonesia and Jamaica.

But this program has operated much the same way for many years and, like any successful operation, it needs from time to time to change and adapt to remain successful. The traditional demands for food aid have changed as we face new situations in Eastern Europe and Central America. We need to respond quickly and rapidly to these changes and others yet to come.

The laws and regulations governing the food aid programs have become encrusted with bureaucratic requirements, many imposed by Congress, others by successive administrations. The Inspector General of the Agency for International Development called the current law "obsolete, complicated, and confusing" and called for "more realistic, achievable goals. * * *".

For more than a year, the committee has worked to create new food aid legislation that will allow the Nation to respond quickly and appropriately to the needs of millions of people. This provision was originally cosponsored by a majority of committee members and reported out unanimously in April. Moreover, it has the endorsement of a wide range of agricultural groups as well as the cooperatives and private voluntary organizations who administer these programs overseas.

The second part of the international title is devoted to maintaining the steady growth in agricultural exports of the past 5 years. Constructing this part of the legislation was a difficult task because we are in the final 5 months of trade negotiations in the Uruguay round. The committee wanted to make sure that our farmers and exporters have the tools to capture new markets and expand established ones. But we did so in a way which supports the free-market goals of our trade negotiators and does not allow protectionist forces in Europe and elsewhere an excuse to lock American products out of their markets.

Therefore, S. 2830 retains the main trade features of the 1985 farm bill: the Export Enhancement Program, Targeted Export Assistance, and export credit guarantees. If the Uruguay round ends with a genuine commitment to substantial and progressive reductions in trade-distorting subsidies, as I hope it will, this legislation will allow us to move quickly to take advantage of the expanded export market. If the trade round is not successful and our farmers must compete with unfair foreign subsidies and trade barriers, we will be prepared to meet those challenges as well.

RESEARCH

The most important component of S. 2830's research title is the National Research Initiative, which identifies a new direction for the agriculture research agenda. I applaud the inclusion of the special grants language in the title to encourage the development of regional research projects. The additional funding for the National Needs Fellowship Program, a grant program for undergraduate and graduate students, is also critical to agricultural science education.

Sustainable agriculture properly receives emphasis in this farm bill. However, sustainable agriculture should not be confused with low-input sustainable agriculture, which requires a reduction in the use of inputs. Sustainable agriculture is a strategy of implementation and management practices applied to the farm. While reducing the improper use of chemicals is a desirable goal, for some farmers a manageable level of inputs is necessary for a sustainable farming operation. Research on low-input sustainable agriculture should not exclude efforts at integrated pest and crop management programs and other effective sustainable agriculture practices.

Several areas within this title may be duplicative and should be streamlined before final passage of the bill. For example, this title creates over 125 State and national boards and committees with multiple report and technical guide requirements. I understand the desire for accountability, but wonder if we aren't creating more administrative paperwork than effective solutions.

CROP INSURANCE

The committee, in the course of its deliberations, made many difficult decisions. One decision we did not make was what to to about crop insurance. Most Senators would agree with Secretary Yeutter's point that it is wasteful to run a two-track risk protection program: subsidized crop insurance for farmers choosing to buy it, and ad hoc, after-the-fact disaster bills for everyone.

The administration proposed eliminating crop insurance and implementing a disaster indemnity program. This may be the most cost-effective course, although most members of the committee would prefer to retain a crop insurance program that farmers would choose to purchase.

The chairman and I continue to struggle with this issue and hope to have some recommendations prior to the completion of this legislation.

Mr. President, I began with a plea for rational discourse, not emotion-laden rhetoric. I made this plea because agriculture is something more than simply another business. It is indeed a valuable and worthwhile way of life. I have been managing my family's farm for the last 30 years, and it is natural that when we discuss farm policy, our deeply held feelings about life on the land come to the fore.

My point, however, is that though farming is more than a business, it is a business nonetheless. It is a business which must remain competitive in an ever-changing world if it is to survive on anything approaching a commercial basis.

We do not do farmers a favor by romanticizing them. We do not advance the cause of American agriculture by proposals that would hamstring U.S. competitiveness and take us back to the days when mountains of surplus grain rotted in the open air beside full-to-bursting bins.

Yes, this farm bill is partly social policy. No one can rationally deny that. But it is also a series of laws and regulations that will either help or hinder our farmers as they try to sell their produce in world markets. Our emotions, deeply held as they may be, must not blind us to that.

Ever-increasing subsidies that bid up production costs and hamper competitiveness are not, in the final analysis, good for American farmers. We should maintain some income supports, and we will. But the basic message of the 1985 farm bill must be repeated loud and clear: Gradually but irreversibly, American agriculture will come to depend more on the market, less on the Government. We shall take our agricultural policy forward into the 1990's, not backward into the 1930's.

I yield the floor.

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Vermont.

Mr. LEAHY. Mr. President, I commend the Senator from Indiana for his fine statement. I have two items.

PRIVILEGE OF THE FLOOR

Mr. President, I ask unanimous consent that three legislative fellows, who

have worked with the committee on the preparation of the farm bill, be granted the privileges of the floor. The three legislative fellows are Lisa Witt, who is a budget examiner for the International Affairs Division of the Office of Management and Budget, and Jim Phippard a legislative fellow from the Agency for International Development, and Keith Bulatao, a legislative fellow from the Environmental Protection Agency.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, as the distinguished Senator from Indiana and I both said, we do have an amendment to correct some of the budget considerations. I think that we did a good job in keeping the spending under control in this bill.

I want to remind Members that spending on agriculture has fallen dramatically since fiscal year 1986. In fiscal year 1986 we spent $25.8 billion on commodity programs. That is a level neither I nor Senator LUGAR would ever consider bringing to this floor. Since then, spending has fallen by almost 60 percent to just over $10 billion for fiscal year 1991, fallen from $25.8 billion in fiscal year 1986 to $10 billion fiscal year 1991.

I do not know of any other budget function that posts that kind of savings.

The costs are expected to average just under $12 billion for the life of this bill. There have been some very good ideas from both sides of the aisle that might have significantly increased our spending. A number of them, had they not been subject to budget considerations, I would have eagerly accepted. They were too expensive, so I have opposed them.

We have since received Congressional Budget Office estimates, and with the amendment I am about to send to the desk, it would bring the cost of the bill back to baseline, reduce spending across the board. It will cut spending from export promotions to conservation progrms, from cotton to wheat, from feed grains to rice, in an attempt to spread the cut on all programs involved.

AMENDMENT NO. 2303

(Purpose: To amend S. 2830, to reduce the cost of the bill)

Mr. LEAHY. Mr. President, I send the amendment to the desk and ask that it be treated as original text for the purpose of an amendment.

The PRESIDING OFFICER. Is there objection?

Hearing none, it is so ordered. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY] proposes an amendment numbered 2303.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(a) TIMING OF ADVANCE COMPENSATION.—On page 70 after line 24, insert the following new subclause (III):

"(III) TIMING OF ADVANCE COMPENSATION.—Advance compensation under this clause shall be made available between October 1 and October 31 of the year in which the crop is harvested.".

(b) CONFORMING AMENDMENT.—On page 71—

(1) on line 1, strike "(III)" and insert "(IV)"; and

(2) strike lines 6 and 7 and insert "not later than 270 days after the advance compensation was made available.".

(c) TIMING OF ADVANCE COMPENSATION.—On page 118 between lines 9 and 10, insert the following new subclause (III):

"(III) TIMING OF ADVANCE COMPENSATION.—Advance compensation under this clause shall be made available between October 1 and October 31 of the year in which the crop is harvested.".

(3) on line 10, strike "(III)" and insert "(IV)"; and

(4) strike lines 15 and 16 and insert "not later than 270 days after the advance compensation was made available.".

(d) COST-SHARE ASSISTANCE ON PERENNIAL COVER.—

(1) On page 96, line 20, strike "50" and insert "25";

(2) On page 146, line 8, strike "50" and insert "25";

(3) On page 201, line 8, strike "50" and insert "25"; and

(4) On page 244, line 14, strike "50" and insert "25";

(e) TARGETED OPTION PAYMENT.—

(1) On page 198, between lines 20 and 21, insert the following new clause:

"(iv) ADJUSTMENT FOR UNDERPLANTINGS.—In determining the increased acreage limitation percentage that is applied to the producer's upland cotton base under this paragraph, the Secretary shall exclude an amount of acreage equal to the average difference between the producer's permitted upland cotton acreage and the acreage actually planted (including acreage devoted to conserving uses under subsection (c)(1)(D)) to upland cotton for harvest during the previous two years.".

(2) On page 242, between lines 4 and 5, insert the following new clause:

"(iv) ADJUSTMENT FOR UNDERPLANTINGS.—In determining the increased acreage limitation percentage that is applied to the producer's rice acreage base under this paragraph, the Secretary shall exclude an amount of acreage equal to the average difference between the producer's permitted rice acreage and the acreage actually planted (including acreage devoted to conserving uses under subsection (c)(1)(D)) to rice for harvest during the previous two years.".

(f) STORAGE PAYMENTS.—

(1) On page 349, strike lines 15 through 25 and insert the following:

"In making storage payments to producers under section 110 of the Agricultural Act of 1949 (7 U.S.C. 1445e) and to commercial warehouses under the authority contained in the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.), the Commodity Credit Corporation and the Secretary of Agriculture shall, to the extent practicable, ensure that the rates of the storage payments made to producers are equivalent to average rates paid for commercial storage, taking into account the current demand for storage for commodities, efficiency, location, regulatory compliance costs, bonding requriements, impact of user fees, and other considerations determined appropriate by the Secretary, except that the rates paid to producers and commercial warehouse shall be established at rates that will result in no increase in current or projected combined outlays of the Commodity Credit Corporation for the storage payments made to producers and commercial warehouse as a result of the adjustment of storage rates under this section."

(g) STOCKS-TO-USE RATIO FOR OILSEEDS.—On page 305, line 15, strike "20 percent" and insert "19 percent".

(h) MINOR OILSEED PLANTINGS ON 50/92 ACREAGE.—

(1) on page 183, strike lines 22 through 24 and insert "(E) PLANTING INDUSTRIAL AND OTHER CROPS ON CONSERVATION USE ACREAGE.—";

(2) on page 184, line 19, strike "(I)" and insert "(i)";

(3) on page 184, line 23, strike "(II)" and insert "(ii)";

(4) on page 185, strike lines 9 through 24;

(5) on page 228, strike lines 12 through 14 and insert the following:

"(E) PLANTING INDUSTRIAL AND OTHER CROPS ON CONSERVATION USE ACREAGE.—";

(6) on page 229, line 9, strike "(I)" and insert "(i)";

(7) on page 229, line 13, strike "(II)" and insert "(ii)"; and

(8) beginning on page 229, strike lines 24 through line 14 on page 230.

(i) MARKETING ASSISTANCE PROGRAM—On page 462, line 17, strike "$225,000,000" and insert "$200,000,000";

(j) USER FEES.—At the appropriate at the end of title XIX, add the following new section:

"SEC. 19 . COLLECTION OF FEES FOR INSPECTION SERVICES.

"(a) QUARANTINE, INSPECTION AND TRANSPORTATION FEES.—

"(1) QUARANTINE AND INSPECTION.—The Secretary of Agriculture may prescribe and collect fees to cover the cost of providing agricultural quarantine and inspection services in connection with the arrival at a port in the customs territory of the United States, or the preclearance or preinspection at a site outside the customs territory of the United States, of a commercial vessel, commercial aircraft commercial truck railroad car, and each passenger aboard a commercial vessel or commercial aircraft.

"(2) TRANSPORTATION.—Each person that provides transportation to a passenger to enable such passenger to obtain transportation through a commercial aircraft or commercial vessel into the customs territory of the United States shall—

"(A) collect from such passenger the fee prescribed under this subsection at the time the document or ticket authorizing such transportation is issued; and

"(B) identify on the document or ticket referred to in subparagraph (A), or through electronic means as determined appropriate by the Secretary, the fee charged under this subsection as an agricultural inspection fee, or as part of a combined Federal inspection fee.

"(3) TREASURY.—Any person who collects a fee under this subsection shall remit such fee to the Treasury of the United States prior to the date that is 31 days after the close of the calendar quarter in which such fee is collected.

"(4) AGRICULTURAL QUARANTINE INSPECTION USER FEE ACCOUNT.—

"(A) ESTABLISHMENT.—There is established in the Treasury of the United States a no-year fund, to be known as the 'Agricultural Quarantine Inspection User Fee Account' (hereinafter referred to in this subtitle as the "Account'), for the use of the Secretary for quarantine or inspection services under this subtitle.

"(B) AMOUNTS IN ACCOUNT.—

"(i) DEPOSITS.—All of the fees collected under this subsection shall be deposited in the Account.

"(ii) REIMBURSEMENT.—The Secretary of Treasury shall use the Account to provide reimbursements to any appropriations accounts that incur the costs associated with the Secretary carrying out all activities of the Secretary at ports in the customs territory of the United States or at preclearance or preinspection locations in connection with the enforcement and administration of this subtitle.

"(iii) PROCEDURE.—The Secretary of the Treasury shall make reimbursement under clause (ii) on a quarterly basis. Amounts required to be reimbursed under clause (ii), shall be made on this basis of estimates made by the Secretary of the expenses described in clause (ii) that are incurred by the Secretary in the 3-month period immediately preceding such reimbursement.

"(iv) ADJUSTMENTS.—Adjustments of reimbursements made under clause (ii) shall be made to the extent necessary to correct prior estimates that were in excess of, or less than, the amount required to be reimbursed under clause (iii).

"(5) ADJUSTMENT IN FEE AMOUNTS.—The Secretary shall adjust the amount of the fees to be assessed under this subsection to reflect the cost to the Secretary in administering such subsection, in carrying out the activities at ports in customs territory of the United States and preclearance and preinspection sites outside the customs territory of the United States in connection with the provision of agricultural quarantine inspection services, and in maintaining a reasonable balance in the Account.

"(b) PLANT INSPECTION.—Section 102(f) of the Act of September 21, 1944 (7 U.S.C. 147a(f)) is amended to read as follows:

'(f)(1) Notwithstanding paragraph (2) of this subsection, there are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this section. Unless otherwise specifically authorized or provided for in appropriations, no part of such sums shall be used to pay the cost or value of property injured or destroyed.

'(2) The Secretary of Agriculture is authorized to prescribe and collect fees to recover the costs of providing for the inspection of plants and plant products offered for export or transiting the United States and certifying to shippers and interested parties as to the freedom of such plants and plant products from plant pests according to the phytosanitary requirements of the foreign countries to which such plants and plant products may be exported, or to the freedom from exposure to plant pests while in transit through the United States. Any person for whom such an activity is performed shall be liable for payment of fees assessed. Upon failure to pay such fees when due, the Secretary of Agriculture shall assess a late payment penalty, and such overdue fees shall accrue interest, as required by 31 U.S.C. 3717. All fees, late payment penalties, and accrued interest collected shall be credited to such accounts that incur the costs and shall remain available until expended without fiscal year limitation. The Secretary of Agriculture shall have a lien for the fees, any late payment penalty, and any accrued interest assessed against the plant or plant product for which services have been provided. In the case of any person who fails to make payment when due, the Secretary of Agriculture shall also have a lien against any plant or plant product thereafter attempted to be exported by such person. The Secretary of Agriculture may, in case of nonpayment of the fees, later payment penalty, or accrued interest, after giving reasonable notice of default to the person liable for payment of such assessments, sell at public sale after reasonable public notice, or otherwise dispose of, any such plant or plant product upon which the Secretary of Agriculture has a lien pursuant to this section. If the sale proceeds exceed the fees due, any late payment penalty assessed, any accrued interest and the expenses of the sale, the excess shall be paid, in accordance with regulations of the Secretary of Agriculture, to the owner of the plant or plant product sold upon the owner making application therefore with proof of ownership within six months after such sale, and otherwise the excees shall be credited to accounts that incur the costs and shall remain available until expended. The Secretary of Agriculture shall, pursuant to regulations as prescribed by the Secretary, suspend performance of services to persons who have failed to pay such fees, later payment penalty and accrued interest.'.

"(c) VETERINARY DIAGNOSTICS.—Section 11 of the Act of May 29, 1884 (58 Stat. 734, as amended, 21 U.S.C. 114a) is amended by inserting immediately following the first sentence: 'The Secretary of Agriculture is authorized to prescribe and collect fees to recover the costs of carrying out the provisions of this section which relate to veterinary diagnostics. Any person for whom an activity related to veterinary diagnostics is performed pursuant to the section shall be liable for payment of fees assessed. Upon failure to pay such fees when due, the Secretary shall assess a later payment penalty, and such overdue fees shall accrue interest, as required by 31 U.S.C. 3717. All fees, late payment penalties, and accrued interest collected shall be credited to such accounts that incur the costs and shall remain available until expended without fiscal year limitation.'.

(2) LIENS.—

(A) IN GENERAL.—The Secretary shall have a lien against the animal, article, means of conveyance, or facility for which services have been provided under this subtitle for the fees, any late payment penalty, and any accrued interest assessed under this subsection.

(B) OTHER ANIMALS, ETC.—In the case of any person who fails to make payment when due under this subsection, the Secretary shall have a lien against any animal, article, or means of conveyance thereafter imported, moved in interstate commerce, or attempted to be exported by the person after the date of such failure until the date on which such owner or operator make full payment to the Secretary under this subsection.

(C) SALE OF ANIMALS, ETC.—

(i) AUTHORITY.—The Secretary may, if a person does not pay fees, late payment penalties, or accrued interest on such, after providing reasonable notice of default to such person, sell at public sale after reasonable public notice, or otherwise dispose of, any such animal, article, means of conveyance or facility on which the Secretary has a lien under this paragraph.

(ii) EXCESS PROCEEDS.—If the sale proceeds under clause (i) exceed the fees due, any late payment penalty assessed, any accrued interest on such, and the expenses associated with the sale, such excess shall be paid to the owner of the animal, article, means of conveyance, or facility if such owner submits an application for such excess together with proof of ownership not later than 6 months after the date of such sale. If no such application is made, such excess shall be credited to accounts that incur the costs associated with the fees collected and shall remain available until expended, without fiscal year limitation. The Secretary shall suspend performance of services to persons who have failed to pay fees, late payment penalty, or accrued interest under this subtitle.

"(d) REGULATIONS.—The Secretary of Agriculture may prescribe such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(e) RECOVERY OF AMOUNTS OWED.—An action may be brought for the recovery of fees, late payment penalties, and accrued interest which have not been paid in accordance with this section against any person obligated for payment of such assessments under this Act in any United States district court or other United States court for any territory or possession in any jurisdiction in which such person is found or resides or transacts business, and such court shall have jurisdiction to hear and decide such action.

"(f) DEFINITIONS.—

"(1) PERSON.—For the purposes of this section, the term 'person' means an individual, corporation, partnership, trust, association, or any other public or private entity, or any officer, employee, or agent thereof.

"(2) VESSEL.—For the purposes of subsection (a), the term 'vessel' does not include any ferry.

"(3) CUSTOMS TERRITORY.—For the purposes of subsection (a), the term 'customs territory of the United States' means the 50 States, the District of Columbia, and Puerto Rico.

"(4) PLANT AND ANIMAL QUARANTINE LAWS.—For the purposes of subsection (a), the term 'plant and animal quarantine laws' means one or more of the following: the Plant Quarantine Act of 1912 (7 U.S.C. 151 et seq.); the Federal Plant Pest Act (7 U.S.C. 150aa et seq.); the Federal Noxious Weed Act of 1974 (7 U.S.C. 2801 et seq.); the Animal Quarantine Laws (21 U.S.C. 101-105, 111-131, and 134-134h); the Honeybee Act (7 U.S.C. 281 et seq.); section 306 of the Tariff Act of 1930 (19 U.S.C. 1306), and any other Act administered by the Secretary relating to plant or animal diseases or pests or noxious weeds.

"(5) UNITED STATES.—For the purposes of subsection (b), the term 'United States' means the several States of the United States, the District of Columbia, Guam, the Commonwealth of the Northern Mariana Islands, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, and all other territories and possessions of the United States.".

(G) PENALTY.—On failure of a person to pay any fee assessed under this section, the Secretary shall assess a late payment penalty on such person, and the overdue fees and late payment penalty shall accrue interest,

as provided in section 3717 of title 31, United States Code. Any late payment penalty and any accrued interest shall be credited to the accounts that incur the costs associated with the fees collected and shall remain available until expended without fiscal year limitation.

Mr. LEAHY. Mr. President, I urge the adoption of the amendment, and I ask unanimous consent that a summary of the amendment, along with a table, be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF BUDGET SAVINGS AMENDMENT

The budget reduction amendment accepted by the Senate to S. 2830 achieves the savings by a variety of program changes. These changes will reduce the cost of the bill as reported from the Committee to the Senate Budget Resolution baseline.

A table describing the savings levels is attached.

The provisions in the amendment include:

Changing the timing on the advance compensation provision.—The bill as reported from Committee provided advance compensation to producers, if the Secretary chooses to reduce loan rates below the basic loan level. Congressional Budget Office assumed that the initial compensation would be provided in fiscal year 1991 and repaid in fiscal year 1992, thus the fiscal year 1991 cost. This provision provides the compensation and repayment within the same fiscal year.

Returning Marketing Assistance Program spending to $200 million.—The Committee raised spending on the Marketing Assistance Program (formerly known as the Targeted Export Assistance Program) to $225 million per year. The amendment returns the program to the current $200 million spending level.

Perennial cost share.—The amendment will provide a 25% cost share to producers who plant perennial crops on reduced or conserving use acreage.

Targeted Option Program change.—The amendment makes clear that cotton and rice acreage a producer has underplanted in the previous two crop years will not be eligible for the Target Option Program.

Farmer-owned reserve storage payments.—The provision in the Committee reported bill regarding comparability of commercial and producer grain storage payments is modified to make the provision budget neutral.

Minor oilseed plantings on 50/92 acreage.—A provision allowing the planting of minor oilseeds on conserving use acreage under the 50/92 program is eliminated.

APHIS user fees.—Fees will be collected to fund a portion of the Animal and Plant Health Inspection Service operations at ports of entry into the U.S. and for other portions of APHIS.

[In millions of dollars]

Adjustments to package	Fiscal year—					Total

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Vermont.

The amendment (No. 2303) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote.

Mr. DASCHLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DASCHLE. Mr. President, this will likely be the most important debate affecting rural America that we will have during this entire Congress.

For many in Washington, agriculture policy is an academic exercise. They tinker with the numbers on one end to see how the numbers come out on the other end.

For the people of rural America, agriculture policy is much more than this. Agriculture is their way of life. The decisions we made in the next few days will determine whether many of the people in rural States will be able to continue their chosen occupation and live in their chosen community, and whether the future they hoped for their children will be a reality.

We will hear much in the next few days about the virtues of the 1985 farm bill. When Senators hear these speeches, I urge them to keep the following facts in mind:

The 1980's were the worst period for farm income since records have been kept. Overall income may be at high levels, but when you adjust for inflation, farm income is behind previous years. Crop farmers have experienced stagnant or declining returns. Some States, such as my own, have experienced declines of up to 60 percent in real net farm income since the 1970's.

The number of farms has dropped significantly, while the average size of farms has increased. Almost 300,000 families left farming in the 1980's. The rural population is decreasing by 150,000 people each year.

Prices have been driven to such lows that farmers no longer can depend on income from the market. In some States, Federal payments represent more than 50 percent of net cash income.

Earlier this year, members of the Agriculture Committee from North and South Dakota, Iowa, and Nebraska toured these States and heard what farmers say about the farm bill, not what the so-called experts in Washington say.

Let me quote a few of their remarks.

From a wheat farmer in North Dakota:

As grain farmers, we were vicitimized by the effects of the 1985 farm bill. The theory that declining loan rates and target prices would ultimately increase our profitability has devastated us, individually and collectively. With the exception of those with substantial outside income and resources, many of us will be going broke. We are currently on a suicide mission. We cannot exist on economic dialogue and trade theories.

From another farmer:

Regardless of the statistical reports that the Agriculture Department is using to try to show that farmers are better off this year than last, I know differently. I have yet to talk with one farmer in North Dakota who says he is better off this year than last year. We are very close to a depression in rural America. These are hard times for all farmers.

From a Nebraska farmer:

A good farm program is a fair farm program. The 1985 farm bill was not fair. It yielded record profits for the grain processing and exporting companies. For most of the farmers in Nebraska and folks that depend on farmers for their jobs, the 1980's were characterized by bankruptcy, farm sales, pain and despair.

Having described for you the economic conditions in rural America, let me tell you how I see the legislation the committee proposes to meet these needs.

But before I do that, let me express in the most sincere way I know my gratitude to our chairman, Senator LEAHY, for his leadership in guiding the committee through this difficult process. The farm bill is a heavy load for this or any other committee. It includes 19 titles, encompassing 1,081 pages. Chairman LEAHY kept the committee to the task. His patience and fairness enabled Members on both sides to have their views considered. As he said, this bill is a bipartisan product. To bring this bill before the Senate is an achievement for the chairman, as well as the ranking Member, the senior Senator from Indiana. They are to be commended for their accomplishment and certainly their fairness.

The bill offers many significant improvements in agriculture policy.

As the chairman of the Subcommittee on Research, I am satisfied with our efforts in developing a research title that for the first time sets priorities for research that reflect the needs of rural America and real-life farmers, not researchers and agribusiness. These priorities have been endorsed by the National Governors Association. The bill shifts more emphasis to research in new products, and in bringing new products to the market,

instead of increasing production. The bill also increases funds for sustainable agriculture, authorizes funds for research on the effects of global warming, and improves the coordination of Agriculture Department activities and educational efforts to deal with ground water contamination.

I am also pleased with the development of the grain quality title. I express my gratitude to the junior Senator from Missouri, Mr. BOND, who joined in this effort. Without his cooperation and support for this objective, this title would not be a reality. The measure represents his work and our work in the subcommittee for more than a year to understand the details of grain quality issues and develop a package to bring our grain quality laws up-to-date with the demands of the competitive global market. The bill establishes a framework for future improvements in grain standards, including consideration of the economic, or end-use, value of grain. The bill will improve the cleanliness of our grain and our competitiveness by precluding the blending of clean grain with contaminated grain. It also builds incentives for quality into farm programs at long last.

This legislation recognizes the restrictions of the 1985 farm bill that prevent farmers from adjusting their operations for conservation, environment and market considerations. It gives farmers new flexibility to plant crops that make sense for the environment and for the market. It will reduce the strong incentives built into the 1985 farm bill that encourages farmers to use excessive amounts of fertilizers to boost production.

The bill improves the operation of conservation programs. It makes swampbuster more enforceable by establishing a graduated penalty system. From the farmer's standpoint, it makes swampbuster and other wetlands programs more workable. It protects wetlands and environmentally sensitive lands without making it impossible for farmers to operate their farms.

S. 2830 updates our agricultural trade programs. It establishes clear authorities among Federal agencies involved in food aid. It establishes the Food for Freedom Program to help emerging democracies, with a priority for value-added products. It also requires the Agriculture Department to develop a long-term strategy to expand overseas markets.

The bill also reauthorizes the wool and honey programs, which are certainly very important to the people of my State.

That said, I must explain my opposition to the bill as it is, and lay out the ways I hope to improve it.

In determining whether the bill deserves support, it must ultimately be judged on these two critical points:

What does it mean for farm income?

How fairly are the benefits provided in this legislation distributed?

On both these tests, in my view, this proposal fails. The committee bill as it stands offers no improvement in farm income. In fact, the bill will allow for substantial reductions in farm income. The bill also perpetuates a policy that disproportionately distributes benefits to larger farms.

Some Senators will argue that the committee's farm bill is the best product that could be achieved under our budget constraints. I do not believe it. While I acknowledge that our considerations are tempered by budget constraints, the budget does not make the structure of this farm bill inevitable. It does not make lowering farm income inevitable.

Even given the budget limits, we can write a farm bill that does more to improve farm income, and does more to fairly distribute the benefits provided within this legislation.

Moreover, faced with a tighter budget, it becomes even more important that we change direction. With less to spend overall, we must adopt policies that improve farm income and distribute agricultural program benefits more fairly than we find in this bill.

With a shrinking pie, we must find ways to divide the pie more fairly.

This farm bill could be called the "S&L Farm Bill." It is another victim of the savings and loan crisis. The cost of the savings and loan bailout this year, $60 billion to $65 billion, is almost equal to the cost of farm programs for the last 5 years. Rural America is forced to accept less, at the same time its pays it share for cleaning up after the greed and arrogance of those people who abused our thrift system.

Despite all the complaints about spending on agriculture programs, agriculture represents less than 2 percent of the budget. What we have spent to develop the B-2 bomber would have funded commodity programs for the last 2 years in their entirety. The interest we paid on the national debt last year would have covered the cost of commodity programs for the entire decade of the 1980's.

Spending on agriculture has been decreasing dramatically, and people should understand that. From its highest point in 1986, agriculture spending has decreased by more than 56 percent. The decrease in defense spending, on the other hand, has been only 4.6 percent in the same period.

In terms of farm income, this bill sticks close to the baseline established by current law, especially after the amendment just adopted by the Senate.

According to the Congressional Budget Office, continuing this policy will mean a decline in net cash income of almost 30 percent. I really think it is important that we emphasize this again and again. This could mean, according to CBO, the exit of another 500,000 farmers from agriculture. Some in this body have grown tired of hearing that number. Some even doubt its validity. It seems unbelievable. Perhaps it is exaggerated, a statistical anomaly. But it is not my number; it is CBO's number; the same CBO that we depend upon for all of our budgetary and forecasting statistics as we make decisions in this body and in our committees. Even if you reduce it by half, to 250,000 farmers in the next 5 years, that is still a dramatic amount. That is almost the number that left farming in the last 10 years. Imagine the impact to rural communities of losing that number in half the time.

How can we so easily brush aside this information? Have we forgotten how many people in rural America live on the edge of economic disaster? A few cents here or there in prices is a budget issue in Washington, but, to the people in rural America, those same few cents can make the difference between whether or not a family can keep its farm.

What other industry would we allow to suffer this kind of loss? If we were looking at a bill that it was estimated would mean the closing of more than 500,000 small businesses and the displacement of an equal number of families from their homes and their way of life, would we not try to change it? Would we not fight it? Would we not say that a loss of that proportion is unacceptable regardless of what business or what work force we might be talking about? Would we not make some effort to keep those businesses alive, and to prevent those families' lives from being so brutally uprooted?

If the objective is to sweep away these people and make room for those farmers on the high end of the economic ladder, then perhaps one can be satisfied with this farm bill.

But if the objective is to keep a place in rural America for families to live and work on their own land, this bill is not satisfactory; it is not acceptable.

We can do better. We can make improvements within the budgetary constraints that we have been given.

It amazes me that even this modest attempt to improve current law has drawn a rebuke from the administration and Secretary Yeutter. He threatens to recommend that the President veto the bill if it passes in its current form. Yet, even in its current form, this legislation will provide even greater advantage to the vast multinational corporations who demand cheap grain to enhance their profits and position worldwide. We simply cannot sacrifice family farmers on an altar of imagined free trade, with little more than a

passing thought to whether the situation it creates is fair or gives competitors too much.

During consideration of this bill, I plan to offer amendments that I hope will forestall the catastrophe that the Congressional Budget Office said could result from maintaining the status quo. One amendment I plan to offer would establish higher target prices for the first levels of production of wheat or feed grains. This amendment will target additional benefits to family-size farmers, the ones who need them the most.

I plan to offer another amendment to improve the fairness of the bill through additional reform in the limitations on payments to individuals. This amendment will make it harder for individuals to circumvent payment limits. It also would require an annual report to Congress listing the individuals who receive payments in excess of the $50,000 limit, and create a training program for USDA personnel to improve their ability to prevent abuses.

I also plan to offer another amendment to bring storage payments to commercial elevators in line with storage payments to farmers, a measure that will save at least $100 million over the life of the bill.

I also hope that in the course of deliberations on this bill, we may have an opportunity to consider amendments to raise loan rates and to index target prices to inflation, proposals that were rejected in committee.

For those who object to raising loan rates, consider this: Loan rates are the farmer's minimum wage. When we debate whether or not to raise the minimum wage for workers, few Senators argue that workers do not deserve such a raise. The human needs of these workers outweight considerations over competitiveness and other matters. We are asking you to consider the human needs of farmers as well as their minimum wage.

Before one suggests that linking target prices to the costs of production is a radical, partisan idea, let me read from a letter by the chairman and vice chairman of the National Governors Association Committee on Agriculture and Rural Development. The chairman, I might add, is the Republican Governor of my State of South Dakota.

The letter says:

> While we appreciate your action to reduce the downward spiral of these targets, we believe target prices should reflect the cost if inputs. Economic forecasters agree that the inflation rate for 1991 will likely be slightly more than 4.0%. Farm income has increased in the last few years largely due to weather related price increases. Leveling farm prices coupled with four percent inflation will erode farm income. We ask that you index target prices to an appropriate inflation indicator to help offset this erosion.

Mr. President, the farm bill has been a matter of intense interest in my State this year. I have received hundreds of letters and phone calls from people crying for a change in agriculture policy. They struggle to keep their heads above a rising tide of debt and inflations. They watch in dismay as their neighbors leave the land. They see their small towns die, their schools and hospitals close.

For many of them, the worst part is that they see no future in farming for their children. In Langford, SD, the high school canceled its Future Farmers of America Program because there were not enough students interested. Less than a third of the students who live on farms in my State say they plan to become farmers.

Some Senators are fond of reciting the hard realities of economics. The people who write me may not know much about economics, but they know a lot about the hard realities of life. When these Senators propound their economic theories and recite their impressive statistics about trade and other matters, let us remember these people. Behind all the numbers and all the theories are real people, people whose lives depend upon the judgments we are about to make.

Mr. President, when we finish our work here, I hope we can say we stood for the family farmers of rural America. That is why I cannot in good conscience support the bill in its current form and why, in spite of my great admiration for the two managers of this bill, I hope the Senate will see fit to improve the legislation to allow for greater opportunities for improved farm income and a fairer distribution of the benefits this bill provides.

I yield the floor.

Mr. COCHRAN. Mr. President, I rise in support of S. 2830, the Food, Agriculture, Conservation, and Trade Act of 1990, perhaps the most comprehensive agricultural legislation ever considered by the Senate. The 19 major titles address the concerns of consumers, producers, agribusiness, and environmentalists. This bipartisan legislation is supported by a strong majority of the Agriculture Committee.

S. 2830 ensures sound agricultural policy by continuing to provide consumers with low-cost food, by stabilizing farm income, and by ensuring protection for our Nation's environment. It extends current conservation programs and increases protection of wetlands, ground and surface water, and highly erodible land.

This legislation contains many key provisions of the 1985 Food Security Act, the success of which is shown by the fact that the value of agricultural exports increased from a decade-low of $26 billion in 1986 to $40 billion in 1989, and that net farm income rose steadily to a record $48 billion in 1989. The 1985 farm bill increased farm income and restored the competitiveness of American farm products in international markets.

In 1985, a marketing loan program was developed for cotton and rice. This program allowed the U.S. rice and cotton sectors to recapture lost market shares in world trade. The program also increased domestic use and reduced burdensome surplus stocks. Costs of the program have declined, and 1990 savings from the cotton program are expected to return over $100 million to the U.S. Treasury.

The Food, Agriculture, Conservation, and Trade Act of 1990 not only continues the successful marketing loan programs for cotton and rice, but extends coverage to wheat, feed grains, and oilseeds. The program for soybeans and other oilseeds is a major step to reverse recent declines. Between 1979 and 1989, U.S. soybean production declined 15 percent to 1.9 billion bushels, while foreign production increased 68 percent to 2 billion bushels. Similarly, the U.S. share of the world soybean market dropped from 84 to 64 percent, with a comparable decline in export shares of oilseed products.

American soybean producers have succeeded in the past with little government involvement. Foreign governmental support of soybean production, however, has continued to expand since the 1985 farm bill took effect. U.S. soybean acreage and production have decreased while world demand has grown. As a result, the United States is losing its share of an important world market to foreign competitors. Today, the U.S. soybean industry is at a crossroads, and it is vital that our producers maintain a healthy oilseed sector and regain market share in world markets. I believe the marketing loan program will help them do this and will work as effectively for soybeans as it has for cotton and rice.

A major goal in this farm legislation is increased planting flexibility for our farmers. The flexibility provisions remove some rigidities in past legislation; this should promote increased efficiency in farming operations and help producers make management decisions that are both economically sound and environmentally sensitive.

The strong trade title in this bill will assure continued robust agricultural trade through 1995. Export assistance and market development initiatives will be strengthened. For example, a new Food for Freedom Program will provide maximum flexibility to respond to uncertain situations, such as those in Eastern Europe. The Targeted Export Assistance Program will be replaced by a Marketing Assistance Program, which will be broader and will focus on building long-term markets. A revised Export Enhancement Program will combat unfair trade practices abroad, pressuring other

countries to achieve trade policy reform.

Our farm programs benefit all Americans by maintaining a stable agricultural sector which benefits both producers and consumers. Our national objective is to assure our consumers a dependable, high quality supply of food and fiber at reasonable prices. To accomplish this objective, producers must have adequate incentives, as well as some measure of protection against such inherent risks as weather, insects, and disease which threaten to create volatility in prices and incomes from year to year.

Farm programs, therefore, are a means to an end. They provide producers with income and price-support protection through loans, payments, purchases, and storage programs to promote orderly marketing and to minimize wide swings in commodity prices. Further, many programs attempt to balance supply and demand by requiring producers to adjust their production in line with market needs.

I urge all Senators to support the Food, Agriculture, Conservation and Trade Act of 1990, which will ensure that all Americans have the safest and most reliable low-cost food and fiber supply in the world.

Mr. President, I just want to make a few additional comments, mainly to compliment the leadership of our committee, the distinguished Senator from Vermont [Mr. LEAHY] and the distinguished Senator from Indiana [Mr. LUGAR] who have really devoted a tremendous amount of energy, effort, and intelligence to developing this legislation.

Mr. President, the Senate Agriculture Committee has been working on this legislation for quite some time. We began last year with a series of hearings which took the committee all over the United States. We listened to farmers, to those involved in agribusiness activities, consumer groups, and others who were interested in the provisions of the 1990 farm bill to find out the suggestions they had which could be made to improve the 1985 Food Security Act.

The 1985 act has proven to be a great success in many respects. It has improved the situation for many of the commodities, particularly those where surplus stocks have accumulated. We developed two new programs, a marketing loan program and an export enhancement program which helped move what we produce here in America into the international marketplace for profit.

I think we have a record of achievement as a committee in terms of reaching out to get the best possible advice and counsel from experts. This includes those who are trying to live day by day on the farms of America, to see how we could better craft a farm program which would be sensitive and responsive to the needs and interests of American agriculture and all of America's citizens. I think we have achieved that goal, Mr. President. I compliment those who have worked hard to make this possible and I look forward to discussing the amendments which may be offered.

I just want to point out a couple of things that Senators can sort of be on the lookout for as we consider this bill. We have at work here, really, a competition of ideas between those who want to elevate price supports to such a level that we would produce basically for a domestic market, and those who would like to continue the U.S. agricultural sector as a competitive worldwide enterprise.

Therein lies one problem. If we escalate the price support levels so high we cannot sell what we produce in the international marketplace, we basically leave to foreign competitors, then, the other world markets which we have basically priced ourselves out of completely. That is one of the problems we have in trying to deal with amendments such as the one described by the Senator from South Dakota.

It would be great to have the Government guarantee to every grain farmer who wanted, a price which was higher than each individual farmer's cost of production. That is the goal that some are pursuing in this farm bill debate. But, if we do that we have to understand that there are other implications from adopting that strategy; whether we want to be competitive in the international marketplace, and how high the subsidy levels should go in terms of the drain and stress on the Federal budget. These are all considerations which the committee has had to undertake.

It has not been a very easy process to sort out all of these competing interests, but I think the committee has done very well in this regard and I commend, again, Chairman LEAHY, and the ranking Republican member, Senator LUGAR. I commit to them my effort to try to defend this bill on the floor and to guard it against amendments which would unravel the compromise that this bill reflects.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I rise also to speak about the farm bill that we have before us. I want to talk about the structure of American agriculture. I want to talk about the distribution of Government payments. I want to talk about imports and exports.

I compliment my friend from Mississippi, Senator COCHRAN, for the comments he has made. He has hit the nail right on the head. There are two competing philosophies shaping the farm bill. Should we raise the prices to such a level that we only will have an internal market? Or should the United States be a factor on the world scene in agriculture?

I am going to be using a series of charts and graphs so people can follow my train of thought. The first chart illustrates the number of farmers there are in the United States.

There are now 2.1 million farmers, in the United States. Of them, nearly half have a gross farm income on their farm of less than $10,000.

That, of course, gets into the definition of who is a farmer. A farmer is a person who produces 1,000 dollars' worth of goods for the market. If you had one sow, you could produce more than 1,000 dollars' worth of goods. If you had one steer, it would almost be worth $1,000. So most farms in the United States are very, very small. And most people who are on the farm do not spend their entire time there by any means, nor do they get most of their living there; 49.3 percent of the farmers have a volume of sales of less than $10,000. An additional 15.6 percent have a volume of less than $25,000. So 65 percent of all farmers have a gross volume of sales, of less than $25,000. Only one-half of 1 percent of all farmers have a gross volume of over $1 million and only 1 percent of the farmers have a gross volume between $500,000 and $1 million a year.

Farming is not a big business, by and large. There are in this group some rather large farmers to be sure but most of the farmers are pretty small businessmen and do a rather small volume of business.

My second chart shows what these farms produce; 49 percent that have a volume of less than $10,000 only produce 2.5 percent of the farm product of the United States. Put another way, nearly half of the farmers produce just a little more than 2 percent of all the goods.

On the other end of the scale, one-half of 1 percent of the farms that do more than 1 million dollars' worth of business produce almost 28 percent of the total output in agriculture in the United States; 75 percent of all the farmers do a real volume of less than $50,000 which represents approximately 11 percent of the total volume in agriculture. Most of the volume is produced by the larger farmers.

Some say these larger farmers are the ones that get all of the Government largess; that they are the ones who get all of the farm subsidies. But that is not the case.

Here is a chart that shows how the subsidies are paid and to whom they go. Only one-half of 1 percent of the farmers have volumes over $1 million. They produce 28 percent of the goods. They get 3 percent of the payments.

As we can see from this chart, Mr. President, most of the payments are received by the farmers in the middle,

the family farmers, the small farmers. Farmers who have a volume of $100,000 to $250,000 a year receive somewhat over a third of all the payments.

Farmers that have between $50,000 and $100,000 a year in volume receive 21 percent of Government payments. The great bulk of the payments are made to small family farmers. These payments are not made to the farmers at the upper end.

These two groups of farmers, these with sales over $500,000 annually, that produce 38 percent of all of agricultural output, receive 9 percent of the Government payments.

We are going to hear time and again during the course of this debate that it is the big farmers who are receiving all the subsidies. The facts of the matter are that farmers who do a volume of between $50,000 and $500,000 receive in excess of 70 percent of the subsidies and that is the way it should be. We are trying to support the farmers who are in the middle level.

Again, there are over 2 million farmers. Only 700,000 farmers receiving anything from the Government, and this is the distribution of those payments.

Let me speak for a moment about the infrastructure of agriculture. Those people who sell seed and fertilizer and chemical supplies to the farmers, those who operate the grain elevators and the processors, the transporters, the insurers, the lawyers in rural America, those who work on the barges, the railroads, the ships, and the trucks, are the infrastructure. It has to be the goal of farm policy not only to support the farmers but to support the infrastructure of agriculture as well.

Really, the infrastructure of agriculture has more people working in it than work on the farm. So if we want rural America to prosper, we have to help not only the farmer but we have to keep in mind the infrastructure of agriculture.

The infrastructure of agriculture has a somewhat different approach than do the farmers. The farmers want the most for each bushel that they produce. The infrastructure of agriculture relies more on the totality of the bushels. They rely much more on the volume of the goods than they do on the price of the goods. They get paid on the gross number of bushels, rather than on what each bushel brings.

So the infrastructure of agriculture also needs to be served by this farm bill, because, again, rural America has more people working in the infrastructure of agriculture than they do in agriculture itself. Therefore, as I listened to my friend from South Dakota who just spoke about raising loan rates, if we are going to fail to support the infrastructure, we are going to give away part of rural America. It is important we, indeed, support not only the farmer but rural America in general.

Let me put up an interesting chart about the investment in agriculture for an ordinary farm. This might not be the ordinary farm in South Dakota or in Nebraska, but it is in Minnesota. The subject of this chart is that farmers are, indeed, very, very highly leveraged.

A normal farm of 500 acres—and the average farm in the United States is 462 acres so this really is quite average—at $1,200 an acre, which is a reasonable value, means the farmer has $600,000 invested in land. We took a figure of about $150,000 of machinery for a total investment of $750,000, a very sizable investment.

I've multiplied out that he planted corn on 240 acres and beans on 250 acres. The house, a driveway, and so on make up the other 10 acres. Calculating a reasonable price that the farmer is likely to obtain for the soybeans and corn, gives a total income of $146,000. That is a gross income on an investment of $750,000. That, indeed, is a very highly leveraged business.

If the rains do not come and if he has a bad year, one can see that he has an enormous investment that is riding on a razor-thin volume. If you consider the fact that the average profit on his volume, in Minnesota at least, is about 20 percent, the return on invested capital is very small, 2 or 3 percent. Farming is a tricky business.

It is a different kind of business than the one I am accustomed to being in which is retail, where the volume is far, far larger than the investment. In farming the volume is about 20 percent of the investment. If the farm is highly financed, if $400,000 of that $750,000 is financed and the interest rate is 10, or 11, or 12 percent, which is probably average now, a very large portion of gross income goes just to pay the interest. This is one of the elements of farming, the extraordinary leverage, that brings the Congress and brings the Government into play with agriculture. It is such a fragile business, because it is subject to so many vagaries, including nature.

This is why we on the Agriculture Committee have a sense that, yes, the Government needs to be involved in agriculture because it is a fragile business, it is a business where the leverage is higher than any other I know, and it is a business that is subject to the vagaries of nature and depends on unpredictable elements in our society more than any other I know.

I would like to talk about the international aspects of agriculture as well. It is an important element. Some of my friends on the Agriculture Committee are, indeed, feeling that there should be a high support price per bushel. I do not say that the prices should be low, but the loan rates should be competitive; that loan rates should make our goods available for export. Look at what we export. In the case of corn, 30 percent of what we produce is exported. In the case of soybeans, it is almost 50-50, and it used to be a good deal larger. We have lost a large portion of the world market in soybeans, and that is too bad.

In the case of wheat, 64 percent of the wheat that we produce in the United States is exported. It, indeed, is important that we have loan rates that are competitive on the international market. If loan rates rise to such a degree that we are no longer competitive, what happens to rural America if we do not export our commodities?

These are raw commodities. Exports are a billion and a half bushels of wheat in this case, or a billion bushels of soybeans. Think of the trucks that must operate, the insurers that must work, the trains and the barges and the other transportation modes and the elevators that must handle goods in order to move 1 billion bushels of soybeans, or 1 billion bushels or more of wheat. The amount of corn shipped overseas would be almost 2.5 billion bushels.

It is absolutely essential that this farm bill that we discuss and that we pass adapt itself to the world market. Those who would look inward, those who, as the Senator from Mississippi has pointed out, would have a high internal price and thereby take us out of the export markets, would do great damage to rural America. Rural America depends on the entirety of these items being handled, and exported, moved about, insured and handled by elevators. It is important that we support not only the farmer but the infrastructure of agriculture, and that means volume.

Now I would like to take a look at the land values and how they relate to agricultural exports. This chart goes, Mr. President, from 1910 to 1990. The blue line is the line that represents the value of Minnesota farmland in southwestern Minnesota.

For the first 65 years of this chart, there was a very gradual increase in land values. Suddenly in the 1970's, as exports rose, land values just skyrocketed. If you were a farmer in the seventies or early eighties and bought your land on the top side of this graph, fixed capital for land just became so great a portion of the farmer's overhead that it could not be "penciled out," as they say. Farmers simply could not make it work. They could not get enough money from growing crops in order to pay for the land.

That led to a very severe recession and, indeed, a depression on the farms

earlier in this decade. As we can see, the land values went down as fast as they went up, though they did not go all the way down to zero. Now they have turned around again.

Notice the uncanny linkage to the level of exports. On this side of the graph, Mr. President, it is dollars per acre. This is in millions of dollars. So this would be $40 billion in trade. As trade increased, so did the value of agricultural assets. Since the principal asset of a farmer is the land, it is important from that standpoint as well that we support international trade. If we do not support international trade, the basic asset of agriculture, the land, will not appreciate as it has in the past.

Mr. President, let me speak for a moment about agricultural trade and what started the great growth in agricultural trade in the 1970's. This is a chart showing agricultural imports and exports. The top line is the exports; the bottom line is the imports. Since 1960 we have always run a trade surplus in agriculture. Right now that trade surplus is nearly $20 billion. When you look at the balance of trade figures for the United States, many people have pointed out that over many years, the balance of trade has been negative. This is not so in agriculture. In agriculture, we have had a very positive balance of trade. Farm trade did not really amount to much until the 1970's when the line bolted upward. I would like to discuss why it did that next.

One of the first things that happened in the 1970's was that the Soviets had a change of heart. The Soviets decided that in times of low grain production, they would not slaughter their animals but, instead, they would buy grain from abroad in order to feed their animals a normal rate rather than slaughtering them at too young an age. They decided to import grains. With the Russian trade deal, suddenly up jumped the United States trade figures, and world trade really began to take off.

Also, in the 1970's, there was a period of rapid economic growth. In addition, all the petro dollars were about, money was cheap, and people were encouraged to make loans at rather low interest rates relative to inflation. The real interest rates in the 1970's were very low and sometimes the rate of inflation, indeed, exceeded the interest rate. That created a great incentive to borrow. Many Third and Fourth World and other nations got deeply into debt. Some of that money came back as agricultural trade. That, too, was part of the 1970's.

In addition, there was bad weather in the world, but there was good weather in the United States. We were able to produce while some parts of the world were not able to produce.

Finally, in the 1970's, the value of our dollar was quite low making our exports very competitive.

Between the Soviets, who had a change of heart, the bad weather, the world economic growth, the cheap money, and the fact that the value of the dollar was low, exports absolutely boomed in the 1970's. They started off in 1970 at about $7 billion and ended up close to $40 billion in 1980, an extraordinary increase for a single decade.

But in the early 1980's, absolutely everything reversed so that we saw a decline, as indicated in the chart. The decline began in January 1980, just the beginning of the decade. The Soviet grain embargo led to us being thought of as unreliable food suppliers. It was the second embargo in less than a decade. That embargo was brought about by President Carter. But President Nixon had also imposed an embargo earlier on soybeans against the Japanese. That led the Japanese to invest a great deal in South America so that they would have an ensured source of vegetable oil when they needed it. Embargoes have worked very much against us.

The Nixon embargo was a very brief one, a matter of weeks, but nevertheless, it so upset the Japanese that they made very large investments in South America. The Soviet grain embargo continued on for quite some time and really shattered confidence in the United States as a reliable supplier of food.

World trade in the 1980's stagnated. There was a worldwide recession. On top of that, the weather changed and the entire world experienced some pretty good years weatherwise, and production went up. Interest rates, while they came down from the very high levels of the late 1970's, nevertheless, in real terms remained very high. The 1980's turned out to be some pretty difficult years. The value of the dollar went up so our exports were more expensive. Then came the emergence of the European Community as a new and very expansive player on the world market. I will speak about that in a moment as well.

All the things that benefited us in the 1970's turned around and worked against us in the first half of the 1980's. In the second half of the 1980's, once again, we have a favorable trend, to some degree because of the 1985 farm bill.

In the 1985 farm bill we made loan rates competitive once again. They were not competitive under the 1981 farm bill. The dollar moderated in value. There were some short crops around the world. Some of the elements of the 1970's recurred. But the 1985 farm bill was a moving factor in all of that because American goods were competitive once again. Indeed, as is shown here on the chart, trade has picked up. Where at one time the difference between exports and imports was about $5 billion, they once again have grown to approximately $19 or $20 billion.

Let me put up, Mr. President, another chart which shows where we buy and where we sell our agricultural exports. The startling point is our trade in the Far East, in Asia. We sell $16.3 billion and we import $3.3 billion in agricultural trade, so it is a 5-to-1 factor. We have a trade balance in the Far East of $13 billion.

Our biggest customer is Japan. To Japan we export well over $8 billion and we import almost nothing. Taiwan is the third largest customer with $1.6 billion in agricultural exports from the United States; and Korea, the second largest, with $2.5 billion.

These are relatively small countries, and you can see from them that when a country has economic success, one of the first things it does is improve the diet of its people and it expands world trade. That, of course, is one of the positives of 1990's. As we see world economies changing from a planned economy to a more competitive economy, as that begins to happen in Europe and in other places, we should reasonably expect to do more business with them exporting our agricultural goods.

As you can see, Mr. President, despite the fact that Western Europe has become a very large exporter, they are still pretty good customers of ours. We export $7 billion to them. We import $4.5 billion from them, probably the largest item being wine, which is considered an agricultural item as well.

In the case of Latin America, we import more than we export. In the case of Canada, it sometimes shifts from year to year. But in 1989, they exported to us somewhat more than we exported to them.

Oceania includes New Zealand and Australia where we have a large trade imbalance. But throughout the world, total exports in 1989 were about $40 billion, the total imports are somewhat in excess of $21 billion, so that the net trade balance is nearly $19 billion, which is very satisfying, indeed.

Let me talk if I may, for a moment, Mr. President, about the European Community. What has happened in the European Community has really changed the face of agriculture worldwide. In 1977, they were net importers of nearly 20 million tons of grains. They were the largest customer that we had in those days. They were the world's largest customer in agriculture. Look how they have changed. They have crossed the line and have become exporters and now in grains have become the second largest exporter all in the course of 10 or 11 years.

It changed the face of world agriculture because the Europeans decided that they wanted sufficiency for themselves, because they decided that they would really subsidize their farmers. They have changed in a period of 11 years from a net importer to the second largest world exporter, we being the largest world exporter.

They have a different attitude. They spend an extraordinary amount on agriculture. They spend about $55 billion a year on their agricultural programs. In 1990 we will spend, I believe, $8.4 billion, about one-seventh. They spend almost $7 for every dollar that we spend, and they prop up agricultural prices so high that they get an enormous production and then they have to subsidize the exports and they dump it onto world markets. This is a very cruel thing, indeed, because the Third and the Fourth World countries—the poor countries of the world—can only lift themselves up by their bootstraps by developing their agriculture.

Every country in debt that starts in the business of trade begins first in agriculture and they begin first with some products from the land. They simply do not have the wherewithal to begin a manufacturing society. That is a more mature society. But because the Europeans have these large surpluses and because they dump them onto the world market and drive down the prices, some farmer in the Third or Fourth World—in Africa or Asia—who is really eking out a living, suddenly finds his marketplace depressed because the Europeans have to get rid of their surplus.

So what the Europeans do in subsidizing exports, and indeed what we do in subsidizing exports hurts some very poor people around the world, farmers in third and fourth world countries are simply not able to defend themselves. Hopefully, through the GATT proceedings of international trade negotiations that will change and a more level playing field will result.

Mr. President, let me talk about some displacements that have occurred in the world. That is, if the Europeans dump onto the world market, who is not selling?

This is a chart that shows the cumulative amount of grain that they have shipped onto the world market, because of their subsidies. Somebody had to be displaced unless the market grew. In some years the market grew but not by that amount. This chart over here, which almost tracks the European growth exactly, shows the cumulative amount of U.S. grain production that is foregone by acreage reduction programs.

This country alone has acreage reduction programs. This country alone says to a farmer if you want to participate in a program, you cannot plant on all of your land. You can only plant on 90 acres out of 100 or 7 acres out of 10. The other land must lay fallow.

If we had planted on those set-aside acres, we would have had far more production. There would have been much more activity in rural America. Indeed, as we set aside acres, the Europeans picked up all of the slack.

If every country set aside, if every country said to their farmers you cannot plant on all your land, you can only plant on a certain percentage of it, that would be one thing. But only we do that. We penalize ourselves.

We penalize not only our farmers, but all of rural America, because we reduce the volume. So there are fewer truckers, there are fewer barge operators, there are fewer people working at the grain elevators, there are fewer people who are involved in the entire infrastructure of agriculture because we set aside.

We continue to set aside in this farm bill. And I continue to object to set-asides. I continue to say it simply is not in the American interest to set aside productive land and increase the cost production on the land that we actually do plant.

If a farmer can only plant on 8 acres out of 10, the land payments on those 2 acres on which he does not plant continue. The taxes on those 2 acres on which he does not plant also continue. So he has to earn from the 8 acres enough not only to pay the costs attendant to those 8 acres but pay the costs for the other 2 acres as well.

It increases the overhead of American agriculture and disadvantages American agriculture. We alone follow that practice on the basis that by laying aside land you allegedly have less production, and therefore you will have a higher price. When you have a higher price, the Government's payments become less.

So it is to the advantage of the Government, not to the advantage of the farmer. It is to the advantage of the Government, not to the infrastructure of agriculture that set-asides are used.

It would be my hope, and I will offer an amendment that I do not expect to see passed presently, to undo set-asides and allow the most productive land in this country not to lay fallow unnecessarily, but to produce agricultural commodities so that we can be competitive on the world market.

Let me also speak now about the world soybean trade, the U.S. share of world soybean trade as indicated by this chart and what our farm programs have done with respect to it.

This part of my opening remarks, Mr. President, has to do with flexibility that I hope will be expanded in this farm bill.

Back in 1970-71, we had a total of 80 percent of the world trade in soybeans. We had at this point 80 percent, total trade was about 20 million tons, and the total trade has gone up to about 60 million tons in this 16-17 year period.

Our share of the total trade has gone steadily down; where it used to be 80 percent, it is now, as you see, approximately 36-37 percent.

So our share in the trade of soybeans has gone down. Why speak about soybeans? It is one of the large crops. Wheat, feed grains, which includes corn, sorghum and oats, and soybeans are the three principal crops.

Soybeans is an approximately 2 billion bushel crop in the United States. It is the fastest increasing crop in the world agriculture. It has been called the "miracle crop" because it has added so much additional production to world agriculture, and has improved lifestyles through cooking oils and other use of oils. Soybeans are indeed an essential part of animal feed throughout the world. It has been the most expansive crop by far in agriculture.

We have lost market share. Because of the inflexibility of the farm program, our farmers cannot respond to market signals and plant soybeans. Our farmers have to plant the crop that is mandated by the farm bill if they want to participate in farm programs. It is that, too, that I have sought to change in this particular farm bill, to increase the flexibility that farmers have in being able to plant crops on their farms.

Now, if you have a corn base, you have to plant that base or you lose that base. You use it or lose it, as they say. You cannot plant soybeans on that corn base even if the world market is short on soybeans and you want to respond to the market. You simply cannot do it or you lose your base. The base, your agricultural base, really is an important element of the value of your farm.

So unfortunately as this chart shows, while world trade in this miracle crop called soybeans is expanding at a rapid rate, our share worldwide is going down. Who is taking it? In this case it has been the South Americans. From 1979-1988, the production of soybeans in this country has gone down by 13 million acres. The production of soybeans in South America has gone up by an exact like amount, 13 milion acres. So as we gave our production away, the South Americans, with glee, picked it up.

It is my hope that this farm bill will allow sufficient flexibility so that we in the United States will be able to regain some of our market share and be aggressive producers of this crop called soybeans.

Mr. President, I want to speak briefly about Europe, because they have become the principal opponent, the other principal exporter in world trade, and suggest a contrast, for a moment in their agriculture with ours.

They have a total population in the European Community of 323 million. We are at about 244 million, perhaps 250 million. Those are small countries, and the largest country is France, and it is as small as the State of Texas. The size of West Germany is just a little bit larger than the State of Minnesota. The size of Great Britain is somewhat larger than the State of Minnesota, but not by much Yet, they have 7 million farms; we have about 2,100,000 farms. While the average size of our farm is 462 acres, their average size is 41 acres.

If you look at dairy in Italy, for instance, their average herd size is three. In all of Europe, I believe the average herd size is 15, something that has not been the case in the United States now for 35 years. In the United States, the average herd size is closer to 60. And they have in Europe a series of small farmers, a huge number of small farmers, 3½ times as many farmers as we do.

They are just subsidized in a manner that slows down their economy; that is expensive to their consumers; that, as I said, is injurious to people who are very poor in the Third and Fourth World countries. And it is unfortunate that we have to deal with countries that subsidize to such a degree.

They subsidize, Mr. President, to such a degree that in wheat, where the average yield in the United States might be 40 bushels, they have 10-ton clubs, 10 tons of wheat per hectare, which is on average about 150, 155 bushels per acre.

In Europe you will see cracks in the wheat fields because they fertilize and use herbicides perhaps a dozen times during the course of a growing season, as opposed to perhaps three in the United States. That is the way they get their yields up, and that is the way they develop these huge surpluses that they dump on the world market. As I say, it destroys the lives of many poor people around the world.

Mr. President, finally, in talking about the competition, let me talk about the enormous potential that exists in South America. We farm in this country approximately 330 million acres, 330 million acres, as you see here, of arable land, crop land.

In Brazil, they farm about 120 million acres. In Brazil, they have available another 500 million acres that has not been planted. In Argentina, about 50 or 60 million acres is in production. Well over 300 million additional acres can be put into production.

What does that mean? That means that we should have a farm policy that does not guarantee such high prices worldwide that we encourage the South Americans to begin production, because indeed, if they start to produce on all the acres they have, we will find new competitors coming in that will make our farm economy far more difficult to cope with.

As I pointed out, in the case of soybeans they respond very quickly. We reduced our soybean acres by 13 million. They increased their plantings by 13 million acres, not substituting soybeans for another crop in most instances, but just planting new acres, fertile acres, that they had previously used for grazing.

So as we consider the situation of American agriculture, we also have to understand the enormous potential that our competition has.

Mr. President, I have not commented a great deal about the 1990 farm bill that has come out of the committee, other than to say that it continues to have set-asides, acreage reduction programs, ARPS, as they are sometimes known. I do not agree with ARPS, because as I pointed out on one of our charts, not only are we the only country to set aside acres, not only are we the only country that will say you cannot produce on good acres of land, but we give away markets through the use of ARPS to other countries. That has been documented time and time again.

I will offer an amendment to end that practice in the United States, to eliminate the use of set-asides, to eliminate the use of acreage reduction programs. I will also introduce an amendment to make loan rates more competitive. That is, I will introduce an amendment to continue the 1985 formula with respect to loan rates, that loan rates can reflect market prices. That was one of the great strengths of the 1985 farm bill, and it should be continued.

Finally, Mr. President, I will be introducing, or perhaps the Senator from Iowa will introduce, an amendment with respect to planting flexibility, that farmers, if they have a wheat base or a corn base, do not have to use it or lose it; that if they have such a base, they can look at the marketplace and they can say, OK, this year it makes more sense to plant soybeans, or it makes more sense to plant some other crop. And they can respond to markets, rather than respond to farm programs.

I believe that markets work. I have always, throughout my entire life, worked with markets, and I think that the proof of the last 5 years, where the agricultural markets have been given a chance to work, proves once again that they will work, that farmers will be more enriched, that rural America will be kept busier, and that really should be a goal of this farm bill.

I say in conclusion, Mr. President, that this farm bill that we reported from committee has many positive factors to it. I do not mean to suggest that it is a nonsatisfactory piece of legislation. I do mean to suggest that through increased flexibility, that by having loan rates that are more competitive and more oriented toward the market and, furthermore, the elimination of acreage reduction programs, we would indeed strengthen the farm bill and make it a farm bill that will lead to bigger and better things for American agriculture and for all the people of the world.

Mr. President, I yield the floor.

Mr. BOREN addressed the Chair.

The PRESIDING OFFICER (Mr. BURDICK). The Senator from Oklahoma is recognized.

Mr. BOREN. Mr. President, today we begin debate on one of the most important pieces of legislation the 101st Congress will address—the Food, Agriculture, Conservation, and Trade Act of 1990, more commonly known as the 1990 farm bill.

Farm legislation is vital to the entire Nation, not just to a few farmers. American farmers provide the consumer with the cheapest, safest, and most reliable food supply in the world. The U.S. agricultural sector is also a major food supplier to the rest of the world, especially the poorest, least developed countries which are not self-sufficient in their most basic need—food.

Agriculture is the single largest industry in the American economy. The American food industry employs over 20 million people and accounts for nearly one-fifth of our Nation's gross national product. Agriculture is also the largest industry in my home State of Oklahoma, accounting for nearly $3.7 billion of income in 1988.

The U.S. farm sector is one of the few bright spots in our balance of trade; we have maintained an agricultural trade surplus for four decades. Our agricultural exports reached an all-time high of $40.6 billion in 1989.

Mr. President, our food and fiber sector is the envy of the world. Most of the credit for this system must go to the American farmer for his hard work, endurance, and skillful management of our natural resources. American innovation and technology, too, have contributed greatly to the progress of the industry.

Farm legislation, however, has also played an important role. If properly crafted, farm programs can serve several vital functions.

First, income support programs can help provide a stable financial health to the agricultural sector. Every business must estimate different variables that effect its future. Interest rates, currency values, and labor costs are the most obvious examples. Each of these variables is extremely important to business, and each is difficult to estimate. Agricultural producers, however, must gamble with these factors plus one addition—the weather. No other business enterprise depends on

such an unpredictable force to such a great degree as the farmer does on the weather.

Debts must be paid in bad years as well as good. The target price mechanism in this legislation provides some needed income stability to farming operations and buffers our food and fiber sector from wild swings in cashflow.

Second, farm legislation establishes a series of rules and incentives designed to preserve our valuable farmland resources. Agricultural producers are pricetakers in their respective markets and therefore have an incentive to maximize production for the short term. They cannot control price. Production is the only thing they can control. Concern for the long-term condition of our farmland resources led Congress in 1985 to tie certain conservation provisions to commodity programs. This legislation continues that trend and reauthorizes several programs that help preserve our valuable soil and water resources.

Let me say, Mr. President, that there are those who would like to change the farm program to exclude some farmers, particularly larger farmers by volume, from the program. We must look at those actions with a great deal of concern because the more we push farmers outside the program, the more we encourage them simply to maximize their production, the more we undermine the preservation of the resource base of our land, of our environment, by pushing people out of the program and therefore discouraging them to take advantage of the conservation provisions.

Third, farm legislation authorizes agricultural research projects that will continue to allow the American food industry to take advantage of the latest and best applied technology. Land grant universities in every State in the Nation contribute to this effort to improve production, reduce costs, and address health concerns.

Mr. President, these are just a few general advantages of our farm programs that I hope my colleagues will consider.

As I say, oftentimes those from States where agriculture is not a large component of the economy simply believe that the farm bill is to benefit farm programs alone and farmers alone, that only those Members from farm States should be concerned about. Nothing could be further from the truth, Mr. President. We all must be concerned about farm legislation. We must all band together, for the sake of our national economy, for the sake of our national resource base, for the sake of our environment, to craft farm legislation that makes sense.

The Food Security Act of 1985 set the commodity programs for the 1986 through 1990 crops of wheat, feed grains, cotton, and rice. Winter wheat farmers in Oklahoma, Texas, Kansas, and other States have completed their harvest of the 1990 crop and are attempted to plan their farming operations for next season. I have joined with several other Senators in urging Secretary Yeutter to announce the most critical elements of the 1991 wheat program and I hope he will do so without delay. However, most elements of the program will not be finalized until the new farm bill becomes law. Unfortunately, this will not occur before winter wheat planting begins. Therefore, expedient passage of this bill is critical to the decisionmaking for winter wheat producers.

Finally, I believe it is especially important for Congress to pass a multiyear farm bill before the conclusion of the Uruguay round of the General Agreement on Tariffs and Trade [GATT]. A strong, multiyear farm bill is needed to show our European competitors that we will not unilaterally withdraw our export programs and to show our own U.S. negotiators in Geneva that Congress does not want a GATT agreement that is bad for American agriculture.

We must not unilaterally disarm our farm programs and leave the American farmer at the mercy of European governments with large export subsidies which are designed to steal our markets. The only way to get relief from the EC at the bargaining table is to deal from a position of strength through a farm bill that effectively promotes American farm exports.

It is urgent, therefore, for us to act and for us to send that signal to those who would continue their unfair export subsidies against us in an effort to take markets away from the American farmer.

As chairman of the Subcommittee on Domestic and Foreign Marketing, I am especially supportive of this bill's trade title. This bill takes the best ideas from several agriculture trade bills, including S. 2147, which I introduced along with Senator COCHRAN of Mississippi, as well as the trade bill introduced by the distinguished chairman, Senator LEAHY, and the distinguished ranking member, Senator LUGAR.

Our farmers can compete with any farmers in the world. However, they are also being forced to compete with foreign governments. The European community, for example, has a long standing policy, known as restitution payments to pay its exporters to sell wheat at a loss. For these reasons, we have adopted the Export Enhancement Program [EEP] which is designed to match the European subsidies by providing our exporters with certificates redeemable for government-owned commodities.

Although the EEP has been successful in regaining some of our lost markets, the community's subsidies continue. Our subcommittee heard testimony that the EC's restitution payments have reached as high as 10 times the EEP bonus for certain markets, 10 times the size of the export subsidy. Clearly, we must continue to keep the pressure on our competitors and aggressively use the EEP.

The best way to assure that the pledges recently made at the Houston economic summit to consider dismantling of the huge export increase in farm subsidies by the European community, the best way to make sure that those pledges are redeemed is to continue a strong export enhancement program now, to do it in this farm bill, and to send that message while our negotiators are at work on the GATT amendment.

This bill continues this strong export policy by authorizing EEP expenditures of at least $600 million annually. It also allows the EEP to be used against countries that hurt U.S. exports through the practice of monopolistic pricing. The bill renews the Cottonseed Oil Assistance Program [COAP] and makes needed improvements in the GSM credit programs.

Mr. President, I believe this farm bill must pass and it must pass soon. To achieve that goal, Senators from farm States must work together in a bipartisan fashion. The worst thing that could happen for our producers would be for the farm bill to become mired in partisan politics. Instead, we have an obligation to put any political differences aside in order to write the best possible agricultural policy for the Nation.

Mr. President, I simply close by saying we were finally able to do that in the Agriculture Committee, and, after some partisan haggling in the beginning, we realized we had a broader responsibility not only to the agricultural sector, but to the entire economic interests of this country to put aside partisan differences, to work together, to come forward with a consensus bill with a large majority of the Agriculture Committee behind us. That is exactly what we have done.

The grave danger we face is this: If we were to fail to reach an agreement now and push this bill on to passage and get it on to the conference committee so that early on in the fall we can have a farm bill finally signed into law, the longer we wait, the more we will be pressured to have only a 1-year farm bill. I say to my colleagues nothing could be more damaging to the economic interests of our United States. If we have simply a 1-year farm bill with uncertainty of what the programs will be in the following year, it will make it very, very difficult for producers to make long-range investment decisions.

More than that it will send exactly the wrong message to our negotiators at the GATT, and it will send a mes-

sage to our competitors who are continuing these huge subsidies, estimated to be as high as $10 billion, to steal our market, sometimes as high as $7, $8, $9 per bushel of wheat in order to take our markets away from us, that we are at their mercy, that they are going to be able to determine in the GATT negotiations what our long-term farm bill will look like.

So, Mr. President, I urge my colleagues to let us join together, put aside such minor differences as we might have, speed this bill to passage on the Senate floor, get it to the conferees so that we can get a bill on the President's desk to send a strong message and strengthen the hand of our negotiators in the GATT negotiations which are now going forward.

I thank the chairman, the distinguished Senator from Vermont, who is on the floor, for his leadership. I thank the ranking member as well. We have had a very good effort. It has been a very hard working group. Many hours have been spent in the Agriculture Committee to bring this bill on the floor. I think overall it is an exceptionly good product. It does not mean it could not be improved in the course of the legislative process. But as we make those improvements, let us not bog down, let us not slow the pace of getting this bill enacted into law.

Mr. LEAHY. Mr. President, I thank the distinguished Senator from Oklahoma for his kind words and for his leadership on this committee. The Senator from Oklahoma has been a tireless worker on the very complex issues in this bill, notwithstanding his other duties as chairman of the Senate Intelligence Committee. And having had some experience in that field, I know the enormous number of hours that takes and the hours that none of the public sees because it has to be, by the very nature of that committee, behind closed doors. But the Senator from Oklahoma was there every time we needed him on these agriculture matters, adding his expertise and his good common sense.

I agree with him that we have put together legislation that can carry out the goals that he has talked about in the domestic agriculture field, and also in trade.

So I applaud him for what he has said and I just wanted to note my appreciation for his help in the committee.

Mr. President, I suggest the absence of a quorum.

The PRESIDNG OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PRESSLER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDNG OFFICER. Without objection, it is so ordered.

The Senator from South Dakota is recognized.

Mr. LEAHY. Mr. President, will the Senator from South Dakota yield to me just for a couple of minutes for a housekeeping chore

Mr. PRESSLER. If it would be just for a couple of minutes and if I can get the floor back in 2 minutes.

Mr. LEAHY. Of course.

Mr. President, I ask unanimous consent that the Senator yield to me for 2 minutes without losing his right to the floor.

The PRESIDNG OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2304

Mr. LEAHY. Mr. President, we have some committee en bloc amendments. They were reported by the committee subsequent to the reporting of the overall bill and the committee authorized me, as chairman, to offer the amendment on its behalf.

I send the amendment to the desk and I request that the amendment be treated as original text for purpose of further amendments and that no point of order be waived.

The PRESIDNG OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY] proposes an amendment numbered 2304, en bloc.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

(The text of the amendment is printed in today's RECORD under "Amendments Submitted.")

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. LUGAR. Mr. President, I join the distinguished chairman in endorsing this amendment which comprises numerous amendments adopted by the committee by unanimous, bipartisan consent.

It was agreed at the time we came to our basic conclusions on the farm bill that minor and technical amendments might be offered, and if they found unanimous consent in a bipartisan way in the committee, they would be made a part of the chairman's amendment. So it is my privilege to endorse the amendment and ask for its passsage.

The PRESIDING OFFICER. Is there further debate?

If not, the question is on agreeing to the amendment.

The amendment (No. 2304) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. I thank the distinguished Senator from South Dakota and the distinguished Senator from Indiana.

Mr. PRESSLER. Mr. President, I would like to speak on the farm bill that is before us, to give some of the views of South Dakota.

Two years ago, I held a series of listing meetings on the revision of the farm bill. Since that time, I have kept in close touch with the ranchers, farmers, small businessmen and others in my State regarding revision of the farm bill.

As you know, this body last acted on this bill 5 years ago. It was a long and contentious debate. We are now entering into a new farm bill debate here on the Senate floor and I think it is good to review some recent history. Also, it is my desire to report to the Senate some of the findings I have had in meetings with my farmers and ranchers.

In fact, about 2 years ago I spent the February recess visiting 14 towns, small towns, strictly on how the farm bill was doing and what we could do to improve it. Subsequently, I have held several other meetings on this topic in my State.

The issue before us is agriculture in the 1990's. As we saw in the Houston summit, agricultural trade negotiations are at the very center of the farm policy debate. For the first time in our country's history, we have found that the trade aspects of agriculture are going to be key concerns in the 1990's. I have said frequently that what happens in international trade may well be as important to farm prices in the United States as some of our farms programs. Therefore, we must watch international trade agreements very, very closely.

Mr. President, I think it is good to review some of the history of the agricultural trade debate and to recognize that European agricultural subsidies are, generally speaking, designed to increase agriculture production, while ours are designed to decrease agriculture production.

For example, if a farmer qualifies for target or loan prices in the United States, that farmer must set-aside part of his land and not produce on it. This leads to the charge that we are paying people not to produce. Also, we have the conservation reserve program, in which whole farms or tracts of land are taken out of production for several years and people are paid not to produce and to practice conservation practices.

In part, we are preserving topsoil, we are preserving wildlife, we are preserving water with these set-asides and the conservation reserve program. But the point is, our subsidy program is designed to reduce agricultural production. In Europe, the subsidy program

is designed to increase agricultural production—no land set-aside program is required to qualify for subsidy.

Also, the Europeans engage in heavy subsidizing of agricultural exports. That is, when the surplus crops of these countries are sold abroad, they are dumped. The European Community [EC] alone spends $12 billion each year on subsidies for farm exports. These crops are sold at world prices, whatever they will bring, and that is usually just below the United States loan rate. They undercut the sale of U.S. farm exports in third country markets.

Whatever the reason, we need an international agricultural treaty. We need to change the way we define our subsidies compared to those of Europe and other countries.

Some countries subsidize the transportation of agricultural commodities. Canada heavily subsidizes agricultural products for export. That is a subsidy just as much as a deficiency payment paid to a rancher or farmer. In the 1990's we are going to need a common set of definitions on just what constitutes a farm subsidy.

I plan to offer an amendment calling for an international agricultural conservation reserve agreement, under which countries could get credit for actually reducing production. When our farmers and ranchers do not produce on all their acres, that actually helps our international competitors. Europe, Argentina, Canada, and other countries that are surplus-producing countries are at full production. We are not. So our subsidies are actually a double subsidy to them. In the 1990's we are going to have to move toward solving that problem. In part, that is what President Bush was talking about in his Texas meeting.

On the issue of target prices, I support increased target and loan rates under the current circumstances, in which our farmers and ranchers have to compete against a system in Europe that can only be characterized as very unfair competition.

I recall that on this floor when I came here, over 11 years ago, I discussed this with Senator Milton Young, the late Milton Young, of North Dakota, who served in this body I think 30-some years. He gave me the history of how he had initiated the target price program for wheat because of the growing subsidies in the European countries. There were many others who also contributed to these policies. It was not a Republican policy or Democratic policy—it was a bipartisan farm policy.

Regardless of the history, today we are standing on the verge of a new farm bill. Granted, what we do here in the Senate on the farm bill will be very significant. Perhaps more significant will be the appropriations that will come later, and the possible imposition of a Gramm-Rudman-Hollings sequester, if a budget agreement is not reached. So, there are many bumpy points on the road as we move toward appropriate funding of a new farm bill.

I am sure there will be efforts to reduce the target prices. I have not joined in that effort because I think under the circumstances our farmers are entitled to at least a cost-of-living-increase, if not more. If target prices are frozen or reduced, that will be very counterproductive.

I also believe that we as a nation have an interest in keeping ranchers and farmers on the farm. For example, in Europe they have kept small-farm agriculture prosperous. This has meant that small towns also are prosperous, and the business communities in those small towns are prosperous.

We can go into almost any small town in France or Germany or Italy or England and find a Main Street that has prosperous small businesses. That is not true of many towns in the United States. Indeed, in the small towns of the United States, we often find that small businesses are boarded up. They are closed.

In practice we have almost had a policy of moving people from rural areas into very crowded city centers. Europe has had a long-time policy of keeping people on the land.

Our policies, in terms of the basic strength of our national economy, would be better if we had such a policy to keep family-size farmers and smaller ranchers in operation. That should be the purpose of this farm bill. It should not be huge subsidy payments to a few big conglomerates. There should be limitations on farm program payments.

During the last consideration of the farm bill I offered an amendment with a three-tiered pricing system, which I think has merit, to help the small farmer. It was based on the idea that, if Government programs help keep the family farm, small farmers and ranchers, and help enrich the small businessmen in our towns, all America will benefit. Indeed, there have been surveys in New York City that show that most people want to keep the concept of the family farmer in America.

There are many other details to this farm bill that are of great importance. There is the crop substitution issue, which is very important in my State. There are a number of other details I shall be working on with others as the amendments move forward.

Mr. President, I grew up on a family farm in eastern South Dakota, in Minnehaha County. I am very proud of that. My parents still occupy that farm. This is a point of pride to me. Having been active in 4-H, the agricultural youth group, I feel I know farming well. What we are doing here is very important, not only to the farmers of our country but to all citizens because it is an essential element in the fabric of our national life.

The fact that we have such a large supply of high quality food is a great blessing. There are not very many countries in the world where you can buy milk fresh every day. That is because there is no program to maintain a uniform supply of milk. Countries that do not have a dairy program, for example, have ins and outs, ups and downs in milk production, and can buy clean, fresh, tested milk only in the big cities. That is an unusual treat in the world. If we get away from Europe and the United States, it is fairly hard to do. And it is also true of other food products.

We spend a much lower percentage of our budgets on food than many other countries do because we have had a system of even production. We have had a farm program that has allowed small farmers and ranchers to stay in business. It has allowed diversity, and it is in the national interest to have that even supply of food at a reasonable cost.

I know there are many environmental issues, kindness to animals issue, and so forth that are being blended into this debate. We have many disagreements on those sorts of issues. But, as we begin this farm bill debate, let us remember that what we are doing here will affect our country for many years to come, not only farmers but also city folks.

The PRESIDING OFFICER. The Senator from Nevada.

AMENDMENT NO. 2305

Mr. REID. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Nevada [Mr. REID] proposes an amendment numbered 2305.

At the end of the bill add the following new section:

SEC. . It is the sense of the Senate that Federal nutrition programs are important elements of our national food and agriculture policy. It is further the sense of the Senate that when legislation reauthorizing federal nutrition programs is considered in the Senate, such programs should be authorized at levels that will meet recognized national needs.

Mr. REID. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is not a sufficient second.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. WIRTH). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 2306 TO AMENDMENT NO. 2305

Mr. REID. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state it.

The bill clerk read as follows:

The Senator from Nevada [Mr. REID], for himself, Mr. RUDMAN, Mr. CHAFEE, Mr. BRYAN, Mr. BRADLEY, Mr. PELL, and Mr. KERRY, proposes an amendment numbered 2306 to amendment No. 2305.

Mr. REID. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment, add the following new section:

SEC. . MEANS TEST FOR AGRICULTURAL PAYMENTS.

The Food Security Act of 1985 is amended by inserting after section 1001C (7 U.S.C. 1308-3) the following new section:

"SEC. 1001D. MEANS TEST FOR AGRICULTURAL PAYMENTS.

"Notwithstanding any other provision of law, a person (as defined in section 1001(5)(B)(i) shall be ineligible to receive payments under any of the annual programs established for a commodity under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) (other than disaster payments or payments received under conservation reserve programs established under subtitle D of title XII of the Food Security Act of 1985 (16 U.S.C. 3831 et seq.) and as amended by subsequent legislation) for a crop year if the average amount of gross sales of agricultural commodities by the person during the 5 previous crop years is in excess of $500,000 per year.".

Mr. REID. Mr. President, agriculture holds a special place in the history of the United States. In the 1700's through the early 1800's, most Americans were farmers and farm prosperity was equated with national prosperity. In terms of American history, most farm families barely produced enough to feed themselves.

In the latter half of the 1800's, this situation began to change rapidly, thanks to scientific and industrial changes. Every decade since the 1800's, farming has become phenomenally more productive. The development of new plant varieties, fertilizers, coupled with increased use of tractors and the modernization of farm machinery has doubled and tripled the production output of all of our major crops. For this we certainly need to thank, and I do thank, the American farmer.

Today, farming is no longer the chief way of life in industrailized nations. In 1850, each farmer produced enough food for four people. Today, a farmer produces enough food for more than 80 people. Less than 3 percent of all Americans live on farms. Yet, the United States produces most of the world's agricultural output.

As farms have become less a way of life for the majority of Americans, it has become more and more a business. The U.S. Government became solidly involved in agriculture by offering price supports to farmers during the Great Depression under the guidance then of President Herbert Hoover. Hoover had had considerable background in agricultural policy. Having been founder of the Commission of Relief during World War I, it was his responsibility to organize food relief for war-ravaged Europe, and he has been credited with saving, and rightfully so, countless lives.

As a result of the great success of Hoover's Commission for Relief, he was appointed by President Woodrow Wilson as Director of the U.S. Food Commission. In 1929, when Hoover was President, the Agricultural Marketing Act passed which established a Federal Farm Board to protect American farmers from the shocks of the Great Depression which had already begun.

Hoover promised to "establish for farmers income equal to those of other occupations." Ironically, though, farmers suffered during this time because of Federal policies. The Federal Reserve had reduced the money supply by one-third causing a huge drop in price levels at the same time that taxes were being raised.

In 1933, the Agricultural Adjustment Act was enacted. President Roosevelt intended for the act to expire when the farm crisis ended. The intent of the act was clear: "To relieve the existing national economic emergency by increasing agricultural purchasing power."

Raising farm income was, during this time, one component of a policy to revive national prosperity. According to a 1934 article in the New York Times, after 1 year of dealing with the Federal Farm Board, Kansas farmers voted strongly against Federal controls.

In the 1930's, roughly 40 percent of all American farmers were tenants and sharecroppers. The New Deal programs were designed solely for agricultural relief. The landowners, the tenant farmers, the sharecroppers saw barely a penny of benefits.

Historian David Eugene Conrad notes Agricultural Adjustment Administration bureaucrats who were sympathetic to the farmers were forced to resign their positions.

As the original intent of President Hoover's farm income support was forgotten, the New Deal encouraged farmers to produce far more than they could sell by promising them far more than the market values of their crops. The absurdity of this lies in the fact that farmers were encouraged to overproduce, yet their surpluses were cited as proof of the need for Government management of agriculture.

Mr. President, the Agricultural Adjustment Administration offered target prices for wheat and cotton crops as they do today for these and many other commodities. This policy established a safety net to protect the small, struggling farmer. It is much more than this, though. By including farmers at every income level, I believe it is time we reevaluated the purpose and intent of our grossly outdated farm programs. Is it good, responsible public policy to dole out Federal dollars to as many farmers as possible? I put that in the form of a question, Mr. President. Is it good, responsible public policy to dole out Federal dollars to as many farmers as possible?

If the original intent of the Agricultural Adjustment Act is to keep as many Americans as possible on the farm, our programs have failed and failed miserably. Since 1933, the U.S. farm population has fallen from 30 million to less than 5 million. I am really ashamed to say, Mr. President, that what was once intended to assist Americans in rising out of the depths of the Great Depression has departed from that vision and become a policy ridden with disincentives to efficient production, the nightmare of any free market nation.

According to the USDA, there were 2.2 million farms in the United States in 1988. Yet, the USDA classifies a farmer as anyone who sells over $1,000 a year in farm commodities. Think about that. The USDA classifies a farmer as anyone who sells over $1,000 a year in farm commodities. This means if my neighbor sells his horse for more than $1,000, USDA classifies him as a farmer. The examples are replete with absurd examples of who is classified as a farmer because of this classification, namely, $1,000.

Needless to say, USDA farm statistics are grossly skewed by the inclusion of $1,000-a-year farmers who are obviously not earning a living in this endeavor. In spite of the inclusion of these gentlemen farmers, the 1988 average net income of all U.S. farmers was a healthy $45,644 a year. Even by including the $1,000-a-year-gentleman-farmer category, the average American farmer earned over $45,000 a year. In 1986, 55 percent of the USDA's so-called farmer's income really came from off the farm. This could come from occupations such as teaching, consulting, or investment in real estate.

Farmers are relying less and less on actual farm income. Because of the USDA's generous definition of "farmer," it often appears that the American farmer is truly in a crisis position. Perhaps he is. And there are examples, I have heard from this floor, that certainly indicate that there are some farmers who are having trouble. But who can be sure when we talk about numbers, when we use the classification that the USDA has as to what a farmer is; that is, someone with an income of over $1,000 in farming?

By refusing to make a reasonable classification of just who is and who is not a farmer, the USDA guarantees the overspending of billions of tax dollars. Since the New Deal era, it has been proclaimed that farmers have a right to the cost of their production. This says that if a farmer grows a certain program crop, the taxpayers are obliged to pay for it and provide him a profit also.

If farmers have a right to the cost of their production, then why are we not subsidizing all vegetables, all fruits, all livestock, and other examples? If economic arguments for subsidizing the commodities, which we do, made sense, then no one would produce commodities not protected by Government programs.

In any other business an owner must either lower his cost of production or try another business if he cannot make ends meet. Our taxes are increased when farmers of certain commodities cannot stay afloat. How can it be logical to subsidize certain foods we eat and not others? Who has the right to decide for us what we will and will not eat and what price we will pay for them? Why have we not paid the price of a dozen eggs or a pound of hamburger, chicken?

I find it hard to accept that Americans will go hungry if farmers are allowed to stop idling their land and permitted to grow whatever they want and as much as they want.

Why price fluctuations, heavy debt and bad weather? Why are some farmers dependent on Government programs and not others? It does not make a lot of sense to me and it does not make a lot of sense to the American taxpayer.

Current agricultural policy seems to be based on the assumption that America will benefit from federally mandated inefficiency and waste rather than allowing farmers to produce at maximum productivity. Supporters of farm programs often justify them based on farmers' needs, but since the New Deal the programs have not targeted benefits according to need.

It is inappropriate, and some say morally inappropriate, to provide farm program benefits to all but the most needy. Why should any but the most destitute farmer be treated better by the Federal Government than any other American citizen? Prevailing agriculture policy assumes that the Federal Government treats all farmers equitably and ethically. This is not so. Providing agricultural subsidies to affluent farmers contradicts the realities, priorities, justice, and moral principles important to Americans.

Some argue that our Nation's food supply needs protecting. While no one would dispute the importance of food to our survival, controlling its supply was not the original intent for our programs initiated during the Depression, as I have outlined.

There are many other goods and services crucial to our well-being which, of course, are not directly subsidized. We can talk about all kinds of programs: Medicine; we can talk about clothing; we can talk about home building. We simply do not deem that they should be subsidized.

These kinds of programs, when we subsidize prosperous farmers, fly in light of anything that is reasonable. This is the sort of Government intervention which creates victims. We cannot economically reward one group without punishing another group. What is lavished on wealthy farmers must first be taken from other citizens.

In a free market society, what gives one citizen the right to someone else's paycheck? In order for Government to control agriculture in our country, we insist on subsidizing wealthy farmers. By doing this, the poor—not only the poor farmers but the poor generally—are sacrificed again and again and again.

The moral and economic debate for Government control of agriculture either includes all sectors of agriculture or no sectors of agriculture because it simply would not be comprehensible from an intellectual basis to do otherwise.

Our farm programs are in need of fixing for several reasons: Our food prices can and ought to be lowered. We need not spend billions of dollars a year on agriculture in these times of tightening budget constraints, and I mean billions of dollars of taxpayers' money. And since a moral and economic argument for farm subsidies holds little water, program benefits should be targeted to the neediest farmers, period.

Mr. President, I am not alone in my belief that the distribution of agricultural payments is grossly disproportionate. When the National Public Policy Education Committee surveyed 12,000 American farmers—farmers, I repeat—it was found that 53 percent of these people agree that agricultural programs should give more benefits to needy farmers. This tells me that farmers, like other Americans, recognize that our limited resources need to be carefully distributed.

My perceptive colleague in the other body, DAN GLICKMAN, stated on the floor of the House of Representatives this past February that not only are the largest farms in the United States recipients of a disproportionate share of agricultural payments but also that our precious tax dollars must be targeted to only those farms which are in need of Government payments to remain viable. Remember, Mr. President, DAN GLICKMAN represents an agricultural State, the State of Kansas.

Congressman GLICKMAN received a letter from the USDA this past March concerning the targeting of agricultural payments. This letter to Mr. GLICKMAN referred to some astonishing statistics from a USDA reference entitled "Economic Indicators of the Farm Sector, National Finance Summary" dated 1988.

In 1988, there were 30,000 farms in the United States with gross sales in excess of a half million, $500,000. These 30,000 farms comprise less than 1.5 percent of all farms in the United States. Out of these 30,000 farms, 14,000 were recipients of direct agriculture/Government payments. This means that 14,000 out of 30,000 farms with gross sales in excess of a half million produced commodities which were covered by agricultural programs and chose to participate in them. These 14,000 farms received $1.2 billion in direct Government payments from the U.S. Department of Agriculture. Less than one-half of 1 percent of all U.S. farms received 8.4 percent of all agriculture payments made in 1988, $1.2 billion.

Mr. President, I am referring to a percentage of farms that is affected. We have a pie chart representing 100 percent. My amendment that is before this body affects that little, tiny piece of pie out of this full pie chart—one-half of 1 percent. This amendment will save the United States taxpayers $1.2 billion and affects 14,000 farms—14,000 farmers, one-half of 1 percent.

In effect, what we would be doing, Mr. President, is writing the U.S. taxpayer a check for $1.2 billion. This would come from one-half of 1 percent of the farms in the United States, let me mention, 14,000 farms, the wealthiest farmers in the United States; $1.2 billion paid to 14,000 farmers.

Now, Mr. President, this astounds me, as I am sure it astounds the American taxpayer, but incredibly it affects States in the following manner. There is only one State in the United States in which it affects more than 2 percent of the farmers. It affects in six States more than 1 percent of the farms. In all the rest of the States, that is 43 other States, it affects less than 1 percent of the farms.

What is more—and listen to this—the average net cash income of these farms is over $700,000 a year, net; not gross, net. Within the $500,000 and above gross sales class, the average gross sales income is $1,897,000, of which the average net income in dollars is $762,000 a year. The average direct payment made to farms in this sales class is $62,500. In 1988, the average family income in the United States was $38,608. This is the average family income. This is the average taxpayer payment to these farmer fat cats: $62,587.

And, Mr. President, we are talking about one-half of 1 percent, 14,000 farmers that gobble up $1.2 billion.

In other words, we the taxpayers, using our agent, the U.S. Department of Agriculture, paid millionaires a subsidy nearly twice as big as most hard-working families make in a year. The millionaire subsidy could be used to fund numerous priorities ignored over the past decade.

Mr. President, you know the multitude of projects you are interested in for scientific purposes. There are others of us interested in medical research for disease such as breast and uterine cancer, interstitial disease, multiple sclerosis, diseases that affect the women, and we are going to hear more about that in the debate in the days to come.

This money, this $1.2 billion, could be used for all kinds of worthwhile programs rather than to give a $1.2 billion subsidy to 14,000 fat-cat farmers.

One thing we have not mentioned, of course, is we could use it to do something about our deficit. We are fighting and scratching to come up with money to do a better job of balancing the budget than what we have done. The American public is hearing all kinds of "Read my lips; we are going to tax you now."

There is a debate going on here in Congress as to how much of it is going to be from taxes, and how much is going to be from spending cuts. Let us look at some spending cuts right here; a spending cut for 14,000 farmers which would save $1.2 billion.

It could be used on many other programs, Mr. President: Our schools, our underfunded health-care system. Our health-care delivery system is staggering. What has happened to rural health? Rural health, hospitals are closing here; they are closing there. They are not closing by sectors. They are closing all over this country.

According to OMB's fiscal year 1991 budget, requiring that farmers and farm corporations with gross annual sales in excess of $500,000 are ineligible for agriculture payments will result in savings of at least $1 billion a year. So we know it is at least $1 billion, probably more.

In his opening remarks regarding the 1990 farm legislation, the able chairman of our Agriculture Committee, Senator LEAHY, emphasized the paramount importance of passing that which is not a budget buster. Those were his words: budget buster. I could not agree with him more.

Since I have come to this floor, I listened to a statement from the senior Senator from South Dakota, and he said one of the things that we have to do is make sure that the wealthy farmers do not get more than their share. Well, I agree with that. I think he should look closely at my amendment, as I hope the rest of the Senators and their staffs do, because I could not agree with Senator LEAHY more, nor could I agree with the senior Senator from South Dakota more, that we have to make sure that the wealthy farmers do not get more than their share.

In a July 16 letter from Secretary of Agriculture Yeutter to Vice President QUAYLE, the Secretary cites the cost of this act as excessive, and recommends that President Bush veto it should the cost of the act not be reduced. That is the act now before this body. I have taken this warning to heart, and I am sure my colleagues have, too. Let us begin with the first vote on the farm bill by lopping off $1.2 billion worth.

Barring agricultural payments for the wealthiest one-half of 1 percent of farms will not affect the supply of our food. As I have already pointed out, farm programs are not supply management programs. They are income support programs.

Should this group of approximately 14,000 farmers whose crop production is controlled by the Federal Government be barred from programs and begin to operate their farms differently, we could indeed have maybe an abundance of the goods covered by the farm program. This is what I am sure would be good news for Americans.

We hear so much, and I have heard it already here. I am happy to be one of those who says we have a very good supply of food in this country, but never forget one reason we have a great supply of food in this country is this country has been endowed with great natural resources—the greatest farmland in the world, great resource projects that help water those lands. We have so much here of natural resources that we should be the breadbasket of the world.

Well, I know many Nevadans, and I think every State that is represented in this Senate, would love to pay lower prices for the food they feed their families. Growers of commodities not covered by farm programs certainly do not flood the market with their goods. Why would they plant with no program? Despite the abuses by our agriculture programs, this year's farm bill contains many beneficial and admirable provisions.

I believe that if you look at the information put out by the Democratic Policy Committee, which summarizes the farm bill, some of the strides the Agriculture Committee has made in this farm bill are significant. It breaks the circle of poison by prohibiting the overseas use of pesticides banned from U.S. farm use.

The subcommittee which I chair held hearings during this Congress to deal with a number of those substances which are unhealthy: Alar in apples, cherries, and grapes. We have a tremendously difficult time making sure that that is no longer put on our apples, cherries, and grapes. It is not, but of course one of the loopholes is that farm products that are carried in this country, imported into this country, you cannot have Alar on them. I would really congratulate and applaud the Agriculture Committee from stopping this type of thing.

We held hearings on the use of fungicides and pesticides on our food production. Of course, we are doing a pretty good job here. We have great strides to make in eliminating the amount of these products that can be used on our domestic farm products.

But what controls do we have on those farm products that come in from overseas? We were going to have a series of hearings. The Agriculture Committee has beaten us to the punch, and I am very happy they have done that. It will save the Environment and Public Works Committee a lot of time because this bill makes provision to break the little circle of poison, and that is the right way to phrase it because it really is a circle of poison. Of course, it establishes the first ever "naturally, organically" grown label.

Again, our subcommittee, when we were going through some of the problems of fungicides, pesticides, Alar, we had a number of hearings about organically grown food. I can remember clearly the Commissioner of Agriculture from the State of Texas came in and explained a very successful program that has been initiated in Texas with organically grown food. I am glad to see the Agriculture Committee has also recognized the importance of organically grown foods, and the "organically grown" label.

I believe that protecting the safety of our food is one of the greatest responsibilities we have in the Senate. That is why I commend and applaud Chairman LEAHY and those members of the committee for working with these two very important areas.

We also have to recognize that there are very important provisions in this act designed to protect our precious wetlands, forests, and pastures. If it were not for land grant colleges and

agricultural research, we would not be producing what we do today.

So even though I am here, Mr. President, to talk about one-half of 1 percent of the farmers in this country, the wealthiest farmers in this country, 14,000 farmers to get $1.2 billion, I am also here to applaud and commend the Agriculture Committee, which did many farsighted things in this bill. I think they have done some outstanding things. I have listed six provisions of the legislation that I think are outstanding.

But it does not take away from the fact that the mission this body has here today is to save $1.2 billion for farms with gross sales in excess of $500,000 a year.

Remember, net cash income, as a percent of gross cash income to these farmers, is 40 percent. For the average American farmer the ratio is between 2 and 4 percent.

Why are we worrying about protecting these farmer fat cats? What we should be worried about is the true family farmer, not these huge corporations who are trying to control agriculture policy in this country.

The average American farmer ratio of income, net income as a percent of gross cash income, is 2 to 4 percent. Our agricultural program should be targeted to the struggling, disadvantaged farmer, and to ensure that this happens, I am offering and have offered today an amendment which has been cosponsored by several of my colleagues: Senators RUDMAN, CHAFEE, BRYAN, BRADLEY, PELL, and KERRY.

This amendment to the Food, Agriculture, and Conservation Trade Act of 1990 is a step in the direction of responsible farm policy, a step in the right direction to save this country money. My amendment will add a vitally needed means test to our country's agricultural ARP's. Farmers and farm corporations with gross annual sales of agricultural commodities in excess of one-half million dollars will not be eligible for direct farm program payments except for disaster and conservation reserve program payments.

In the letter from Secretary Yeutter and Vice President QUAYLE, which I cited, it was suggested that payment eligibility be focused on smaller farms, in order to reduce agriculture expenditures. I think that Secretary Yeutter is on the right track, as far as this goes.

Mr. President, this amendment should be supported, without question, because it will save the taxpayers dollars. It will lower our food prices by limiting price supports to the top, the wealthiest, fat cat farmers and stop subsidizing the millionaires. Remember, what we have is a free market economy. We have the countries of Eastern Europe wanting to adopt our free market system. Let us not show them the chapter about farm programs, because they are going to say, maybe we did not read the chapter, maybe we better take another look at it, because in a free market economy such as ours, there should be no multibillion-dollar- taxpayer-provided subsidies to the wealthy. We have produced more than enough food to feed the American people and a large share of people outside the American continent. It is estimated that, in 1988 alone, the overpayment of agricultural benefits caused food prices to increase by $10 billion. I urge my colleagues to join me in my efforts to restrict agriculture payments to farmers who are not really in need of it. I hope, Mr. President, that my colleagues here in the Senate will join me in this effort.

Mr. President, I have had people visit my office, well-intentioned people, who said, "Senator REID, you are not really going to offer this, are you?" I said, "Yes, I am." I said that I am because it simply is unfair to treat 14,000 people in this manner. It is unfair to treat them in that manner because it directly affects the consuming American public.

We have been reading a lot about Donald Trump's problems lately. One of the problems is he spent too much money on the Taj Mahal. There are people saying that Atlantic City is saturated. Maybe what we should do in Atlantic City is help Donald Trump in some way. If we are really interested in helping the wealthy, we should start with him.

Mr. President, I have seen good times and bad times in the economy of my State of Nevada. The good times come for a lot of reasons. There is a lot of warm sunshine, and we have a good tax base. But we have had bad times also, and we have not asked for Government subsidies to bail out the resort industry.

We cannot, Mr. President, treat farmers any differently than we treat other people. I have heard on this floor a lot of talk about rural America. Well, I was born and raised in rural America, and I can remember my father, who was a hard rock miner in good times and bad times. Sometimes there were no places for him to work. But there were no Government subsidies to bail out the gold mining business. There was not much gold.

So I think we have to recognize what we are doing here and not lose sight of the facts. We have to say, here is this policy and that policy and remember what you are doing. The act started back in 1935, and we have people hungry on the farms.

Mr. President, we are talking about one-half of 1 percent, 14,000 farmers, who take from the American taxpayer $1.2 billion. Why can we not support something like this? I am not asking to revolutionize the farm programs. I am not here knitpicking about a program that may not be hitting on all eight cylinders. I am here talking about one-half of 1 percent of the farm programs.

Mr. President, I have been supportive of farm programs in the past, but I am telling you I cannot support this, and I do not see how anyone else can—14,000 farmers, a small percentage of the farms in each State, having mass wealth. The average income is $700,000 for each one of these. How can we not support a program like this? How can we not agree to chop this off? How can we not agree to save the American taxpayer $1.2 billion? Because we, in effect, by passing this, will be writing a check to the American public for over $1 billion.

I yield the floor, Mr. President.

Mr. PRYOR. Mr. President, I would like to take this opportunity to commend the very distinguished Senator from Vermont, the chairman of the Agriculture Committee. Senator PAT LEAHY, working very closely with Senator LUGAR of Indiana, I think has shaped and fashioned a farm bill over the last several months, Mr. President, that I think is a very solid bill.

I have never voted for a farm bill that I was proud to go home and brag about. I think this will not be an exception. These are hard bills to put together.

Chairman LEAHY, in my opinion, who basically has very little to gain for his home State and the products that they produce in the State of Vermont, as a direct result from this bill, has probably put more time and attention into dealing with the concerns that each of the producing-State Senators making up that committee, making up the geographic terrain of this country, than any chairman that I have ever had the opportunity to work with.

It was a dedication. It was a commitment. There was never any question of ours that Chairman LEAHY resented. He was always available for us to bring our particular problems to him and to his staff alike.

Senator LUGAR also has worked in a very, very cooperative and expert manner in trying to fashion a bipartisan approach to a very, very complex issue.

The first thing that I would like to say, having commended our chairman and ranking member, is I think that we need to get something in perspective. The agricultural bill that we have before us this afternoon is a very, very complex piece of legislation. Many people love to critize the American farmer. They especially love to criticize the programs that help and aid not only the American farmer but more importantly the American consumer.

Mr. President, once every 5 years after the Agriculture Committee has assembled and worked its way through

many, many of these complex programs we then produce, each 5 years, a bill of this nature to guide the farm policies, to guide the farm economy, to make our statements to world trading partners as to what will be our Government's response in these very, very difficult times in the field of agriculture.

We do this, I think, with one person very, very high, at the top of our thinking process. We are trying to protect the American consumer. We are trying to give the consumer quality food, safe food, we are trying to keep down food lines, we are trying in every way that we can to have the best food program in the world, and we have achieved it. We have achieved it in spite of many of the difficulties and many of the onslaughts and many of the problems that some of these programs actually bring about.

Mr. President, this particular bill, the Agriculture Act of 1990, truly is a product, I think, of good people working in goodwill to fashion a meaningful and a workable program not only for the farmer but equally important for the American consumer.

I think it should be noted also, Mr. President, that this piece of legislation, though covering every State in the United States of America, is a program and is a commitment of our American taxpayer for less than 1 percent, seven-tenths of 1 percent of our Federal budget. Less than seven-tenths of 1 percent of our Federal budget is represented, Mr. President, in this very large and heavy package. Income support for the farmer, philosophically, traditionally, historically has never been a support program to make the farmer rich or even in some cases to make the farmer whole or to pay back his cost of production. What we are doing here is to attempt to stabilize food prices in America. That is the purpose of agriculture subsidies.

Let me be the first to say this: From time to time during the long history of the agriculture programs in our country, adopted by this Congress, there have been a few farmers who have abused these programs. I might add that some of those farmers have gone to jail, or are in jail, or perhaps might be in jail. So the system has a way of basically taking care of those abusers. But there have been abuses.

There have been abuses in the housing program in New York City, in San Francisco, and in Chicago. But because we find abuses, and because we find a few racketeers or a few people who are not as sensitive to obeying the law as others, we do not stop building homes, we do not stop subsidizing houses. We try in our own way to find a way to fashion legislation to help the American farmer, to also help the American consumer.

Mr. President, there is no Senator in this body that I admire more than my friend from Nevada, Senator HARRY REID. I will never forget his maiden speech on this floor when he was seated right here. I happened to be the Presiding Officer of the Senate. He talked about the need for a taxpayer's bill of rights. I sent a note down to his desk and I said, "Senator REID, I don't know if you know who I am or not, but I want to join you in that effort." Since that day we have been colleagues and comrades in arms, not only on that issue but I hope when this bill is over we will be comrades in arms on this issue.

I would, however, Mr. President, like to take a moment or two to point out the flaws in Senator REID's amendment. I think I can treat those flaws very quickly and I can talk to our colleagues very succinctly about those flaws and, hopefully, if there is due time, and I know the Senator from North Dakota, the very distinguished member of our committee, will be responding shortly after I finish in a few moments. I know he would like to make some points in addition to mine.

First, Mr. President, a means test, a means test as Senator REID's proposal would bring about: Let me, if I might, read to you the wording in the Reid amendment that has just been presented to the Senate. He talks about, on the second page sixth, seventh, and eighth lines, average amount of gross sales, not net sales, of agriculture commodities by the person during the 5 previous crop years if it is in excess of $500,000.

Senator REID's amendment sounds wonderful. It sounds just great for a very few percent of those farmers out there who are producing food and fiber for this country and also for the world's population. I think it really has a wonderful feeling to this amendment or wonderful ring to it, that we are going to take all this money away from those greedy money grubbers and we are going to give it to hospitals, or we are going to give it to health care, or we are going to do something like that.

Mr. President, let me just say if the Reid amendment would pass—I want our colleagues to think about this—if it would pass, 40 percent of all of the agricultural production in America would be immediately disqualified for farm assistance payments, 40 percent. I am not talking about 40 percent of the farmers. I am talking about 40 percent of the acres. If you take 40 percent of the acres of agriculture of all production in our country out of the farm programs, those farmers are going to be free to do anything they want to because they have to make up the difference.

What are they going to do? In 40 percent over all the acres in this country we are going to see the farmers double and triple their production. When this happens we are going to see ourselves once again spiraling not upward but back downhill, falling rapidly into the same crisis we are attempting to pull ourselves out of at this time. We are going to see massive overproduction. We are going to see massive decreases at the same time in farm prices. And we are going to see, for those remaining farmers in the program, the way the loan rates, the deficiency payments and everything else is structured, we are going to see payments that will exceed any and all expectations.

The means test is not going to work. It will bring a dramatic decline into farming.

The second point, gross farm income, that is what my friend's amendment says. Senator REID's amendment talks about gross farm income. Mr. President, I know farmers in my State—and by the way there are 900 farmers in my State who would lose all agricultural support payments if the Reid amendment would be adopted. All right.

In the State of Arkansas, Mr. President, I know of several farmers who make $1 million, $2 million, $2½ million in sales, in sales in gross sales. They lose money in their farming operation. That is hard to believe. Because what is not being accounted for is the cost of land and the cost of equipment that must be replaced. That is not factored into these considerations.

Mr. President, I respectfully submit to this body that the Reid amendment, even the concept of a means test, is a concept which I truly believe is faulty and I truly believe would bring a massive decrease in farm income and ultimate rural chaos. We are talking about the closing of hospitals that Senator REID has talked about it. He has engaged himself and committed himself to health care and a better system of health care. I have had the opportunity and the privilege of working with Senator REID on some of the issues that we jointly feel should become policy and should become the practice of our health care system.

Mr. President, most of those hospitals that have closed in the last decade in the United States have been rural hospitals. Most of the businesses that have closed in the last decade have been rural businesses. We have seen a rapid deterioration, a decay, a decline, of rural activity and we see a stagnation today of rural America which, if this particular proposal would pass, I think would rapidly accelerate that period of decline and stagnation. I suggest that this is only going to get worse.

Finally, Mr. President, one additional point, my good friend and colleague Senator REID has talked about taking all of this money and fighting disease

with it. I think that is wonderful. I would like to take a lot of dollars that we spend around here and fight disease with it. And I would like to say, Mr. President, with all due respect to my friend Senator REID, that the whole patchwork and the whole landscape of American agriculture is, once again, of looking at what would ultimately assist the consumer—a lower food price, a quality product that we not only can sell here at a reasonable price but overseas at a fair price.

These are not the only subsidies that we have going around. For example, Mr. President, in the Senator's own State of Nevada, in the Far West in this country, there are some other subsidies. All of those people in Washington DC, and in Arkansas, we do some subsidy in your State, I say to my distinguished friend. We subsidize the water. We subsidize western water. Are we griping about it? Are we trying to say that any farmer or any citizen who gets $500,000 a year in gross sales, that they are not going to get any more water, or that we are not going to subsidize any more water?

We subsidize grazing lands in the West. We subsidize grazing land in the Senator's own State of Nevada. Are we trying to say that we are not going to subsidize any more of this land? No, we are not making that response to this very, very difficult question because this is a question of basically a common approach dealing with cotton, corn, soybeans, peanuts, rice, sunflower seeds, wool, and you name it, Mr. President.

We have attempted in this legislation to take into consideration each and every concern, after hours of testimony, after days and evenings of debate, after really contentious sessions of how we have disagreed in some areas and finally have come to agreement in the overall concept of what should be the policy for the next 5 years, not only for the American farmer, but equally as important, as I have said before, for the American consumer.

Mr. President, I truly hope that this amendment offered, by Senator REID is not agreed to.

On July 19, my friend, Senator COCHRAN from Mississippi, and myself, along with 14 other Members of this body, sent to our colleagues a "Dear Colleague" letter outlining the flaws of the Reid amendment—although good intentioned, Mr. President, I might add once again—submitted to this body by a very dear friend of mine.

Mr. President, I ask unanimous consent that the "Dear Colleague" letter sent by Senator COCHRAN and myself on July 19 to our colleagues be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, July 19, 1990.

DEAR COLLEAGUE: You have undoubtedly received one or more letters during the last several days requesting support for further limiting farm program benefits in the form of "targeting", or a "means test." The adoption of either would be very detrimental to American agriculture.

Farm program opponents misuse farm cost and return data to characterize certain farmers as being among the nation's "largest and wealthiest . . . needing no program payments." It is interesting that gross revenues are always the measure used to determine "wealth" on a farm and the operator's need for program benefits. This is clearly an inappropriate and misleading yardstick since it measures revenues against only part of production costs. This excludes for example, fixed costs such as land, equipment and other capital replacement!

How can these important and substantial costs be excluded from a new return equation without distorting the conclusion? The only meaningful computation of net returns must take into account the full economic cost of production. Data from USDA show that, while most major crops have returns somewhat in excess of CASH expenses, they do not have returns sufficient to cover the full economic cost of production. These figures are U.S. averages for all farm sizes, but the same situation prevails for large farms as well as small ones as can be noted from the following excerpt from a June 28, 1990, letter from Deputy Assistant Secretary of Agriculture Daniel A. Sumner to Reps. Richard Armey and Charles Schumer:

"The percentage of farms in a vulnerable financial position (high debt-to-asset ratio and negative net income) is larger for farms with gross revenues above $1 million than it is for smaller farms. This suggests that the greater average net returns on the larger farms is associated with greater financial risk."

Don't be mislead by the net cash return figures that are being cited. Farmers have to pay for land and equipment if they expect to farm for more than a very short time. Unlike may business ventures, farming is very capital intensive, and requires a significant long term investment. In addition, large scale producers do not always realize an economy of scale.

As this issue is debated in the Senate remember also that supply and price stabilization is one of the more important objectives of farm programs. It is an objective intended not only to benefit farmers, but every American consumer of food and fiber. The desired stability can be achieved only by attracting a high percentage of agricultural production into program participation. This means that the larger farmers must be eligible for program benefits. Otherwise they have no incentive to comply with acreage reduction programs (ARPs) which are necessary to manage inventories and stabilize prices. Without program benefits, there would be a strong incentive for producers to put all of their productive acreage into production. This would impose even higher ARPs on the remaining program participants.

Over the life of the 1985 farm bill acreage reduction programs (ARPs) were as high as 25% for some crops. If a 25% ARP is needed under current program eligibility rules, a 50% ARP could be needed if program eligibility were denied to farmers accounting for half of crop output. This is too great a burden to place on program participants. The elimination of program benefits for certain farms could ultimately pose a great burden on remaining program participants. The implementation of a strict "means test" type program would cause surplus stocks to increase, prices to fall, and deficiency payments to increase significantly. As a result, farm income (for participants and nonparticipants combined) would fall, land values would drop, loan defaults would occur, and lending institutions would be adversely affected.

Workable farm programs that achieve the objective of supply and price stabilization and ensure an abundant supply of safe, reasonably priced food and fiber depend on a high level of program participation. This participation cannot be achieved by denying eligibility through a "means tests" or by making participation impractical by imposing further limits on benefits.

The Senate Agriculture Committee has worked very hard to report a bill which is beneficial to the American farmer, consumer, and conservationist. It contains essentially the same principles as the Food Security Act of 1985 which enabled a significant recovery for American agriculture. I urge you to defeat amendments that would destroy the effectiveness of farm legislation which has already proven to work well.

Sincerely,

David Pryor, Thad Cochran, John Breaux, Bennett Johnston, Bob Kerrey, Dennis DeConcini, Richard Shelby, Trent Lott, Wendell H. Ford, Wyche Fowler, David Boren, Howell Heflin, Bob Graham, Dale Bumpers, Jesse Helms, Slade Gorton, Pete Wilson.

Mr. PRYOR. Mr. President, I also ask unanimous consent that a table on water subsidies, a State-by-State analysis of those States that receive these water subsidies from the rest of us taxpayers, be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

WATER SUBSIDIES, A STATE BY STATE ANALYSIS

[In thousands of dollars]

	Amount of subsidy	Percent of total
Arizona	$5,503	1.03
California	329,182	61.62
Colorado	10,632	1.99
Idaho	25,165	4.71
Kansas	5,823	1.09
Montana	8,121	1.52
North Dakota	1,923	.36
Nebraska	24,791	4.64
New Mexico	4,648	.87
Oklahoma	53	.01
Oregon	7,052	1.32
South Dakota	3,633	.68
Utah	10,525	1.97
Washington	87,037	16.29
Wyoming	8,174	1.53
Wyoming-Nebraska	1,602	.30
Totals	534,300	100.00

COMBINED TOTAL SAVINGS FOR GRAZING ANIMALS ON GOVERNMENT LAND VERSUS PRIVATE LAND

(Includes BLM and USFS)

State	BLM	Forest Service	Total
Alabama		$16,791	$16,971
Arizona	$2,451,450	6,786,896	9,238,346
Arkansas		187,768	187,768
California	1,364,100	3,545,413	4,909,513

COMBINED TOTAL SAVINGS FOR GRAZING ANIMALS ON GOVERNMENT LAND VERSUS PRIVATE LAND—Continued

(Includes BLM and USFS)

State	BLM	Forest Service	Total
Colorado	2,572,000	12,487,289	15,059,289
Florida		142,196	142,196
Georgia		29,220	29,220
Idaho	6,486,450	9,867,960	16,354,410
Illinois		128,403	128,403
Kansas		239,359	239,359
Kentucky		1,662	1,662
Louisiana		146,220	146,220
Maryland		8,771	8,771
Minnesota		3,471	3,471
Mississippi		32,874	32,874
Missouri		209,082	209,082

Mr. PRYOR. Mr. President, I thank the Chair and I yield the floor.

Mr. COCHRAN addressed the Chair.

The PRESIDING OFFICER. The Senator from Mississippi is recognized.

Mr. COCHRAN. Mr. President, let me compliment my distinguished friend and colleague from Arkansas for his statement. He very correctly points out the inequities which could result if this amendment were adopted by the Senate.

Let me suggest right away that it has an appealing sound to it. Let us limit the payment of farm benefits to only the smaller farmers with a small level of gross receipts. But my first impression of the amendment is that it would be unfair because gross receipts do not necessarily translate into high profits. If you had a farm with high gross receipts, $1 million, for example; that does not necessarily mean that a producer will have any net income.

In the Southeast, Mr. President, farming is capital intensive and very risky. It requires a tremendous investment of energy, effort, and money in order to have a successful and profitable farming operation, particularly with cotton, soybeans, and rice and with aquaculture, catfish, as well. These types of farms require a great deal of investment.

Many of them are heavily indebted and have high interest payments to banks, the farm credit system, and others who are extending credit. A tremendous expense is incurred every year. So, to just presume, as this amendment does, that high receipts mean high profits is an erroneous basis for targeting benefits.

Let me say then what the facts are. Farm programs now account for only 0.8 percent of Federal outlays. The Congressional Budget Office estimates that the costs of these programs will fall as low as 0.6 percent in fiscal year 1991. Currently, under the law, program benefits are targeted. As a matter of fact, there is a $50,000 per person cumulative limitation on target price deficiency payments and a $200,000 per person limitation on marketing loan payments and other payments.

For a variety of reasons, farm program benefits are based upon production levels, not the financial condition of individual farms. For this reason, large farms tend to receive a disproportionate share of program benefits. For instance, the Department of Agriculture has indicated that in 1988 there were 30,000 farms, which is 1.4 percent of all farms, with gross sales of over $100,000. They accounted for 37 percent of the cash receipts from the sale of farm commodities and 8.4 percent of all direct Government payments. So, as a percentage of gross farm income, Government payments accounted for only 3 percent of these operations.

Government payments represented a much higher portion of gross income for farms with sales between $40,000 and $500,000. These program payments represented about 13 percent of gross income. So payments are already targeted toward the mid-sized farms.

The limitations on payments right now serve to manage the payments to large farms.

In conclusion, Mr. President, gross sales, is an inappropriate means of limiting payments, since a farm could have a very large gross sales but coupled with a very high cost of production, could result in a modest return or even a loss.

According to a study completed by the Department of Agriculture, debt to asset ratios tend to be larger for farms with higher gross revenues. The percentage of farms, therefore, in a vulnerable financial position is larger for farms with gross revenues above $1 million than it is for smaller farms.

If the current rules for targeting benefits were changed, Mr. President, to exclude larger farming operations from participating in Federal programs, this could result in extreme instability in the agriculture sector. In order to qualify for program benefits, farmers have to abide by the Department of Agriculture's regulations.

If, for example, we have a situation of oversupply where we are accumulating stocks and market prices are being depressed, the Department could require an increase in the amount of the set-aside required for program participants. The Acreage Reduction Program would be instituted in order to control production and to bring the supply nearer in line with the demand which exists so that prices can stabilize.

If a farmer is excluded from the program because he has gross receipts in excess of an arbitrary amount, he is not going to participate in the program and, at the same time, will not be governed by those rules of set-aside or acreage reduction. He will be on his own, to plant as much as he wants, to take advantage of the depression that exists in agriculture in other parts of the country. This may result in putting smaller farmers out of business. That is a prospect that is a result unintended which could come from an amendment of this kind.

I am from a rural State. Agriculture is very important, and is our major industry in Mississippi. Approximately 16 percent of Mississippi's farms which have gross sales over $100,000 would be ineligible for benefits if this amendment were passed. This would not only have a devastating effect on my State's farmers, but it would also have a devastating effect on the entire economy of our Nation's agriculture sector, Mr. President.

I urge the Senate to reject this amendment.

Mr. BAUCUS. Mr. President, I would like first to address the farm bill generally and make a brief statement on the pending amendment.

Mr. President, the 1990 farm bill as reported out of the Agriculture Committee is a disappointment.

The bill does have some strong points.

During the committee markup of the farm bill, my colleagues and I were able to include a number of valuable provisions.

These provisions include: an increase in the oats target price from $1.55 in 1991 to $1.85 by 1995; a change in the way the USDA will calculate barley deficiency payments that will increase producer income; a new program to encourage increased production of minor oilseeds including canola, rapeseed, safflower, and flax; a provision which will allow farmers to choose to increase or decrease ARP percentages and receive a corresponding increase or decrease in the target price level; a provision precluding the Secretary of Agriculture from using a whole herd dairy buyout program to control the supply of milk; authorization for continued strong trade promotion programs such as TEA and EEP; and a mandate to implement a marketing loan or an across-the-board EEP if the current round of GATT negotiations fail.

Mr. President, these improvements are necessary and are appreciated. But, it is rare that I can cite seven major provisions that I either sponsored or cosponsored and still oppose a bill. Unfortunately it is the case this time. Though this bill does move in

the right direction, it simply does not go far enough.

Mr. President, we must recognize that we are on the brink of a crisis in rural America. There are a number of warning signs that we are approaching a serious recession in the Farm Belt.

A recent study by the Congressional Budget Office concluded that farm income will decline by 21 percent over the next 5 years.

It went on to conclude that if the farm bill does not increase farm income over the current baseline, 500,000 farmers will be forced into bankruptcy in the next 5 years. That means that about one in every four farmers will be driven off the farm. An exodus that would dwarf the problems of the early 1980's. The basic problem is very simple. Target prices—the prices farmers receive for their crops—have been coming down and the costs of production have been going up. Farmers are caught in the squeeze.

For example, the wheat target price has declined from $4.38 to $4 in the past 5 years while production costs have increased more than 20 percent. Obviously, no farmer can survive those two adverse trends for long. To reverse these trends I believe this farm bill should have made real increases in target prices. Such increases are imperative so that we can continue to feed ourselves and much of the rest of the world. At the very least, the bill should have provided farmers with protection against inflation. That is why I pushed so hard in committee to index target prices to the CPI-U. My amendment failed in committee, and I, therefore, had to vote against reporting out the bill. I intend, however, to offer the same amendment on the floor.

My amendment will simply ensure that high levels of inflation will not erode farm income. It will provide a safety net for farmers against high inflationary costs of doing business. I urge my colleagues to support it.

I am also dissatisfied with the formula the bill contains to calculate barley deficiency payments. It is a step in the right direction, but it does not go far enough. The current system is grossly unfair. In calculating government payments, USDA assumes that farmers received far more for their commodity on the market than they could ever hope to get.

Either we should use the malting value of barley when calculating the target price for all barley and keep them combined when determining the market price for deficiency payment purposes; or we should separate feed barley from malting barley when determining the target price and when figuring the market price. This is the only formula that makes sense. Any formula short of this will continue to cheat feed barley producers out of high deficiency payments.

I believe that this bill should have provided relief to barley producers who are being forced to repay advance deficiency payments for the 1988 and 1989 crop years.

In conclusion, Mr. President, I have never been a doomsayer and I do not mean to be one today. The farm program has served this nation well over the last 50 years. The United States has consistently been the world's leading agricultural producer and exporter.

U.S. consumers have long benefited from the lowest food prices in the industrialized world.

Farm policy has worked and it will continue to work if we are willing to produce a fair farm bill. But if we are not, if we are more interested in pinching pennies than ensuring a reliable supply of high quality food, we will have serious problems. Farmers are the backbone of rural America. If the farm economy turns sour, we will see ghost towns throughout the Farm Belt and the American food supply will be severely threatened for the first time since the Great Depression.

Mr. President, I urge my colleagues to consider the implications of a failed farm policy and work to produce a fair and balanced farm bill. I hope we can produce a bill that gives the farmers of Montana and the rest of the Nation a fair shake.

Mr. President, I would like to say a few words on the pending amendment. I am frankly surprised that we are even considering this amendment. I am surprised because I know the author of it and I respect him highly. I have worked alongside the author many times on issues within the jurisdiction of the Environment and Public Works Committee. I have found him to be fair, solid and one of the most insightful persons in the U.S. Senate.

That is why I am so surprised that he has offered this amendment today. One of the problems with the amendment is that it focuses on gross receipts. Anyone who has run a business knows that the level of gross receipts often has very little to do with the profitability of the business. Some businesses require high margins, some businesses lower margins. So often a business with very high gross receipts has low profitability. This amendment, therefore, is flawed in its premise.

In addition, Mr. President, I might add that we already have a $50,000 payment limitation on most farm programs. This limitation is in place to protect against abuses. It has worked well in the past and I am sure it will protect against abuses in the future, as well. This makes no sense.

Finally Mr. President, the farm program is not a welfare program. It is a program designed to ensure a stable supply of food, and at the same time protect farm income. The amendment before us today attempts to turn the farm program into a welfare program. Such action is inappropriate and I reject it.

For these reasons, Mr. President, I strongly urge defeat of this amendment.

Mr. President, I yield the floor.

Mr. CONRAD addressed the Chair.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. CONRAD. Mr. President, I want to first respond to the amendment of our colleague from Nevada. I, too, hold our colleague from Nevada in high regard. He is, I think, one of the most effective legislators among us. But in this area, I must say I think he has made an error in logic. His argument is really fatally flawed because, on the one hand, while he repeatedly points out that it only relates to one-half of 1 percent of farmers, he does not point out that that one-half of 1 percent of our farm producers provide 38 percent of our agricultural production.

Mr. President, I simply direct the attention of my colleagues and the Chair to this chart that shows the distribution of farm sales. The last two bars related to the amendment of the Senator from Nevada. In these two categories, we have the farmers who produce over $500,000 of gross sales. As my colleagues can see, they produce 28 percent of our agricultural produciton.

What happens if the amendment of the Senator from Nevada is agreed to? Very simply what would happen, Mr. President, is that those small number of farmers who have a very large part of the overall production would dramatically increase their production in order to make up for the lost income. What would that do? It does not take anyone with a great mathematical background to understand if they increase their production, prices will go down and the result will be that subsidy payments to the other 99.5 percent of the farmers in America will go up.

This will not save the taxpayers money, Mr. President. In fact, the estimate that the Senator from Nevada has given is, I think, perhaps from an early USDA estimate which said that if you had this kind of limitation, you would save over a billion dollars. But you know what? USDA finally figured out what I have just pointed out; that if you, in fact, eliminate that one-half percent from the farm program who produce 38 percent of our agricultural production, they are just going to increase their production, collapse price, increase subsidies for everyone else.

As a result, USDA says the actual savings from this measure, if enacted in 1992, will be $150 million, not $1.2 billion.

No. 2, what would farmers do who are in this category who are targeted by the amendment of the Senator

from Nevada? Very simply, they would break up their operations so they would not lose their farm program benefits. They would break up their operations so that they would still qualify and, in fact, many of us believe you would find no savings at all.

So, Mr. President, while I believe this amendment is well intentioned, I do not believe for one moment that it would accomplish what the Senator from Nevada seeks to accomplish.

Mr. President, let me turn my attention to the overall farm bill.

I would first like to extend my congratulations and my thanks to the chairman of the Agriculture Committee, Mr. LEAHY, my fellow committee members and their dedicated staffs. The bill before us today represents literally months of hard work and difficult negotiation.

At the outset, I want to say that this legislation, as it stands today, does not achieve everything I wanted to accomplish in a 5-year farm bill. It is, however, an improvement over current law, and given the strong differences of opinion in the Agriculture Committee over the commodity provisions, the very heart of this legislation, this bill represents a remarkable compromise.

Again, I want to congratulate Chairman LEAHY and his staff for their excellent leadership.

As we begin our work on this bill, I would like to take a moment to briefly put the debate into a broader perspective. During recent months, we have heard a lot of heated rhetoric about farm policy. We have heard a lot of attacks. We have even heard some hostility directed toward the farm program, and we have also heard an enormous amount of misinformation.

One of the most frequent myths that we have heard is that the farm bill is anticonsumer, that it drives consumer prices up. I think we heard something of that from the Senator from Nevada. He said we ought to have lower prices. Mr. President, I think those who make that argument are simply misled, perhaps misinformed, because exactly the reverse is true. The food stockpiles that we build through our farm programs keep prices reasonable. In fact, Americans pay a lower percentage of their consumer dollar for food than any other people in the world.

I direct the attention of my colleagues to this chart that shows consumer spending on food in the developed countries of the world. This relates to those countries that have a gross national product something close to ours. My colleagues can see that at the very bottom is the United States. In fact, if we had a chart that showed every country in the world, we would find the United States enjoying the lowest food costs of any nation in the world.

In many African countries, people spend more than half of what they earn for food. Even with countries with a standard of living comparable to ours, such as West Germany, Japan, Sweden, Switzerland, people spend 16, 18, to 20 percent of their consumer dollar on food. In America, we spend just over 10 percent.

Even if we add the cost of the farm bill, Americans still spend a lower percentage of their consumer dollar on food, 10.7 percent, to be exact, than do the people of any other nation.

Mr. President, let me repeat that. Even when you add the cost of the Federal Farm Program, consumers in America pay the lowest consumer price for food of any nation in the world—in fact, of any nation in world history. In short, we enjoy the widest variety of wholesome food available anywhere at the lowest consumer cost in the world.

Why? Because for decades this country has pursued a deliberate and sensible policy of managing the country's food supply through a Federal Farm Program. We do not have to imagine what life would be like without a responsible Federal Farm Program. We need only look to the East. Look to the Soviet Union where people will wait in line for hours on the off chance that they might be able to buy a beat up piece of what might be beef. Look at East Germany. What did the first crowds pouring through the Berlin Wall want to buy? Oranges, fresh oranges. Look at Poland, where food riots broke out when the Government announced huge price increases.

(Mr. ROBB assumed the chair.)

Mr. CONRAD. Mr. President, look at Africa, where children die every day of famine brought on by terrible drought.

We had a terrible drought just 2 years ago. It wiped out nearly one-half of the entire harvest nationwide. Yet there was no famine in America, no riots, no panic buying, no food shortages, and no skyrocketing prices. We do not know what it is like to pay $1 for a loaf of bread on Monday and $2 for that same loaf on Tuesday. We do not have to wait in endless lines to buy most basic necessities of life, even in the middle of the worst drought in 50 years.

Mr. President, I can remember so well being in the Soviet Union and seeing people standing in lines around a block waiting to buy a piece of meat; waiting in lines around a block because there was a rumor that there might be some fruit available in a store.

I can remember so well being at a dinner engagement in which we were served a white, fishy-looking substance. I turned to my wife and said, "What do you think that is?" She said to me, "Why don't you try it?" So I took a bite, and it was pure lard—pure lard being served in the Soviet Union.

Mr. President, I think many times we do not know how good we have it, and yet we are now presented with an amendment, and other amendments, I am sure, to follow, that threaten what has been an American success story.

Mr. President, I told this story yesterday. I want to repeat it today. Just weeks ago we had a visitor in my home town of Bismarck, ND, from the Soviet Union. That person went to visit a grocery store in Bismarck. After he had walked up and down three aisles in that grocery store, he had to leave the store. He was so overcome by emotion at what he had seen that is available to the typical American consumer that he could not handle emotionally what he had seen.

Mr. President, it is unparalleled in the world what is available to the American consumer. It is unparalleled in the world the stability of our food supply. And we act at our peril when we talk about making radical changes.

Stable supplies of food at reasonable prices are absolutely essential to our political and economic security. That is why we have a farm bill. That is why Congress has approved new farm legislation every few years for more than half a century. Our farm programs work. One look at the shelves of any grocery store in our country proves it.

Yet somehow the national importance of the farm program gets lost in the rhetoric. Somehow the farm bill is portrayed as some sort of elaborate scheme to keep farmers in business. That is like saying we build powerplants so the guy who runs the generator can have a good job.

Of course, the farm program benefits farmers, but it also benefits consumers, wage earners, manufacturers, shippers, the American economy as a whole, and the people of a hungry world. The farm program means affordable prices for American consumers. It means food security and stable prices. It means processing and manufacturing jobs right here at home instead of in Japan. It means a healthy domestic industry, one of the few to create trade surpluses for the United States year after year. It means food stockpiles to help ease famine and malnutrition around the world. It means that 2 percent of our people who live and work on family farms can earn a decent living while they feed the Nation and the world.

I hope that as we debate the complex and often arcane details of this legislation, we will not lose sight of these larger issues.

There are a few other myths and misperceptions that have arisen in the farm bill that I think require a response. We have all seen newspaper articles that ask why should the Government support farmers but not plumbers or shoe store owners? That

is a fair question, a legitimate question. It is a good question.

The answer is simply this: Agriculture is not just another industry. No one has ever died because their faucet is leaking. No government has ever been overthrown because too many shoe stores went out of business. But many governments have toppled when the grocery shelves are bare, and people die every day because they have no bread. Famine is common in human history.

You cannot control drought, flood, hurricanes, hail, or any of the acts of God which can destroy a crop. But we have known since Joseph told Pharoah of his dreams that a wise government builds food surpluses. In fact, farm programs and food security have been the hallmark of advanced governments for centuries, from the ancient Egyptians and the Incas and the Romans, to the United States, Japan, Europe, and China today.

Few Americans realize that world agricultural production has been outpaced by consumption for the past 3 years.

Let me repeat that fact. Few people in this country understand and appreciate that for the last 3 years global consumption of food has exceeded production. We are consuming more than we are producing. Most Americans are not aware of this because the United States and other food-producing nations carry food reserves for just such occasions.

How many of us would be willing to depend on private corporations to store adequate food reserves? How many would trust the free market to pursue a food policy that deliberately keeps food prices reasonable so that even the poorest among us can afford food? That is the role of Government. When I hear people say, who have not been engaged in the considerations of this farm bill, that we are out here in a free market in world agriculture, humbug. There is not a free market in world agriculture. Our friends in Europe subsidize prices at three times world market rates for commodity after commodity after commodity. If the United States wants to retreat from the world agricultural trade war, we will lose that fight. What has been an American success story will be threatened.

Mr. President, it is very easy to come to this floor and score a few debating points.

But people need to think very carefully about what we are discussing. Food security in this country costs each American about 14 cents a day. That includes 2 cents a day for research on nutrition, food safety, new varieties of disease- and pest-resistant plants, environmentally neutral methods of production in biological control techniques for plant diseases and pests. Mr. President, 14 cents a day is not too much to ask to have a stable and secure source of food for our country and others in the world.

Another myth I would like to puncture is the idea that most farm program benefits go to wealthy farmers. We have heard that on the floor. We have seen it in the newspaper headlines. I would invite any of my colleagues to travel with me to North Dakota and meet these so-called wealthy farmers. I urge my colleagues to come with me on a tour of my State and talk about wealthy farmers.

Mr. President, my State, the most agricultural in this Nation, led the Nation in personal income decline last year. For the last 3 years we have led the Nation in outmigration. Where is all of this wealth flowing that we have heard so much talk about?

The most recent update from USDA's Economic Research Service indicates that farms with $50,000 or more in the net cash returns account for 20 percent of those receiving payments, 51 percent of sales, and about 60 percent of all direct payments received; $50,000 may sound like a lot of money. But net cash income does not translate into profit. Net cash returns do not account for personal labor, depreciation, and other fixed expenses. It also does not account for returns to management and investment.

Typically, net farm income is less than 50 percent of net cash returns, meaning that these so-called wealthiest farmers are those with net incomes of less than $25,000 a year. I can report to my colleagues in my State there are very few with net incomes of $25,000.

I wish I could take my colleagues today to farms that are grossing $500,000 a year that are on the brink of bankruptcy today, on the brink—$500,000 in gross sales and they have $525,000 of expenses, and we are talking about putting them out of business here today on the floor of the Senate.

Let me just say the $25,000 a year may be a decent living, but it certainly is not wealthy by the standards of almost any other industry. Farming is an extraordinarily risky occupation, one that requires enormous capital investment and experiences huge operating costs. How many small businessmen who clear $25,000 a year need to buy and maintain a $100,000 combine? How many can have their industry destroyed by a 15-minute hailstorm? Few jobs pay this little while calling for the management skills, the hard work, and the high financial risk of farming.

The need for a strong farm bill is clear. The outlook for farm income in the 1990's is sobering. A study by the nonpartisan Congressional Budget Office indicates that under a simple extension of the 1985 farm bill, if we just took the 1985 farm bill and extended it, net cash income would decline by 29 percent by 1995, and net farm income by 21 percent.

Mr. President, American agriculture is just recovering from the worst farm recession since the 1930's. Net farm income during the decade of the 1980's fell to the lowest level in real dollars since recordkeeping began in 1910, lower than during the Great Depression of the 1930's.

Mr. President, we have heard a lot of talk about record farm income. What they forgot about is inflation. Unfortunately, farmers cannot forget about inflation. Farmers are faced with inflation in everything they buy. Mr. President, just to make the point, I want to show this chart that shows declining net farm income, the U.S. average for the decade, expressed in 1982 dollars, so we are comparing apples to apples, oranges to oranges. This chart shows, Mr. President, that the decade of the 1980's was the lowest 10-year period for farm income since they started keeping records in the 1910's.

That is the backdrop upon which we write the 1990 farm bill. The farm depression pushed down the value of farm assets by $500 billion between 1981 and 1987; nearly 50 percent.

Mr. President, we have heard great consternation in the land about a loss to our economy of some $500 billion in the S&L crisis. And well that we should; $500 billion is a staggering sum. We not only lost $500 billion in the S&L disaster; we lost $500 billion of farm assets in the period 1981 to 1987. I have not heard much talk about it in the news media. I have not read much about it in the newspaper columns. But in 1981, we had farm assets of almost $1.1 trillion, and by 1987, the bottom had fallen out; we had lost over $500 billion in value down to $600 billion.

The farm depression also reduced net investment to agricultural plant and equipment into negative numbers throughout the 1980's as farmers were forced to live off of their balance sheets. Mr. President, this chart shows very clearly net farm capital investment, average per year, again expressed in 1982 dollars for consistency, 1970 through 1974, $3 billion net capital investment; 1975–79, nearly $4 billion net capital investment. But look at what happened in the period from 1980–84; a hemorrhage, a loss of $4.6 billion; 1985–90, another hemorrhage, $4.5 billion as these so-called wealthy farmers lived off their balance sheets.

Mr. President, I realize that budget constraints will limit our ability to address some of the needs of the farm program, but I believe the bill, as it stands before us, represents the absolute minimum budget commitment. Our traditional share of the Federal budget is 2.2 percent. In this submission we are at seven-tenths of 1 per-

cent, one-third of our traditional share of Federal spending.

Mr. President, we cannot discuss the farm bill merely in terms of domestic policy. The implications for international trade and global competitiveness are enormous. United States food processors and farmers face an aggressive trade war and rigid trade barriers from our competitors in Europe, Japan, and other nations. While the European Economic Community has been carefully protecting its producers in aggressively going after world markets, we have sharply reduced support for agriculture, down 25 percent in real terms since 1981.

Let me give my colleagues just a few examples. The Europeans subsidize the sunflower to the tune of 28 cents per pound. We do not currently support our sunflowers at all. They support soybeans at $15 per bushel, compared to $4.50 here. They support wheat at $5.60 a bushel, compared to $4 here; and corn at $5.20 a bushel, compared to $2.75 here.

Moreover, the European Economic Community spends about $10 billion a year to dump surplused subsidized grain on world markets.

Our farmers are efficient and productive, but they cannot hope to compete against those overwhelming subsidies. Do not think for a minute that the Europeans are subsidizing farmers for the farmers' sake. The EEC's supports are designed to capture markets, to provide millions of jobs in food processing, and they have succeeded.

In just 15 years, the European Community has gone from being one of the largest importers of foods to being one of the largest exporters. Meanwhile, our food industry is shrinking. Twenty million Americans worked in the food industry in 1975. Today there are 18 million. We have lost jobs because we have lost agricultural production. We are also losing export markets. Today our trade surplus in food products stands at $16 to $18 billion, down from $26 billion in 1980.

If we fail to provide adequate support levels for agriculture, we will be throwing down our weapons in this trade war and inviting the Europeans, Canadians, Australians, and all of our other competitors to walk in and take over these markets. Is that what we want?

Of course, I believe American agriculture would do very well in a truly free global market, but that market does not exist. If we continue to reduce argiculture supports, while our competitors continue their aggressive trade policies, we will lose.

Let me discuss for a moment some of the specific provisions of the bill before us. As I said earlier, this farm program does not do as much for farmers as I would like. We fought to raise target prices and loan rates to partially insulate agriculture from inflation, but the majority of the committee disagreed. I will not hesitate to propose raising target prices again.

This compromise bill does, however, stop the sharp decline in target prices. It offers our producers more opportunities and more flexibility to make intelligent business decisions than the rigid provisions of the 1985 farm bill did.

This bill provides much greater income protection for producers of oilseeds. For the first time, the farm program will provide an underlying level of income protection for producers of oilseeds. This provision is critical if the United States is to be successful in competing for market share in one of the fastest growing food markets in the world.

U.S. producers have also lost oats production and market share even as the demand for oats has risen in the United States. Under the 1985 bill, we have become major importers of oats. This legislation raises the support level for oats in 10 cent annual increments until $1.85 is reached in 1994. This is a plus for our farmers and our trade balance.

The legislation corrects an inequity in the calculation of the barley deficiency payments. It limits the impact of unusually high malting barley prices on the calculation determining feed barley deficiency payments. Under this legislation, the Secretary may not include malt barley prices in excess of $0.22 above the feed barley price for determining the national average price of barley.

This will cushion against a repeat of 1988 and 1989 inequities, when malt barley prices averaged $1 or more above feed barley prices because of the drought, raising the average barley rice and virtually eliminating the deficiency payment for feed barley. Feed barley producers who received low market prices were denied deficiency payments because of the high price of malt barley.

Farmers are not only given more flexibility in what they can plant, they are given the opportunity to design their own farm program by selecting levels of set-asides which fit their farms. Under the Targeted Option Payment Program [TOPP], farmers may increase their set-asides—up to 15 percent for wheat producers and 10 percent for feedgrains producers—and receive an increase in their deficiency payments of 0.5 to 1.0 percent for each percentage increase in set-asides. Farmers who wish to lower their set-asides can do so by accepting a lower support level. This flexibility helps all farmers and is supported by North Dakota farmers.

This bill also makes some progress in modifying the conservation provisions known as swampbuster to make them fairer to farmers. In spite of the improvements, I strongly feel that the changes did not go far enough and I voted against the conservation title of this farm bill. I continue to believe the swampbuster provisions are unreasonable and unfair, and that the penalties are far too severe.

However, there have been some improvements. Producers can now work with the Soil Conservation Service to determine whether draining nuisance spots will have a "minimal effect on wetland values" and whether or not mitigation will be required to offset the loss of minimal wetland values. In addition, first time violators of the swampbuster rules are subject to less draconian penalties than in current law. This is progress over the 1985 bill.

This bill also establishes a nonprofit corporation, the Alternative Agricultural Research and Commercialization Corporation [AARCC], to promote new uses for agricultural commodities like soybean oil ink, biodegradable plastics, and red dye from sunflower hulls. AARCC will provide research grants for the development of new industrial uses for agricultural commodities, and business financing and technical assistance for the commercialization of these products.

Senator HARKIN and I have worked on this legislation for 3 years. AARCC is designed to bring some of the amazing technological discoveries our agricultural researchers have made, and will continue to make, to the marketplace.

The renewable resources of American agriculture represent some of the brightest hopes we have for solving pressing environmental problems. We can replace products made with precious, nonrenewable fossil fuels with the renewable resources of American crops. We can diversify our rural economy with new jobs and new industry. We can open up new markets at home and overseas. That is what AARCC is aimed at, and that is what gave this bill such strong bipartisan support in the Committee on Agriculture. I want to thank Senator BOND, in particular, for his strong advocacy on this issue.

This farm bill contains many provisions from legislation I introduced, S. 2634, to extend and improve Farmers Home Administration's [FmHA] programs. My legislation was developed from testimony I received from seven hearings I held on the agency since early 1989.

It includes a program to return FmHA to its proper role of providing supervised credit to beginning farmers, and financially troubled farmers. The agency has strayed from that role. It is necessary for FmHA to again increase its supervision in order to meet its mission: Providing short-term credit and assistance to beginning and financially troubled borrowers, enabling them to build the skills and

equity they need to build a successful farming operation.

The administration had expressed its intent to reduce reliance on FmHA by implementing mandatory borrower graduation and a sharp reduction in direct lending. The compromise bill does not take this course.

This bill provides a systematic program of borrower training in financial and farm management, increased training of FmHA employees and county committees, and more frequent review of borrowers' financial status to discover and resolve problems early. FmHA is required to plan for a borrower's graduation from FmHA credit programs from the day the borrower receives his first loan.

These provisions should insure that FmHA makes good loans and properly oversees those loans. It also insures that borrowers receive the assistance they need to graduate to private credit.

Further, the bill gives beginning farmers preference in purchasing of FmHA inventory property. It also corrects problems which arose from the implementation of the Agricultural Credit Act of 1987, and clarifies congressional intent. I believe this bill contains reasonable solutions which will prevent abuses to the act, while still serving legitimate borrowers. While I am not entirely satisfied with these provisions, I appreciate the effort that members of the committee have made to reach this compromise.

I am deeply concerned about FmHA direct loan funding. This bill shifts funds from the Direct Loan Program to the Guaranteed Loan Program. Interest rate reduction assistance is required on the funds shifted to guarantees. FmHA is encouraged to subsidize interest rates on guarantee loans by up to 4 percent. This change, along with FmHA's commitment to increase lenders' and borrowers' use of the program, should increase the number of borrowers who qualify for private credit with FmHA guarantees.

The shift in funding from FmHA's direct to guaranteed lending mandated by the committee is a very large cut in the Direct Loan Program. It is my understanding that this shift is intended by the committee to be taken from appropriations levels based on the Congressional Budget Office's January 1990 baseline. The use of interest rate reduction assistance on such loans will enable some farmers to qualify for guaranteed loans.

However, interest assistance alone has not, in the past, helped all farmers make the transition to guaranteed loans, as the General Accounting Office and other organizations have testified. Such a sizable shift from direct to guaranteed loans, according to the experts, cannot be accomplished without denying credit to some farmers. Already, FmHA direct loan funding has been slashed by two-thirds—from $4.9 billion in fiscal year 1985 to $1.6 billion in fiscal year 1990. Further cuts, beyond those contemplated here, would undermine the basic mission of the program.

Farmers face extremely high real interest rates today. In many areas of the country, farmers have experienced several years of natural disasters, including droughts followed by floods. Tens of thousands of farmers depend on FmHA moderate interest rates to get them through difficult times. Young farmers depend on FmHA to help them start farming. There will continue to be a strong demand for FmHA direct loans. It is my hope that adequate funds will be made available to meet this demand.

Let me repeat that I do not think this bill is enough, but it is the most we can do in the current budget situation. It does not accomplish all that I believe is needed: It falls short of the bill that I introduced with Senators KERREY, EXON, HARKIN, and DASCHLE.

However, given the severe budget pressure, in my judgment it was more important to move quickly with the best possible package. In particular, the bill is a significant improvement over current law and the version of the 1990 farm bill passed by the House Committee on Agriculture.

I also believe that the AARRC Program to commercialize new industrial products from agricultural commodities will have positive long-term benefits for agriculture. Finally, passage of this bill should help us achieve more favorable trade terms for American agriculture and food processing businesses.

In closing, allow me to remind my colleagues that the farm bill is important to every citizen of this Nation. It is very easy for my urban colleagues to attack the farm program. It is easy for them to tell their constituents that agriculture spending is wasteful or wrong-headed. But they should know better. They should know that if they gut the farm program, they will have to tell their constituents why food prices are rising, why we are losing American export markets, and American jobs, to foreign countries.

I urge my colleagues to resist the easy rhetoric. I urge them to do what responsible governments have done for thousands of years: Enact a careful sensible farm program to protect our country's food security and international trade position for the next 5 years.

The PRESIDING OFFICER. The Senator from Missouri [Mr. BOND].

Mr. BOND. Mr. President, when any bill with some length and complexity comes to this body from a committee of original jurisdiction, it is clear that there are many questions that colleagues need to ask. And the members of the committee ought to be willing and able to explain why the various provisions are in the measure and what has brought about the need for the measure.

Frankly, with respect to the farm bill, it is something that affects all of us. We have to have the food every day; almost all of us have some form of agriculture; most of us have a diversity of agriculture in our States. Despite all of the uncertainties, we know from childhood that which farmers face—drought, flood, pestilence, interest rates—probably the greatest complexity that farmers face and the most difficult, is in understanding and working through the Federal Farm Program. I believe that in this instance, as in many others, there are basic misunderstandings about the nature of the Federal Farm Program and what we are trying to do here today.

Personally, I feel that the amendment before us is based on a misunderstanding of what it is the farm bill is doing and what it proposes to do. I believe that those problems and the shortcomings in the amendment have been addressed by my colleague, the Senator from North Dakota, and before him, the Senator from Montana, and the Senator from Mississippi. They have laid out some of the basic reasons for the farm bill which are inconsistent with the amendment that has been introduced.

Today we have before us what I think is basically a good bill. I want to commend our chairman, Senator LEAHY, and our ranking member, Senator LUGAR, for their great leadership in bringing this bill to this point. Together the two men have been able to bridge some very wide gulfs.

It has not been an easy task. It took many hours in committee and in backroom sessions, in prayer meetings, and extended discussions, where we came together to produce a bill that we could bring to the floor. It is a special day, and it is one which we have looked forward to. Some of us wondered whether we would reach this point.

As we bring this forward, we have to answer some questions that are popular in many circles. Why is a farm bill necessary? Well, agriculture is crucial to the U.S. economy. From farm to retail, it is America's largest industry. Food and fiber accounts for more than $800 billion in assets. Agriculture exports are one of the few bright spots in U.S. trade. Every dollar in these export earnings generates another $1.50 in downstream economic activity.

What is more, when our competitors rely on import restriction subsidies and unfair trade practices to protect their domestic markets, we have to take action in response to protect our farmers. Even as farm numbers decline, as they have in recent years, re-

ceipt productivity increased. One farmer now provides enough to feed 113 people. The Federal Government has come to be involved in agriculture since the 1930's. The goal remains the same, to balance the needs of farmers with the public's expectations of a safe, abundant food supply at reasonable prices.

The health of the general economy, of course, is vital to U.S. agriculture, and the health of our agricultural sector is vital to our economy. As we debate the farm bill, it is important that we have sound fiscal and monetary policies to assure rural America of affordable credit, employment opportunities, and continued strong demand for agriculture products.

High inflation and high interest rates remain a major concern for the agricultural economy. Failure to reduce the Federal budget deficit will stifle that fragile recovery now underway in agriculture. That is why, even though we present on the floor today spending under the guidelines, operating guidelines of the CBO, OMB baselines, we know full well, if there is—and we hope there will be—a summit agreement reached, which will bring down that deficit to lower interest rates and to keep our economy sound.

There will undoubtedly be some additional costs imposed and some additional reductions made to the farm programs. We understand that because agriculture will benefit from the lowered interest rates and the sound economy. We also realize that agriculture has a very important role in the world market and that is why the GATT agreements are so important.

I believe that we who are concerned about agriculture and all of us who follow agriculture or depend upon it should be thankful for the leadership role that President Bush played at the Houston summit in bringing foward the need for the developed countries to take the lead in getting rid of unfair trade subsidies and agricultural surpluses.

The European Community is currently spending about $97.5 billion on agriculture. That is the price of the subsidies, of the dumping subsidies, of the production subsidies. You get $16 to $18 for a bushel of soybeans in tne European Community. In our country people would be growing soybeans in window boxes if they got those prices. No wonder they have surpluses to dump in the world market. When they dump those surpluses they take sales away from American farmers. Yes, we do have a long-term goal to get back to that free market. We have a long way to go to get there and until we do we cannot leave the American farmer without protection.

That protection is the thing that drives the cost of the commodity programs. We have seen that CBO baseline estimates outlays for this year at about $7 billion. Much of that is needed to counter the subsidies of our competitors. But let us recognize that those figures are down 71 percent since the 1986 high of $25.8 billion, and at a 25 percent reduction even from the actual 1988 spending. Agriculture has been hit hard by sequesters in 1987 and 1989. A total of $4.1 billion in savings was generated.

Now we have heard, and probably will hear, some very moving statements and speeches about how we ought to increase target prices for agriculture, increase the levels of marketing loans. Unfortunately when we talk about those grand and glorious goals we overlook the fact that we have to operate within budget constraints even before the summit agreement. We should not be promising what we cannot produce.

We have worked long and hard with the administration, with the staffs of both the minority and majority to come out with the best deal possible we could put together for agriculture. We feel that freezing target prices is the best that can be achieved without busting the budget, which no one is going to accept in this time of tight constraints.

The good news is that target prices and Government payments are not the only solution, however, for putting revenue in farmers' pockets. We are moving toward a market economy where farmers can get their returns from the marketplace. We are on the right track.

The Food Security Act of 1985 has been a success. It has moved us in the direction of more market orientation. It has reduced the financial stress within the agricultural sector. It has restored our international competitiveness. It has reduced commodity surpluses. It has improved the food stamp program. It has added new conservation benefits and decreased soil erosion significantly.

Under the 1985 farm bill we see land values once again beginning to increase. Total gross cash income less cash expenses from farming has increased to $47 billion from $27 billion in 1985 to a projected $49 billion in 1989. Net farm income is rising from $32 billion in 1985 to a projected $49 billion in 1989. Deflated in 1982 dollars it is still a 30 percent increase. Debt to asset ratios have fallen. Export values increased commodity reserves have been reduced. We have implemented a conservation program. Conservation compliance plans on 140 billion acres will reduce erosion by more than 1.4 billion tons annually of soil.

I believe the committee bill builds on this sound foundation. The key elements of the compromise that we passed provides first for flexibility. As we have talked about the farm programs with farmers in my State, we find a greater need for flexibility. Farmers want to be able to plant for the market rather than for the farm program. Under this bill that has been reported out of the committee, producers can plant other program crops, oilseeds, and experimental and industrial use crops on up to 25 percent of their crop acreage base.

There is the targeted option program which would increase or decrease the acreage reduction set aside in exchange for an increase or reduction in target price. Producers can plant oilseed or experimental crops on up to one-half of required set aside. Zero certification allows producers to forgo planting any acres on which they have a base, protect their historic crop acreage base, and have freedom to plant another crop which would not be eligible for the Federal target prices or marketing loans.

A very important element in this bill is to provide a marketing loan for oilseeds. This is critical for oilseed programs.

The United States has been squeezed out of the world market for soybean oil and Sunflowers and other oilseeds. Since 1979 our share of the world's soybean market has fallen from 84 percent to 64 percent. U.S. production has fallen by more than 9 million acres since 1979 while foreign production has increased 68 percent over the same period. Brazil and Argentina have increased production by 116 percent. If that trend were to continue, by 1999 Brazil and Argentina will plant more acres to soybeans than the United States.

The committee's marketing loan program will ensure that the United States can compete against the subsidies of the European Community and improve the current gap between the program crops. That and the flexibility provided in this program are going to enable soybean and other oilseed producers to recapture the American share of that very important market. While CBO estimates have changed, the provision currently is estimated at either $49 to $125 million over 5 years, but I believe that this is acceptable for a crop which has the exports associated with it, over $500 million a year in exports from Missouri alone.

Another area that is very important in this bill is one in approving the grain quality standards. There was concern raised in the 1985 farm bill that at the time it was concluded there was not sufficient information to determine what was available on the existence, nature, and seriousness of a grain quality problem on the world market. I personally and many of my colleagues talk about anecdotal evidence, stories told us by purchasers of grain abroad who say that American grain does not measure up to the quality, to the standards, of that shipped from other countries.

The Office of Technology Assessment has completed a study on grain quality last year. They found out that the results showed that improvements must be made. Buyers today not only factor price and supply into their decisions but quality. If we do not do something about it we are going to lose markets, we are not going to be able to maintain the markets we have.

The bill passed out of the committee includes a modified version of legislation introduced by Senator DASCHLE and myself last year which adopts provisions that relate to grain standards and the operation of commodity price support programs. We believe this is an essential step to assure that American farmers maintain their rightful place in the world market.

In addition, this bill reauthorizes key export programs and I think makes some very important improvements in Public Law 480, our primary food donation program, Food for Peace. It encourages the long-term planning with a goal for identifying growth markets and reauthorizes credit guarantee programs, the Export Enhancement Program, and the Targeted Export Assistance Program, which has been renamed the Marketing Assistance Program.

We also continue our very important commitment to the environment. This has been a major concern in my State. Several provisions from the bill I introduced earlier this year, the Agricultural Conservation Research and Enhancement Act of 1990 have been included. It broadens the scope of the conservation reserve program. It reauthorizes the program through the 1995 request for a 140-million-acre floor.

It provides new incentives for planting trees, particularly hardwood trees.

It requires a study of options for land coming out of the conservation reserve, now renamed the Environmental Conservation Acreage Reserve or ECARP; certainly not a very pleasant name but at least one to make it stand out from the other acronyms that we use around this place.

There is a new wetlands reserve program; new flexibility in offsetting compliance; a new integrated management program; and important changes in the swampbuster provision—similar to a bill introduced by Senator BOSCHWITZ and myself.

It expands on the minimal effect determinations, where farmers can, if they have a nuisance spot, farm that land without being penalized.

It establishes a new category of minimal effect where mitigation will be permitted. Where a farmer has a pothole in the middle of the field and cannot farm that field efficiently and economically, under certain circumstances, with the approval of the county, ASCS can commit that land. It can be committed on a one-for-one basis by bringing back prior converted wetlands of similar value and same size in that area. This is an essential step for efficient farming.

It also provides a graduated penalty rather than imposing a total forfeiture of all program crop payments.

In my State, one farmer lost $37,000 because of an inadvertent planting, on a wetland of one acre, a nurse crop that was found to put him out of compliance. Now the penalties can be graduated to the severity of the infringement.

On the conservation side, it improves the situation because the determination is triggered at the drainage rather than the planting.

Paperwork reduction is included in the bill. Paperwork reduction, that is for farmers not for Members of the Senate.

The bill that we have reported out has 1,081 pages and a report of 1,282 pages. It weighs 6 pounds, 2 ounces. Perhaps we can adopt an amendment on paperwork reduction that would limit the farm bill to 100 pages.

In any event, I hope that we can pass a bill on the floor of this body with strong bipartisan support. It received that support in the committee.

Farmers want and deserve a bill. I think that we have made many good strides in this bill. There should be some changes. I will support changes.

I hope that we can continue to work and make sure that agriculture is well served by our 1990 farm bill. I do not want to see efforts weaken the bill. I do not want to see a 1-year extension. I believe that there is too much uncertainty in agriculture today and a 1-year extension just heightens that uncertainty. It puts us at the mercy of the negotiations in Geneva. It adds too great an uncertainty as to what we would ultimately adopt for farmers. I believe the farmers deserve a 5-year bill. I intend to see that they get one.

Again, Mr. President, I commend the chairman and the ranking member for their leadership and their perseverance in bringing the bill to the floor.

Mr. DECONCINI. Mr. President, I rise today in opposition to the amendment of my distinguished colleague and friend from Nevada, Senator REID, which limits payments to farmers who have gross annual sales over $500,000. An adjustment of this magnitude will seriously impair the effectiveness and the equity of farm programs.

The Agricultural Committee, as the distinguished Senator from Missouri has just pointed out, has worked for a long time to mold something that can be brought to this body as a bipartisan farm program, something that does not attack different sections of the country.

I have looked at this bill, Mr. President. Quite frankly, some of it has no bearing whatsoever on the economic condition of the West or the Southwest. Some of it deals with peanuts and sugar and things that we do not deal with. Yet you will not see this Senator out here offering amendments to undo what the Agriculture Committee has worked on for so long. The Committee has brought a farm bill to this body which recognizes the economic importance of agriculture, even in areas that are outside our own selfish interest and our own constituent interest. The Agriculture Committee should be commended for its hard work to report a bill that is responsible. The pending amendment will destroy the effectiveness of farm legislation which has worked and will work well.

Mr. President, the use of gross annual receipts is not the best measure for control of farm programs. It is not an accurate representation of annual profits, nor is it a measure of wealth or how well a farmer is really doing.

Mr. President, it is a well-known fact that the majority of American farmers, including many of them in Arizona, have income off of their farm. In Arizona, even some of the wealthy farmers, their wives teach because they want to and in some cases they teach because they have to, or they work in other places or they have other income.

If you look no further than what the distinguished Senator from Nevada has proposed, you may conclude that any farmer who makes more than $500,000 a year gross income, has got to be a very wealthy person. Such figures are certainly within the upper levels of American income. But a farmer has to pay a great deal of money in order to farm in Arizona and other Southwest States. It is high-priced land now. They have to buy equipment. They have to buy supplies. They have to spend a great deal of money for maintenance of that equipment and distributing those supplies.

Agriculture is a unique industry. American farmers have significant long-term expenses that one does not see every yaer but must be paid over a very long period of time.

Western farmers are big business, Mr. President. In an average year, over 75 percent of the cotton farmers in Arizona exceed the proposed limitations based on gross sales. Those farmers are highly efficient. They are productive operations. On an average 260-acre farm in Arizona, a cotton farmer spends over $233,000 just in growing that crop. The major share is the cost of water. So the farmer has to pay taxes, has to pay for machinery, and has long-term expenses for that total farm or that 260 acres, not just to grow that central crop.

Particularly in the West, and increasingly throughout the country, we are encouraging our farmers to diversi-

fy. In Arizona, it is not uncommon for a cotton farmer to raise cattle and to grow a mixture of program and nonprogram crops. Diversification makes good economic sense and it makes good environmental sense.

The bill reported to the floor by the Agriculture Committee encourages diversification. Diversified farms, Mr. President, have high gross receipts. They are high cash flow operations. It just does not make sense to have a farm bill encouraging diversification on the one hand, and penalizing the efficient farmer trying his very best to respond to that legislation on the other hand. That is what this amendment does.

This amendment contradicts what this farm will is trying to accomplish which is to put this Nation, into a prosperous, more effective, productive farm program.

Under this amendment, the most productive farmers will be punished. Mr. President, this is not equity.

There is more to this issue than who gets benefits from the Federal Government's Farm Program. If large producers are not participants in farm programs, there would be no incentive for them to comply with acreage reduction programs. These programs are necessary to stabilize prices and manage our agricultural inventories. If farmers do not participate, they will be forced to plant all their acreage and increase their efficiencies just to cover expenses. The result will be an increase in production of surplus crops, prices will spiral and make it even harder for the United States to participate competitively in world markets. A workable farm program requires a high level of farmer participation. This amendment will discourage participation from those that most need to be in the program.

Senator REID argues that his amendment will save Federal taxpayer money. I would argue that it will cost the taxpayer money. As my farmers in Arizona dramatically increase their production of cotton, the world price of cotton will plummet. The cost of the cotton program for those farmers continuing to participate will also dramatically increase.

Rather than finding more money to pay for needed health care programs, as the Senator from Nevada wants to do—and I support that very admirable position he has taken as to spending more in health care programs—we will really have less money.

I urge my colleagues to look at this farm bill and this farm program as a united effort, one that continues to apply throughout the land. We ought not be here hacking up one person's farm program and trying to penalize somebody because their farming is different than in some other part of the country.

PRIVILEGE OF THE FLOOR—S. 2830

Mr. DECONCINI. Mr. President, I ask unanimous consent that Robert Breazeale, a legislative fellow acting as a legislative assistant in my office, be accorded the privilege of the floor during consideration of S. 2830, the Food, Agriculture, Conservation, and Trade Act of 1990.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOSCHWITZ. Mr. President, I rise in opposition to this amendment. I notice in the historical highlights of agriculture in Minnesota that in 1987, which is the last year that count was made, 860 farms that have annual volumes in excess of half a million dollars. In 1969 there were 47 such farms and the number has increased quite rapidly in recent years. There are now 860 such farms. It is not a large part of my constituency.

It is not unlike the national farm picture. We have about 100,000 farms in Minnesota; somewhat less than 1 percent have a volume in excess of half a million dollars.

It is not a matter of trying to protect a large constituency, but it is a matter of trying to apply some common sense to the amendment.

It is quite clear to me, in the event we pass such an amendment, fathers and sons and daughters who work together on many farms throughout Minnesota will simply break up the farm into parts in order that the amendment will not apply to them. That has happened in other regards in the farm bill. So the amendment will not have a meaningful impact.

As some of the other Senators have mentioned also, it is not clear to me why this number was chosen because it may not have any relationship to net income. It may have no relationship to need. And, certainly as the Senator from Arizona pointed out, in the event you exclude these people from the farm program, their only option will be to plant fence row to fence row, throw on some more fertilizer and chemicals so they increase production, and try to make it back by sheer volume. That will have, certainly, a negative impact on the farm program in other areas.

Other businesses certainly and other programs certainly do not have these kinds of limitations. I think it would be wrong to have this kind of a limitation in the farm bill. It really does not have any meaningful impact. Certainly the types of aid that the western farmers, where the Senator from Nevada is from, receive by way of water benefits; they, too, should be part of this? But they are exempted from it because those are not payments in the normal sense of the word.

This is not an amendment that has equity on its side. This is not an amendment that will achieve much by way of results.

I would say, if the Senator from Nevada looks at the chart that shows the distribution of Government payments—again 1987 is the most recent year we have figures for—it shows the payments by the Federal Government do indeed hit where we want them to hit and that is the family farm.

If we look at the production of farms, we will see that those farms with gross sales over half a million dollars do about 38 or 39 percent of the total volume and receive only 9 percent of the total farm payments. Most of the farm payments are in the middle section of 50,000 to 250,000 annual volume and that is where they should be. Those are the family farms. Those are not the large corporate enterprises, many of which are out in the Senator's part of the country.

So I respectfully oppose this amendment on the basis that it will not achieve the desired ends. It may, indeed, have an unsettling element to the entire farm bill and, therefore, I encourage my colleagues to vote no.

The PRESIDING OFFICER. The chair recognizes the Senator from Vermont [Mr. LEAHY].

Mr. LEAHY. Mr. President, I do not know how many other Senators may want to speak on this issue. I certainly do not want to cut anybody off, but there has been a very good debate on this amendment. We have heard the issue propounded. I hope we might get to a vote soon.

The proponent of the amendment is on the floor. I understand he does want to say something further. The distinguished Senator from Arkansas, who has spoken on this, wishes to, I understand, say something further. The distinguished Senator from Minnesota has just spoken.

I keep getting questions from Senators who are holding committee hearings and other meetings, when we might vote. Mr. President, I would like to ask the distinguished Senator from Nevada [Mr. REID] if he has some idea, for scheduling purposes, when this may come to a vote simply so we could let others know. I am not in any way trying to discourage debate.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Responding to the chairman of the Agriculture Committee, with his consent I would like to yield to the Senator from Arkansas who has a brief statement.

Mr. PRYOR. Mr. President, I appreciate the Senator from Nevada yielding. If I might respond, Mr. President, to the distinguished chairman's request, it is my understanding that after Senator REID closes for his amendment, only one remaining Senator has expressed an interest in

coming to the floor and that is Senator BOREN of Oklahoma.

If there are others, I hope we will be notified soon. We have been on this amendment now for approximately 2 hours. We think it is ready either for an up-or-down vote or a tabling motion. So let me say, any Senators who have any desire to speak for or against the Reid amendment, we all hope they will, posthaste, come to the floor of the Senate.

Mr. LEAHY. I thank my distinguished colleague. I think that perhaps we will have the vote relatively soon, in the next 15 or 20 minutes.

Mr. REID. Mr. President, if the Senator from the Agriculture Committee will yield, there are a couple other Senators who expressed a desire to me to speak. Senator RUDMAN has indicated he wishes to speak.

Mr. President, if the Senator has yielded to me——

Mr. LEAHY. I yield the floor, Mr. President.

Mr. REID. I see the distinguished Senator from Alabama; does he wish to speak on the amendment?

Mr. HEFLIN. Yes.

Mr. REID. I have some statements I would like to make, and I indicate to the Senator from Alabama, who I understand has been involved with the committee meeting with Senator RUDMAN and that is why they both have not been here, I have no problem with allowing the Senator to speak. I have to be here regardless of who speaks and who does not speak. I can always speak at some moment when there is a lull in the statements.

Perhaps I will add him to the list of people I need to respond to. I yield the floor.

Mr. HEFLIN. Mr. President, I want to thank the distinguished Senator from Nevada for allowing me to address the issue. I have many conflicting situations, and trying to be here and speak on this amendment has been difficult. But I am delighted and appreciate the courtesy of the Senator.

I would like to begin my remarks by a personal experience. One time in my small town of Tuscumbia, AL, I voted absentee, and I soon found out that everybody in the courthouse and most of the people in the community where I lived knew how I voted in the sheriff's race, in the probate judge's race, in the Governor's race and everything else.

I decided that if I was going to exercise my right of secret ballot, I would never vote absentee again, and I never have.

Now what does that have to do with the Reid amendment? It has a lot to do with it. Under the Reid amendment, as I understand it in its entirety, it is required that a farmer, big or small, has to go to the ACS office, the Agricultural Stabilization and Conservice Service, Commodities Stabilization office, in each county.

And if the Reid amendment is adopted, in 1991, a farmer has to go down with five of his income tax returns for the past 5 years. He goes into the ACS office and he presents them to show that his gross sales did not amount to more than $500,000. I know human nature and I know rural people. Everybody in the area will know about the tax returns of that farmer who goes to the office. The banker will hear about it, and the banker will say, "Well, you know, he didn't do as well, as I thought he did and he didn't show me his tax return. I'm not sure I'm going to loan him any money for his next year's crop."

That is to point out one of the faults in regard to this amendment. There are all sorts of ways to look at tax returns, and I am not sure they will ever altogether prove gross sales, and you would have to have a number of different types of financial statements to establish gross sales.

I see Senator PRYOR over there. Senator PRYOR was the author of one of the greatest pieces of legislation that has been adopted since I have been in the Senate. I was one of his cosponsors, and that bill was the taxpayers' bill of rights. This amendment will just about eliminate among farmers any degree of secrecy or privacy. I believe every American citizen has a constitutional right of privacy. We have never made public income tax returns, but that is what is going to happen in the event that this amendment becomes law.

The farmers have suffered a great deal over the years. I voted against the 1986 Tax Reform Act largely because it devastated American farmers. Over a period of years, tax policy had been developed relative to farming, and things that were essential to them were destroyed in that Tax Reform Act of 1986. They changed their depreciation schedules; they changed the capital gains as it would apply to timber; and certainly anybody who has ever been involved with tree growing realizes that it takes from 20 to 75 years, depending on the type of tree, for the tree to grow; that if there is any justification for capital gains differential in tax law for any one group, it is for the farmer who grows timber. And most every farmer has a small woodland.

That was a devastating bill, in my judgment, to the farmer. It also did away with a lot of things like income averaging, tax credits on certain things;

To me we have some things here in regard to the tax returns that would have to be used. It would mean that it may not present a true picture and would cause an administrative nightmare on the basis of gross sales. If we are going to do something, I think net is a much better approach. I am not advocating that. I am against it for many other reasons, some of which I will recite. Gross sales in farming is misleading as to the income that a farmer gets.

The cost of production varies as to the crop and as to the operation. There is in certain parts of the country rich land. It costs the farmer who grows corn in rich land where he can make 150 bushels to the acre the same amount it costs the farmer in the lands which do not produce more than 60 bushels to the acre.

We have a lot of differences involved. We have cost of production that enters into this equation. There are certain highly intensified capital farming operations. Cotton is one of them.

I recently was on a cotton farm. I was getting my picture taken, films being made in regard to my upcoming campaign for reelection. They were taking pictures of me leaning up against the cottonpicker to show that my interest in farming had not waned and that I was the farmers' friend. I said, "What does that cottonpicker cost?" He said, "$140,000." You go in the wheat fields and you see a combine. What do they cost?

The point I make is that there is a wide variance between farming operations. Some require very high capitalization, and, as a result, their net may be very low. But involved in high capitalization, if they are going to be able to make a profit, it means that the production on the acre of land of whatever it must be, gross sales, have to be much higher because of the high cost of the intense capitalization. That goes into the cost of production. Gross sales, in my judgment, is not the proper approach for any type of limitation. I think the payment limitations by net profit is a much more proper approach.

Now, this legislation, in my judgment, is also one of the most antienvironmental amendments that has been presented. We are all for a better environment, an environment that looks to the future. And there are environmental concerns on the farm. If you are in a farm program, you have to comply with environmental requirements.

But environmentally, from the viewpoint of the sodbuster program, the wetlands program, the swampbuster program, all of those programs which are designed to improve the environment that a person under the program has to comply with, if he is driven out of the program, he cannot comply. I do not know the total number of acres that are available in all farms or the total number of acres that qualify under the sodbuster program or the swampbuster program or the wetlands program, and all of those types of pro-

grams, but if we are to eliminate them for the program, you are going to find an antienvironmental policy is being adopted. I think it will be a mistake.

I also realize that in the production of farm commodities, whether it is grapes, cotton, rice, wheat, corn, or whether it is the production of cattle or anything else, one of the biggest costs is fuel. Some crops have additional fuel costs like drying and other aspects. But in the event you drive people out of the program, you are going to see you will have problems. And, in my judgment, this amendment, to some degree, places the farmer under the heel of OPEC. It has effects which mean that if OPEC raises the price of fuel, the cost of production goes up, and it will have a direct relationship to the price of farm commodities. The gross sales go up and you are going to have a situation where, when it is tied to gross sales, the biggest cost of production is fuel.

Another problem is that we are addressing are those farmers who will get out of the program, and when they get out of the program, you are going to find it much more difficult to deal with the Farm Credit System. The Farm Credit System is already shaky. We have had a rescue of the Farm Credit System, and I think we cannot afford to have an S&L in the Farm Credit System, which we have had before, and this is a danger that applies.

I have asked some people, does this include the loan program? There are payments made under the loan program, particularly when, in effect, they sell to the CCC, the Commodity Credit Corporation. It can have the effect of driving people out of the program where they can receive no loan, a payment which helps them over a period of time in which loans can be very effective for farmers in selecting the time they want to sell their product. Some will sell to the CCC. We have had over the years some of the largest payments made through the farm program are payments made through the Commodity Credit Corporation.

Do the farm program payments benefit consumers?

The farm program opponents tend to characterize payments to farmers as a cost to taxpayers without corresponding benefits. This is a gross injustice to farmers and taxpayers alike. One of the prinicpal objectives of farm programs is supply and price stabilization. Without farm programs, and substantial participation in it, no mechanism would exist for managing production and inventories. In the absence of some form of production or inventory management the tendency would be toward violent cycles of overproduction and underproduction and vicious swings in price, each feeding on the other and both exacerbated by the weather.

Because agricultural production is unpredictable under the best of circumstances, there are times when inventories are very low and must be rebuilt in order to maintain consistently adequate supplies at reasonable prices. This means that the production capacity in excess of what is needed for normal year-to-year food and fiber demand must be maintained.

The taxpayers cost for farm programs is in part an investment in this production capacity which allows inventories to be rebuilt when necessary. Consumers receive a dependable supply of the lowest cost agricultural products in the world. It avoids the combination of scarcity and excessive prices which otherwise would occur.

They claim that a disproportionate share of farm program payments go to large farmers. They cite 1987 data. Farm program opponents tend to cite 1987 data because that was the year when the world was awash in agricultural commodities, prices were depressed, and farm program costs were high.

I do not think 1987 is an appropriate year to cite. We have seen a substantial decrease in the payment by the Federal Government on farm programs in more recent years. They show that the top 3.6 percent of payment recipients got 42 percent of payments.

The true facts are that the distribution of payments are disproportionate only in the sense that limitations already in effect deny large farmers a vast share apportioned by the production. Because payments are coupled with production, payments should be proportionate with the level of production. This is not the case because limitations are already stringent enough to make it unfeasible for many large farmers to participate in the program, and therefore their production receives no payment. That is quite a large number.

Many large farmers who are program participants, but affected by limitations, receive payments only on part of their production. Presently a large farmer is limited to $200,000. In my judgment that is a better way rather than using some type of gross sales as a basis for trying to limit Government payments.

If the top 3.6 percent of payment recipients receive 42 percent of the payment, it can only be concluded that the same 3.6 percent produced considerably more than the 42 percent of the program commodity.

USDA has no data to show the relationship between farm output and payments. However, using sales as a surrogate for production, it can be easily shown that large farms get a disproportionately smaller share of payments. For example USDA data shows that in 1988 farms with sales of $500,000 and over accounted for 36.6 percent of total sales, but received only 8.4 percent of Government payment.

I could go on, on this topic, but in my judgment this is an ill-advised, ill-conceived program. If you are going to have a limitation program, I think that the payment limitation is the proper approach to be used.

Gross sales vary so much—gross sales for cotton farmers will be much higher and with less profit than there will be for some of the other commodities. The other commodities such as wheat or corn are not nearly as intensified as to the financial investment and the cost of production. You get into cotton, you have cottonpickers, which I told you the cost of, you have to have insecticide, and you have to use airplanes to go over the fields to spray the insecticide.

So in my judgment, as we look at this proposed amendment, it is ill-advised. It has many consequences I do not believe that the authors of the amendment ever thought of. I urge my colleagues in the Senate to vote this down. Thank you.

Several Senators addressed the Chair.

The PRESIDING OFFICER (Ms. MIKULSKI). The Senator from Vermont.

Mr. LEAHY. Madam President, I again repeat what I said earlier. I really would like to see this come to a vote. I think there is going to be a vote up or down.

I would urge if there are other colleagues who wish to speak on this amendment that they do it quickly. We have a number of other amendments to follow this one. We are looking at a late night as it is. Madam President, I hope Senators might bring this to a vote in the next 10 minutes.

Mr. REID. Will the Senator from Vermont yield?

Mr. LEAHY. I yield to the Senator from Nevada.

Mr. REID. I know the manager of this bill has a large bill. I saw the pocket version which is 1,300 pages long. I sat here for 2½ to 3 hours. I have some remarks to make in answer to the many mistakes that people have made with regard to my amendment. I am writing to do that. I want to make sure that the debate moves along freely. That is why I have not tried to take the floor. I am ready whenever there is a lull in the proceedings.

Mr. LEAHY. Madam President, I should note the Senator from Nevada has been the model of patience through this debate. The Senator from Nevada made his arguments cogently, clearly, directly and, I might say, expeditiously.

I would not urge cutting off anybody, especially the proponent of the amendment. He has been unfailingly courteous to every Senator who wished to speak. Obviously he is entitled to have a chance to state his position.

I would just urge Senators, if they have statements, if they can give the abbreviated version and put the longer one in the RECORD, it would be very helpful because we have a number of amendments that will have to be voted on and will require rollcall votes this evening.

I yield the floor.

Mr. HARKIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Madam President, I want to a associate myself with the remarks of the Senator from Alabama who just spoke.

I have some remarks that I will make later on. I will put them in the RECORD so we do not have to take too much of the time of Senators on the floor, since we want to get on with the bill and get it passed.

First of all, I want to pay a special thanks to the distinguished chairman of the committee, Senator LEAHY, for all of his hard work in keeping the committee together through these long weeks and months of pulling this bill together.

The farm bill always seem to take a long time in committee, but I must say that this year under the leadership of Senator LEAHY, we worked out all of the agreements and disagreements in committee. The bill had very strong bipartisan support when it came out on both sides, Republicans and Democrats.

Obviously, the bill is not the model of what it would be if I could write it myself. I doubt that it is the model or that it would be the same if the distinguished Senator from Indiana could write it himself, but it represents a reasonable compromise between the various conflicting interests in agriculture in the country. It is a true testimony to the qualities of leadership and patience that the distinguished chairman from Vermont has shown in getting this farm bill out.

I want to talk basically a few minutes about the amendment offered by my friend from Nevada. I must admit that, on the surface, it makes sense and looks good. We do not like the idea of these multimillionaire farmers getting Government payments when they are making $15 million, $20 million a year and getting all these big Government payments.

Quite frankly, to the extent that we can limit the amount of Government payments that go out and tighten down on the $50,000 payment limitation that is now part of the law, that I agree with. When you approach it from the income standpoint, as the Senator from Nevada has done, It it really does do more harm than good. I know that $500,000 gross income sounds like a lot of money. The Senator from Alabama pointed out what a cottonpicker costs. He should check what a combine costs or maybe some of the new John Deere tractors. You will find those prices are well in excess of $150,000 themselves, in my part of the country.

This $500,000 gross income sounds like a lot of money, but I was checking here. You can take a farmer in Iowa that has a diversified operation, maybe has corn, some soybeans, maybe smokes, some hay, pasture ground, and let us say they are marketing livestock, fat cattle. At the price of cattle right now, fat cattle, it would be about 500 head. That is not an enormously large feed lot in my State of Iowa. But maybe the farmer has a couple of sons coming into the farming business with him, and they feed out 500 head of cattle. Right there, boom, you have your $500,000, and they are not eligible for the program.

But that is just gross income. Out of the $500,000 that they would sell that fat cattle for, they may be only netting, depending upon the market and what the feed prices are and things like that, $50,000 to $90,000. Yet, under the amendment of the Senator from Nevada, they would be out of the program.

What would that mean? That would mean, for example, that on all their corn ground and their soybean ground and oats, and maybe they have some wheat—not that much in Iowa, but maybe in Missouri—that kind of combination, that means they would be out of the program. That means that they could plant as much as they wanted to.

That is where this amendment, I think, does more harm than good, because then these farmers would have no constrictions. They would plant whatever they wanted to. It would drive the commodity prices down, which means the Government costs would go up. That means next year we would have to have bigger set-asides on the land that is left.

The other problem with this amendment is that once these farmers are out of the program, they do not have to comply with any of the conservation measures that we have in law or that would be in this bill. Some of these farms, to be sure, could be larger farms, and it is very important that they comply with the conservation measures that are in the bill.

Well, the under the amendment of the Senator from Nevada, they would not have to comply. They could sodbust. They would not be constricted. They could be swampbusters. They could tile all the swampland and drain it all out. They would not have to comply with any conservation measures whatsoever.

Again, I know $500,000 sounds like a lot, but when you think of it in terms of livestock production, you get there very quickly. About 30 percent of the production in this country would be outside of the program, if this amendment were to pass. Take 30 percent of the production outside of the program, and you are going to really wreak havoc on market prices.

Take that livestock farmer in Iowa marketing maybe 550 head, 600 head of cattle, then he would be out that 1 year if you market the 500, 600; he would be out of the program. Say next year, for market reasons and decisions that that farmer made, he is not going to feed that many cattle, and say he is only going to feed 300. So the next year he would be in the program. Well, then the next year he decides he is going to put some more cattle on feed. He would be back in the program. Then you have this in and out, in and out of these farmers. That would wreak havoc on the marketplace.

So while I have empathy with the Senator from Nevada in what he is trying to get at, I think there may be some better ways to do it. I would have a lot of problems with approaching it from the standpoint of gross income.

I know that the Senator has talked about the averages. The average net income, I am told by the Senator, is like $700,000-some. Well, averages are a funny thing. It is like that river whose average depth is 2 inches deep. It is a mile wide, but the average depth is 2 inches. It is a half-inch, except in the center where it is 20 feet deep. The average net income may be $700,000. that is because a very, very few are making millions. That is pulling the average up.

So that while I understand the motive, and while I think the motives in terms of cutting down Government payments to these larger farmers is admirable, I think there are better ways to do it than to focus on the gross income side. Quite frankly, I think in doing that, as I said in my remarks, we would do more harm than good.

I yield the floor.

Mr. BOREN. Madam President, many of the other speakers have already made the points I wanted to make in my remarks. So I will not take the time of the Senate to go over them again and again.

I certainly understand why my good friend and colleague from Nevada has offered this amendment. We are indeed facing very difficult budgetary times. There are many of us who serve on the Agriculture Committee that have wanted to make sure that a primary focus of the farm program would

be to keep in being those family-size farm units, make it possible for them to continue to exist. And when savings had to be made in the programs, we have been very sensitive to the need to try to direct as much of the benefits to smaller units as possible.

But I think while the amendment is well-intentioned, when you talk about giving benefits to those who have gross receipts of $500,000 or more in 1 year's time, it is as if you are only talking about very, very large operators or very profitable operators, and that is simply not always the case. The fact is that you could easily gross $500,000 annually, while netting less on a farm than an average factory worker.

There have been many large farm operations that have very large gross receipts that have not even been able to break even. We are also dealing with a situation here—and the Senator from Alabama discussed this at length—during which time, if we had to provide for tax returns to be given to local USDA county officials and county committees in order to collect information then I think we have a real problem in terms of the violation of confidentiality. It would be very, very hard on small closely knit, rural, communities for people to simply keep confidential that kind of personal financial information.

So that is an additional problem that we are dealing with. I think when we think about the size of farms that are involved and the size of economic units involved, we really have in mind, I am sure when you hear the figure, especially of those not from farming regions of the country, $500,000 a year in gross receipts, you tend to think that you are dealing with a huge operation, something like the size of the King Ranch, section after section of land, 10, 15 miles across.

In fact, smaller operations, those that certainly could be operated by a family, or parents and children with the same family, would be caught up in this kind of net.

I just did some fast calculations. If we look at the average yield on wheat in my State, you can easily on 950 acres have gross receipts of $100,000. On cotton, with average yields on 350 acres, you could easily have another $80,000 of receipts. And if you run 375 head of cattle, which is not a gigantic herd, you could easily have gross receipts if you look at 85 cents per pounds, of over $318,000 a year.

So, in other words, a farming operation or farming ranching operation—and often in a State like mine, it is a combination operation with 950 acres of wheat, 350 acres of cotton, and 375 head of cattle which would not by any means qualify you to appear on a production like Dallas or Dynasty, but simply a family farming operation, you could have gross receipts that would trigger this kind of provision and exclude you from participation in the farm program.

Farming in these days even in terms of a family farming operation is not something that is operated on a small scale, at least as far as gross receipts are concerned. It has been very modest in terms of net income. You think of the cost of inputs for an agricultural operation of family size, a new tractor with four-wheel drive costing $130,000; a new combine and wheat thrasher. Many of my farmers have a $135,000 new cotton stripper that will cost somewhere between $120,000 and $200,000. You are talking about inputs in a family-sized operation that are exceedingly expensive.

Let me raise another point—and I would share this with my colleagues because I know without regard to whether our colleagues come from agricultural regions or from urban areas—we are all concerned about conservation, and are all concerned about saving our natural resource, and we are all concerned about impacts on the environment. While it is true that a very small percentage of the number of farmers in this country would fall under this gross receipts test, let me say it is ironic, I would say to my colleagues, that it is very possible that extremely wealthy people who might have net incomes of $10 or $20 million a year who happen to have farming operations would still be eligible to continue to get farm benefits on their farms.

Let us say have an example of a surgeon, a very successful surgeon who might have a net income of $5 or $6 million a year. That person has a farming operation, maybe a farming operation that has $400,000 of gross receipts in a year's time. That person is still going to be eligible for Government subsidy payments even though he has net income of maybe $5 million a year.

But a family farmer under this amendment who might have gross receipts on $150,000 or $130,000 might have a net income of $25,000 this year because that is all that farm family netted from that farming operation. They would not be eligible for benefits, although the other person who had a net income of $5 million a year because it did not come from agriculture even though he had a farming operation would be eligible.

So we have those kinds of problems. Let me go back to the point that I was making just a moment ago and that is the potential impact on our conservation programs and on the environmental programs which we have so carefully crafted over a period of years. Income stability has been a very important role of the farm program but another very important role of the farm program has been conservation of the natural resource and protection of our environment.

That is why in the 1985 act and earlier acts we have been careful to craft certain provisions that would leave farmers to idle out of production a certain number of acres each year. The Government has been partners in terms of building ponds and providing terracing. We have had specific provisions, swampbuster provisions, sodbuster provisions, to try to take very fragile land out of production, land where the soil is thin, where there is very little rainfall and severe slopes and where erosion is likely to occur. We have had a tragic loss of topsoil of the land resource in this country.

There is also growing concern about the use of chemicals in agricultural production. This is something we hear from many of our colleagues from the nonagricultural areas as well as concerns from farmers themselves because the farmers are the very best stewarts of the land. They know they must preserve their land if it is to remain productive.

What will happen if this amendment is adopted? What is the practical impact? I urge my colleagues who are from nonagricultural areas to hear me on this point because many of the very people who argued so effectively for conservation programs and for programs to protect our environment I think might mistakenly vote for this amendment without understanding the full impact of it.

While we might have only one, two, or three of the farms in the country fall in this category, in terms of gross receipts they make up a much larger share of the agricultural production of the country. In some States you might have three farms making up to 1 percent of the number of farmers but 20 percent of the amount of production.

What is going to happen to a farming operation that is excluded from participation in the farm program under this amendment because of the $500,000 gross receipts limitation? That farmer is now freed of all constraint; he is no longer in the farm program. He can no longer take advantage of conservation programs. That farmer can no longer receive an economic benefit from idling part of his or her land and putting it into a conservation reserve. What is that farmer left to do? If that farmer is going to maximize his or her income, that farmer will plant every available acre. They will increase production as much as possible. They will pour on the chemical inputs and everything else they can use to increase production on that land. They will take whatever fragile acre they can possibly get their hands on and farm it if they can produce something on that acre because economics will move them in that direction.

So it will be ironic that in the name of trying to do something here, which

really is still not related to net income or ability to earn its gross receipt, we will have caused a very severe problem from a conservation point of view and an environmental point of view. We are going to encourage more use of chemicals and artificial inputs and encourage production on more fragile acres of land in this country by driving out of the farm program some of those larger farming operations that most need to be in conservation programs.

And, lastly, I would say also that we can end up by costing the taxpayers more for those farmers who are remaining in the program because you are likely to cause an over increase in production, as those farmers have the constraints removed, as they no longer have the acres in the conservation programs, as they no longer take advantage of other Government programs that lead them to reduce production. All incentive is more and more production that is likely to collapse the price even further, that is likely to end up costing the taxpayers money instead of saving them money in terms of what is left with the rest of the farm program.

I simply say to my colleagues I hope that they will carefully consider not just the goals of this amendment—I understand the goals, I sympathize with them, I understand the budgetary constraints under which we are operating. My own first allegiance above all is to the family-sized farm unit. They are not only an important agricultural and economic part of our society, they are also a very important unit from the point of view of the sociology of this country and community of this country and value that those farm families represent.

It is worthwhile to preserve their existence and wherever possible we should try to get them the kind of help necessary to provide a safety net under them so that family agriculture can continue. But we will end up hurting family agriculture, we will end up hurting conservation programs, we will end up damaging our own environmental goals, and we are likely to end up costing the taxpayers of this country more if we adopt what I know is a well-intentioned amendment on the part of the Senator from Nevada.

So I urge my colleagues to think before they vote on this particular amendment, and I urge my colleagues to defeat this amendment when it comes to a vote.

I thank the Chair, and I yield the floor.

The PRESIDING OFFICER. The Senator from the State of Washington.

Mr. GORTON. Madam President, I thank my distinguished colleague from Oklahoma for that brilliant analysis of his on this present amendment. I heard it with great interest.

I now, however, Madam President, wish to speak to the bill as a whole and to its philosophy for a while while we are still at the beginning of the debate on a very important piece of legislation.

Madam President, the objectives of the 1990 farm bill are the same now as they have been in every farm bill dating back to 1933 when the Agricultural Adjustment Act was passed. Federal farm programs are intended to provide stability to an industry that is both fundamentally important to our Nation's health and security and at the same time, extremely risky. Farm programs benefit both the farmer and consumer by evening out large swings in prices. The means for accomplishing our goal have changed, but the end objective has not.

The 1990 farm bill, which is before us, contains many excellent provisions. The trade title, for example will assist in maintaining and expanding U.S. market share. Through programs like the Marketing Assistance Program and the Export Enhancement Program, our producers will be given a chance to compete against unfair trade practices overseas. The research title will serve both the producer and consumer. Both groups will benefit through improved technology leading to enhanced production and food safety. The grain quality title will ensure that U.S. grain remains the best in the world. For the first time, a title addressing environmental concerns is included in the bill. The conservation title will take important steps in protecting the environment and preserving the livelihood of the farmer. The commodity titles for wheat, feed grains, and dairy provide producers an adequate level of income security that is consistent with the bill's objectives.

These are commendable programs which I believe will benefit the farmer, the consumer, and the environment for many years to come. I am extremely proud to be a member of the Agriculture Committee which drafted this bill. Most sections of the farm bill I wholeheartedly support. I have, however, concerns about the budget relationship to the 1990 farm bill and its potential impact on America's farmers.

It is wrong to promise the American farmer more than we know we can deliver. The current 1990 farm bill does just that. Congress has imposed upon itself budget restrictions in the form of the Gramm-Rudman-Hollings Act. It is an almost immutable certainty that the dollars promised to American farmers in the bill as drafted cannot be delivered after budget cuts, mandated by Congress in that Act, are enacted. To promise support for agriculture through this bill, while knowing that this support level will be reduced by the Gramm-Rudman-Hollings law, is truly giving with one hand and taking with another.

Madam President, the Federal budget deficit is now predicted to exceed $160 billion. Everyone knows that every program—defense, transportation, commerce, agriculture, and a legion of others—will have to tighten its belt to come near our deficit reduction goal. I do not advocate further cuts in agriculture. But, not only does this farm bill fail to eliminate unnecessary programs to save money, it creates a new program the cost of which could be several billion dollars in the future.

Even after this morning's changes the bill is estimated by the administration to be several billion dollars over what will be our final budget. In fact, unless significant changes are made to the bill, the President may veto it.

If savings are not found during this debate, in the end all farmers, despite what this bill promises, will suffer as their programs face the inevitable budget reductions required by law. For this reason, I believe this draft of the 1990 farm bill makes hollow promises to America's farmers.

Let me make a few observations on individual programs.

My principal, specific objection to the bill is its proposal to create at new oilseed marketing loan. This program is intended to encourage soybean production. In reality, the oilseed program simply introduces a new income transfer program in favor of producers of oilseed crops. The administration estimates that likely, modest changes in market prices from currently projected levels will result in future outlays not now reflected in the bill's budget.

Madam President, the soybean marketing loan appears to be without cost, but a minor change in soybean prices will result in substantial marketing loan payments. These funds will have to come right out of the hides of other existing commodity programs. Thus, the soybean marketing loan will compete directly with major commodity programs. It will compete and will take money away from wheat and dairy, from barley and corn. A new oilseed program will take money away from commodities for which Federal programs were initially created and intended. I cannot justify jeopardizing our commitment to existing programs, including the Northwest commodities of wheat, barley and dairy, to encourage the production of soybeans and to start a major new program.

This bill is also deficient because it does not reform various secondary programs. These unjustified secondary progams should either be eliminated altogether or have their support prices established more in line with those of other commodities. As the distinguished Senator from Indiana [Mr.

LUGAR] pointed out in his statement this morning, numerous commodities such as potatoes and apples, do not rely on Government support prices to remain competitive in the market place. In fact, as the distinguished ranking minority member of the committee disclosed, it is the minor commodities we purport to assist through secondary programs that have the most difficulty competing.

The sugar program is an example. It is bad agricultural policy, bad foreign policy, and bad trade policy. The sugar program, supposedly run at no cost to the Government, transfers $1 billion of costs each year to the consumers of the United States. It prevents many of the developing countries which the United States assists, from exporting their sugar to the United States. Sugar producers have almost the highest profit margin of any commodity. This program should be eliminated.

The peanut program is another archaic program which Congress should eliminate. It is anticompetitive. It prohibits entry into peanut production by new farmers despite existing demands for peanuts. In addition, the peanut program receives an increased subsidy year after year. So while the major commodity programs have consistently taken cuts, the support for peanuts grows. We should not let this condition continue.

This bill provides the Secretary with an option in setting loan rates. I see no reason to change the loan rate provisions for wheat and feed grains. A change would be a departure from the market-oriented agriculture established in the 1985 farm bill. Eighty-five percent of all the wheat in the Pacific Northwest is exported. Under current loan rate provisions the United States has achieved a substantial increase in exports, regained market share, and farm income is at new highs. Changing the loan rate formula is likely to cause agriculture exports to plummet, reducing market share and farmer income.

The purposes of the 1990 farm bill are laudable. But I believe the bill in its present state holds out false hopes to America's farmers. I hope that we can work to craft a bill that meets the needs of the American farmer in a fiscally responsible manner. We have the ability to write such a bill. We should do so.

Mr. REID. Madam President, I have patiently waited this afternoon while people have reflected on the amendment which I have offered. Respectfully, I submit to the Senate that a close reading of the amendment would have cut down the verbiage significantly.

First of all, Madam President, this does not affect, as Senator HEFLIN's staff told him, environmental matters, because in fact we protect that in this amemdment. Farmers would still get those payments. This is not an antienvironmental bill.

But Madam President, if you sat here, as I have this afternoon now for 3½ hours, and if you listened closely you would find yourself in some of the territory that was covered in the book "Alice in Wonderland" because you have arguments going all over the spectrum.

On the one hand, it is argued that production will skyrocket. On the other hand, you hear that grocery shelves will become empty. You hear that prices are going to go up. Then one of the other Senators says prices will go down if this amendment passes.

This we are told in conjunction with the fact that if we pass this amendment, which is directed to the top one-half of 1 percent of the fat cat farmers in this country, if this amendment passes and saves this country $1.2 billion, we are going to ruin the family farm. What kind of reasoning is a that?

We have heard argument after argument here this afternoon as to how we can arrive at the $500,000 figure the $½ million figure. My taxpayers bill of rights, we are being told, is going to go out the door and will not be of any effect any more. That is ridiculous.

If you go to get a loan on a car, do you not have to show people how you are going to repay that loan? If you are going to buy a home, you have to come up with some indication of how you are going to pay that home. If you want to get a credit card, do you not have to do something to give some indication of how you are going to pay that back?

Let us really get back to what this amendment is about, not what it is not about.

What this amendment is about is affecting 14,000 farmers out of the millions we have in this country; 14,000 of them—one-half of 1 percent. That is what this amendment is about.

It is not about "Come and look at my farm, and I will show you some hardship." This is about saving the American taxpayer $1.2 billion. This is what we are here to do, to try to save the taxpayer some money. Here is an opportunity to do it without going through this intellectual exercise that does not direct its point to this amendment.

Madam President: "Percentage of farms affected by proposed means test." See this great big 100 percent—one-half of 1 percent is what we are talking about. We are not talking about destroying the family farm. We are talking about making a little bit of sense out of the farm programs in this country.

What do you think the American taxpayer feels about this? Madam President, before I forget, I have received a note to add Senator HUMPHREY as a cosponsor to this amendment. I ask unanimous consent that be allowed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Madam President, there were a number of points that were raised in the statement of my good friend, the junior Senator from Arkansas. I would like to respond to just a few of those.

First of all, the statement was made that we will spend only 0.7 percent of our $1 trillion budget on farm programs. With all due respect, that is a ton of money. I am talking, Madam President, not about all farm programs. I am not here to trash the farm programs of this country. I am here to talk about one-half of 1 percent of the farmers, and I have to respectfully submit that $1.2 billion is big money no matter where you come from in this country.

I also submit that of course this amendment will affect some farmers. It will affect 14,000 farmers in the State of Alabama. It will affect 142 farmers, or 0.33 percent of the farms in the State of Alabama. In Arkansas, there are 48,242 farms. This would affect 328 farms in the State of Arkansas.

I could go on with other examples. I would like to address my attention to some comments made by the Senator from Arkansas that I think it important to respond to.

There was a statement made about "How much money do these farmers make?" As I indicated earlier in my statement, for farms with gross sales in excess of $500,000 a year—listen to this—not the gross cash income, but the net cash income, as a percent of gross cash income, is 40 percent; profits, 40 percent. For the rest of the farms, it is from 2 to 4 percent.

The senior Senator from Mississippi kept talking about gross profits, about profits, saying that this figure of $500,000 talks about gross figures. Then he started talking about how these people make no profits.

I will cover again, as I did in my opening statement, that the average net cash income of these farms, these farms I am talking about right here, is $700,000 per year. Within the $500,000 and above gross sales cash, the average gross cash income is $1,897,000. We are not talking about the family farmer. The average net cash income is specifically $762,000 a year, these 14,000 people average; 14,000 farmers average $762,000 a year net cash income. That is pretty good.

Instability, the senior Senator from Mississippi talks about. The only thing that is not stable is the arguments made against this amendment. What they are saying is if you do not treat these people right, if you do not treat this one-half of 1 percent of people right, they are going to do all kinds of

things. They are going to plant more crops; they are going to put more fertilizer on their land. To stop that, what we are going to do is bribe them. We are going to bribe these people; we are going to give them $1.2 billion a year so they will be good, good citizens.

That is a fine way to run a farm program, bribe the top half of 1 percent—14,000 fat-cat farmers. That is what we want to do?

The senior Senator from Mississippi talked about a $100,000 gross sales. That is something that is going on in the House. In this body, it is $500,000.

My good friend, the junior Senator from North Dakota, who I came to this body with, who is a close personal friend—I think the world of him. I recognize he comes from a farm State. I recognize he has fought a valiant battle for the people in North Dakota, and I recognize the economy in North Dakota is not the best.

But I have to say, Madam President, that the arguments made by my friend from North Dakota regarding my amendment—not the opening statement he made about the farm bill, but about my amendment—simply are not valid.

Remember, my amendment talks about these farmers here, the top half of 1 percent, that produce not 40 percent of all the farm crops in this country, as has been stated here time and time again by the opponents of this amendment—but 40 percent of the agriculture commodity crops in this country. Here they are, and here is what the program costs were for last year. That its where the 40 percent comes from. Not all crops.

Also, in reference to my friend from North Dakota, there was a lot of talk about how food in the United States, in comparison with how much income we make, is a low figure. Of course it is because we have such a high personal income. These figures that I am talking about, the $1.2 billion that is going to be saved, let us make sure there is no mistake about from where those figures come. They come from the U.S. Department of Agriculture, and I ask unanimous consent that the National Financial Summary of 1988 for the U.S. Department of Agriculture, listing the $1.2 billion of these 14,000 farmers, one-half of 1 percent, be printed in the RECORD.

The PRESIDING OFFICER (Mr. GRAHAM). Without objection, it is so ordered.

(See exhibit 1.)

Mr. REID. The argument that the Nation's richest farmers would skirt the law if my amendment were to be enacted misses the point, though, entirely. We are voting on farm policy. It is up to the administration to enforce the law.

As you know, Mr. President, we in the past passed a law that limited the amounts of payments that farmers could get.

And, of course, they went to great pains to avoid that, as indicated in many different places. One easy reading is the Congressional Quarterly. The latest issue talks about the Christmas tree method of avoiding the $50,000 limit. In fact, it is so outrageous, and listen to how they do it. They have the children, the cousins, the preacher, literally, and that is true that some people are listed getting these $50,000 payments. Last month, one of these people received a letter from the Agriculture Department in Washington informing him that the organization had schemed to evade Federal payment limits. As a result, the letter said, he was being denied Federal farm subsidies this year and retroactive to 1989.

There are ways to get at people who want to cheat. There are ways of getting at people who want to avoid the intent of Congress and other laws. Loopholes should be closed by the U.S. Department of Agriculture. So the argument that the Nation's richest fat-cat farmers are going to skirt the law if this amendment is enacted is a pretty shallow argument.

I am also told the amendment is not good because it would affect trade. This is not a trade amendment, but an income support amendment. If national trade policy, Mr. President, depends on income support payments to millionaires, then we need a new trade policy. I do not think we would get a lot of argument on that. We do need a new trade policy. But my amendment that affects one-half of 1 percent of the wealthiest farmers in the United States certainly is not going to affect our trade policy, and, if it is, we better change our trade policy.

Let us also understand, Mr. President, farmers over $500,000 in sales are not all going broke. The average net income is $762,000 a year. The percentage of profit is 40 percent. How would you like to have a business that you could net 40 percent profit? Not bad. The average gross sales is nearly $2 million, $1.8 million.

Mr. President, I spent the large part of my opening statement talking about what a good job the Agriculture Committee does and has done in this legislation. I approve of many of the conservation issues they have in this bill that they have never had in another agriculture bill. That is good. I approve much of what they have done. But maybe it is important sometimes that someone who is not from a farm State just take a look at this farm bill. Maybe the Agriculture Committee needs someone to look at it who is not in a farm State because, I will say to my colleagues, it takes some pretty stretched reasoning to back up what has happened here.

No one this afternoon has hit this argument on its head. Why should we, the American taxpayers, pay one-half of 1 percent of farmers in the United States, that is 14,000 farmers, $1.2 billion when I have given my colleagues the amounts of money they make? Average net income, $762,000 a year. Percentage profit, 40 percent. Average gross sales, almost $2 million.

My friend from North Dakota invited me to go to North Dakota, and I would love to go to North Dakota. I would like to look at some of his farms. But I want my friend to know that in North Dakota, we have in this category right here that I am talking about, 206 farms out of a total of almost 36,000 farmers. I am sure that there are some farms in North Dakota which are having significant problems, but they are not the farms that are averaging a net income of $726,000 a year, percentage profits of 40 percent, average gross sales of almost $2 million. No, the farms that are having problems are the farms that are struggling, the farms that are trying to help. That is what the agriculture program was originally set up to do, to help the farmers who need help.

I would love to go to North Dakota. I would love to go and see the family farms. I cannot stress enough how much respect and how hard the Senators from North Dakota has worked to protect the family farms. But I do submit that these are not the people he has been trying to protect, that our farm programs are meant to protect. The top one-half of 1 percent, $1.2 billion a year in taxpayers money they take, and in the State of North Dakota, 206, or a percentage in North Dakota of .58 percent.

Mr. President, let us talk about what this amendment does. Let us not talk about speculation because all the horror stories my colleagues have heard today are people looking through a crystal ball, and they have been about that accurate. Let us talk about what this amendment does and what it affects.

What it affects is, out of the 50 States, one State has over 2 percent of the farms that are affected by this; 6 States have over 1 percent of their farms affected; and in 43 States, less than 1 percent of the farms are affected by this. Nationwide, as I have indicated, it is a very small speck.

I am going to repeat for the fourth time here today, this amendment is not gutting the farm bill. This amendment strengthens the farm bill for lots of reasons. I will bet my colleagues, Mr. President, that there are people who are going to vote against this amendment, and you know why? Because they are part of this farm coalition that says you support my package of goodies and I will support your package of goodies. I have had Sena-

tors come to me and tell me they are going to vote against my amendment even though they know my amendment is in the right direction.

I am calling upon this Senate to do what is right. Let us step in the right direction and bring this bill down $1.2 billion. It would make the administration happy; it would make the American taxpayer happy; and it would give us a stronger farm bill.

There is no one who has been better to me since I have been here in the U.S. Senate than the senior Senator from Arizona, but this amendment, contrary to his statement, does not affect nonfarm income. It only affects farm income.

I will also repeat for the third time—I think repetition is important in this—as the Senator from Alabama remarked and recognized that the initial statement he made regarding conservation payments are not excluded, he recognized that he was wrong, and I want to state again, this is not an antienvironmental amendment. In fact, it is proenvironmental.

I also must suggest that we look very closely at the statement of the junior Senator from Iowa, who said this amendment at face value had a lot of merit. If he looked at it more closely, it would have even more merit than the face value. He talked about using 1 year as the way of establishing how much commodity support that you would have.

This is a 5-year rolling average that we are talking about, not 1 year. It is a 5-year rolling average. I recognize, everyone recognizes, there are good years and bad years. That is why we established this 5-year rolling average.

So again I submit that we are not violating any confidences of anyone, that we are not gutting the farm bill. In fact, what we are doing is suggesting to the American public that it is about time we gave them something.

Let us talk about basic fairness. That is what this amendment is all about, fairness; one-half of 1 percent of the farmers in the country or 14,000 farmers are getting $1.2 billion of our taxpayers' money. These people are averaging income of $762,000 a year. They have a 40-percent profit margin. It is time it was put to a stop.

I do not think we have to bribe these people to make sure they are good citizens. That is what we have been told; if we do not give them this money, they are going to plant more crops, drop more fertilizers on the land. So to keep them quiet, make sure they are good citizens, let us give them $1.2 billion of the taxpayers' money. I say no.

I yield the floor, Mr. President.

EXHIBIT 1

TABLE 32.—DIRECT GOVERNMENT PAYMENTS, BY VALUE OF SALES CLASS, 1970–88 [1]

Year	Farms with sales of—										All farms
	$100,000 to $499,999				$40,000 to $99,999	Less than $40,000					
	$500,000 and over	$250,000 to $499,999 [2]	$100,000 to $249,999 [3]	Total		$20,000 to $39,999	$10,000 to $19,999	$5,000 to $9,999	Less than $5,000	Total	
Million dollars:											
1970	124	140	266	406	708	826	671	400	582	2,479	3,717
1971	116	130	244	374	622	685	550	327	471	2,033	3,146

[1] See estimation note following table 41.
[2] For the years 1970–81, data are for sales class $200,000 to $499,999.
[3] For the years 1969–81, data are for sales class $100,000 to $199,999.

The PRESIDING OFFICER. Who seeks recognition?

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I commend the Senator from Nevada for the amendment he has presented. I am pleased to be a cosponsor of this amendment.

It seems to me it is a very simple amendment. It would disqualify farmers and farm corporations with gross sales over one million from receiving farm program payments except for disaster and conservation reserve payments.

I know the arguments against this. The arguments are that it is too hard to police; that the farmer and his son have a big farm, it is very prosperous so they just split it up in some fashion and so they continue to qualify.

It seems to me that with the sophisticated methods we now have both in our Internal Revenue Service and certainly the U.S. Department of Agriculture which is putting out not millions but billions in payments to farmers all over the Nation, there ought to be a way of policing this so the outrageous

evasion of the purpose of this bill does not occur.

I want to make one thing clear. In no way do the proponents of this amendment intend it is going to wipe out the American farmer or wipe out this farm bill. Not at all. This is just a small fragment of a total farm bill in the over $20 billion range. What we are talking about is certainly not anything of miniscule proportions, but we are dealing with $1 billion that can be saved from that program.

The purpose of this amendment from the distinguished two Senators from Nevada, Senator RUDMAN and others, is to ensure that the Federal Government sends its payment not to the millionaire farmers but to those who need the benefits. It seems to me unfair to our taxpayers, unfair to all citizens of the Nation when we are struggling with these tremendous deficits, to send these substantial payments to a relatively few farmers in the United States and, indeed, some who are millionaires.

You might say, well, that is not quite true. These payments go to the farmers who need it.

Let us look at the record, as Al Smith used to say. Let us look at some statistics. These come from the U.S. Department of Agriculture itself. What did they say in their survey conducted in 1988, which is only the year before last, where we have the latest statistics?

This is what they say. In the Nation there are over 2,200,000 farms. Of those, the top 60,000—60,000 out of 2,200,000—received about 43 percent of the Federal direct payments.

How is that for a distribution system? The top 60,000 out of 2,200,000 get 43 percent of the payments. What is the average payment? Is it just some miniscule amount, something to tide them over, a couple thousand, 20,000? Not at all. The average payment is $75,000. That is a nice check to get through the mail.

The average net farm income from these farms, that is, what is left over when everything is paid for, is it $20,000, $30,000? Are they just scratching by? Not at all. The average net farm income is $96,000.

Is this just some minuscule operation, they are just barely making it, everything in debt to the local banks? Not at all. The average net worth—meaning you take what they have, less what they owe, and this is what is left. It is pretty good, is over $800,000.

This is what OMB has to say about this subject. "In 1987, 30 percent of $22.4 billion in subsidies that went out"—30 percent of that tremendous chunk of money—"went to 4 percent of the farm operators."

What is going on around here? The 4 percent gets 30 percent of the money, and these farm operators had an average, this group had an average net income of $100,000 a year, which is pretty good, and net worth of nearly $850,000.

What is an average net income of over $100,000 a year? That is three times, three times the average income for an American family. So you have this total inequality in the distribution of these funds. The system is upside down. The sum of 30 percent of all the payments go to 4 percent of the farmers, and those 4 percent are doing very well. Their income is three times that of the average American family.

If we pass this amendment, this Senate right now could start off by saving up to $1 billion a year. That is pretty darned good, and it is a very big start toward facing up to the biggest single national problem we face in America, the deficit. I do not think anybody will argue with that.

Now, is this just something that we from the East conjure up? After all, people say, you are from Rhode Island. How many farms do you have?

We do not have many farms, and none of them are under any kind of system like this. So you say, well, you have an ax to grind.

Sure, I am anxious to save some money. But I also would point out, you ask the farmers themselves. This is a report that came from the farmers.

Asked whether farm programs should give more benefits to farmers with annual sales under $250,000, 16 percent thought it was a bad idea; 53 percent agreed. In other words, if you are going to have payments, have them go to people who need them.

Here is a letter of support from an organization that is clearly part of the farm community, the National Grange. This is what they said in June of this year. They stated that Senator REID's amendments will provide opportunities for small and medium-sized family farmers to prosper and survive.

One of the great cries around this Chamber is the small family farm, and this legislation will help the small family farm. Certainly it will put the tilt in that direction to a greater extent.

In conclusion, I would just like to say there is not any one of us who does not go out on the stump the Fourth of July, August recess, in September. All seasons of the year we are ready to talk at the drop of the hat about the evils of the Federal deficit. It is a good theme, it is a good topic, and it plays well. But the question is, are we willing to do anything about it?

Here is a chance to do something about it—$1 billion, which could go to reduce the deficit. But if we do not want to do that, we could put it into nutrition, Head Start, health programs, assisting the elderly, or education. There is a host of ways we could spend that money if we do not want to use it to cut the deficit.

Mr. President, in closing, I think the amendment makes common sense. It certainly adheres to the basic values we have espoused in this Congress many, many times—make sure that the small family farms survive. But we do not have to worry about the top 4 percent of the farms in the Nation.

Mr. President, I commend the authors of the amendment, and hope it will be adopted.

I also ask unanimous consent that an editorial from the New York Times dated June 19, 1990, in connection with this subject be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, June 19, 1990]

GET FAT FARMERS OFF WELFARE

Imagine that Congress had decided to create a new welfare program that took $10 billion from taxpayers and gave it all to the owners of a single industry. Then imagine that two-thirds of this money went to the richest 15 percent of the owners. That sounds unimaginably perverse. It is. It is also a fair summary of how farm subsidies work.

To begin with, the $10 billion in subsidies doesn't include billions more in inflated food prices. To make matters worse, the smallest farms, 70 percent of the total, get less than 10 percent of the Federal payments. The upshot is a system that makes poor urban mothers pay 20 percent more for milk while wealthy dairy farmers get ever wealthier.

Now two Congressmen, Dick Armey of Texas and Charles Schumer of New York, have devised a radical remedy for this perversion: Stop paying welfare to the wealthy. Specifically, their bill would eliminate subsidies for farmers earning more than $100,000 or any farm with sales over $500,000. It's sad that Congress even needs to debate such a bill; it's even sadder that it probably won't pass.

Of course farmers resent the notion that farm subsidies are called welfare. They prefer to think of them as payments to stabilize output, conserve soil or save the small family farm. But the nation's farm program encourages soil erosion, destabilizes production and favors large farms. The complex provisions include target prices, marketing orders, marketing loans, quotas and support prices.

All these devices jack up consumer prices. And because the subsidies are distributed according to farm output, not need, large farms wind up collecting 100 times more than small farms.

The farm program is a hodgepodge of contradictory regulations. Price supports are set high, producing huge surpluses. So Congress then provides expensive export subsidies to get rid of the excess. When dairy price supports generated big surpluses, Congress paid farmers to slaughter their herds. At times, Congress has put itself in the ludicrous position of paying more in crop subsidies than the entire crop was worth.

The details of the Armey-Schumer bill may need revision. Setting limits on a farmer's personal income will be administratively costly. But setting limits on gross sales doesn't take proper account of costs. And past Congressional efforts to limit subsidies

have been half-hearted and easily evaded. So far, Representatives Armey and Schumer do not have a complete solution.

Yet the underlying principle is surely correct: Kick wealthy farmers off welfare. If enforced, the Armey-Schumer bill would save taxpayers about $1 billion a year. Even more could be saved if Congress went one step further and limited Federal subsidies to the truly needy. That could save $6 billion.

A Southern Congressman laments that the Armey-Schumer bill would be the "beginning of the end of farm programs as we know them."

Wonderful.

Mr. CHAFEE. I yield the floor.

Mr. LEAHY. Mr. President, I assume we are ready to vote. Have the yeas and nays been ordered on the amendment?

The PRESIDING OFFICER. The yeas and nays have been requested on the first-degree amendment.

Mr. REID. I ask for the yeas and nays on the second-degree amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there further debate?

Mr. LUGAR. Mr. President, I am advised the distinguished Senator from New Hampshire, Senator RUDMAN, wishes to speak. We are attempting to get him to the floor.

Let me make just a short argument awaiting his presence. I commend the distinguished Senator from Nevada for the general thrust of the amendment. I believe the entire issue of payments limitation may be one that should be visited during this farm bill. But I would suggest that the current amendment is probably not the best way to attempt that.

I suggest that for at least two reasons. The committee has examined any number of ways in which payment limitations might come to the floor or payments might be targeted for farmers who are needy. The predicament always is that whatever the solution the means of evasion are substantial.

In this particular case, farms having $500,000 in income have sometimes sought under stress much this kind of situation to divide it to a point in which their income was clearly less than $500,000. Since the amendment has a one-threshold situation, either above or below, it is not hard to conceive how farmers would subdivide their property or their businesses to evade this particular amendment if they were so inclined.

I suppose beyond that the accounting problem, the problem of looking to the 1040 income tax return, leads not only to an argument on the invasion of privacy, but it leads to an auditing problem that is very substantial if what was once a farm of $500,000 income now becomes 10 farms with $50,000 or so, and 10 returns of various relatives are involved.

The problem that the Senator from Nevada is attempting to reach in this is a profoundly important problem in terms of fairness and in terms of equity in American agriculture. It may be, in the overall course of this debate, that the limitation or the targeting situation should be approached another way.

On balance, Mr. President, I am convinced that this amendment does not propose the right way. For these reasons, I will vote in the negative in the event we have an up-and-down vote.

Mr. REID addressed the Chair.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Mr. President, while we are waiting for Senator RUDMAN, I will respond very briefly to my friend from Indiana. As far as someone being scholarly, no one in this body exceeds the senior Senator from Indiana. We recognize his scholastic background.

Having said that, Mr. President, I suggest that the reasoning of my friend from Indiana is not valid. Of course there are means of evading any law. The jails are full of people that tried to evade the law.

I already recounted how certain people have tried to evade the $50,000 limit that was set by the Congress and the President some time ago. The U.S. Department of Agriculture has an obligation, in fact the obligation here amounts to offer $1 billion—in fact $1.2 billion. That is the figure the U.S. Department of Agriculture. The Office of Management and Budget sets it at a little over $1 billion.

So it seems to me that the USDA would take care of these people that attempt to avoid the law. That is not a reason I respectfully suggest for not voting for this method to bring just a small part of the spending under control.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. MIKULSKI. Mr. President, I rise to clarify my vote in favor of the amendment offered by the Senator from Nevada.

I do not feel that this amendment is perfectly crafted. I think my distinguished colleague from Nevada is too optimistic in his belief that $1 billion will be saved. I would also point out that excluding the largest producers from crop programs means that the ability of the programs to regulate production—which is their intended goal—would be greatly compromised. I am, however, strongly in support of the concept of targeting the wealthiest farmers—or rather agricorporations—from farm program subsidies. For this reason, I feel it necessary to vote for this amendment. It's a step in the right direction.

I would like to make my dedication to small and family farmers clear. My own State of Wisconsin is known for its productive and successful small- and medium-sized farms. They are truly the backbone of American agriculture—and they are the one's who need Government farm subsidies.

Mr. JOHNSTON. Mr. President, on its face, the amendment offered by the senior Senator from Nevada is appealing, but it begs the basic point: Why are payments needed anyway? Whether the farm is small or large, the reason is that the full economic cost of production exceeds the average price received by farmers.

The reason that prices received do not equal the full cost of production is that pervasive subsidies throughout the world have depressed the world price for agricultural products. It is not lack of efficiency on the part of our farmers, but unfair subsidies from abroad, and the steadfast refusal by foreign countries to discontinue these subsidies, that put our farmers at a disadvantage.

How should we respond to this situation? Should we unilaterally stop all subsidies, and forfeit agricultural production to foreign countries? Of course not, and no one seriously suggests that. Should we only provide support to small farmers, with income—measured in gross receipts which of course does not adequately take into account capital costs required particularly in the Southeast as the distinguished senior Senator from Mississippi pointed out—below a certain level, allowing large farms to sink or swim? That would be counterproductive as well. We must have commercial size farming operations to compete under prevailing world market conditions; eliminating large farms from payment programs would only lead these farms to double, or triple, production to increase economies of scale. This would only lead to overproduction—and this would as the distinguished senior Senator from Arkansas pointed out lead to a large reduction in gross farm income.

The only option which makes economic sense for us is to provide price supports for all sizes of farm units—subject to current limitations—enabling commercial scale farms to survive and participate in production limits, thereby enabling these farms to operate profitably when and if a global agreement is reached to eliminate subsidies altogether.

In 1989, agricultural exports were $39.7 billion, and accounted for about 12 percent of total U.S. merchandise

exports. Our agricultural trade surplus—over $18 billion in 1989—helps keep the U.S. trade deficit lower than it would be otherwise. It makes no sense to me to adopt an amendment which would have the effect of crippling larger units which by definition contribute more to this surplus side of our balance of trade.

This amendment is not good for Louisiana, where many farmers have had high capital costs in equipment and land because of the nature of the commodities we produce and where many of these same farmers are heavily burdened by debt. The limit proposed by the Senator from Nevada ignores these factors. It is also not good policy for our country and I urge that it be rejected.

Mr. BREAUX. Mr. President, I oppose the amendment offered, which proposes to impose a means test on farmers based on their gross revenues. It is unfair to farmers in Louisiana and the Nation because it is misleading with regard to their cost of production and income.

If the amendment were to be enacted, it would remove a number of farmers from participation in Government programs, the benefits they provide to participants, and would disrupt domestic stocks and price stability. Without the incentive of the program benefits, farmers outside the program would be able to put all of their productive acreage into use, which would increase supplies and force downward pressure on prices. In this situation, farmers and the farm sector will suffer from more financial problems.

Stable supplies and prices benefit the Nation's farmers and consumers. Driving farmers from participation in Government programs because they do not meet an income test is not an equitable policy nor a sound one. It would be harmful to farmers and consumers would not benefit. I oppose the amendment for those reasons.

Mr. LAUTENBERG. Mr. President, I rise as a cosponsor of the Reid amendment to urge my colleagues to support this important proposal, which would eliminate farm subsidies to producers with earnings in excess of half a million dollars.

Mr. President, when you hear farm program advocates defend current policies, they talk with great emotion about the small, struggling farmer. It is a sympathetic plea, and I share the concern that many Americans have about such family farmers.

But the fact is, Mr. President, that current farm programs disproportionately benefit not the small, struggling family farmer, but huge, highly profitable agribusinesses. Many of these producers are millionaires. They do not need taxpayer subsidies, and they don't deserve them.

It is also important to note that these subsidies do not go to all types of agribusinesses. At the same time that wealthy wheat farmers are raking in huge Government handouts, many types of farm production are excluded altogether. In my State of New Jersey, for example, we have many farmers who produce fruits and vegetables that are not eligible for price support payments. Why grant subsidies to large producers of cotton and rice, while those who produce blueberries, cranberries, peaches, or tomatoes get no such support? That is unfair.

Mr. President, existing farm programs are also unfair to consumers. In fact, agricultural subsidies cause food prices in the United States to increase by an additional $10 billion per year.

Opponents of the Reid amendment say that large producers that would be excluded from farm programs under this amendment would increase production if the amendment were adopted. If that happened, they say, prices would come down, perhaps to a significant degree.

The strange thing, Mr. President, is that they say this as an argument against the Reid amendment. Well, Mr. President, tell that to the American consumer. Tell that to the working American who has to feed his or her family.

Mr. President, if this amendment can reduce the prices of produce for consumers, I say: Great. That is a good reason to support the Reid amendment.

Let me make one more point, Mr. President.

It was only a couple of days ago that we learned that our budget deficit in fiscal year 1991 is expected to be $168.8 billion—and that is not including billions more in costs from the thrift bailout. Our budget deficit demands action. We have to eliminate waste wherever we see it.

Well, the Federal policy of providing handouts to wealthy agribusiness is extremely wasteful. It is 1.2 billion dollars' worth of waste. And it is time to put a stop to it.

Mr. President, this amendment would not solve all the problems and inequities in the current farm program. Not by any means. But it is a step in the right direction. It would make sure that at least the largest producers do not get the benefits of taxpayer handouts. It would save taxpayers an estimated $1.2 billion. And it would inject at least a minimal degree of rationality to a fundamentally flawed farm policy.

I urge my colleagues to support it.

Mr. LEVIN. Mr. President, I have been supportive in the past of efforts to limit farm program payments to individuals to $50,000. A limit such as that makes good fiscal and farm policy sense to prevent farm programs intended to promote the family farm from giving away money to huge agribusinesses. However, that is not what the Senator from Nevada's amendment would do.

By limiting eligibility for payments to those producers with average gross sales under $500,000 over the last 5 years, the amendment disrupts supply management efforts and may hurt farmers of modest income. The amendment would lead to overproduction and, therefore, because of the decline in average market prices below the program crop target prices, accrue little or none of the savings that have been attributed to it.

Also, the amendment is an inaccurate mechanism, in that it would have arbitrarily deprived producers above a certain gross income level, regardless of their costs of production. from receiving payments.

Mr. LEAHY. Mr. President, we are very close to a vote. I yield to the Senator from Arkansas.

Mr. PRYOR addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. It is my understanding that there are no more speakers, Mr. President, relative to the Reid amendment which is the pending business. Mr. President, is there an underlying amendment? Is there a second-degree amendment? I move to table the underlying amendment.

Mr. LEAHY. I ask for the yeas and nays.

The PRESIDING OFFICER. Has the Senator from Arkansas moved to table the first-degree amendment? Is that correct? Is that correct? There is a first- and second-degree amendment.

Mr. LEAHY. Parliamentary inquiry, Mr. President. If the underlying amendment is tabled, then does it all fall?

The PRESIDING OFFICER. The Senator is correct. If the first-degree amendment is tabled, it carries with it the second-degree amendment.

Mr. REID. Will the Senator from Vermont yield?

Mr. LEAHY. Yes.

Mr. REID. Senator RUDMAN has just made an appearance. He has been tied up in a committee meeting most of the afternoon.

Mr. LEAHY. Mr. President, certainly, if the Senator wishes to, nobody is going to cut off his time, but just because we had told everybody we are going to vote about 5 o'clock earlier, could the Senator from New Hampshire give us some indication of how much time he wants so we can alert our people?

Mr. RUDMAN. I thank my friend from Vermont.

Mr. President, let me say to my friend from Vermont, the chairman of the committee, that I truly would have been here much earlier. I want to tell the Senator that I do not believe in inconveniencing the Senate but I was involved in a 5½-hour deposition

taken by the Ethics Committee today. I have just arrived from that deposition.

I would like about 2 minutes to get some papers together and I would like to speak for approximately another 3. Senator REID, according to my information, has made a very persuasive presentation which, if logic would follow, would persuade the Senate to adopt his amendment. However, I would like just a few minutes to address a few of the issues raised here today. I suggest the absence of a quorum. I withhold that.

Mr. LEAHY. Mr. President, could I ask unanimous consent that, at a quarter of, the Senator from Arkansas [Mr. PRYOR] be recognized for the purpose of a motion to table.

The PRESIDING OFFICER. Is there objection?

Mr. PRYOR. Mr. President, may I inquire? I want to have a vote as soon as the Chair, but I want to inquire of the Senator from New Hampshire, does this give the Senator an adequate amount of time to present his case?

Mr. RUDMAN. It does.

The PRESIDING OFFICER. Is there objection?

Without objection, at 5:45, the Senator from Arkansas will be recognized for purposes of a motion.

Mr. RUDMAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. RUDMAN. Mr. President, I want to briefly highlight some of the most significant facts in this amendment.

Let us start by calling this amendment what it is. It is an amendment that provides for an agriculture entitlement means test. We are talking in the budget summit about means testing Social Security and means testing Medicare. We are talking about means testing a whole range of programs.

What the Senator from Nevada and I have attempted to do is to means test agricultural subsidies. I have heard the arguments that opponents of this amendment have made today. However, there are a few figures which the Senator from Nevada mentioned, that I am going to repeat. Because whether we carry the day here or not, I expect that in the near future, the Senate will address this issue again.

In 1988, farmers grossing over $500,000 in sales received $1.2 billion indirect Government payments. OMB estimates that this amendment would save $1 billion a year. Looking at the recent escalation of agricultural subsidies, I believe that figure is probably low.

In 1981, USDA said the farm bill would cost $12 billion over 5 years and it cost $60 billion. In 1985, USDA said that the farm bill would cost $52 million over 5 years, and it cost $80 billion. This year USDA estimates that the farm bill will cost $59 billion in mandatory spending and $3 billion in discretionary authority for new programs.

I believe that the 1990 farm bill will cost the American taxpayers in the vicinity of $90 billion over the next 5 years.

It is important to note that over the past 8 years, almost all Federal programs have experienced some reductions, while agriculture has been increased.

I would like to talk about the equity of a means test.

First, it will provide equity in the agricultural programs where currently almost three-quarters of the participating farmers receive only one-fifth of the Government payments. When I saw that figure, I was appalled. It will repeat it. Three-quarters of the participating farmers—the small family farmer that we think of, receives one-fifth of the Government's commodity payments.

Here is another persuasive statistic: The top 14.7 percent of the program recipients receive 57 percent of the payments. Think about it.

We all talk about the small, poor family farmer. But, the top 14.7 percent of the program recipients are not the family farmer the American people think we are trying to help.

This amendment would affect less than 1 percent of the United States participating farms. Of the 30,000 farms grossing over $500,000 annually, only approximately 14,000 are participating in the Government programs.

I would like to make some comparisons of Federal payments and income levels for a few selected Federal programs for 1987. The average income of a farmer receiving CCC subsidy payments was $48,000. In addition, they received an average Federal payment of $18,017. Compare that to low-income people. The average income of Social Security recipients was $4,700 and they received an average Federal payment of $3,000. The average income of a family an AFDC was $4,800 and they received an average payment of $4,300. In this same year, the average U.S. household income was $36,600. Yet, Mr. President, we have seen farms grossing over $500,000 receive an average payment of $62,587 from the various commodity programs. This is not what I consider equity.

Finally, I would like to point out three of the more recent agriculture payment horror stories that the American public has had to pay for.

No. 1, the dairy program. In Jerome County, ID, a group of investors from the Matco Corp., received $9.9 million in Federal subsidies.

No 2, the wheat program. A farmer in California used three corporations to turn eight entitlements worth $400,000 into 79 entitlements worth $3,950,000.

No. 3, the sugar program. Because of our sugar price support, the American consumers makes an involuntarily annual contribution to one corporation in Florida of as much as $52 million a year.

Mr. President, this is a very modest amendment. It would mean testing the agriculture entitlement programs so that the most needy farm income recipients are the ones to receive the commodity payments. I hope that this amendment will have the support of the Senate.

The PRESIDING OFFICER. Under the previous order, the Senator from Arkansas is recognized.

Mr. CHAFEE. Mr. President, I wanted to ask the Senator a question for 2 minutes.

Mr. PRYOR. I yield 2 minutes to the Senator from Rhode Island.

I ask unanimous consent, Mr. President, that I may be recognized for 2 minutes to make a motion.

The PRESIDING OFFICER. The Senator from Arkansas has yielded 2 minutes to the Senator from Rhode Island.

Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, I ask the Senator from New Hampshire a question. I agree with everything he said. One of the arguments he used is, well, you cannot police this, that the farm that has the father and two sons making $500,000 a year will just split it up. It seems to me that with the sophisticated equipment we have in this country we ought to be able to police this in some fashion. Does he have any thoughts on that particular challenge to the proposal he made?

Mr. RUDMAN. With the amount of money we spent on computers in the IRS and with the identification numbers and geographical numbers required, one would think it would not be difficult to police at all. If we can find welfare recipients who have cheated and received $100 or $200, we ought to be able to find a farmer who gets hundreds of thousands of the dollars only because of subdividing his farm.

The PRESIDING OFFICER. Under the previous order, the Senator from Arkansas is recognized to make a motion.

Mr PRYOR. Mr. President, at this time I move to table the underlying amendment No. 2305, and on that, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New York [Mr. MOYNIHAN] is necessarily absent.

Mr. SIMPSON. I announce that the Senator from Montana [Mr. BURNS] and the Senator from Idaho [Mr. SYMMS] are necessarily absent.

I further announce that the Senator from Colorado [Mr. ARMSTRONG] is absent due to a death in the family.

I further announce that, if present and voting, the Senator from Idaho [Mr. SYMMS] would vote "yea."

The PRESIDING OFFICER (Mr. HARKIN). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 66, nays 30, as follows:

[Rollcall Vote No. 162 Leg.]

YEAS—66

Adams	Durenberger	Lott
Akaka	Exon	Lugar
Baucus	Ford	Mack
Bentsen	Fowler	McCain
Biden	Glenn	McConnell
Bingaman	Gore	Nickles
Bond	Gorton	Nunn
Boren	Graham	Packwood
Boschwitz	Gramm	Pressler
Breaux	Grassley	Pryor
Bumpers	Harkin	Riegle
Burdick	Hatfield	Robb
Coats	Heflin	Roth
Cochran	Helms	Sanford
Conrad	Hollings	Sasser
Cranston	Inouye	Shelby
Danforth	Jeffords	Simon
Daschle	Johnston	Thurmond
DeConcini	Kassebaum	Wallop
Dixon	Kerrey	Warner
Dole	Kohl	Wilson
Domenici	Levin	Wirth

NAYS—30

Bradley	Humphrey	Mitchell
Bryan	Kasten	Murkowski
Byrd	Kennedy	Pell
Chafee	Kerry	Reid
Cohen	Lautenberg	Rockefeller
D'Amato	Leahy	Rudman
Dodd	Lieberman	Sarbanes
Garn	McClure	Simpson
Hatch	Metzenbaum	Specter
Heinz	Mikulski	Stevens

NOT VOTING—4

Armstrong	Moynihan
Burns	Symms

So the motion to lay on the table amendment No. 2305 was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. Mr. President, I wonder, while most of our colleagues are on the floor, if we might get some idea where we stand. The distinguished Senator from Indiana [Mr. LUGAR] and I are prepared to stay here and move on. I strongly encourage that. I keep hearing in the wind the sound of amendments fluttering hither and yon, eager staff, Members, lobbyists, and otherwise, but they do not quite materialize. I wonder if we might have some that could not only materialize, but do so under a relatively short time agreement so we can let our colleagues know where we stand.

We have passed the package of committee amendments, which was a substantial number, 40 or more amendments. We passed the very substantial $3.5 billion savings amendment. We have accomplished a fair amount today. But if we are to finish this bill, we are going to have to have cooperation from Senators. Otherwise we are going to be in late every single night for several nights to run.

Having said that, Mr. President, I yield to anybody who would like to step forward with an amendment.

The PRESIDING OFFICER. Is any Senator seeking recognition to offer amendments?

Mr. LEAHY. Then, regular order, Mr. President.

The PRESIDING OFFICER. The Senate will be in order.

Mr. LEAHY. I was thinking regular order was third reading. That was what I was thinking of.

The PRESIDING OFFICER. The Senate will be in order.

Mr. BOSCHWITZ. If the Senator from Vermont will yield, I have a couple of amendments, actually three, that I am prepared to go forward with. I understand some amendments may be laid down tomorrow. I would prefer to do them at that time, very frankly, if I could.

I have an appointment here in about 15 minutes. While I do not believe my amendments will be very lengthy—one of them I think will be accepted, it is just technical in nature—nevertheless they may require rollcall votes.

Mr. LEAHY. Mr. President, the Senator's appointment is not for 15 minutes. Maybe we could take care of all of them by then. Then, of course, we could get the rollcall started before he had to leave for his appointment.

Mr. PRESSLER. Mr. President, I have an amendment which I do not believe requires a rollcall vote. I am prepared to offer it now. I think it was agreed to on both sides.

Mr. LEAHY. I am not aware of the amendment the distinguished Senator is talking about.

Mr. PRESSSLER. I think the Senator's staff is aware of it.

The PRESIDING OFFICER. Has the Senator from Vermont yielded the floor?

Mr. LEAHY. I yield the floor.

AMENDMENT NO. 2307

(Purpose: to require a report concerning an interntional agricultural conservation reserve)

Mr. PRESSLER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from South Dakota [Mr. PRESSLER] proposes an amendment numbered 2307.

Mr. PRESSLER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title XII the following new section;

SEC. . REPORT CONCERNING AN INTERNATIONAL AGRICULTURAL CONSERVATION RESERVE.

(a) FINDINGS.—The Congress makes the following findings:

(1) Approximately one-fifth of the world's cropland is experiencing an intolerable rate of soil erosion;

(2) The cost of farm program subsidies is at record levels in many nations;

(3) The United States has taken the initiative of enrolling nearly 34 million acres of agricultural land in a ten-year Conservation Reserve Program;

(4) World food production historically has increased at an annual rate of 2.5 percent, but world food production during the 1980's has increased at an average rate of over 3 percent annually;

(5) All nations would benefit from the decreased agricultural subsidies and stabilized food production an international agricultural conservation reserve could provide.

(b) REPORT TO CONGRESS.—

(1) Not later than one year after the date of the enactment of this Act, the Secretary of Agriculture shall, in consultation with other federal agencies, prepare and submit a report to the Congress on the feasibility of negotiating an international agreement or treaty to establish an international agricultural conservation reserve to protect fragile agricultural soils.

(2) The report shall examine the potential for the establishment of an international agricultural conservation reserve under which:

(a) All signatory nations would agree not to subsidize farmers who bring highly erodible virgin land into crop production.

(b) All signatory nations would agree to return a certain percentage of highly erodible cropland to its natural state and keep it out of production for a minimum of 10 years and implement sound conservation practices on such land to control soil erosion.

(c) Provisions would be established to allow a portion of the land placed by signatory nations into the reserve to be returned to production if stocks fell below those levels needed to maintain adequate commodity and food supplies.

Mr. PRESSLER. Mr. President, today I am offering an amendment to S. 2830, the 1990 farm bill, which will require a report concerning an international agricultural conservation reserve treaty that would reduce soil erosion and equalize agricultural subsidy programs.

The high cost of farm programs, export subsidies, and worldwide soil erosion problems provide a unique opportunity needed to reach such an agreement.

My amendment requires a report to Congress not more than 1 year after the date of its enactment by the Secretary of Agriculture on the feasibility of negotiating an international agreement or treaty to establish an international agricultural conservation reserve to protect fragile lands. Such an agreement would require all grain exporting nations to agree not to bring any virgin land into production and to return an equal percentage of their cropland to grass or other natural per-

manent vegetative cover. The land would have to be held out of production for a minimum of 10 years. Emergency provisions would be included to allow land to be brought back into production if a shortage of grain occurred or a nation's production fell below domestic consumption. Such an agreement would benefit all nations.

The United States has taken the initiative in idling nearly 34 million acres through its Conservation Reserve Program [CRP]. In addition, more than 20 million more acres are idled because of U.S. farmers' cropland enrollment in other Federal farm programs. U.S. farmers must idle a percentage of their cropland in order to be eligible for crop subsidy payments. This has given an unfair advantage to foreign competitors who receive crop subsidies that do not hinge on the idling of cropland.

Mr. President, as we work together in crafting the 1990 farm bill, we need to keep our agricultural community prospering. However, one objective expressed to me by the farmers and ranchers I have visisted with, and from whom I have received letters and phone calls, is fair treatment in the world trade arena. Our farmers and ranchers have proven that they are the most efficient and productive in the world. They desperately need to be able to compete fairly with other major agricultural exporting nations.

The 1990 farm bill will not eliminate set-aside programs. This is why we must look to an international land conservation program. It is vital not only for fair trade, but also for the global protection of fragile lands.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. LEAHY. Mr. President, I have no objection to this amendment.

The PRESIDING OFFICER. Is there further debate? If there be no further debate, the question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (No. 2307) was agreed to.

Mr. PRESSLER. Mr. President, I move to reconsider the vote.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. Mr. President, again, after that flurry of unprecedented action, we are back to where we were.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2309

(Purpose: To authorize the Secretary of Agriculture to arrange for additional inspection services in connection with certain ports of entry)

Mr. MURKOWSKI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. MURKOWSKI] proposes an amendment numbered 2309.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Insert at the appropriate place in title XIX in the section entitled Collection of Fees for Inspections Services:

SEC. . ADDITIONAL INSPECTION SERVICES.

(a) AGREEMENTS.—The Secretary of Agriculture, in carrying out regulations prohibiting or restricting the entry of materials that may harbor pests, or diseases, is authorized to enter into agreements with operators or owners of vessels for the purpose of providing inspection services at ocean ports of entry in the United States in addition to the regular or on-call basis currently available in connection with such ships. Any such agreement shall provide for the payment by the operator or owner of an amount determined by the Secretary to be necessary to defray the costs of providing additional service pursuant to such agreement.

Mr. MURKOWSKI. Mr. President, I rise today to offer a simple, straightforward amendment to the Department of Agriculture to be reimbursed for certain necessary inspection services.

As you know, the Department is responsible for inspecting vehicles entering the United States to ensure that no agricultural pests are present. This is a very necessary task, and one which the Department has performed in an exemplary manner. However, there are occasions when the system breaks down.

For a number of years, there has been a problem involving the inspection of cruise ships entering southeast Alaska from Canada. Simply put, the Department's inspectors are located in Anchorage, and the cruise vessels enter at Ketchikan—over 800 miles away. The Department's inspection budget simply does not allow inspectors to meet the cruise ships upon arrival in Alaskan waters, and until these ships have been inspected, nothing can be offloaded.

Because passengers do not disembark until later ports, the lack of inspection does not affect them. However, it does affect the vessels' ability to promptly and properly dispose of their garbage. Storage space on any vessel is limited, and keeping garbage on board poses a serious health hazard for the passengers and crew on board.

The only alternative, at this point, is to steam outside U.S. jurisdiction and dump the garbage overboard. Frankly, Mr. President, I do not know anyone on either side of the aisle that would find that an acceptable option.

My amendment is revenue neutral. It simply provides for reimbursement agreements between cruise ship operators and the Department. In short, if the industry wants extra inspections it will be able to pay for them.

Not only will this amendment help ensure pollution control, and reduce health risks to our citizens, it reflects industry and government cooperation for the advancement of a cleaner environment. I urge my colleagues' support. It is my understanding it has been cleared on both sides.

I defer to the Republican floor leader.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, we commend to the Senate the amendment of the distinguished Senator from Alaska. The amendment clarifies the program that was included in the budget amendment offered by the distinguished chairman of our committee this morning. We recommend an "aye" vote for this amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If there is no further debate, the question is on agreeing to the amendment.

The amendment (No. 2309) was agreed to.

Mr. MURKOWSKI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who seeks recognition?

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I would like to, for a minute, discuss this amendment with the managers before I offer it. I have an amendment to conform the checkoff approval provisions relating to wool, to the other checkoff program approval provisions that we have in law. As my colleagues know, most of them are majority. This one, for some reason, is two-thirds.

Sixty-three to sixty-eight percent of the producers support the checkoff, the self-promotion, self-help part of enabling legislation for them, which others are using.

I want to just ask the managers: Have they looked at that situation? I

think it is only fair, and I would intend a very simple amendment that would just make the checkoff approval provision for wool comparable to those for other livestock promotion programs.

Mr. LUGAR. If I may respond to the distinguished Senator, I have not seen the amendment. I will be happy to study it. I suspect testimony might come from Members who have an interest in wool in their States, and we would want to hear from them. But I certainly look forward to examining the amendment.

Mr. LEAHY. Mr. President, I wonder if I could ask the Senator from New Mexico a question. Is this similar to a provision that is in the House farm bill?

Mr. DOMENICI. I believe it is. My State does happen to be a very big wool-producing State. I am not on the Senator's committee. But I have met with the people in our State regularly, and it seems to me they very much would like to have a majority vote for the checkoff which costs the taxpayers nothing, as my colleagues know.

Mr. LEAHY. I wonder, Mr. President, if the distinguished Senator would mind withholding just for a minute or two and just allow me a chance to take a look at that. If the amendment is what I believe it is, I do not think there will be any objection to it. We may just save all of us some time.

If the distinguished Senator will withhold, it will be my intention to put in a quorum call, unless someone is seeking recognition on another matter, so that he would not lose his ability to bring it up.

Mr. DOMENICI. Mr. President, I am most appreciative of the chairman's statement, and I certainly will not send the amendment to the desk. I have now provided it to both the chairman and ranking member, and I look forward to their perusal of the amendment. Certainly, I do not want to take this issue and expedite it, if there are other Members in the Senate who clearly have an interest in wool or think to the contrary.

Having said that, I believe I will make a few remarks about the farm bill while the distinguished managers take a look and see what they think about the amendment.

Mr. President, I rise to comment on a very important piece of legislation before us, the 1990 farm bill, formally known as the Food, Agriculture, Conservation and Trade Act of 1990. I know that my colleagues on the Senate Agriculture Committee have worked many long and difficult hours in developing this bill. I commend them for their efforts.

Today, we are facing a much different agricultural economy than 5 years ago. I think the 1985 farm bill did a good job of moving agricultural policy closer to free market forces. We have seen a 6-year trend of debt retirement, and farmers now have a more conservative approach to financing. Land values have ceased their precipitous decline and are now moving upward. Commodity prices, during the last couple of years, have risen moderately, reflecting tighter crop supplies and expanding world trade. Recent USDA forecasts of net cash income of farmers in 1990 range from $55 to $59 billion, compared with the record income of $57 billion in 1988.

Our citizens enjoy a safe, relatively inexpensive variety of food. Here in the United States, about 14 percent of our total personal consumption spending is on food, while citizens of Japan spend about 21 percent; the U.S.S.R., while it is hard to be precise, we think they spend about 40 percent. A kilogram of coffee costs $7.61 in Washington, DC, and $12.25 in Singapore; while a kilogram of boneless sirloin steak costs $9.74 here and, believe it or not, $45.66 in Tokyo.

I think it is time, and everyone does, to refine the Food Security Act of 1985. I support the goals of providing increased program flexibility to farmers and developing a farm bill that is more responsive to changing international markets.

Certainly, agriculture is a tough, competitive, and mature industry. Agricultural production will always be at the mercy of climatic conditions. Over the years, we have seen the agricultural sector moving toward a smaller number of farms. However, these farms are generally larger, quite efficient, and enjoying enconomies of scale. Today's successful farmer is a competent manager, a skillful negotiator, and an innovator. Our farmers and ranchers can efficiently produce plentiful amounts of the highest quality commodities. Given a level international playing field, American agribusiness can compete with anyone, anywhere, anytime.

Mr. President, as ranking member of the Budget Committee, I noted with disappointment and dismay the cost estimate for the Senate-reported bill. As estimated by the Congressional Budget Office, direct spending for the commodity programs authorized in the bill were $2.9 billion in 1991 and $4.3 billion, 1991 to 1995, over basically a straight extension of the 1985 law.

I compliment the chairman and ranking member of the Agriculture Committee for recognizing the excessive cost of the provisions contained with the Senate-reported bill and offering an amendment to bring spending back to the baseline level. At least, the bill now before us is back to the level assumed in the Senate-reported budget resolution.

I think it is important, however, to note that the House-passed budget resolution assumed reduced spending on farm programs of $800 million in 1991 and $8.1 billion over 5 years.

However, I do not know if there is slippage between the House-passed resolution and the House farm bill. Perhaps the distinguished ranking member knows whether the farm bill that is before the House saves $8.1 billion over 5 years as recommended in the budget resolution.

I would caution my colleagues that we should not send the wrong signal to our agricultural producers. The need for reduction in spending for farm programs is clear.

Agriculture will have to do its part to contribute to the deficit reduction package. The summiteers from both the House and Senate are calling for cuts in agriculture. The administration included in its 1991 budget a reduction in CCC spending of $1.5 billion next year and $19.4 billion over the next 5 years. The administration also supports reductions in agriculture spending within the context of the budget summit. To date, the summiteers have not reached an agreement, but I believe we will. And when we do, obviously agriculture will have to take some portion of the savings.

The "other summit" held in Houston earlier this month sent a clear signal to the world that trade-distorting agricultural subsidies worldwide would have to be reduced and eventually eliminated. It is my hope that we will now begin to see movement in the GATT negotiations that reflect those views expressed in the summit communique.

In the absence of a budget which does not meet the Gramm-Rudman-Hollings targets, this country will face massive across-the-board cuts this fall. The midsession review of the budget prepared by the Office of Management and Budget estimates a Gramm-Rudman-Hollings baseline deficit of $168 billion, and subsequently, a sequester of approximately $100 billion will occur if our budget summit efforts are not successful, we will have that planned train wreck on October 15, in which case OMB projects CCC outlays to be cut by $3.9 billion.

But, agricultural spending cuts don't have to be that severe and, in fact, should not. I would remind my colleagues that we are in the midst of a budget summit called by the President, so that both the administration and the Congress can develop a multiyear, enforceable package to reduce the deficit.

Let me suggest to you that some of the problems that plague the agriculture sector have distinct similarities to our overall Federal budget, and in the larger picture they are all related.

Large Federal deficits drive up interest rates, increase debt carrying costs of all debtors—including farmers, increase the value of the dollar overseas,

and reduce all exports—including agriculture, this reduces export commodities prices and, thereby, reduces farm income and creates cash-flow problems to service debt.

I am convinced that the one thing we can do that will benefit agriculture in the long run more than anything else is to lower those projected deficits. Clearly, that is what I have been trying to do as a participant in the budget summit, because if we do that there is a high probability that interest rates will be reduced across the board. That means if we are going to succeed in a budget summit, everyone is going to have to share in this sacrifice.

To do that, agricultural expenditures must be reduced below a simple extension of current law. That is what the budget summit is driving toward and what the House passed-budget resolution called for, although as I indicated I am not at all sure that the budget resolution in the House is being implemented by a farm bill. That is what the Houston economic summit has requested, and I believe in the end this is what the American people are asking us to do. Ultimately I believe it is precisely what the farm sector, those farmers and ranchers in the United States, will benefit most from, and ultimately it will ensure their long-term economic prosperity.

The bill before us obviously has missed that point, but I am hopeful that the economic summit will not. I am hopeful that we will have a fair sharing of the deficit reduction burden, and agriculture will bear its fair share.

Mr. President, I wonder if the distinguished chairman and ranking member have had an opportunity to review my proposed amendment. I am not trying to rush. If not, I can wait until tomorrow.

Mr. LEAHY. Mr. President, we are reviewing it.

VISIT TO THE SENATE BY MEMBERS OF THE JAPANESE PARLIAMENT

Mr. WIRTH. Mr. President, we have in the Chamber today a distinguished group of Japanese parliamentarians from across the political spectrum in Japan. They are in Washington for a week to be meeting with Secretary Cheney, meeting with people here on the Hill on United States-Japan relationships, also developing a whole new process for setting up a broader set of relationships between the United States and Japan. There have been some rocky times in the past, and we have just had a very fascinating set of discussions on the Kurile Islands, United States budget process, naval arms control, and the Korean peninsula, easy isues to all of us.

RECESS FOR 5 MINUTES

Mr. LEAHY. Because we do have a group of distinguished parliamentarians from Japan on the floor, I would ask unanimous consent that we stand in recess for 5 minutes so that Members might meet our friends from Japan; that when we return Senator DOMENICI be recognized.

There being no objection, the Senate, at 6:38 p.m., recessed until 6:43 p.m.; whereupon the Senate reassembled when called to order by the Presiding Officer [Mr. HARKIN].

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT

The Senate continued with the consideration of the bill.

The PRESIDING OFFICER. The Senator from New Mexico.

AMENDMENT NO. 2310

(Purpose: To conform the checkoff approval provisions relating to wool to other livestock checkoff program approval provisions)

Mr. DOMENICI. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI] proposed an amendment numbered 2310.

Mr. DOMENICI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 929, between lines 18 and 19, insert the following new section:

SEC. 1730. CHECKOFF PROGRAM FOR WOOL.

Section 708 of the National Wool Act of 1954 (7 U.S.C. 1787) is amended by striking out "two thirds" each place that such appears and inserting in lieu thereof "a majority".

Mr. DOMENICI. Mr. President, I understand that the managers are willing to accept this amendment.

Simply stated, this will make the provisions relating to the wool checkoff program similar to other livestock checkoff programs, changing the required voting for approval to a simple majority instead of a super majority.

I strongly support the concept of producer-funded and producer-directed promotion programs to increase market demand. The National Wool Act, as amended, authorizes the wool and mohair industries to engage in market development, research and promotion activities.

Following the renewal of the Wool Act, the Secretary of Agriculture conducts a referendum of all sheep and Angora products to determine if a two-third majority of producers voting or of sheep and goat inventory represented by the voters favor continuation of the promotion programs. If approved, a deduction rate is established for producers to fund the program.

My amendment would merely change that acceptance level to a simple majority.

This amendment would bring the sheep industry's promotion program in line with other livestock sectors' programs. Only a simple majority approval level was required for the beef, dairy and pork promotion programs.

Since 1955, at least 63 percent of sheep producers and at least 69 percent of sheep production in the United States have voted to continue the wool promotion program. My amendment is supported by producers.

According to the Congressional Budget Office, this amendment would not increase the cost of the 1990 farm bill. This is merely a technical measure designed to bring uniformity to the livestock industries' promotion programs.

I understand this provision was included in the chairman's mark reported by the House Subcommittee on Livestock, Dairy and Poultry and was accepted with no debate or controversy.

Mr. President, I would urge my colleagues to supprot this amendment.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. LUGAR. Mr. President, we supprot the amendment of the distinguished Senator from New Mexico, and the logic that he has offered is persuasive. The program that he has described is one of the older programs, and perhaps had the extraordinary majority because of that, but clearly is inconsistent with the other checkoff programs. In other areas, the 50-percent majority has been the standard. We believe that is a fair standard, and we support the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from New Mexico.

The amendment (No. 2310) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

AMENDMENT NO. 2311

(Purpose: To prohibit the organically produced certification from being granted to a handling operation that uses storage containers or bins that contain fungicides, preservatives, or fumigants)

Mr. GRASSLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Iowa [Mr. GRASSLEY] proposes an amendment numbered 2311.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out paragraph (5) of section 1617(a) and insert in lieu thereof the following new paragraph:

"(5) use any packaging materials, storage containers or bins that contain fungicides, preservatives, or fumigants;".

Mr. GRASSLEY. Mr. President, I have submitted a copy of my amendment to both sides of the aisle. I believe that it likewise will be approved.

I want to say in support of my amendment that overall I compliment the Committee on Agriculture for their efforts to promote consumer confidence in organic foods. If consumers determine that they prefer organically produced foods, it must be clear to them and to the farmers who attempt to grow organic foods what constitutes organically grown food.

However, certification of only the production segment establishes a public perception that the agricultural product is definitely chemical hormone free. This can be a false illusion if products become tainted after it leaves the farm. Instances are reported within the food industry of organic products transported within the same shipment as toxic materials; organic products showing traces of chemical residue after joint tenancy in storage facilities with nonorganic pruducts; and contaminated shipping containers used for organic products.

The public health safety and welfare is not served by certification of merely the first link in the marketing chain to the consumers. Unless an entire organic certification trail is attained the consumption of food items labeled "organic" will equate that of the spin of a roulette wheel for our consumers.

The current push toward raising environmental consciousness and striving to redirect agricultural production toward environmentally sound practices will be moot if the ultimate sale of the product falls through due to the loss of product integrity on its way to the market.

I believe that my amendment closes these loopholes. We will have that integrity.

I yield the floor.

Mr. LUGAR. Mr. President, the distinguished Senator from Iowa has identified an important point with regard to the integrity of the organic certification process. He does close the loop. For that reason, we strongly support his amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Iowa.

The amendment (No. 2311) was agreed to.

Mr. GRASSLEY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LUGAR. I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BINGAMAN). Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I rise just for a few minutes to address in a very general way the entire farm bill, and to do this in the way of opening remarks, but also to do it in a way of complimenting my colleagues on the Senate Agriculture Committee who have done so well.

I do not serve on that committee, but I had an opportunity to attend a few meetings and sit in on the markup of this bill by the Senate Agriculture Committee. There were a number of difficult issues and a lot of late nights spent by these committee members in resolving those issues, and I thank my colleagues for their dedication to this entire effort.

Because the farm bill occurs only once every 5 years it may seem like there is not very much to do because it does not happen every year. But it sure is a massive undertaking as evidenced by anyone who has had an opportunity to see the legislation, 1,000 pages, and the committee report of about 800 or 900 pages.

Every 4 or 5 years, Congress reauthorizes farm legislation, and the committee saddled with the responsibility does it for many reasons.

The main reasons are an adequate food supply for America's consumers, continued vitality and viability of rural America, and, lately, in the last two farm bills, much and justified concern about the environment, and, of course, farm income as well. It used to be that farm income was the only concern. It is one of many concerns now.

So I say that the members of this committee did their work very well. Of course, in this process of doing this work very well, there was much compromise, and, to some extent, to get a bill voted out of committee, there has to be something for everyone. That tends to make legislation that may be otherwise relatively simple, very complex.

There are a number of points that I feel must be further addressed to achieve the goals of fairness, simplicity, and flexibility necessary for any farm program to work. The most important issue I see is meaningful planting flexibility. I have spoken before to this body on the need for farmers to be able to make planting decisions based on the market forces, based on those market situations, and not just on determinations made by politicians and bureaucrats in Washington, DC. The Agriculture Committee has made strides toward increasing planting flexibility. But I feel that we must revisit this issue.

The committee missed the mark on flexibility, in my estimation, when it defeated the amendment of Senator BOSCHWITZ, which would have provided neutral planting signals for program crop acres. His program would have been good for farmers, good for the environment, and it would have saved money to boot. On this latter point, that I hope my colleagues will have a chance to consider efforts to save money in this bill and to save it without hurting agriculture. They will find that there can be a considerable amount of money saved by granting more flexibility to farmers to make a determination on what they plant. Flexibility is extremely important to Midwestern farmers.

Now, there are other areas that I feel are critical to Iowa farmers in this bill. Agriculture trade and the conservation titles are important interests in my State, and there is a growing interest in my State about the whole issue of sustainable agriculture.

A final question regarding our 1990 farm bill is whether or not it will fit within the budget agreements that we must reach to bring our deficit under control. I am well aware of the efforts of the managers of this bill to bring the bill, at least in their estimation, into conformity with the guesstimates of the Congressional Budget Office. Starting out this way in a more fiscally sound way was a positive thing for them to have done.

There is still a lot of argument about cost. There will be honest differences of opinion, I am sure, but I hope that when we consider any opportunity to save money in this bill in the future, we give particular consideration to those that do not affect farmers' income.

The 1985 Food Security Act has cut payments to producers for the last 4 years. I am pleased to see that this bill proposes a freeze on target prices and halts the decline in our target prices. This means, however, that we must find alternative ways to cut Government spending without hurting farm income, and flexibility, I am sure, is jut one of the many ideas that might be thrown out for our consideration.

Reform of our program payment limits could be another opportunity. We just had a vote on that. I am sure that Senator REID would say that we missed a wonderful opportunity to save a lot of money. But some of us that voted against that felt that just gross payment limitations or gross income was not a fair determination of how you ought to determine eligibility for the farm program.

There are a number of other options which have been presented in committee and, I am sure, will be presented here again on the floor. I intend to review each option carefully with the goal of achieving a balance between a sound farm policy and a sound budget policy. In the end, we need a farm program that is fiscally responsible, environmentally sound, rationally consistent, fair to farmers, and fair to consumers. In regard to being fiscally responsible, I think we all need to remember that when we consider the impact of Federal budget deficits upon interest rates in the United States, if we can protect just 1 percentage point of what farmers will pay in interest as the cost of operations, we will increase farm income by $2 billion a year and in some respects do much more for agriculture that way than what we do directly through price support payments.

So I hope my colleagues share these goals and will work toward these ends.

I yield the floor.

Mr. COATS. Mr. President, I am convinced, like most Hoosiers, that a great deal of what is best about Indiana is found in its farmers.

Indiana values those in agriculture for their economic contribution. Farming is, after all, the No. 1 family-owned business in the State. Farms cover two-thirds of Indiana. The value of Indiana's agricultural exports is now over $2 billion a year. And we must always remember that between American dependence and American independence there is only a thin layer of fertile soil.

But Indiana also looks to farm communities for something other than prosperity. It views them as the defenders—the incubators—of traditional family values. Family farms help provide both our wealth and our conscience. They remind us what is best about stable, healthy families and the virtues they breed. Their importance is more than economic.

For many years now, the needs of agriculture in Indiana, as well as the health of agriculture in the Nation, have found a champion in my colleague DICK LUGAR. His work on the Agriculture Committee is unsurpassed. His stature in the Senate on this issue is unequaled. Over the years, he has provided a strong, distinctly Hoosier voice in the formation of America's farm policy. And with this new farm bill that history of concern and commitment is confirmed.

This is an Indiana tradition I hope to share and strengthen. For a decade in the Congress, I have been guided by a few firm principles—convictions I think can be consulted with confidence.

I believe America requires a farm policy that reflects a deep concern for our farm families. We must remember that a farm crisis is not just numbers and deficits, but pride and tears.

We need to move at a gradual but sustained pace toward free farm markets in which supply and demand determine production and price. The history of intrusive government intervention in farming has been a history of failure.

We need to realize that expanded markets for agricultural products abroad are vital to America's long-term economic health. Indiana is second only to the State of Washington in per capita income derived from exports. We send abroad nearly 50 percent of the crops we produce. Indiana ranks fifth in corn exports, fourth in soybean exports. And we also need to ensure that free international trade is fair international trade.

We need to expand markets at home by finding new uses for old crops. Agricultural innovation and technology is essential.

And we need to guarantee that environmental restrictions, particularly on the use of agricultural chemicals, are both needed and reasonable before they go into effect. Farmers have an important role in protecting the environment. But their burden must be fair.

I was pleased with most of the features of the 1985 farm bill. In general, it worked as we intended. That legislation reduced the huge surpluses of grains and fiber that accumulated under previous Government programs. It has helped make the prices of U.S. agricultural products competitive in world markets. It has helped stabilize farm income.

And now we make our regular return to this issue. I have examined the bill before us closely. It is complex. The amendment process will be occasionally controversial. But given the convictions I have outlined, I have concluded this bill is generally good for agriculture, good for Indiana and good for the Nation.

I believe that farms should prosper through sales, not subsidies. Provisions that stimulate agricultural research are welcome. I support provisions of the Lugar-Leahy bill on acreage flexibility.

We should be concerned about certain environmental provisions of this bill. The issue of target prices and loan rates will again be debated. But, taken as a whole, the Lugar-Leahy legislation is well written, well intended, and needed.

Agriculture is our Nation's largest industry, counting for 16.6 percent of GNP in 1986. There are 2.16 million farms in the United States. This debate we are entering is essential to our economic health. It is vital to Indiana's future. And the bill before us is a step in the right direction.

Mr. KASTEN. Mr. President, I rise today to voice my thoughts on the 1990 farm bill.

The 1990 farm bill is the single most important farm legislation the Senate has addressed in the last 5 years. The Agriculture Committee has worked many long hours writing this bill and bringing it to the floor for consideration. I am hopeful that all sides can work together on this critical legislation so that we can keep American agriculture going—and going strong—for the next 5 years.

There are a few key areas of the bill that I think could stand some improvement. These include dairy, conservation and trade—and I intend to offer amendments to make the necessary changes.

DAIRY

The dairy title of the bill passed by the Senate Agriculture Committee has already made some significant strides toward reform—reforms which I have strongly supported for years. I would like to express my appreciation to the Agriculture Committee for the efforts they have made in this area which is so crucial to my home State of Wisconsin.

The 1990 farm bill will repeal the California Make Allowance which will permit cheese, butter, and nonfat dry milk from other regions of the country to compete in the lucrative California market—in which artificially low prices have protected California dairy products for the last 35 years. This important provision will also stem the disproportionate growth of California's processors. It's time to establish a level playing field for all dairy to play on.

Another significant reform which I have strongly advocated for years is a change in the determination of milk surpluses to a total solids milk equivalent.

This new formula will increase the stability of the support price, which has fluctuated over recent years due

to the butterfat formula used by the Commodity Credit Corporation.

The bill also instructs the Secretary of Agriculture to reform the Minnesota-Wisconsin [M-W] price series and Federal milk marketing orders, both of which are outdated and have come to discriminate against Upper Midwestern dairy in recent years.

This is a significant improvement over current law, but the committee left these provisions dangerously open-ended. I will make an amendment to set a solid deadline of January 1, 1992, for reform of both the Minnesota-Wisconsin price series and Federal milk marketing orders.

Our Nation's dairymen, especially those in Wisconsin and the entire Midwest, have waited long enough for relief from these outdated and discriminatory pricing systems.

Secretary Yeutter recently informed me that hearings on milk marketing order reform will be held in Eau Claire, WI, as well as in Minneapolis and four other locations. I am heartened by this news—I'll be testifying at the Eau Claire hearing and I'm hopeful that by the end of 1991 all American dairymen will be competing on a level playing field.

OPENING NEW MARKETS

Opening new markets for American agriculture should be one of the greatest priorities of this farm bill. The future success of our Nation's farmers lies in foreign markets. I will be working with the distinguished senior Senator from Iowa [Mr. GRASSLEY] to set aside 25 percent of the Export Enhancement Program funding for a Value Added or First Stage Processed Export Enhancement Program. This new market research program will aggressively seek out new foreign markets for American agriculture.

I will offer an amendment to define within the trade section of the bill what a first-stage processed agricultural product is. It is of particular concern to me as a Senator from America's dairy State that products like cheese, butter and nonfat dry milk are included in this program. Canned vegetables, chilled meats—like pork and beef, flour and oils will also greatly benefit from the expansion into these new foreign markets.

There are untapped markets all over the world just waiting for our products—and it is up to us to exploit that opportunity.

CROP FLEXIBILITY

Another important change we need to make is a move toward crop flexibility. I support a crop flexibility plan that will permit farmers to flex out of part of their program base in order to grow a crop that is in high demand in the marketplace. If a farmer tried to do this now, he would lose some of his Federal program benefits.

We have to change that policy. Just look at what happened to oats at the end of the 1980's. Due to the oat bran craze, consumer demand for oats soared. Because farmers were locked into their program crops and faced losing their program base acreage if they were to grow anything else, America wound up doubling its imports of oats—at higher prices—between 1987 and 1989.

That is just one example of how we need to make Federal agriculture policy more responsive to real national needs. The 1990 farm bill gives us a golden opportunity to make some real improvements

CARGO PREFERENCE

Mr. President, I will also be working closely with other Senators from the Great Lakes to resolve the cargo preference inequity. The 1985 farm bill increased the cargo preference requirement for the Food for Peace Program—the amount of goods which must be sent on U.S.-flagged vessels—from 50 to 75 percent of all goods shipped. It also guaranteed through a set-aside, a short-term continuation of Food for Peace shipments to the Great Lakes.

This change was called for to help the U.S. shipbuilding industry. Our domestic shipbuilders have long been under siege by foreign competition. It was argued that increasing the percentage of U.S. ships carrying Food for Peace cargoes would spark a demand for more U.S. ships—thus helping the domestic shipbuilding industry.

What has taken place, however, is a steep decline in Food for Peace trade activity in the Great Lakes region. The Port of Milwaukee handled 220,000 tons of Food for Peace cargo in 1987, in 1989 it handled a mere 70,000 tons.

So far in 1990, there have been no shipments whatsoever. The Port of Kenosha in my own State of Wisconsin has been forced to close down as a result of the 75 percent cargo preference. Mr. President, this is an outrage—ironically, in an effort to help American shipping we force American ports out of business and put American labor out of work. A Great Lakes set-aside is necessary to the maintenance of Wisconsin's maritime and agricultural export trade.

Quite simply, the higher the cargo preference requirement mandated by Federal law, the worse Great Lakes ports do. Even though grain products can be purchased at far less cost in Milwaukee than elsewhere, they must be shipped 1,500 miles south to be put on a U.S. vessel—instead of being loaded on a ship in Milwaukee. This does not make sense. It imposes inefficiencies on the system, and it hurts Wisconsin's farmers. The agricultural community in Wisconsin and other Great Lakes States is being damaged by a flawed Federal policy which forces them to compete unfairly with other regions of the country.

Mr. President, it is my greatest hope that the 1990 farm bill will resolve this terrible inequity.

CONSERVATION

One of the Senate's best targets of opportunity in this farm bill is the issue of conservation. With my support and the leadership of Senator LEAHY of Vermont and Senator LUGAR of Indiana, the Agriculture Committee has put together a bill that goes a long way toward uniting America's agricultural policy with a wise and forward-looking environmental policy.

For too many years, we have neglected the fact that we are all sustained by the quality of our soil. The livelihood of our farmers depends entirely on the production of soil and water—so protecting these resources ought to be priority No. 1 for any intelligent agriculture policy.

The conservation title of the 1985 Food Security Act was landmark legislation—the premier conservation legislation since World War II. Linking public support for agriculture to good conservation makes just plain good sense, because we all know that good farming means good conservation.

Poor conservation practices are like a business that steadily consumes its own capital, little by little squandering its inheritance from nature. You can get away with this for a while, but in the end, the resources run out—and you are left with nothing.

That's why I'm delighted to report that the Agriculture Committee has approved a bill that greatly strengthens several of the conservation provisions of the 1985 bill. This action makes it clear that Congress wants to include environmental protection as a full partner in agriculture policy.

This bill includes many of the provisions of the Farm Stewardship Act of 1990 that I introduced in April. Among these are adjustments to swampbuster to improve conservation of wetlands and to increase the ability of farmers to comply.

Most important of all, the bill changes the penalty trigger from producing an agricultural commodity on a converted wetland to the actual wetland conversion itself. It establishes a reduced penalty for cases in which a farmer who converted a wetland, acting in good faith and with a record of no violations over the previous 10 years, could come back into compliance by restoring or mitigating that wetland loss.

Mitigation would become an option where it is both reasonable and technically feasible to offset the loss of a wetland. The active participation of the U.S. Fish and Wildlife Service and the Soil Conservation Service in planning wetland restoration and evaluat-

ing exemption requests will ensure a program that is effective and fair.

This provision should take much of the confusion out of swampbuster—confusion which has hampered effective implementation of this program over the past 5 years.

Together, the change in the trigger, a reduced penalty, and the ability to restore wetlands has shifted the emphasis of swampbuster from penalizing farmers to protecting wetlands.

The 1990 farm bill will make swampbuster more practical. In some cases, farmers have been fined as much as $200,000—that is wrong. These laws were not intended to put farmers out of business for an inadvertent violation that could be corrected. They were designed to protect wetlands and conserve our soil—that is what the 1990 reforms are all about.

Another important component of my bill that has been incorporated in the 1990 farm bill would amend the credit title to continue and expand the forgiveness of farm debt in exchange for conservation. This is intended to be a domestic version of the debt-for-nature swaps that are making progress in saving tropical rainforests.

This part of the credit title has been used only sparingly since 1985; the changes proposed in this farm bill will make this option available to farmers much earlier in the loan-servicing process, even to reduce the principal on new Farmers Home Administration loans. This should help reduce future loan losses to the Government, while at the same time giving a boost to our conservation efforts.

The creation of the Wetlands Reserve Program is another step in the right direction. Combined with swampbuster, the reserve program can help bring to an end our 200-year history of wetlands destruction—a history in which agricultural conversions alone are responsible for the eradication of around 100 million acres of destroyed wetlands. This bill will help us build equity in conservation by permanently protecting wetlands, so that future generations of Americans will be able to enjoy the biological and hydrological benefits healthy wetlands can provide.

Finally, I intend to propose changes in the highly erodible land sections of the title to improve the implementation of conservation compliance. Farmers with erodible land are required to have a conservation plan—an erosion-reduction plan—and to have fully implemented it by 1995.

But a bad plan is as bad as no plan at all, and many plans submitted to date just don't do the job. I will propose that conservation compliance plans mandate active application of primary conservation practices—not just conservation tillage, but such other well-known conservation practices as contour planning and strip-cropping as well.

We need to work toward the day when the application of basic, cost-effective conservation practices is a matter of routine throughout American agriculture. Our ultimate goal must be non-degradation of our soil resources. My amendment will be a step in the right direction.

At a time when environmental protection is becoming a genuinely global concern, it is gratifying that we in America can point to the conservation provisions of the fundamental agricultural law of this land—and know that we are tending to conservation at home as well as abroad.

It is vitally important to all of us that the conservation measures contained in this bill succeed—succeed in gaining widespread support in the agricultural community, and succeed in conserving our fragile natural resources that are starting to show signs of wear and tear.

Mr. President, what we are addressing is nothing short of the future of U.S. agriculture, and the future of the American community as a whole. I look forward to working with my colleagues in crafting this important legislation.

Mr. McCONNELL. Mr. President, since coming to the U.S. Senate, agriculture has been one of my top priorities. Farming is an extremely important industry in Kentucky. In 1989, Kentucky's 90,000 family farmers sold more than 2.5 billion dollars' worth of farm products. While most people believe tobacco and horses dominate Kentucky agriculture, the fact is over 17 different commodities contribute more than $1 million to farmer's income.

This diversity in Kentucky's agricultural economy makes my State a strong competitor in domestic as well as world markets. Over one-fourth of our States' production goes to foreign consumers and we are working hard to increase our presence in the global marketplace.

Today, American agriculture is a world leader and the envy of every free nation. This country's farmers are the most productive, most efficient, and the most concerned about our natural resources than any of our competitors.

Despite the fact that less than 2 percent of the U.S. population lives on a farm, agriculture represents 17 percent of our gross national product and provides jobs for an estimated 20 million Americans.

Just how productive are America's farmers? One American farmer or rancher provides food and fiber for 92 of his neighbors and 22 people overseas. This productivity spreads beyond farmers to benefit consumers.

American consumers pay the lowest percent of their personal income on food than any other country. Our food is not only the most affordable, but consumers have the widest variety of food and the assurance of quality and safety.

This legislation which we are considering the Food, Agriculture, Conservation, and Trade Act of 1990, is designed to maintain the wide array of Federal programs which provides each of us with a safe and affordable supply of food and fiber.

The farm bill is not only commodity support programs. S. 2830 includes provisions to encourage research into new technologies, practices to protect environmentally sensitive habitats, food aid to developing nations, and countless other beneficial programs.

The average person would never see a direct benefit from this farm bill other than the food in which they eat. However, it is the countless number of indirect benefits that makes this bill good policy.

Many of my colleagues will oppose the farm bill. They have been told the farm bill only provides subsidies to already wealthy farmers and farmers are no more deserving of support than plumbers or janitors. But I argue that plumbers and janitors do receive support and indirect benefits from a sound federal farm policy.

I do not contend that our current Federal farm policy is without flaw. Many of the problems have been exploited recently in an effort to undermine the need for a farm bill. I suggest that we proceed cautiously with an eye on the future. Our resources must be conserved and maintained if we are to be prepared for the 21st century when there will be an additional 1 billion people on this planet to feed.

The 1985 farm bill allowed agriculture to prepare to meet the challenges of the future. In the many farmer meetings which I have held across Kentucky, the vast majority of farmers support the basics of the 1985 bill. They have obviously suggested some changes and many have already been incorporated into the new package, but time and time again they say, "conditions are improving, don't mess that up."

The next few days will be filled with debate on amendments that could mess things up. Many believe that farmers should not be treated differently from other segments of our society, but they are different. Farmers produce something that none of us can live without—food. I would hope that each of my colleagues will realize that all Americans benefit from a sound fair agriculture policy. Not just the 2 million farm families, but each and every U.S. citizen.

Mr. LEAHY. Mr. President, just for the sake of our colleagues, we are trying to set the schedule for the continuation of the farm bill. As I said

earlier, we had a very good debate on one of perhaps three or four most important amendments that would come up, the payment limitations debate, which was actively entered into by both the proponents and opponents of the amendment. And we voted on that.

There have been some very significant amendments, especially the first one offered by the distinguished Senator from Indiana and myself, that required in this bill to bring the cost down about $3.5 billion. That also was passed. There were numerous other amendments presented to the committee after the farm bill was voted out, I believe some 40 such amendments, that also were passed en bloc. A number of Senators have given their opening statements. I commend all that.

But I urge Senators to contact me or Senator LUGAR or our staffs tonight so that we can schedule things for a vote tomorrow and Monday, and get these amendments in some orderly fashion.

For those who have amendments they think can be accepted, the staff and appropriate Senators are going to be working throughout the weekend to try to clear amendments. So those who feel they have something that they can win by our accepting it ought to take this opportunity to bring it forth so we can do that this weekend, because if we get into the hurly-burly of the debate next week we may not have the opportunity to look closely enough at a Senator's amendment and we may not realize how brilliantly constructed and important it is and thus might not be willing to accept it and may force him to go to a rollcall vote which he may not win.

So I would encourage those who have amendments to bring them forth now.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SCHEDULE FOR THE REMAINDER OF THE SESSION

Mr. MITCHELL. Mr. President, for the information of Senators, I would like to describe the schedule for the remainder of the legislative session, between now and the August recess, so that Senators can have a full understanding that those events which occur or do not occur now will have an effect on when the Senate goes into recess in August.

We have begun, today, action on the farm bill, a very important measure with respect to which a large number of Senators indicated an intention to offer amendments. Notwithstanding that, only one amendment was offered today despite the fact that Thursday has been designated now for several years as the day on which the Senate is expected to remain in session; as what one might call the maximum work session day.

Upon disposition of the farm bill, I have indicated publicly on many occasions, and in my discussions with the distinguished Republican leader, it is my intention to proceed to the campaign finance reform bill.

Upon disposition of that measure, it is my intention to proceed to the debt limit extension bill, if we have received that measure from the House by that time and I hope very much that we will.

Then, following disposition of that measure, it is my intention to proceed to complete action on the Department of Defense authorization bill.

It is my hope that we will also, within that period, be able to work in other matters such as appropriations bills, the first one of which I believe was reported a short time ago. But the measures I have described are those which represent the minimum that will be necessary to act on.

To the extent that action on those measures is delayed now, why then, of course, to an equal extent such action will be required at the other end of this legislative period, thereby increasing the probability of delaying the onset of the August recess.

I hope very much that we will be able to complete action in time to recess as previously scheduled at the close of business on August 3. But, if we are not to have any significant legislative activity on Thursdays or Friday or Monday in the period between now and then, then it is almost certain, dictated by the action of the Senate itself, that the Senate recess will be delayed beyond the August 3 deadline.

I make these remarks merely to inform Senators fully of the proposed schedule and what is to occur. I do not intend by my remarks to suggest that the legislation I mentioned is an all-inclusive list. There will undoubtedly be other matters prior to recess.

The Ethics Committee report of this week will require disposition by the Senate. It is my intention to bring that before the Senate at the earliest possible time, consistent with the opportunity for all Senators to fully consider that measure. And there may well be other matters.

I merely make this statement to point out that the timing of this legislative period, and more specifically the onset of the August recess, is up to the Senate itself; that will be determined by individual Senators. So, those Senators who are unwilling to come forward and offer an amendment, which results in a delay of this bill, assure their continued presence in August. It is a function that is entirely within the discretion and authority of Senators themselves.

We have attempted, with great difficulty and consuming a fairly substantial amount of time, to prepare a schedule for tomorrow which, as these agreements indicate, merely involves debate on one amendment, which will then be put over for further debate and voting on Tuesday, and debate and voting on one other amendment. We are in the process, and I commend the managers of the bill and their staffs for their efforts, of attempting to do the same with respect to Monday. But each Senator should be aware that each day within which limited or no activity occurs in July means a day on which activity will be required in August.

I encourage all Senators, for their own convenience if for no other reason—I now appeal to the ultimate motivation—the self-interest of Senators; that if Senators wish to commence the recess at the close of business on August 3, it is incumbent upon them individually and collectively to come forward and proceed to offer amendments and dispose of legislation when a measure is before the Senate.

I thank my colleagues for their cooperation today. I thank the distinguished manager, the chairman of the committee, and the distinguished ranking member and minority manager. I hope very much that we will be able to get some cooperation in arranging a full schedule of activity on this measure on Tuesday.

Mr. LUGAR. Will the leader yield?

Mr. MITCHELL. Yes.

Mr. LUGAR. I thank the distinguished Senator for yielding for a moment of comment. I think the leader has pointed out very clearly the road that lies ahead of us. I will say on our part, I look forward to working with the distinguished chairman of the committee. We are eager to accelerate passage of this legislation.

I think we have worked out a program at least for activity and progress for Friday and Monday. It appears Tuesday is a crucial day for really coming to grips with whether we can not only get amendments to the floor, but resolve them so that perhaps Members would not wish to offer every single one they have indicated they might offer.

I think we made good progress today. Inevitably, the opening statements take time. We have had an amendment, a test of strength of sorts. It appears at least to me that it is possible Tuesday might be a very productive day and maybe conclusive. I would be optimistic enough to predict that. Surely by Wednesday, we should come to a resolution of the farm bill.

Mr. LEAHY. If the Senator will yield, to begin with, I absolutely agree with the sentiments of the distinguished Senator from Indiana. I wonder if I might ask the distinguished majority leader, if we have amendments on Tuesday, and I fully expect we will—I will strongly urge that we do—would it be the distinguished leader's intention to go well into the evening Tuesday if we are making that kind of progress? I would recommend that.

Mr. MITCHELL. Yes, it is my intention, indeed. I think Senators ought to be prepared for the virtual certainty of lengthy sessions each day between now and the August recess. It will be difficult to meet the original schedule in that regard in any other way. I think that will be necessary. So I hope that Senators will be able to adjust their schedules accordingly and be prepared for what I think is not only a likelihood but almost a certainty.

Mr. President, having said all that, there will obviously be no further rollcall votes this evening. I want to conclude again by thanking my colleagues for their cooperation and efforts in this regard.

Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. CRANSTON. Mr. President, I ask unanimous consent that there be a period for morning business, with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 11:09 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 5002. An act to amend title 38, United States Code, with respect to veterans' housing and memorial affairs programs, to improve the Department of Veterans Affairs compensated work therapy program, to authorize the Secretary of Veterans Affairs to provide a demonstration program of transitional housing for veterans in that program, to provide mortgage payment assistance to avoid foreclosure of home loans guaranteed by the Secretary of Veterans Affairs, and for other purposes.

At 1:14 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 5258. An act to require that the President transmit to Congress, that the congressional Budget Committees report, and that the Congress consider, a balanced budget.

ENROLLED JOINT RESOLUTIONS SIGNED

The message also announced that the Speaker has signed the following enrolled joint resolutions:

S.J. Res. 276. Joint resolution designating the week beginning July 22, 1990, as "Lyme Disease Awareness Week"; and

S.J. Res. 281. Joint resolution to designate September 13, 1990, as "National D.A.R.E. Day."

The enrolled joint resolutions were signed by the President pro tempore [Mr. BYRD].

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 5002. An act to amend title 38, United States Code, with respect to veterans' housing and memorial affairs programs, to improve the Department of Veterans Affairs compensated work therapy program, to authorize the Secretary of Veterans Affairs to provide a demonstration program of transitional housing for veterans in that program, to provide mortgage payment assistance to avoid foreclosure of home loans guaranteed by the Secretary of Veterans Affairs, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 5258. An act to require that the President transmit to Congress, that the Congressional Budget Committees report, and that the Congress consider, a balanced budget for each fiscal year; pursuant to the order of August 4, 1977, referred jointly to the Committee on the Budget and the Committee on Governmental Affairs.

MEASURES PLACED ON THE CALENDAR

The following joint resolution, previously received from the House of Representatives for concurrence, was read the first and second times by unanimous consent, and placed on the calendar:

H.J. Res. 548. Joint resolution designating the week of August 19 through 25, 1990, as "National Agricultural Research Week."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-3295. A communication from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a supplemental summary of the budget known as the Mid-Session Review; pursuant to the order of January 30, 1975, as modified by the order of April 11, 1986, referred jointly to the Committee on Appropriations and the Committee on the Budget.

EC-3296. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the status of certain budget authority proposed for rescission by the President in his fifth special impoundment message; pursuant to the order of January 30, 1975, as modified by the order of April 11, 1986, referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Agriculture, Nutrition, and Forestry, and the Committee on Commerce, Science, and Transportation.

EC-3297. A communication from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to amend title 10, United States Code, to provide for the protection of distinguished persons by personnel of the Department of Defense; to the Committee on Armed Services.

EC-3298. A communication from the Secretary of Energy, transmitting, pursuant to law, notice of procedures for submission of a report under the Stewart B. McKinney Homeless Assistance Act; to the Committee on Banking, Housing, and Urban Affairs.

EC-3299. A communication from the Fiscal Assistant Secretary of the Treasury, transmitting, pursuant to law, a report on methods to increase the use of underutilized minority banks, women's banks, and limited-income credit unions as depositories or financial agents of Federal agencies; to the Committee on Banking, Housing, and Urban Affairs.

EC-3300. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, a study on the feasibility of making Secretary-owned property available to low-income persons whose homes were destroyed in the areas declared for disaster in connection with Hurricane Hugo and the Loma Prieta earthquake; to the Committee on Banking, Housing, and Urban Affairs.

EC-3301. A communication from the Chairman of the Federal Trade Commission, transmitting, pursuant to law, the annual report of the Commission for fiscal year 1989; to the Committee on Commerce, Science, and Transportation.

EC-3302. A communication from the Chief of the Forest Service, Department of Agriculture, transmitting, pursuant to law, the boundary decision of the White Salmon National Scenic River within the Gofford

Pinchot National Forest, WA; to the Committee on Energy and Natural Resources.

EC-3303. A communication from the Administrator of the Energy Information Administration, Department of Energy, transmitting, pursuant to law, the quarterly report on U.S. coal imports for the first quarter of 1990; to the Committee on Energy and Natural Resources.

EC-3304. A communication from the Deputy Under Secretary of the Department of Energy, transmitting, pursuant to law, notification that the study evaluating Federal energy technology R&D programs in the light of possible global climate change will be provided by September 1, 1990; to the Committee on Energy and Natural Resources.

EC-3305. A communication from the Acting Chairman of the Nuclear Regulatory Commission, transmitting, pursuant to law, notification of the phaseout of the Atomic Safety and Licensing Appeal Panel; to the Committee on Environmental and Public Works.

EC-3306. A communication from the Chairman of the Board of Foreign Scholarships, transmitting, pursuant to law, the annual report of the Fulbright Program; to the Committee on Foreign Relations.

EC-3307. A communication from the Assistant Secretary of the U.S. Department of State, transmitting, pursuant to law, notification of the payment of a reward; to the Committee on Foreign Relations.

EC-3308. A communication from the Assistant Secretary of the U.S. Department of State, transmitting, pursuant to law, notification of the payment of a reward; to the Committee on Foreign Relations.

EC-3309. A communication from the Chairman and CEO of the Farm Credit Administration, transmitting, pursuant to law, the semiannual report for the period from October 1, 1989, through March 31, 1990; to the Committee on Governmental Affairs.

EC-3310. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the report on diabetes prevention, treatment, and control among American Indians and Alaskan Natives; to the Committee on Indian Affairs.

EC-3311. A communication from the Secretary to the Board of the Railroad Retirement Board, transmitting, pursuant to law, the 1990 annual report on the financial status of the railroad unemployment insurance system; to the Committee on Labor and Human Resources.

EC-3312. A communication from the Executive Director of the Committee for the Purchase from the Blind and Other Severely Handicapped, transmitting, pursuant to law, the fiscal year 1989 annual report; to the Committee on Labor and Human Resources.

EC-3313. A communication from the Secretary of Education, transmitting, pursuant to law, the final regulations on the Foreign Language Materials Acquisition Program, Library Literacy Program, Library Services and Construction Act Basic Grants to Indian Tribes and Hawaiian Natives Program; to the Committee on Labor and Human Resources.

EC-3314. A communication from the Secretary of Agriculture, transmitting, pursuant to law, the views on the actions of the Senate Committee on Agriculture, Nutrition, and Forestry to develop a 1990 farm bill; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3315. A communication from the Comptroller General of the United States, transmitting, pursuant to law, an opinion on the Federal Savings and Loan Insurance Corporation's final financial statement; to the Committee on Banking, Housing, and Urban Affairs.

EC-3316. A communication from the Chairman of the Federal Reserve Board, transmitting, pursuant to law, the monetary policy report to the Congress; to the Committee on Banking, Housing, and Urban Affairs.

EC-3317. A communication from the Secretary of the Interstate Commerce Commission, transmitting, pursuant to law, notification that the Commission in Docket No. 39886, *Huron Valley Steel Company* v. *Seaboard System Railroad, Inc., et al.,* has extended the time period for issuing a final decision to September 20, 1990; to the Committee on Commerce, Science, and Transportation.

EC-3318. A communication from the Secretary of Energy, transmitting, pursuant to law, studies on global climate trends and greenhouse gas data; to the Committee on Energy and Natural Resources.

EC-3319. A communication from the Administrator of the Department of Health and Human Services, transmitting, pursuant to law, a report on the "Rural Health Care Transition Grant Program"; to the Committee on Finance.

EC-3320. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, D.C. Act 8-228, "District of Columbia Emergency Overnight Shelter Amendment Act of 1990" and report, adopted 6-26-90; to the Committee on Governmental Affairs.

EC-3321. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, D.C. Act 8-229, "Victims of Violent Crime Compensation Act of 1981 Conforming Amendments Act of 1990" and report, adopted 6-26-90; to the Committee on Governmental Affairs.

EC-3322. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, D.C. Act 8-230, "District of Columbia Statutory Savings Provision Act of 1990" and report, adopted 6-26-90; to the Committee on Governmental Affairs.

EC-3323. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, D.C. Act 8-231, District of Columbia Income and Franchise Tax Conformity Amendment Act of 1990" and report, adopted 6-26-90; to the Committee on Governmental Affairs.

EC-3324. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, D.C. Act 8-232, "National Council for Negro Women Equitable Real Property Tax Relief Act of 1990" and report, adopted 6-26-90; to the Committee on Governmental Affairs.

EC-3325. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, D.C. Act 8-233, "Vital Records Act of 1981 Amendment Act of 1990" and report, adopted 6-26-90; to the Committee on Governmental Affairs.

EC-3326. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, D.C. Act 8-234, "District of Columbia Government Employee Affirmative Obligation Amendment Act of 1990" and report, adopted 6-26-90; to the Committee on Governmental Affairs.

EC-3327. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, D.C. Act 8-235, "Motor Vehicle Fees Amendment Act of 1990" and report, adopted 6-26-90; to the Committee on Governmental Affairs.

EC-3328. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, D.C. Act 8-236, "Conveyance of the Jewish Community Center Act of 1989 Amendment Act of 1990" and report, adopted 7-10-90; to the Committee on Governmental Affairs.

EC-3329. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, D.C. Act 8-237, "Real Property Tax Rates for Tax Year 1991 Amendment Act of 1990" and report, adopted 7-10-90; to the Committee on Governmental Affairs.

EC-3330. A communication from the Vice President of the Farm Credit Bank of Texas, transmitting, pursuant to law, the annual report for the pension plan for the year ended December 31, 1989; to the Committee on Governmental Affairs.

EC-3331. A communication from the Director of the Federal Bureau of Investigation, transmitting, pursuant to law, the first of five annual reports on the FBI's New York Demonstration Project [NYDP]; to the Committee on the Judiciary.

EC-3332. A communication from the Congressional Affairs Officer of the Federal Election Commission, transmitting, pursuant to law, a report of the Federal Election Commission on the Presidential Election Campaign Fund; to the Committee on Rules and Administration.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-543. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Appropriations.

"SENATE CONCURRENT RESOLUTION No. 26

"Whereas, the Land and Water Conservation Fund grant program has had a significant impact on outdoor recreation and has greatly contributed to the quality of life in Louisiana; and

"Whereas, Louisiana state and local governments have benefited greatly from the Land and Water Conservation Fund grant program by using these funds to acquire and develop more than 567 recreation facilities; and

"Whereas, Louisiana state and local governments have contributed more than $57.3 million to match federal support for this program; and

"Whereas, Louisiana and state and local governments are engaged in an intensive effort to protect and enhance our conservation estate, wetlands, and recreational resources; and

"Whereas, there is an important relationship between recreational opportunities and tourism, industrial inducements, protection of our cultural and natural resources and the health and economic well being of the citizens of Louisiana; Therefore, be it

"Resolved, That the Legislature of Louisiana memorializes the Congress of the United States to fully fund the Land and Water Conservation Fund grant program, and be it further

Resolved, That a copy of this resolution shall be transmitted to the Secretary of the

United States Senate and the Clerk of the United States House of Representatives and to each member of the Louisiana congressional delegation."

POM-544. A resolution adopted by the House of Representatives of the State of Illinois; to the Committee on Banking, Housing, and Urban Affairs:

"HOUSE RESOLUTION No. 617

"Whereas, there are numerous savings and loan associations ("Thrifts") operating in the State of Illinois which were created by, or are the surviving institutions of, supervisory mergers approved by the Federal Home Loan Bank Board ("FHLBB") and the Federal Savings and Loan Insurance Corporation ("FSLIC"); and

"Whereas, these mergers were used by the FHLBB and FSLIC as a vehicle to assist specified thrifts in the acquisition of designated financially-troubled thrifts in Illinois; and

"Whereas, many of these troubled thrifts had substantially negative net worths; and

"Whereas, in lieu of any FSLIC monetary contributions, the mergers were consummated through the placement of goodwill on the books of the surviving institution, a practice which was fully sanctioned under generally accepted accounting principles at that time of merger; and

"Whereas, these surviving thrifts have, in the vast majority of cases, operated successfully and profitably since the time of merger and, in many cases, have raised their net worth to current regulatory requirements; and

"Whereas, this financial progress was accomplished at no cost to the FSLIC, thus saving the insurance fund hundreds of million of dollars in otherwise required contributions; and

"Whereas, the majority of these merged institutions have operated profitably and have significantly depreciated the goodwill on their books; and

"Whereas, these merged institutions have carried out the financial burden of the FSLIC in protecting depositors' investments and restoring otherwise insolvent thrifts to viability; and

"Whereas, the proposed savings and loan reform legislation now pending in the United States Congress would penalize these merged institutions by disregarding the goodwill placed on their books by the FHLBB and FSLIC for the purposes of regulatory capital requirements; and

"Whereas, the proposed legislation as it is currently drafted would impose severe burdens upon the industry and force most of these otherwise profitable Illinois institutions into mergers with out-of-state or foreign banking interests; Therefore, be it

"*Resolved, by the House of Representatives of the Eighty-Sixth General Assembly of the State of Illinois,* That this body expresses its enthusiastic support for the savings and loan industry in the State of Illinois; and be it further

"*Resolved,* That this body expreses its appreciation to those savings and loan institutions who have kept the industry financially viable in the State of Illinois in the absence of the monetary assistance contemplated by the Federal regulatory scheme; and be it further

"*Resolved,* That this body calls upon the United States Congress to enact legislation which will provide for complete and total reimbursement to these merged institutions for the regulatory goodwill placed on their books at the time of merger in lieu of monetary contributions from the FSLIC, and be it further

"*Resolved,* That suitable copies of this preamble and resolution be presented to each member of the Illinois Congressional Delegation, the President of the U.S. Senate, and the Speaker of the U.S. House of Representatives."

POM-545. A resolution adopted by the House of Representatives of the State of Illinois; to the Committee on Commerce, Science, and Transportation:

"HOUSE RESOLUTION No. 1650

"Whereas, the General Assembly of Illinois adopted SB 1254 in June of 1989 and created provisions for the new Uniform Drive's License Act; and

"Whereas, this legislation prevents Illinois from losing federal highway and roads funds by complying with federal standards for commercial truck drivers; and

"Whereas, commercial licensed truck drivers will now be disqualified from driving for twelve months if they refuse to submit to a blood-alcohol content test (BAC) or have a BAC as low as .04%; and

"Whereas, the commercial truck drivers in Illinois are among the safest truck drivers in the country and have had their image tarnished by a small minority of careless operators; and

"Whereas, the new commercial drivers licensing regulations make demands on all commercial intra-state haulers to pay a 30% increase to become licensed and provide limited provisions for exemption: Therefore be it

"*Resolved, by the House of Representatives and the Eighty-Sixth General Assembly of the State of Illinois,* urges Congress to consider exempting Intra-state haulers, who are not required to receive Illinois Commerce Commission authority to operate, from Commercial Drivers licensing rules.

"*Resolved,* That suitable copies of this resolution be sent to United States Secretary of Transportation Skinner and to all members of the United States Congress."

POM-546. A resolution adopted by the City Council of Sweetwater, Florida, favoring legislation to provide Hialeah Race Track with exclusive non-competitive racing dates during the winter season; to the Committee on Commerce, Science, and Transportation.

POM-547. A concurrent resolution adopted by the Legislature of the State of Mississippi; to the Committee on Environment and Public Works.

"SENATE CONCURRENT RESOLUTION No. 502

"Whereas, the U.S. Army Corps of Engineers and the United States Environmental Protection Agency have promulgated guidelines regulating the classification and use of wetlands; and

"Whereas, under administrative guidelines applying a broad definition of wetlands, hundreds of thousands of acres already in cultivation or development have been classified as wetlands; and

"Whereas, administrative mitigation guidelines for broadly defined wetlands have placed excessive prohibition on development possibilities; and

"Whereas, these administrative guidelines have deprived landowners of the use of their property without compensation; and

"Whereas, although wetlands constitute only a small percentage of the land area in the United States, wetlands constitute a very large percentage of the land area in areas such as the Mississippi Delta and the Mississippi Gulf Coast; and

"Whereas, these administrative guidelines classifying wetlands and implementing no net loss standards are impacting lands never before considered wetlands in these areas; and

"Whereas, these administrative guidelines ignore the special needs of unique geographical areas such as the Mississippi Delta and Gulf Coast; and

"Whereas, the ill defined no net loss policy and the lack of specific criteria for evaluation of mitigation efforts and use permits have created a high level of uncertainty; and

"Whereas, the overly broad classification of land as wetlands in counties in the Delta and Gulf Coast regions applies to 40% to 85% of the land area in these counties; and

"Whereas, this will result in tax asssessment reductions causing a devastating loss of the tax base and revenues for municipalities and counties in these areas; and

"Whereas, a common sense approach to developing reasonable classification, use and mitigation guidelines and standards will identify special geographical considerations that need recognition and will preserve and protect actual wetlands: Now, therefore, be it

"*Resolved, by the Mississippi State Senate, the House of Representatives concurring therein,* That we urge the President and Congress to take speedy and appropriate action to ensure that regulatory agencies use a common sense approach in promulgating guidelines regulating the classification and use of wetlands and mitigation of loss of wetlands: Be it further

"*Resolved,* That copies of this resolution be transmitted to the President of the United States, the President and Secretary of the United States, the Speaker and Clerk of the United States House of Representatives and to the Mississippi congressional delegation."

POM-548. A resolution adopted by the House of Representatives of the State of Illinois; to the Committee on Environment and Public Works:

"HOUSE RESOLUTION No. 1796

"Whereas, the United States Congress, the United States Nuclear Regulatory Commission, and the United States Environmental Protection Agency have each approved the concept of deregulating certain radioactive waste that they have characterized as "below regulatory concern"; and

"Whereas, if it is deregulated, this radioactive waste will be disposed of in landfills, sewers, incinerators, and many other types of facilities that were never designed or intended to take radioactive waste; and

"Whereas, this deregulated radioactive waste could be recycled into contaminated raw materials and consumer products; and

"Whereas, it has been estimated that more than 30% of the current volume of "low-level" radioactive waste could be subject to this deregulation; and

"Whereas, evidence is growing that exposure to low levels of ionizing radiation have greater negative health effects than have been previously assumed by national and international agencies; and

"Whereas, simultaneous exposure to radiation and toxic chemicals often acts synergistically to produce unexpectedly severe effects on human health and the environment, and the deregulation of nuclear waste

may result in a great increase in such multiple exposures: Therefore be it

"Resolved, by the House of Representatives of the Eighty-Sixth General Assembly of the State of Illinois, That this House is strongly opposed to the deregulation of any radioactive waste, and to the acceptance of any radioactive waste, deregulated or otherwise, at any waste disposal or treatment facility that is not specifically licensed to handle such waste; and be it further

"Resolved, That this House respectfully urges the U.S. Congress to repeal Section 10 of the 1985 Low-Level Radioactive Waste Policy Amendments Act (P.L. 99-240), which requires the Nuclear Regulatory Commission to set standards for the deregulation of radioactive materials that have been characterized as "below regulatory concern"; and be it further

"Resolved, That this House strongly urges the U.S. Nuclear Regulatory Commission and the U.S. Environmental Protection Agency to refrain from any activity that will further the deregulation of radioactive wastes or materials; and be it further

"Resolved, That a suitable copy of this Preamble and Resolution be transmitted to the members of the Illinois Congressional Delegation, to the Administrator of the U.S. Environmental Protection Agency, and to the U.S. Nuclear Regulatory Commission."

POM-549. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Environment and Public Works:

"SENATE CONCURRENT RESOLUTION No. 24

"Whereas, the Secretary of Transportation of the United States shall not approve any federal highway funding in any state which has a maximum speed limit on any public highway within its jurisdiction in excess of fifty-five miles per hour other than a highway on the Interstate System located outside of an urbanized area of 50,000 population or more; and

"Whereas, there are many sections of four laned, United States numbered highways in Louisiana on which a speed limit of sixty-five miles per hour would be safe and more practical; and

"Whereas, the state government is in a better position to determine the speed limit necessitated by the conditions of a specific local road to ensure safety to travelers; Therefore, be it

"Resolved, That the Legislature of Louisiana memorializes the Congress of the United States to authorize an increase of the maximum speed limit on public roads to sixty-five miles per hour without penalty, Be it further:

"Resolved, That a copy of this Resolution shall be transmitted to the Secretary of the United States Senate and the Clerk of the United States House of Representatives and to each member of the Louisiana congressional delegation."

POM-550. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Environment and Public Works:

"SENATE CONCURRENT RESOLUTION No. 35

"Whereas, the state of Louisiana has a vested interest in maintaining its wetlands which are essentfal to the economy and beauty of the state; and

"Whereas, equally important is the agricultural community which is responsible in large part for the economic health of the state; and

"Whereas, environmentalists, persons who derive their living from the rich wetlands resources, and the agricultural community have traditionally worked in harmony to support the reasonable and productive use of the state's farmlands and wetlands; and

"Whereas, the 1890 Harbors Act gave the United States Army Corps of Engineers jurisdiction over maintenance of the navigable waters of the United States; and

"Whereas, section 404 of the 1972 Clean Water Act gave the United States Environmental Protection Agency legislative authority to regulate the permitting of dredge and fill activities in or adjacent to the navigable waters of the United States and thereafter, the United States Environmental Protection Agency entered into an agreement with the United States Army Corps of Engineers giving them the authority to administer the dredge and fill program; and

"Whereas, a change in the way that the United States Environmental Protection Agency, the United States Department of Agriculture, the United States Soil Conservation Service, the United States Fish and Wildlife Service, and the United States Army Corps of Engineers define "wetlands" may require many landowners in Louisiana to obtain section 404 permits for specific activities planned for their property; and

"Whereas, should this change remain in effect, approximately 4.2 million acres of Louisiana cropland will be affected; and

"Whereas, the restrictions placed on landowners are not limited to those in Louisiana, but impact many landowners throughout this country; and

"Whereas, private lands bought, developed, or farmed for many years are now suddenly classified as wetlands, which places severe restrictions on the continued use of the land as a viable source of livelihood; and

"Whereas, this expanded jurisdiction occurred only as a result of writing a new wetlands procedural manual, and not because of a change of law: Therefore, be it

"Resolved, That the Legislature of Louisiana hereby memorializes the Congress of the United States to take whatever action is necessary to cause the United States Environmental Protection Agency, the United States Department of Agriculture, the United States Soil Conservation Service, the United States Fish and Wildlife Service, and the United States Army Corps of Engineers to redefine "wetlands" such that prior-converted croplands excluded from the provisions of the Food Security Act of 1985 would also be excluded from regulation under section 404 of the Clean Water Act of 1972: Be it further

"Resolved, That a copy of this Resolution shall be transmitted to the secretary of the United States Senate and the clerk of the United States House of Representatives, and to each member of the Louisiana congressional delegation."

POM-551. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Environment and Public Works:

"SENATE CONCURRENT RESOLUTION No. 48

"Whereas, farming and farmlands make vital contributions to the economic well-being of the state of Louisiana; and

"Whereas, prior-converted croplands currently under cultivation in the wetlands region of Louisiana are threatened by recent action on the part of the United States Army Corps of Engineers and the Environmental Protection Agency to revise the federal definition of regulable wetlands; and

"Whereas, under the revised definition, approximately four million two hundred thousand acres of cropland currently under cultivation in the state would be subject to the permitting process of the United States Army Corps of Engineers; and

"Whereas, farmers and farming as an industry, have been made to endure various and numerous hardships in Louisiana and across the United States in recent years; and

"Whereas, loss of farmlands in the productive and fertile wetlands region of Louisiana would be a detriment to the individual farmers who cultivate the area in particular and to the farming industry in Louisiana in general: Therefore, be it

"Resolved, That the Legislature of Louisiana memoralizes the Congress of the United States to exempt prior-converted croplands from the definition of regulable wetlands under the control of the United States Army Corps of Engineers: Be it further

"Resolved, That a copy of this Resolution shall be transmitted to the Secretary of the United States Senate and the Clerk of the United States House of Representatives and to each member of the Louisiana congressional delegation."

POM-552. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Environment and Public Works:

"SENATE CONCURRENT RESOLUTION No. 162

"Whereas, recently the Mega Borg, a Swedish oil tanker, exploded when attempting to transfer crude oil to a smaller tanker, which explosion resulted in a spill of nearly four million gallons of oil into the Gulf of Mexico; and

"Whereas, as a result of the oil spill, disasterous damage is occurring along much of Louisiana's coastline; and

"Whereas, much of the damage is irreversible in that it threatens the wildlife, waterfowl, fish, and oysters that claim the marshes, coasts, and estuaries as their homes; and

"Whereas, sixty-eight percent of the imported oil entering the United States enters the Gulf and three hundred and twenty-four million barrels of oil are produced on the federal Outer Continental Shelf each year; and

"Whereas, a state that is as heavily involved with the transport of oil and as seriously threatened by damage if it is spilled should be prepared for emergencies; and

"Whereas, the United States government has a responsibility to participate in and assure the effectiveness of an emergency response to any oil spill: Therefore, be it

"Resolved, That the Legislature of Louisiana memorializes the Congress of the United States to require the United States Coastguard to immediately address the problem created by the oil spilled in the Gulf of Mexico from the tanker the Mega Borg by undertaking to spur those responsible for the tanker to clean up the spill and by coordinating efforts made in that regard and to require the creation of and provide for the implementation of the plans necessary to prevent future such occurrences and to respond quickly and effectively to those which do occur: Be it further *"Resolved,* That all efforts to plan for the prevention of or response to oil spills be developed in coordination and cooperation with all appropriate Louisiana officials: Be it further

"*Resolved,* That a copy of this Resolution be transmitted to the Secretary of the United States Senate and the clerk of the United States House of Representatives and to each member of the Louisiana congressional delegation."

POM-553. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Finance:

"SENATE CONCURRENT RESOLUTION No. 5

"Whereas, it has come to the attention of the Legislature of Louisiana that federal legislation has been proposed that would have the effect of mandating that there be lower assessment levels and/or lower rates of taxation for certain businesses and/or certain types of property, in particular, property owned by water carriers, pipelines, and telephone companies; and

"Whereas, a draft bill is being circulated by the Honorable J. James Exon, United States Senator from the state of Nebraska which would require such lower assessment levels; and

"Whereas, it has been estimated that passage of such proposed legislation would result in a direct loss of more than fifty million dollars of revenue annually to Louisiana's parishes, school boards, sheriffs, municipalities, levee and drainage boards, and other local taxing bodies; and

"Whereas, the loss of revenues of this magnitude would have a devastating effect on this states' local governing bodies, particularly in view of the poor economy in Louisiana over the last several years: Therefore , be it

"Resolved, That the Legislature of Louisiana memorializes the Congress of the United States, and the representatives of Louisiana in Congress, both Senators and House members alike, to strenuously oppose all proposed legislation which would have the effect of mandating a reduction in property assessments and/or lower rates of taxation for certain businesses or for certain property located in Louisiana, and particularly, that they oppose the draft legislative bill being circulated by U.S. Senator J. James Exon of Nebraska dealing with this matter: Be it further

Resolved, That a copy of this Resolution be transmitted to the Secretary of the United States Senate and the Clerk of the United States House of Representatives and to each member of the Louisiana congressional delegation."

POM-554. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Finance:

"SENATE CONCURRENT RESOLUTION No. 136

"Whereas, there exists several proposals to increase federal excise taxes on such products as gasoline, beer, wine, and tobacco; and

"Whereas, higher federal excise taxes would increase the cost of such products to consumers, reduce consumers' disposable income, and threaten jobs in these industries; and

"Whereas, the United States tax laws have always been progressive with people paying based on their ability to pay; and

"Whereas, increases in federal excise taxes are regressive and would damage those least able to afford such tax increases with the increases falling most heavily on the middle class and working poor; and

"Whereas, if federal excise taxes are increased, the state's economic activity would be adversely affected and the state will lose revenue: Therefore, be it

Resolved, by the Legislature of Louisiana that the Congress of the United States is hereby memoralized to oppose any legislation which would increase the federal excise taxes on gasoline, beer, wine, and tobacco: Be it further

Resolved, That a copy of this Resolution be transmitted to the Secretary of the United States Senate, the Clerk of the United States House of Representatives, and to each member of the Louisiana congressional delegation."

POM-555. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Finance:

"SENATE CONCURRENT RESOLUTION No. 148

"Whereas, the members of the Legislature of Louisiana wish to memorialize the Congress of the United States of review the provisions of the Social Security Act commonly known as the social security offset and windfall, which substantially reduce the anticipated retirement benefits of Louisiana public employees, for the purpose of repealing or amending those provisions to provide relief for such public employees and parity with benefits enjoyed by non-public employees who are able to receive private pensions without comparable reduction in social security benefits; and

"Whereas, most public employees in the state of Louisiana participate in state or local public retirement systems and not in the social security system as to such public employment; and

"Whereas, numerous Louisiana public employees and/or their spouses also are or have been employed in non-public sector jobs for which they and their employer have contributed to the social security system; and

"Whereas, upon retirement after many years of dedicated public service, Louisiana public employees have been promised and are entitled to receive a public pension based upon their service and contributions to the public retirement systems; and

"Whereas, Louisiana public employees who have also been employed in non-public sector jobs or have spouses who have been so employed and have contributed to the social security system upon retirement expect to receive social security benefits commensurate with their social security-covered service and comparable to those received by all others who contributed to the social security system; and

"Whereas, as a result of the social security windfall provision, Section 215(a)(7) of the Social Security Act and the offset provision, Subsections (b)(4), (c)(2), (e)(7), (f)(2), and (g)(4) of Section 202 of the Social Security Act, the social security benefits for which contributions were made by the employee or the employee's spouse, respectfully, are substantially reduced or eliminated, severely impacting the financial condition of the public retiree; and

"Whereas, the Legislature of Louisiana firmly believes that Louisiana public employees should not be penalized for their years of dedicated public service and should receive social security benefits which are commensurate with their or their spouses' years of social security-covered service and contributions and are comparable to those received by all other employees. Therefore, be it

Resolved, That the Legislature of Louisiana hereby memorializes the Congress of the United States to review the windfall and offset provisions of the Social Security Act for the purpose of repealing or amending such provisions to provide relief to public system retirees and to provide social security benefits to such public system retirees which are commensurate with their or their spouses' years of social security-covered service and contributions and are comparable to those received by other retirees." Be it further

Resolved, That a copy of this Resolution be transmitted to each member of congress, to the secretary of state and presiding officers of both houses of the legislature of each of the other states in the union, to the clerk of the United States House of Representatives, to the secretary of the United States Senate, to the president of the United States, and to members of the public media."

POM-556. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Foreign Relations:

"SENATE CONCURRENT RESOLUTION No. 95

"Whereas, Nicaraguans have endured years of strife in a war torn and embattled country; and

"Whereas, for the first time in memory the country is being led by a democratically elected government; and

"Whereas, democracy in its infancy, particularly in a country racked with the fallout of long term war, needs support; and

"Whereas, historically support from stable, economically strong democracies has assisted and strengthened fledgling democracies; and

"Whereas, the unalterable commitment of the United States of America to democracy flourishing in every corner of the globe is the crtical underpinning of our guiding principles of individual human rights, freedom, and dignity; and

"Whereas, the people of Nicaragua have struggled so long and deserve to enjoy life under such guiding principles: Therefore, be it

"Resolved, That the legislature of Louisiana memorializes the Congress of the United States to be sensitive to the needs of the Nicaraguan people by supporting the movement toward democracy demonstrated by the recent election in that country: Be it further

"Resolved, That a copy of this Resolution be transmitted to the secretary of the United States Senate and the clerk of the United States House of Representatives and to each member of the Louisiana congressional delegation."

POM-557. A resolution adopted by the House of Representatives of the State of Illinois; to the Committee on Governmental Affairs:

"HOUSE RESOLUTION No. 1660

"Whereas, there are an estimated 30,500 individuals listed as prisoners or missing in action from World War II, the Korean Conflict and the Vietnam Conflict; and

"Whereas, certain departments and agencies of the United States government maintain records and information concerning military personnel listed as either prisoner of war or missing in action; and

"Whereas, disclosure information that any department or agency may have regarding military personnel listed as prisoners or missing in action would benefit the families and the country: Therefore, be it

"Resolved, by the House of Representatives of the Eighty-Sixth General Assembly of the State of Illinois, That we urge Presi-

dent Bush to authorize the release of any information that any department or agency may have concerning military personnel listed as prisoner of war or missing in action from World War II, the Korean conflict and the Vietnam Conflict; and be it further

"*Resolved*, That copies of this resolution be presented to President George Bush, the President of the United States Senate, the Speaker of the United States House of Representatives and each member of the Illinois Congressional delegation."

POM-558. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Labor and Human Resources:

"SENATE CONCURRENT RESOLUTION No. 13

"Whereas, Chronic Fatigue Syndrome, also known as Epstein-Barr Viral Syndrome and Chronic Fatigue Immune Dysfunction Syndrome, is a serious illness characterized by overwhelming fatigue, weakness, and many other disabling symptoms; and

"Whereas, there is no known cause, treatment, or cure for Chronic Fatigue Syndrome which is often incorrectly diagnosed and those inflicted are treated inappropriately; and

"Whereas, Chronic Fatigue Syndrome symptoms may last for many months or years and are often debilitating; and

"Whereas, it is important that we build a greater knowledge and awareness of Chronic Fatigue Syndrome and increase coordination of research and programs to combat this syndrome: Therefore, be it

"*Resolved*, That the Legislature of Louisiana hereby memorializes the Congress of the United States to increase the coordination of chronic fatigue syndrome research and programs within the public health community for the exchange of information about this disease: Be it further

"*Resolved*, That a copy of this Resolution shall be transmitted to the Secretary of the United States Senate and the Clerk of the United States House of Representatives and to each member of the Louisiana congressional delegation."

POM-559. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Governmental Affairs:

"HOUSE CONCURRENT RESOLUTION No. 130

"Whereas, federal law currently provides, when a federal agency determines that it no longer requires the use of property which it owns, that the property becomes excess property and it is then screened for possible use by other federal agencies, and when no other federal agency requires the property for its activities, it becomes surplus property; and

"Whereas, federal surplus property may be donated to state agencies for distribution to local governments, nonprofit educational or public health institutions, medical institutions, hospitals, clinics, health centers, schools, colleges, universities, schools for the mentally retarded, schools for the physicially handicapped, child care centers, and other such institutions; and

"Whereas, such use of federal property by states, local governemtns, and other authorized domestic users has the effect of extending the use of property paid for by the U.S. taxpayer to promote conservation, economic development, education, the development of parks and recreation, public health, and public safety in the United States; and * * *"

POM-560. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Governmental Affairs:

"SENATE CONCURRENT RESOLUTION No. 50

"Whereas, certain departments and agencies of the United States government now maintain and receive information correlated to United States personnel listed as prisoners of war, or missing in action, from World War II, the Korean Conflict, and the Vietnam Conflict; and

"Whereas, it is the desire of the people of Louisiana that such information be disclosed by those federal departments and agencies maintaining such records and information; and

"Whereas, disclosure would allow a nation, proud of its democratic heritage, to no longer keep secret from itself those facts necessary to achieve long overdue introspection; and

"Whereas, disclosure would allow generations recalling World War II, the Korean Conflict, and the Vietnam Conflict to pay tribute to and thank their contemporaries, those brave Americans who suffered and may continue to suffer the fate of prisoners of war, and those brave Americans who are still listed as missing in action; and

"Whereas, H.R. 3603 accomplishes disclosure, while at the same time protects the national security, and also provides for the privacy of those families affected; Therefore, be it

"*Resolved*, That the Legislature of Louisiana memorializes the Congress of the United States to pass H.R. 3603: Be it further

"*Resolved*, That a copy of this Resolution be transmitted to the Secretary of the United States Senate and the Clerk of the United States House of Representatives and to each member of the Louisiana congressional delegation."

POM-561. A resolution adopted by the County Council of King County, WA, favoring the development of a prejudicial conflict resolution process to address intergovernmental conflicts between State or local governments and Indian tribes; to the Select Committee on Indian Affairs.

POM-562. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Select Committee on Indian Affairs:

"SENATE CONCURRENT RESOLUTION No. 124

"Whereas, communities of the Houma Indian Nation have existed in the vicinity of Grand Caillou, DuLac Golden Meadow, Isle de Jean Charles, Lower Pointe aux Chenes, Lower Montegut, and Bayou DuLarge since the eighteenth century extending throughout southeastern Louisiana; and

"Whereas, ancestors of the United Houma Nation, Incorporated of Southeastern Louisiana were residing in the area consisting of Louisiana at the time of first contact with LaSalle in 1686 and have continued to reside in the area of Louisiana since that time; and

"Whereas, research by noted anthropologists has determined that the Houma Indians are, indeed, native to Louisiana; and

"Whereas, in 1979, the Houma Alliance, which was incorporated in 1974 and the Houma Tribe, which was incorporated in 1972, merged to become the United Houma Nation, Incorporated of Southeastern Louisiana; and

"Whereas, the policy of the state of Louisiana provides for recognition of Indian tribes within its borders, to support their tribal aspirations, to preserve their cultural heritage and improve their economic condition, and to assist them in the achievement of their just rights; and

"Whereas, wetland and coastal erosion poses an imminent threat to the culture, livelihood, and homeland of the Houma Indians; and

"Whereas, pending before the Congress of the United States are Senate Bill 2423 and HR 4886 which extends federal recognition of the United Houma Nation; and

"Whereas, the state of Louisiana desires to reaffirm the continuity of the state's recognition of the United Houma Nation as exhibited in House Concurrent Resolution No. 97 of the 1977 Regular Session of the Legislature: Therefore, be it

"*Resolved by the Legislature of Louisiana*, That the state of Louisiana formally recognize the United Houma Nation, Incorporated of Southeastern Louisiana as an Indian community of the state: Be it further

"*Resolved*, That the Legislature of Louisiana memoralizes the President of the United States, the Congress of the United States, the assistant secretary of the Bureau of Indian Affairs within the United States Department of the Interior, the members of the Senate Select Committee on Indian Affairs, the members of the House Interior and Insular Affairs Committee, and each member of the Louisiana Congressional Delegation to support the adoption of Senate Bill 2423 and HR 4886 to extend federal recognition to the United Houma Nation: Be it further

"*Resolved*, That the appropriate federal officials are hereby urged and requested to do that which is necessary to effectuate the formal recognition of the United Houma Nation, Incorporated of Southeastern Louisiana acknowledging that the rights of the Houma Indians are not less, if not greater, than the rights of other Indian tribes in the United States: Be it further

"*Resolved*, That a copy of this Resolution shall be transmitted to the Governor of the state of Louisiana, the President of the United States, the Congress of the United States, the assistant secretary of the Bureau of Indian Affairs within the United States Department of the Interior, the members of the Senate Select Committee on Indian Affairs, the members of the House Interior and Insular Affairs Committee, and each member of the Louisiana Congressional Delegation."

POM-563. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Labor and Human Resources:

"SENATE CONCURRENT RESOLUTION No. 141

"Whereas, the in-home services program in an integral part of the Council on Aging providing such services as meals, housekeeping and handyman repairs to some 27,827 elderly persons whose financial means or health would otherwise prohibit them from receiving such assistance; and

"Whereas, there are presently some 138,600 elderly persons in the state who have expressed a need for such services as are provided by the in-home services program; and

"Whereas, the recent federal budget cuts to the in-home services program can only add to the more than 110,000 elderly persons presently being denied these basic services and whose names remain on waiting lists across the state; and

"Whereas, there is no other program in the state that provides the same or similar services to the elderly population, thus rendering those persons helpless as relates to adequate nutrition and decent housing: Therefore, be it

"Resolved, That the Legislature of Louisiana hereby memoralizes the Congress of the United States to provide full funding for the in-home services program provided by the Council on Aging in all parishes of the state of Louisiana in sufficient amount so as to provide meals and services to all applicants: Be it further

"Resolved, That a copy of this Resolution be transmitted to the Secretary of the United States Senate and the Clerk of the United States House of Representatives and to each member of the Louisiana Delegation."

POM-564. A concurrent resolution adopted by the Legislature of the State of Florida; to the Committee on the Judiciary:

"HOUSE CONCURRENT RESOLUTION No. 451

"Whereas, among the first 12 amendments to the United States Constitution proposed in 1789 was an amendment stating: "No law, varying the compensation for the services of the Senators and Representatives, shall take effect, until an election of Representatives shall have intervened," and

"Whereas, although this amendment has not yet been ratified by the requisite number of state legislatures, there was no time limit given for such ratification: Now, therefore, be it

"Resolved by the House of Representatives of the State of Florida, the Senate Concurring, That the proposed amendment to the Constitution of the United States set forth below be, and the same is hereby, ratified by the Legislature of the State of Florida:

" 'No law, varying the compensation for the services of the Senators and Representatives, shall take effect, until an election of Representatives shall have intervened': Be it further

"Resolved, That certified copies of the foregoing preamble and resolution be immediately forwarded by the Secretary of State of the State of Florida, under the great seal, to the President of the Senate of the United States, the Speaker of the House of Representatives of the United States, and the Archivist of the United States."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JOHNSTON, from the Committee on Energy and Natural Resources, with an amendment in the nature of substitute:

S. 1976. A bill to provide for continued United States leadership in high-performance computing (Rept. No. 101-377).

By Mr. JOHNSTON, from the Committee on Appropriations, with amendments:

H.R. 5019. A bill making appropriations for energy and water development for the fiscal year ending September 30, 1991, and for other purposes (Rept. No. 101-378).

By Mr. CRANSTON, from the Committee on Veterrans Affairs, with an amendment in the nature of a substitute and an amendment to the title:

S. 2100. A bill to increase the rates of compensation for veterans with service-connected disabilities and the rates of dependency and indemnity compensation for the survivors of certain disabled veterans; to amend title 38, United States Code, to improve veterans' compensation, health-care, insurance, and housing programs, and to provide for transitional group residences for veterans recovering for substance-abuse disabilities; and for other purposes (Rept. No. 101-379).

By Mr. KENNEDY, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 2283. A bill to amend the Public Health Service Act to establish a program of grants for the prevention and control of breast and cervical cancer, and for other purposes (Rept. No. 101-380).

By Mr. HOLLINGS, from the Committee on Commerce, Science, and Transportation, with an amendment in the nature of a substitute:

S. 1880. A bill to amend title VI of the Communcations Act of 1934 to ensure carriage on cable television of local news and other programming and to restore the right of local regulatory authorities to regulate cable television rates, and for other puroses (Rept. No. 101-381).

The following executive reports of committees were submitted:

By Mr. PELL, from the Committee on Foreign Relations:

George F. Murphy, Jr., of Maryland, to be inspector general, U.S. Information Agency.

Philip S. Kaplan, of California, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, for the rank of Ambassador during his tenure of service as Deputy United States Representative to the Negotiations on Conventional Armed Forces in Europe (CFE).

(Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.)

Nominee: Philip S. Kaplan.

Post: Ambassador, Negotiations on Conventional Forces in Europe.

Contributions, amount, date, and donee:

1. Self: Philip S. Kaplan, none.
2. Spouse: Barbara Ellen Kaplan, none.
3. Children and spouses names: Douglas S. Kaplan, none.
4. Parents names: Morris Kaplan; Rose Kaplan, none to my knowledge.
5. Grandparents names: Sam & Pauline Falk; Fannie Kaplan, deceased.
6. Brothers and spouses names: Jerome & Carol Kaplan, none to my knowledge.
7. Sisters and spouses names: No Sister.

Thomas W. Simons, Jr., of the District of Columbia, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Poland.

(Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.)

Nominee: Thomas W. Simons, Jr.

Post: Poland.

Contributions, amount, date, and donee:

1. Self: Thomas W., Jr., none.
2. Spouse: Margaret Q., none.
3. Children and spouses names: Suzanne Deirdre; Benjamin Thomas (both unmarried), none.
4. Parents names: Thomas W. and Mary Jo Simons, $60, 1986; $50, 1987; $50, 1988; $25, 1989—DNC.
5. Grandparents names: All 4 decease.
6. Brothers and spouses names: No brother.
7. Sisters and spouses names: Sara R., and Richard Cohen, $25, 1988, Peter Gruenstein (candidate for Congress in Alaska).

Hugh Kenneth Hill, of California, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the People's Republic of Bulgaria.

(Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.)

Nominee: H. Kenneth Hill.

Post: Bulgaria.

Contributions, amount date, and donee:

Self: None except tax allotment.

2. Spouse: None except tax allotment.
3. Children and spouses names: Derek, Jennifer and Brian, none except tax allotment.
4. Parents names: Helen M. Hill, none except tax allotment.
5. Grandparents names: Deceased.
6. Brothers and spouses names: Ottis G. Hill, Roberta Hill, $400—$100 each year, Century Club, Montana Democratic Party; $240 during past year, Champac (Champion Pac (Co.) Pol. Action Comm.
7. Sisters and spouses names: Glen and LaVerne Bushong; M.C. and Loreta M. Burns, none except tax allotment.

Aurelia Erskine Brazeal, of Georgia, a Career Member of the Senior Foreign Service Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Federated States of Micronesia.

(Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.)

Nominee: Aurelia E. Brazeal.

Post: Ambassador to Federated States of Micronesia.

Contributions, amount, date, and donee:

1. Self: None.
2. Spouse: None.
3. Children and spouses names: None.
4. Parents names: None.
5. Grandparents names: None.
6. Brothers and spouses names: None.
7. Sisters and spouses names: None.

Roy M. Huffington, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Austria.

(Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.)

Nominee: Roy M. Huffington.

Post: Ambassador to Austria.

Contributions, amount, date, and donee: 1. Self:

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to testify before any duly constituted committee of the Senate.)

Mr. PELL, for the Committee on Foreign Relations, reported favorably the convention against torture and other cruel, inhuman or degrading treatment or punishment (Treaty Doc. 100-20), and a resolution of advice and consent to ratification thereto with three reservations, four understandings, and two declarations.

TEXT OF RESOLUTION OF RATIFICATION

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, adopted by unanimous agreement of the United Nations General Assembly on December 10, 1984, and signed by the United States on April 18, 1988, *Provided that:*

I. The Senate's advice and consent is subject to the following reservations:

(1) That the United States shall implement the Convention to the extent that the Federal Government exercises legislative and judicial jurisdiction over the matters covered therein; to the extent that constituent units exercise jurisdictions over such matters, the Federal Government shall take appropriate measures, to the end that the competent authorities of the constituent units may take appropriate measures for the fulfillment of this Convention.

(2) That the United States considers itself bound by the obligation under Article 16 to prevent "cruel, inhuman or degarding treatment or punishment," only insofar as the term "cruel, inhuman or degrading treatment or punishment" means the cruel, unusual and inhumane treatment or punishment prohibited by the Fifth, Eighth, and/or Fourteenth Amendments to the Constitution of the United States.

(3) That pursuant to Article 30(2) the United States declares that it does not consider itself bound by Article 30(1), but reserves the right specifically to agree to follow this or any other procedure for arbitration in a particular case.

II. The Senate's advice and consent is subject to the following understandings, which shall apply to the obligations of the United States under this Convention:

(1)(a) That with reference to Article 1, the United States understands that, in order to constitute torture, an act must be specifically intended to inflict severe physical or mental pain or suffering and that mental pain or suffering refers to prolonged mental harm caused by or resulting from: (1) the intentional infliction or threatened infliction of severe physical pain or suffering; (2) the administration or application, or threatened administration or application, of mind altering substances or other procedures calculated to disrupt profoundly the senses or the personality; (3) the threat of imminent death; or (4) the threat that another person will imminently be subjected to death, severe physical pain or suffering, or the administration or application of mind altering substances or other procedures calculated to disrupt profoundly the senses of personality.

(b) That the United States understands that the definition of torture in Article 1 is intended to apply only to acts directed against persons in the offender's custody or physical control.

(c) That with reference to Article 1 of the Convention, the United States understands that "sanctions' includes judicially-imposed sanctions and other enforcement actions authorized by United States law or by judicial interpretation of such law provided that such sanctions or actions are not clearly prohibited under international law.

(d) That with reference to Article 1 of the Convention, the United States understands that the term "acquiescence" requires that the public official, prior to the activity constituting torture, have awareness of such activity and thereafter breach his legal responsibility to intervene to prevent such activity.

(e) That with reference to Article 1 of the Convention, the United States understands that noncompliance with applicable legal procedural standards does not *per se* constitute torture.

(2) That the United States understands the phrase, "where there are substantial grounds for believing that he would be in danger of being subjected to torture," as used in Article 3 of the Convention, to mean "if it is more likely than not that he would be tortured."

(3) That it is the understanding of the United States that Article 14 requires a State Party to provide a private right of action for damages only for acts of torture committed in territory under the jurisdiction of that State Party.

(4) That the United States understands that international law does not prohibit the death penalty, and does not consider this Convention to restrict or prohibit the United States from applying the death penalty consistent with the Fifth, Eighth and/or Fourteenth Amendments to the Constitution of the United States, including any constitutional period of confinement prior to the imposition of the death penalty.

III. The Senate's advice and consent is subject to the following declarations:

(1) That the United States declares that the provisions of Articles 1 through 16 of the Convention are not self-executing.

(2) That the United States declares, pursuant to Article 21, paragraph 1, of the Convention, that it recognizes the competence of the Committee against Torture to receive and consider communications to the effect that a State Party claims that another State Party is not fulfilling its obligations under the Convention. It is the understanding of the United States that, pursuant to the above mentioned article, such communications shall be accepted and processed only if they come from a State Party which has made a similar declaration.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. MACK:

S. 2875. A bill to provide for the preservation of H.B. Plant Hall on the campus of the University of Tampa; to the Committee on Energy and Natural Resources.

By Mr. METZENBAUM (for himself, Ms. MIKULSKI, and Mr. SIMON):

S. 2876. A bill to amend the Public Service Act to provide for adequate representation with respect to the availability of bone marrow pursuant to the bone marrow registry established under such Act, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. BAUCUS:

S. 2877. A bill to temporarily suspend the implementation of program exclusivity regulations of the Federal Communications Commission in broadcasting areas adjacent to time zone borders and to require the Federal Communications Commission to review the regulations and propose revisions that protect the syndicated exclusivity rights of broadcasters while providing viewers with adequate program opportunities; to the Committee on Commerce, Science, and Transportation.

S. 2878. A bill to amend the discretionary allocation provisions of Public Law 81-874 (Impact Aid), and for other purposes; to the Committee on Labor and Human Resources.

By Mr. MOYNIHAN:

S. 2879. A bill to amend the John F. Kennedy Center Act to authorize appropriations for maintenance, repair, alteration and other services necessary for the John F. Kennedy Center for the Performing Arts, and for other purposes; to the Committee on Environment and Public Works.

By Mr. BURNS (for himself, Mr. BOND, Mr. BAUCUS, Mr. SYMMS, Mr. MCCLURE, Mr. MURKOWSKI, and Mr. STEVENS):

S. 2880. A bill to allow the Secretary of the U.S. Department of Agriculture or other appropriate official to protect persons engaged in a lawful hunt within a National Forest or on other lands affected with a Federal interest; establishing an administrative civil remedy against individuals or groups intentionally obstructing, impeding, or interfering with the conduct of a lawful hunt; and for other purposes; to the Committee on Environment and Public Works.

By Mr. FOWLER (for himself, Mr. DASCHLE, Mr. HEFLIN, Mr. SANFORD, Mr. SHELBY, Mr. HARKIN, Mr. METZENBAUM, and Mr. INOUYE):

S. 2881. A bill to promote equal opportunity for minority farmers, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. SIMON (for himself, Mr. DODD, Mr. JEFFORDS, and Mr. DIXON):

S.J. Res. 352. A joint resolution designating the month of September, 1991, as "National Growth Month"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. PRESSLER:

S. Res. 310. A resolution stating that the Senate urges the President to instruct the Attorney General to appoint an independent counsel to investigate the involvement of Government officials in the savings and loan scandal; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MACK:

S. 2875. A bill to provide for the preservation of H.B. Plant Hall on the campus of the University of Tampa; to the Committee on Energy and Natural Resources.

PRESERVATION OF H.B. PLANT HALL

● Mr. MACK. Mr. President, today, I am introducing a bill which would provide financial assistance for the restoration of H.B. Plant Hall on the campus of the University of Tampa, a national historic landmark and symbol of the historical development of the State of Florida.

H.B. Plant Hall was orginally the Tampa Bay Hotel, which was opened in 1891 by Henry B. Plant. The hotel was a luxurious 511-room Moorish-revival-style structure adorned with six minarets, four cupolas, and three homes. The hotel drew celebrities from around the world, including Teddy Roosevelt and Babe Ruth and it held balls, tea parties, and organized hunts during the winter social season.

Following Henry B. Plant's death in 1899, the hotel operated sporadically

under a series of different managers and failed to prosper for a number of years. In the 1930's, the University of Tampa outgrew its facilities, so the university entered into a long-term lease with the city for the use of the hotel's buildings and grounds for offices and classrooms. Since 1933 this national historic landmark has been used by the University of Tampa as its main facility.

The former Tampa Bay Hotel is nearing its 100th birthday and an extensive $12 milion restoration is underway; $4.5 million has already been spent on the project from funds made available by various sources in Florida.

A remaining total of $7.5 million is needed over a 3-year period—$2.5 million per year—to complete the project to preserve this national historic landmark. This bill would authorize these funds to ensure that such a valued national historic landmark be preserved.●

By Mr. METZENBAUM (for himself, Ms. MIKULSKI, and Mr. SIMON):

S. 2876. A bill to amend the Public Service Act to provide for adequate representation with respect to the availability of bone marrow pursuant to the bone marrow registry established under such act and for other purposes; to the Committee on Labor and Human Resources.

BONE MARROW REGISTRY ACT

● Mr. METZENBAUM. Mr. President, I rise to introduce the Bone Marrow Registry Act of 1990. At the outset I would like to salute the efforts of Representative VIC FAZIO, who introduced this bill last month in the House of Representatives. Representative FAZIO's personal and professional commitment to the Bone Marrow Program is well known.

More than 7,000 children and adults die in this country every year of blood diseases that could be cured by bone marrow transplants. They die because the chances of finding a matched unrelated bone marrow donor is about 1 in 20,000. The Federal Government established a national registry to facilitate the finding of that 1 in 20,000 matched donor. The registry contains the names of more than 87,000 volunteers who had their marrow typed at a cost of $75 to aid computer searches for matched donors. But the registry is of insufficient size and diversity to offer much hope for the terminally ill to receive this living gift of life. Thus these patients and their families, already suffering from the trauma of a life threatening disease, often take on the additional costly and heroic effort of finding suitable donors through emergency appeals to the public at large.

Recent estimates indicate that if 250,000 persons were registered as potential donors, 80 percent of those in need of donors could find a match. Moreover, once a suitable match is found, 80 percent of all unrelated donor transplants are completely successful. The price of expanding the registry to 250,000 volunteers is $15 million.

Mr. President, I and many of colleagues in the both the House and Senate are willing to pay this price to prevent the needless death of so many people. The Bone Marrow Registry Act of 1990 is a one-time $15 million authorization for the purpose of testing potential donors with an emphasis on racial and ethnic populations inadequately represented in the registry. This funding level will not only enable the registry to reach a goal of 250,000 volunteers and thereby give thousands a better than even chance of full recovery from a life threatening disease, but also ease some of the burdens on patients and their families who, despite their own personal difficulties, have significantly increased the number of potential donors through their own time, efforts, and expense.

I urge all my colleagues to support this important legislation. I ask unanimous consent that the bill be included in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2876

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Bone Marrow Registry Act of 1990".

SEC. 2. ADEQUATE REPRESENTATION REGARDING BIOLOGICAL TYPES IN BONE MARROW REGISTRY UNDER PUBLIC HEALTH SERVICE ACT.

(a) IN GENERAL.—Section 373(b) of the Public Health Service Act (42 U.S.C. 274a(b)) is amended by redesignating paragraph (2) as paragraph (3), and by inserting after paragraph (1) the following new paragraph:

"(2) With respect to biological compatibility in the transplantation of bone marrow, the Secretary shall ensure that the various types are represented in the registry under paragraph (1) to the extent necessary to provide adequate representation, for purposes of the registry, of the population of the United States. In providing for such adequate representation, the Secretary shall provide for a sufficient increase in the registry regarding any type of bone marrow that is underrepresented on the date of the enactment of the Bone Marrow Registry Act of 1990.".

(b) AUTHORIZATION OF APPROPRIATIONS FOR REGISTRY.—Section 373(b)(3) of such Act (42 U.S.C. 274a(b)) (as redesignated by subsection (a)) is amended to read as follows:

"(3)(A) For the purpose of carrying out paragraph (1), there are authorized to be appropriated $15,000,000.

"(B) Amounts made available under subparagraph (A) shall remain available until expended.".

SEC. 3. EFFECTIVE DATE.

The amendments made by this Act shall take effect October 1, 1990, or upon the date of the enactment of this Act, whichever occurs later.●

By Mr. BURNS (for himself, Mr. BOND, Mr. BAUCUS, Mr. SYMMS, Mr. MCCLURE, Mr. MURKOWSKI, and Mr. STEVENS):

S. 2880. A bill to allow the Secretary of the U.S. Department of Agriculture or other appropriate official to protect persons engaged in a lawful hunt within a national forest or on other lands affected with a Federal interest; establishing an administrative civil remedy against individuals or groups intentionally obstructing, impeding, or interfering with the conduct of a lawful hunt, and for other purposes; to the Committee on Environment and Public Works.

NATIONAL FOREST HUNTER SAFETY AND PROTECTION ACT

Mr. BURNS. Mr. President, I rise today on behalf of myself and Senators BOND, BAUCUS, SYMMS, and MCCLURE to introduce the National Forest Hunter Safety and Protection Act of 1990.

America's cherished system of hunting, long admired by people throughout the world, is being seriously threatened by the tactics of a small, but well-organized group of anti-hunting activists.

These activists have decided not to try and change the laws or beliefs of Americans but instead have chartered a confrontational path of harrassment, intimidation and obstruction aimed at legitimate and law abiding sport hunters.

This bill simply says that any person who knowingly acts with intent to obstruct, impede, or otherwise interfere with the conduct of a lawful hunt on land affected with a federal interest may be assessed a civil penalty of not less than $1,000 but not to exceed the sum of $10,000 for each violation.

I would like to give you a few reasons for the need to protect hunters.

Harassment of legitimate and lawful hunting is on the rise. We noticed it in Montana last year.

Harrassment is an unreasonable interference with hunting.

Harassment is being done by groups whose true goals are to end all use of animals, and that has far reaching implications.

The groups who pursue these goals are not content with the normal mechanisms offered for debate in our free society. They have decided that the ends justify the means, and therefore they will interfere with lawful activities.

Hunting is a traditional and beneficial recreation, both for the hunter and for the management of wildlife populations.

The money paid by hunters in the form of license fees and excise taxes pay the bulk of the bill for the conservation of wildlife.

Under the combination of revenue from hunting and management of populations through hunting, wildlife is more varied and abundant today than at any time since the pioneering era.

Nearly one-half of the hunting that takes place in this country today is done on Federal public lands.

Although 37 States have enacted hunter protection laws, it is not clear that those laws would always apply on Federal lands.

Even if the State laws applied on Federal lands, this legislation would add some unique approaches and avenues that would aid significantly in the control of harassment.

The harassment is being done by groups whose true goals are to end all use of animals, including the use of animals in medical research and testing; the raising and eating of meat; the wearing of fur, leather, wool, and silk; the circus and rodeo; the keeping of pets; and the many varied uses of animal products in industrial processes.

When a person buys a State hunting license, he or she deserves the opportunity for a quality outdoor experience and should not be subjected to harassment by others.

Over the last 50 years hunters have contributed over $2.5 billion toward wildlife conservation through excise taxes, duck stamps and license fees.

This bill will continue this tradition by contributing all moneys collected as fines to the North American Waterfowl Management Plan and the Pittman-Robertson Act. Both of these programs acquire lands to protect wildlife habitat.

Mr. President, hunting is a legitimate, lawful sport and compatible with good management and conservation practices when done properly. Therefore, it is the role of the Federal Government to do what it can to protect the rights of law-abiding citizens engaged in a government-sanctioned sport and to protect the activities as well.

For example, back in March, a legal bison hunt was being carried out just outside of Yellowstone National Park. A member of the fund for animals tried to disrupt the hunt by placing his body between a hunter and a buffalo during the hunt.

Now Mr. President, you don't have to think too hard to figure out that is an extremely tense and dangerous situation for all parties involved. Therefore, it is the goal of myself and the cosponsors to avoid a potential life threatening confrontation between the two groups and help protect both groups.

By Mr. SIMON (for himself, Mr. DODD, Mr. JEFFORDS, and Mr. DIXON):

S.J. Res. 352. Joint resolution designating the month of September 1991 as "National Growth Month"; to the Committee on the Judiciary.

NATIONAL GROWTH MONTH

● Mr. SIMON. Mr. President, I rise today to introduce a joint resolution to designate September 1991 as National Growth Month. This joint resolution would provide an opportunity to educate the public about normal and abnormal growth patterns. It would also give children in America a chance to be screened for the disorders, and treated accordingly.

These disorders affect an estimated 2 million children in the United States. There are many conditions which may affect a child's growth. These include growth hormone deficiency, achondroplasia, Turner's Syndrome, intrauterine growth retardation, precocious puberty, osteogenesis imperfecta, and Noonan's syndrome.

Most children with a growth disorder grow to an average height of 4 feet, 6 inches. Short stature is usually accompanied with a host of other physical problems including infertility, delayed puberty, lack of pituitary hormone, curvature of the lower spine, kidney and heart ailments, and loss of hearing.

Unfortunately, there is a lack of public awareness about this problem which has resulted in many children not receiving diagnosis or treatment for the disorders. Many of these disorders can be detected at birth or during infancy. Due to extensive scientific research, a majority of these disorders can be treated.

I urge every Senator to cosponsor and vote for this very worthy joint resolution to designate September 1991 as National Growth Month.●

By Mr. FOWLER (for himself, Mr. DASCHLE, Mr. HEFLIN, Mr. SANFORD, Mr. SHELBY, Mr HARKIN, Mr. METZENBAUM, and Mr. INOUYE):

S. 2881. A bill to promote equal opportunity for minority farmers, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

MINORITY FARMERS RIGHTS ACT

● Mr. FOWLER. Mr. President, as Congress considers the 1990 farm bill, it is imperative that we address the needs of minority farmers and their communities. While many farmers have struggled across the country in recent years, these minority farm communities are often among the Nation's poorest, and their need for assistance is the most critical.

This year's farm bill provides an excellent opportunity to stem the decline of minorities in agriculture. The minority farm bill I am introducing would enhance minority participation in USDA programs. It would immediately halt the loss of minority land and minority operated farms. It would also eliminate racial discrimination and indifference to the needs of limited resource farmers from all programs administered by the Secretary of Agriculture. I am pleased that Senators DASCHLE, HEFLIN, SANFORD, SHELBY, HARKIN, METZENBAUM, and INOUYE have joined me as original co-sponsors.

This is necessary to reverse the trends set forth in the 1982 Civil Rights Commission report entitled "The Decline of Black Farming in America." The Commission found that since 1920 almost 94 percent of black-owned farms have been lost. Black farmers are currently losing land more than three times faster than other farmers. And similar studies have found that other minority farmers are losing their land at a rate similar to that of the black farmers.

Since that report was written the situation has only grown worse, as the trends that hurt all farmers in the 1980's hit minority farmers the hardest. Nearly one-fourth of all minority farms disappeared over the last decade. In the south, where 60 percent of all minority farms are located, five minority farmers left farming for every white farmer who quit.

We need to stem these losses—before there are no black-owned farms left—and begin the work of rebuilding these communities. The Minority Farmers Rights Act of 1990 will help current minority farmers stay in business, allow former farmers to return to the land and provide opportunities for minority youth to enter farming. I am pleased to join Representative MIKE ESPY who has offered similar legislation in the House to make sure that, with all our efforts to support a viable farm economy, we do not neglect our most disadvantaged farmers.●

ADDITIONAL COSPONSORS

S. 2114

At the request of Mr. KENNEDY, the name of the Senator from Ohio [Mr. METZENBAUM] was added as a cosponsor of S. 2114, a bill to promote excellence in American mathematics, science, and engineering education; enhance the scientific and technical literacy of the American public; stimulate the professional development of scientists and engineers; provide for education, training, and retraining of the Nation's technologists; increase the participation of women and minorities in careers in mathematics, science, and engineering; and for other purposes.

S. 2159

At the request of Mr. BOSCHWITZ, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of S. 2159, a bill to amend title II of the Social Security Act to eliminate the earnings test for individuals who have attained retirement age.

S. 2186

At the request of Mr. MCCONNELL, the name of the Senator from North Carolina [Mr. HELMS] was added as a cosponsor of S. 2186, a bill to repeal the provisions of the Revenue Reconciliation Act of 1989 which require the withholding of income tax from wages paid for agricultural labor.

S. 2319

At the request of Mr. GARN, the name of the Senator from Wyoming [Mr. WALLOP], the Senator from Tennessee [Mr. SASSER], and the Senator from New York [Mr. D'AMATO] were added as cosponsors of S. 2319, a bill to amend the Federal Deposit Insurance Act and the Federal Credit Union Act to protect the deposit insurance funds, to limit the depository institutions, credit unions, and other mortgage lenders acquiring real property through foreclosure or similar means, or in a fiduciary capacity, and for other purposes.

S. 2602

At the request of Mr. METZENBAUM, the name of the Senator from Delaware [Mr. BIDEN] was added as a cosponsor of S. 2602, a bill to amend the Public Health Service Act to provide assistance for biomedical and health services research, treatment programs and for other purposes relating to Alzheimer's disease and related disorders.

S. 2711

At the request of Mr. LOTT, the name of the Senator from Maine [Mr. COHEN] was added as a cosponsor of S. 2711, a bill to amend the Internal Revenue Code of 1986 that provide that certain deductions of members of the National Guard or reserve units of the Armed Forces will be allowable in computing adjusted gross income.

S. 2793

At the request of Mr. AKAKA, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 2793, a bill to amend the United States Institute of Peace Act to honor the memory of the late Spark W. Matsunaga, United States Senator from the State of Hawaii, and for other purposes.

S. 2852

At the request of Mr. LEVIN, the names of the Senator from Vermont [Mr. LEAHY], the Senator from Massachusetts [Mr. KERRY], and the Senator from Rhode Island [Mr. PELL] were added as cosponsors of S. 2852, a bill to reinstate as Federal service the services performed in temporary positions within the Bureau of the Census.

SENATE JOINT RESOLUTION 277

At the request of Mr. LUGAR, the names of the Senator from Montana [Mr. BURNS], the Senator from Louisiana [Mr. BREAUX], the Senator from Kansas [Mr. DOLE], the Senator from Hawaii [Mr. AKAKA], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Idaho [Mr. MCCLURE], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of Senate Joint Resolution 277, a joint resolution designating October 6, 1990, as "German-American Day."

SENATE JOINT RESOLUTION 284

At the request of Mr. BYRD, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of Senate Joint Resolution 284, a joint resolution to designate the week beginning September 16, 1990 as "National Give the Kids a Fighting Chance Week."

SENATE JOINT RESOLUTION 297

At the request of Mr. SIMON, the name of the Senator from Nevada [Mr. BRYAN] was added as a cosponsor of Senate Joint Resolution 297, a joint resolution designating September 1990 as "National Craft Month."

SENATE JOINT RESOLUTION 306

At the request of Mr. SIMON, the name of the Senator from Kansas [Mrs. KASSEBAUM] was added as a cosponsor of Senate Joint Resolution 306, a joint resolution to designate the period commencing October 21, 1990, and ending October 27, 1990, as "National Humanities Week."

SENATE JOINT RESOLUTION 313

At the request of Mr. HEFLIN, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of Senate Joint Resolution 313, a joint resolution designating October 3, 1990, as "National Teacher Appreciation Day."

SENATE JOINT RESOLUTION 340

At the request of Mr. WILSON, the names of the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Montana [Mr. BURNS], the Senator from Kansas [Mr. DOLE], the Senator from New Mexico [Mr. DOMENICI], the Senator from Indiana [Mr. LUGAR], the Senator from Florida [Mr. MACK], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Oregon [Mr. PACKWOOD], the Senator from Alaska [Mr. STEVENS], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Indiana [Mr. COATS], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Mississippi [Mr. COCHRAN], the Senator from Maine [Mr. COHEN], the Senator from South Dakota [Mr. PRESSLER], the Senator from Utah [Mr. Garn], the Senator from New York [Mr. D'AMATO], the Senator from North Dakota [Mr. BURDICK], the Senator from Arizona [Mr. DECONCINI], the Senator from Nebraska [Mr. EXON], the Senator from Ohio [Mr. GLENN], the Senator from Hawaii [Mr. INOUYE], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Hawaii [Mr. AKAKA], the Senator from New York [Mr. MOYNIHAN], the Senator from Rhode Island [Mr. PELL], the Senator from Maryland [Mr. SARBANES], the Senator from Illinois [Mr. SIMON], the Senator from Michigan [Mr. RIEGLE], the Senator from Washington [Mr. GORTON], the Senator from New Jersey [Mr. BRADLEY], the Senator from Alabama [Mr. SHELBY], the Senator from Arkansas [Mr. BUMPERS], and the Senator from Alabama [Mr. HEFLIN] were added as cosponsors of Senate Joint Resolution 340, a joint resolution designating the week beginning November 11, 1990, as "National Disabled Veterans Week."

SENATE JOINT RESOLUTION 345

At the request of Mr. D'AMATO, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of Senate Joint Resolution 345, a joint resolution designating August 20 through 26, 1990, as "National Headache and Jaw Disorders Week."

SENATE CONCURRENT RESOLUTION 91

At the request of Mr. HATFIELD, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of Senate Concurrent Resolution 91, a concurrent resolution expressing the sense of the Congress with respect to achieving common security in the world by reducing reliance on the military and redirecting resources toward overcoming hunger and poverty and meeting basic human needs.

SENATE CONCURRENT RESOLUTION 125

At the request of Mr. COHEN, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of Senate Concurrent Resolution 125, a concurrent resolution expressing the sense of Congress regarding adequate funding for long-term health care services provided through the Medicare and Medicaid programs.

SENATE CONCURRENT RESOLUTION 134

At the request of Mr. HEINZ, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of Senate Concurrent Resolution 134, a concurrent resolution expressing the sense of Congress concerning a 1991 White House Conference on Aging.

SENATE RESOLUTION 310—APPOINTMENT OF INDEPENDENT COUNSEL TO INVESTIGATE THE INVOLVEMENT OF GOVERNMENT OFFICIALS IN THE SAVINGS AND LOAN SCANDAL

Mr. PRESSLER submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 310

Whereas the savings and loan bailout will cost taxpayers at least $89,000,000,000 and possibly more than $300,000,000,000 to insure deposits threatened by bad investments;

Whereas savings and loans associations began failing by the score as early as 1985 and continued failing at an alarming rate for several years;

Whereas by some estimates as many as one-third of the Nation's three thousands thrifts are at risk;

Whereas the elected leaders and top appointed officials are entrusted by Americans

to protect and manage the Federal Government competently;

Whereas some of these leaders may have allowed factors other than good management of government to influence oversight of the savings and loan industry; and

Whereas Americans have a right to know if there may have been any wrong doing among these officials in connection with the Savings and Loan disaster: Now, therefore, be it

Resolved, That the Senate urges the President to instruct the Attorney General to appoint an independent counsel to investigate the involvement of Government officials in the savings and loan scandal.

Mr. PRESSLER. Mr. President, Americans everywhere are outraged by the savings and loan industry disaster. This scandal will cost U.S. taxpayers hundreds of billions of dollars. They have a right to demand accountability for this enormous financial catastrophe.

I am not satisfied that enough is being done to track down, punish, and seek recoveries from officials and others who committed crimes in connection with the savings and loan debacle. They robbed investors in their institutions, and their illegal actions will rob U.S. taxpayers for decades to come. The victims of these crimes demand retribution, and they should have it.

According to the Comptroller General of the United States, the cost of "resolving the thrift crisis" may exceed $500 billion, depending upon the state of the economy and interest expense. Most of the loss will be borne by the U.S. taxpayers. There is plenty of blame for this to be shared by Government and the savings and loan industry. Americans are cynical enough about their Government and certain sectors of business with good reason. That is why we need a special approach in dealing with his unprecedented fiasco.

That is why, Mr. President, I today am introducing a Senate resolution, a companion resolution to House Resolution 407, urging the President to appoint an independent counsel to investigate the involvement of Government officials in the savings and loan scandal. The comprehensive savings and loan fraud package that was added to the omnibus crime bill (S. 1970) will double Department of Justice resources to investigate and prosecute for savings and loan fraud in the private sector and greatly increases penalties for such crimes. I am proud to have cosponsored and voted for that measure.

But we need more action to deal credibly with this problem. The appointment of an independent counsel to investigate the involvement of Government officials in the savings and loan scandal is necessary in order for the American people to feel confident that culprits both in and out of Government will be brought to justice.

Mr. President, I also support the idea of establishing an independent commission of inquiry to assess the facts of the savings and loan fiasco. In addition, we should consider creating a joint congressional select committee to achieve the same purpose.

I hope that my colleagues will join me in cosponsoring this measure and will vote to pass it in this Congress.

AMENDMENTS SUBMITTED

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT

LEAHY AMENDMENT NO. 2303

Mr. LEAHY proposed an amendment to the bill (S. 2830) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes, as follows:

(a) TIMING OF ADVANCE COMPENSATION.—On page 70 after line 24, insert the following new subclause (III):

"(III) TIMING OF ADVANCE COMPENSATION.—Advance compensation under this clause shall be made available between October 1 and October 31 of the year in which the crop is harvested.".

(b) CONFORMING AMENDMENT.—On page 71—

(1) on line 1, strike "(III)" and insert "(IV)"; and

(2) strike lines 6 and 7 and insert "not later than 270 days after the advance compensation was made available.".

(c) TIMING OF ADVANCE COMPENSATION.—On page 118 between lines 9 and 10, insert the following new subclause (III):

"(III) TIMING OF ADVANCE COMPENSATION.—Advance compensation under this clause shall be made available between October 1 and October 31 of the year in which the crop is harvested.".

(3) on line 10, strike "(III)" and insert "(IV)"; and

(4) strike lines 15 and 16 and insert "not later than 270 days after the advance compensation was made available.".

(d) COST-SHARE ASSISTANCE ON PERENNIAL COVER.—

(1) On page 96, line 20, strike "50" and insert "25";

(2) On page 146, line 8, strike "50" and insert "25";

(3) On page 201, line 8, strike "50" and insert "25"; and

(4) On page 244, line 14, strike "50" and insert "25";

(e) TARGETED OPTION PAYMENT.—

(1) On page 198, between lines 20 and 21, insert the following new clause:

"(iv) ADJUSTMENT FOR UNDERPLANTINGS.—In determining the increased acreage limitation percentage that is applied to the producer's upland cotton base under this paragraph, the Secretary shall exclude an amount of acreage equal to the average difference between the producer's permitted upland cotton acreage and the acreage actually planted (including acreage devoted to conserving uses under subsection (c)(1)(D)) to upland cotton for harvest during the previous two years.".

(2) On page 242, between lines 4 and 5, insert the following new clause:

"(iv) ADJUSTMENT FOR UNDERPLANTINGS.—In determining the increased acreage limitation percentage that is applied to the producer's rice acreage base under this paragraph, the Secretary shall exclude an amount of acreage equal to the average difference between the producer's permitted rice acreage and the acreage actually planted (including acreage devoted to conserving uses under subsection (c)(1)(D)) to rice for harvest during the previous two years.".

(f) STORAGE PAYMENTS.—

(1) On page 349, strike lines 15 through 25 and insert the following:

"In making storage payments to producers under section 110 of the Agricultural Act of 1949 (7 U.S.C. 1445e) and to commercial warehouses under the authority contained in the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.), the Commodity Credit Corporation and the Secretary of Agriculture shall, to the extent practicable, ensure that the rates of the storage payments made to producers are equivalent to average rates paid for commercial storage, taking into account the current demand for storage for commodities, efficiency, location, regulatory compliance costs, bonding requriements, impact of user fees, and other considerations determined appropriate by the Secretary, except that the rates paid to producers and commercial warehouse shall be established at rates that will result in no increase in current or projected combined outlays of the Commodity Credit Corporation for the storage payments made to producers and commercial warehouse as a result of the adjustment of storage rates under this section."

(g) STOCKS-TO-USE RATIO FOR OILSEEDS.—On page 305, line 15, strike "20 percent" and insert "19 percent".

(h) MINOR OILSEED PLANTINGS ON 50/92 ACREAGE.—

(1) on page 183, strike lines 22 through 24 and insert "(E) PLANTING INDUSTRIAL AND OTHER CROPS ON CONSERVATION USE ACREAGE.—";

(2) on page 184, line 19, strike "(I)" and insert "(i)";

(3) on page 184, line 23, strike "(II)" and insert "(ii)";

(4) on page 185, strike lines 9 through 24;

(5) on page 228, strike lines 12 through 14 and insert the following:

"(E) PLANTING INDUSTRIAL AND OTHER CROPS ON CONSERVATION USE ACREAGE.—";

(6) on page 229, line 9, strike "(I)" and insert "(i)";

(7) on page 229, line 13, strike "(II)" and insert "(ii)"; and

(8) beginning on page 229, strike lines 24 through line 14 on page 230.

(i) MARKETING ASSISTANCE PROGRAM—On page 462, line 17, strike "$225,000,000" and insert "$200,000,000";

(j) USER FEES.—At the appropriate at the end of title XIX, add the following new section:

"SEC. 19 . COLLECTION OF FEES FOR INSPECTION SERVICES.

"(a) QUARANTINE, INSPECTION AND TRANSPORTATION FEES.—

"(1) QUARANTINE AND INSPECTION.—The Secretary of Agriculture may prescribe and collect fees to cover the cost of providing agricultural quarantine and inspection services in connection with the arrival at a port

in the customs territory of the United States, or the preclearance or preinspection at a site outside the customs territory of the United States, of a commercial vessel, commercial aircraft commercial truck railroad car, and each passenger aboard a commercial vessel or commercial aircraft.

"(2) TRANSPORTATION.—Each person that provides transportation to a passenger to enable such passenger to obtain transportation through a commercial aircraft or commercial vessel into the customs territory of the United States shall—

"(A) collect from such passenger the fee prescribed under this subsection at the time the document or ticket authorizing such transportation is issued; and

"(B) identify on the document or ticket referred to in subparagraph (A), or through electronic means as determined appropriate by the Secretary, the fee charged under this subsection as an agricultural inspection fee, or as part of a combined Federal inspection fee.

"(3) TREASURY.—Any person who collects a fee under this subsection shall remit such fee to the Treasury of the United States prior to the date that is 31 days after the close of the calendar quarter in which such fee is collected.

"(4) AGRICULTURAL QUARANTINE INSPECTION USER FEE ACCOUNT.—

"(A) ESTABLISHMENT.—There is established in the Treasury of the United States a no-year fund, to be known as the 'Agricultural Quarantine Inspection User Fee Account' (hereinafter referred to in this subtitle as the "Account'), for the use of the Secretary for quarantine or inspection services under this subtitle.

"(B) AMOUNTS IN ACCOUNT.—

"(i) DEPOSITS.—All of the fees collected under this subsection shall be deposited in the Account.

"(ii) REIMBURSEMENT.—The Secretary of Treasury shall use the Account to provide reimbursements to any appropriations accounts that incur the costs associated with the Secretary carrying out all activities of the Secretary at ports in the customs territory of the United States or at preclearance or preinspection locations in connection with the enforcement and administration of this subtitle.

"(iii) PROCEDURE.—The Secretary of the Treasury shall make reimbursement under clause (ii) on a quarterly basis. Amounts required to be reimbursed under clause (ii), shall be made on this basis of estimates made by the Secretary of the expenses described in clause (ii) that are incurred by the Secretary in the 3-month period immediately preceding such reimbursement.

"(iv) ADJUSTMENTS.—Adjustments of reimbursements made under clause (ii) shall be made to the extent necessary to correct prior estimates that were in excess of, or less than, the amount required to be reimbursed under clause (iii).

"(5) ADJUSTMENT IN FEE AMOUNTS.—The Secretary shall adjust the amount of the fees to be assessed under this subsection to reflect the cost to the Secretary in administering such subsection, in carrying out the activities at ports in customs territory of the United States and preclearance and preinspection sites outside the customs territory of the United States in connection with the provision of agricultural quarantine inspection services, and in maintaining a reasonable balance in the Account.

"(b) PLANT INSPECTION.—Section 102(f) of the Act of September 21, 1944 (7 U.S.C. 147a(f)) is amended to read as follows:

"(f)(1) Notwithstanding paragraph (2) of this subsection, there are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this section. Unless otherwise specifically authorized or provided for in appropriations, no part of such sums shall be used to pay the cost or value of property injured or destroyed.

'(2) The Secretary of Agriculture is authorized to prescribe and collect fees to recover the costs of providing for the inspection of plants and plant products offered for export or transiting the United States and certifying to shippers and interested parties as to the freedom of such plants and plant products from plant pests according to the phytosanitary requirements of the foreign countries to which such plants and plant products may be exported, or to the freedom from exposure to plant pests while in transit through the United States. Any person for whom such an activity is performed shall be liable for payment of fees assessed. Upon failure to pay such fees when due, the Secretary of Agriculture shall assess a late payment penalty, and such overdue fees shall accrue interest, as required by 31 U.S.C. 3717. All fees, late payment penalties, and accrued interest collected shall be credited to such accounts that incur the costs and shall remain available until expended without fiscal year limitation. The Secretary of Agriculture shall have a lien for the fees, any late payment penalty, and any accrued interest assessed against the plant or plant product for which services have been provided. In the case of any person who fails to make payment when due, the Secretary of Agriculture shall also have a lien against any plant or plant product thereafter attempted to be exported by such person. The Secretary of Agriculture may, in case of nonpayment of the fees, later payment penalty, or accrued interest, after giving reasonable notice of default to the person liable for payment of such assessments, sell at public sale after reasonable public notice, or otherwise dispose of, any such plant or plant product upon which the Secretary of Agriculture has a lien pursuant to this section. If the sale proceeds exceed the fees due, any late payment penalty assessed, any accrued interest and the expenses of the sale, the excess shall be paid, in accordance with regulations of the Secretary of Agriculture, to the owner of the plant or plant product sold upon the owner making application therefore with proof of ownership within six months after such sale, and otherwise the excees shall be credited to accounts that incur the costs and shall remain available until expended. The Secretary of Agriculture shall, pursuant to regulations as prescribed by the Secretary, suspend performance of services to persons who have failed to pay such fees, later payment penalty and accrued interest.'.

"(c) VETERINARY DIAGNOSTICS.—(1) Section 11 of the Act of May 29, 1884 (58 Stat. 734, as amended, 21 U.S.C. 114a) is amended by inserting immediately following the first sentence: 'The Secretary of Agriculture is authorized to prescribe and collect fees to recover the costs of carrying out the provisions of this section which relate to veterinary diagnostics. Any person for whom an activity related to veterinary diagnostics is performed pursuant to the section shall be liable for payment of fees assessed. Upon failure to pay such fees when due, the Secretary shall assess a later payment penalty, and such overdue fees shall accrue interest, as required by 31 U.S.C. 3717. All fees, late payment penalties, and accrued interest collected shall be credited to such accounts that incur the costs and shall remain available until expended without fiscal year limitation.'.

(2) LIENS.—

(A) IN GENERAL.—The Secretary shall have a lien against the animal, article, means of conveyance, or facility for which services have been provided under this subtitle for the fees, any late payment penalty, and any accrued interest assessed under this subsection.

(B) OTHER ANIMALS, ETC.—In the case of any person who fails to make payment when due under this subsection, the Secretary shall have a lien against any animal, article, or means of conveyance thereafter imported, moved in interstate commerce, or attempted to be exported by the person after the date of such failure until the date on which such owner or operator make full payment to the Secretary under this subsection.

(C) SALE OF ANIMALS, ETC.—

(i) AUTHORITY.—The Secretary may, if a person does not pay fees, late payment penalties, or accrued interest on such, after providing reasonable notice of default to such person, sell at public sale after reasonable public notice, or otherwise dispose of, any such animal, article, means of conveyance or facility on which the Secretary has a lien under this paragraph.

(ii) EXCESS PROCEEDS.—If the sale proceeds under clause (i) exceed the fees due, any late payment penalty assessed, any accrued interest on such, and the expenses associated with the sale, such excess shall be paid to the owner of the animal, article, means of conveyance, or facility if such owner submits an application for such excess together with proof of ownership not later than 6 months after the date of such sale. If no such application is made, such excess shall be credited to accounts that incur the costs associated with the fees collected and shall remain available until expended, without fiscal year limitation. The Secretary shall suspend performance of services to persons who have failed to pay fees, late payment penalty, or accrued interest under this subtitle.

"(d) REGULATIONS.—The Secretary of Agriculture may prescribe such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(e) RECOVERY OF AMOUNTS OWED.—An action may be brought for the recovery of fees, late payment penalties, and accrued interest which have not been paid in accordance with this section against any person obligated for payment of such assessments under this Act in any United States district court or other United States court for any territory or possession in any jurisdiction in which such person is found or resides or transacts business, and such court shall have jurisdiction to hear and decide such action.

"(f) DEFINITIONS.—

"(1) PERSON.—For the purposes of this section, the term 'person' means an individual, corporation, partnership, trust, association, or any other public or private entity, or any officer, employee, or agent thereof.

"(2) VESSEL.—For the purposes of subsection (a), the term 'vessel' does not include any ferry.

"(3) CUSTOMS TERRITORY.—For the purposes of subsection (a), the term 'customs territory of the United States' means the 50

States, the District of Columbia, and Puerto Rico.

"(4) PLANT AND ANIMAL QUARANTINE LAWS.—For the purposes of subsection (a), the term 'plant and animal quarantine laws' means one or more of the following: the Plant Quarantine Act of 1912 (7 U.S.C. 151 et seq.); the Federal Plant Pest Act (7 U.S.C. 150aa et seq.); the Federal Noxious Weed Act of 1974 (7 U.S.C. 2801 et seq.); the Animal Quarantine Laws (21 U.S.C. 101-105, 111-131, and 134-134h); the Honeybee Act (7 U.S.C. 281 et seq.); section 306 of the Tariff Act of 1930 (19 U.S.C. 1306), and any other Act administered by the Secretary relating to plant or animal diseases or pests or noxious weeds.

"(5) UNITED STATES.—For the purposes of subsection (b), the term 'United States' means the several States of the United States, the District of Columbia, Guam, the Commonwealth of the Northern Mariana Islands, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, and all other territories and possessions of the United States.".

(G) PENALTY.—On failure of a person to pay any fee assessed under this section, the Secretary shall assess a late payment penalty on such person, and the overdue fees and late payment penalty shall accrue interest, as provided in section 3717 of title 31, United States Code. Any late payment penalty and any accrued interest shall be credited to the accounts that incur the costs associated with the fees collected and shall remain available until expended without fiscal year limitation.

LEAHY (AND LUGAR) AMENDMENT NO. 2304

Mr. LEAHY (for himself and Mr. LUGAR) proposed an amendment to the bill S. 2830, supra, as follows:

Beginning on page 45, strike line 25 and all that follows through page 46, line 3, and insert "shall provide that the Board may not contract with processor organizations for any other services.".

On page 98, lines 17 through 20, strike "The State committee shall announce the establishment of the 5-month period no later than January 1 of each year.".

On page 120, between lines 22 and 23, insert the following new paragraph:

"(6) BARLEY FEED VALUE DETERMINATION.—Prior to the announcement of the program for the 1991 crop of barley, the Secretary shall conduct a study to determine a fair and reasonable relationship between the feed values of barley and corn. The study shall take into account the relative qualities of the two feed grains when fed as is to the various livestock classes, on a dry-matter basis.".

On page 148, lines 5 through 8, strike "The State committee shall announce the establishment of the 5-month period no later than January 1 of each year.".

On page 203, lines 5 through 8, strike "The State committee shall announce the establishment of the 5-month period no later than January 1 of each year.".

On page 246, lines 10 through 13, strike "The State committee shall announce the establishment of the 5-month period no later than January 1 of each year.".

On page 276, line 25, after "occurs", add the following: ", except that the penalty shall not apply to the marketing of breeder or Foundation seed peanuts, grown under the auspices of a publicly owned agricultural experiment station (including a State-operated seed organization), under such regulations as the Secretary may prescribe".

On page 328, between lines 12 and 13, insert the following new subsection:

(d) GROWERS OF HYBRID SEED.—Section 1001A(b) of such Act (7 U.S.C. 1308-1(b)) is amended by adding at the end the following new paragraph:

"(6) GROWERS OF HYBRID SEED.—To determine whether a person growing hybrid seed under contract shall be considered to be actively engaged in farming, the Secretary shall not take into consideration the existence of a hybrid seed contract.".

On page 332, between lines 8 and 9, insert the following new paragraph:

"(5) UPLAND COTTON.—The Commodity Credit Corporation shall sell upland cotton for unrestricted use at the same price the Corporation sells upland cotton for export, but in no event at less than the amount provided for in paragraph (1).".

On page 332, line 24, after "export", insert "(excluding sales of upland cotton for export)".

On page 335, between lines 2 and 3, insert the following new paragraph:

"(3) COMPETITIVE BID BASIS.—Subject to the sales price restrictions contained in this section, the Corporation may sell any basic agricultural commodity or storable nonbasic commodity on a competitive bid basis, if the sale is determined to be appropriate by the Secretary.".

On page 340, line 10, before "Subsection", insert "(a) IN GENERAL.—".

On page 340, after line 24, insert the following new subsection:

(b) PRODUCER.—Section 408 of such Act is amended by striking subsections (l) and (m) and inserting the following new subsection:

"(l) 'Producer' shall include a person growing hybrid seed under contract. In determining the interest of a grower of hybrid seed in a crop, the Secretary shall not take into consideration the existence of a hybrid seed contract.".

On page 341, between lines 13 and 14, insert the following new subsection:

(a) MEMBERSHIP.—The first sentence of section 1006(a)(1) of the Agriculture and Food Act of 1981 (7 U.S.C. 4102(a)(1)) is amended by striking "seven members who are engaged in the commercial production of one or more of the various major agricultural commodities produced in the United States" and inserting "seven members who, individually or as a group, are engaged in the commercial production of each of the program crops and in one or more of the other various major agricultural commodities produced in the United States".

On page 341, line 14, before "Section", insert "(b) EXTENSION.—".

On page 352, between lines 6 and 7, insert the following new subtitle:

Subtitle D—Options Pilot Program

SEC. 1051. SHORT TITLE.

This subtitle may be cited as the "Options Pilot Program Act of 1990".

SEC. 1052. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) there would be significant budgetary savings if practical alternatives could be found to the price support and production adjustment programs carried out by the Secretary of Agriculture and the Commodity Credit Corporation;

(2) in the free market economy of the United States, a reasonable measure of protection from fluctuations in the price of crops such as wheat, feed grains, and soybeans may be found through hedging activity on regulated commodities futures markets;

(3) while utilization of the markets by grain traders and large consumers of commodities for which market futures prices are available is widespread, agricultural producers are not generally familiar with the procedures for hedging the value of their production;

(4) such price protection may be economically obtained by trading in futures options rather than by the purchase or sale of futures contracts for large quantities of grain; and

(5) more information and data are needed to evaluate the viability of futures options trading as an alternative to the price support and production adjustment programs carried out by the Secretary of Agriculture and the Commodity Credit Corporation.

(b) PURPOSES.—It is the purpose of this subtitle to require the Secretary of Agriculture (hereinafter in this subtitle referred to as the "Secretary") to conduct research necessary—

(1) to ascertain whether futures options trading would provide reasonable protection to producers from fluctuations in the value of the commodities they produce;

(2) to ascertain whether producers will accept and fully utilize this method of price protection if information is provided to the producers concerning its proper use; and

(3) to determine the effect widespread adoption of such futures options trading program would have on commodity prices.

SEC. 1053. OPTIONS PILOT PROGRAM.

(a) IN GENERAL.—To determine whether regulated agricultural commodity options trading can be used by producers to obtain protection from fluctuations in the market prices of the commodities they produce and the impact of such trading on the prices of the commodities, the Secretary shall conduct a pilot program for each of the 1991 through 1995 crops of corn and for each of the 1993 through 1995 crops of wheat and soybeans.

(b) COUNTIES.—The Secretary shall conduct the pilot program in various counties that produce significant quantities of the 1991 through 1995 crops of corn, and significant quantities of the 1993 through 1995 crops of wheat and soybeans. For the 1991 crop year, the Secretary shall select not less than three counties in each of three major corn-producing States to conduct the pilot program for corn for the crop year. The Secretary may add additional States and counties to the program in succeeding crop years.

(c) BROKERS.—Trades under the pilot program conducted under this subtitle shall be carried out through registered commodity brokers who choose to participate in the program.

(d) ELIGIBLE PRODUCER PARTICIPANTS.—The Secretary shall contract with eligible producers who wish to participate in the program and who are located in the counties selected for the pilot program. The contracts shall set forth the terms and conditions for participation in the pilot program, including a provision that the contract may be terminated by any participating producer at any time prior to receiving payments for options contracted for under the pilot program.

SEC. 1054. TERMS AND CONDITIONS.

(a) ELIGIBILITY REQUIREMENTS.—

(1) IN GENERAL.—To be eligible to participate in the pilot program conducted under this subtitle, a producer shall meet all of the eligibility requirements specified in this

subtitle, and the regulations issued pursuant to this subtitle.

(2) PARTICIPATION IN PRICE SUPPORT PROGRAMS.—The regulations shall specify to what degree participation in the price support and production adjustment program established for the applicable crop of the commodity shall be required for participation in the pilot program.

(3) ADDITIONAL REQUIREMENTS.—To be eligible to participate in the pilot program, a producer shall—

(A) attend not less than one seminar conducted by the Cooperative Extension Service;

(B) maintain a separate brokerage account for the purpose of trading futures and options contracts covered by the pilot program; and

(C) compile, maintain, and submit (or authorize the compilation, maintenance, and submission) of such documentation as the regulations governing the program may require to permit a proper record to be kept of the results of all cash, futures, or options trading that may be undertaken under the pilot program by the producer.

(b) PROGRAM TERMS AND CONDITIONS.—The Secretary shall issue regulations or develop contract forms, or both, that set forth the terms and conditions of the program, and the rights and obligations of all of the parties participating in the program (including producers and registered brokers). At a minimum, the terms and conditions shall include:

(1) CONTRACT MONTHS AND STRIKE PRICES.—

(A) IN GENERAL.—The contract months and options strike prices at which participating producers may buy commodity put options in order to receive payments to cover the premiums on the options for each of the 1991 through 1995 crops of corn, and for each of the 1993 through 1995 crops of wheat and soybeans.

(B) TARGET PRICE AND LOAN RATE STRIKE PRICES.—The pilot program shall provide—

(i) a target price strike price for put options that is equivalent to the target price for the commodity involved; and

(ii) a loan rate strike price that is equivalent to the loan rate for the commodity involved.

(C) OTHER OPTIONS STRIKE PRICES.—Other options strike prices for commodities included in the program may be used if the prices are selected and agreed on by the Secretary and the representatives of the commodity futures trading industry designated in accordance with section 1055(a).

(2) ELIGIBLE PORTION OF CROP.—The portion of the crop of an eligible producer that may be used as a basis for acquiring options contracts.

(3) PUT OPTIONS CONTRACTS.—The time when, and the manner in which, put options contracts shall be acquired, held, and liquidated by producers to meet program requirements.

(4) PROGRAM BENEFITS.—

(A) IN GENERAL.—The program benefits to be offered participating producers shall include payments of not more than 15 cents per bushel to cover the cost of option premiums, transaction fees, interest, and other expenses.

(B) RELATIVE BENEFITS.—The Secretary shall inform participants that their participation is voluntary and that neither the United States, the Commodity Credit Corporation, nor representatives of the futures industry can guarantee that the participants will be better or worse off financially as a result of participation in the pilot program than the participants would be if the participants participated solely in price support and production adjustment programs carried out by the Secretary and the Commodity Credit Corporation.

SEC. 1055. COMMODITY FUTURES TRADING INDUSTRY.

(a) CONSULTATION.—The Secretary or the Secretary's designees may consult with representatives of the commodity futures trading industry who are specialists in the trading of futures contracts and futures options contracts, and who are designated by the regulated commodity futures markets that choose to participate in the pilot program.

(b) PROCEDURE.—The designations and consultations may be held without regard to the Federal Advisory Committee Act (5 U.S.C. App. 2). Such Act shall not be applicable to the pilot program carried out under this subtitle, or to the meetings of representatives of the commodity futures trading industry with the Secretary or the Secretary's designees relating to this subtitle.

SEC 1056. COMMODITY CREDIT CORPORATION.

(a) IN GENERAL.—The pilot program established under this subtitle shall be carried out by and through the Commodity Credit Corporation.

(b) FUNDS.—The Corporation shall expend such funds as may be required to conduct the pilot program for futures options contract trading in the manner specified in this subtitle and the regulations issued, and contracts entered into, to carry out this subtitle.

(c) CONTRACTS.—Contracts entered into under this subtitle shall be considered to be program benefit contracts of the Commodity Credit Corporation, and not service or acquisition contracts of the United States.

On page 352, line 7, strike "Subtitle D" and insert "Subtitle E".

On page 352, line 9, strike "1051" and insert "1061".

On page 354, line 2, strike "1061" and insert "1071".

On page 390, line 21, strike "1,685,000" and insert "1,925,000".

On page 390, line 23, strike "1,710,000" and insert "1,950,000".

On page 390, line 25, strike "1,735,000" and insert "1,975,000".

On page 391, line 2, strike "1,760,000" and insert "2,000,000".

On page 391, line 4, strike "1,785,000" and insert "2,025,000".

On page 407, line 19, strike "products." and insert "commodities.".

On page 418, strike line 23 and all that follows through line 5 on page 419, and insert the following new paragraphs:

"(1) IN GENERAL.—There are authorized to be appropriated such sums as may be necessary to carry out—

"(A) the grant program established under section 103;

"(B) the concessional credit sales program established under section 107; and

"(C) titles II and III;

including such amounts as may be required to make payments to the Commodity Credit Corporation to the extent the Commodity Credit Corporation is not reimbursed under the programs described in subparagraphs (A) through (C) for the actual costs incurred or to be incurred by such Corporation in carrying out such programs.

"(2) LIMITATIONS.—Not less than 40 percent of the amounts made available for any fiscal year to carry out title I shall be used—

"(A) to carry out the credit sales program established under section 107; and

"(B) to carry out the grant program established under section 103.

On page 419, line 6, strike "(2)" and insert "(3)".

On page 419, strike lines 24 and 25, and insert "any fiscal year for carrying out section 103, section 107, title II or title III, may be used to carry out any other section or title.".

On page 420, line 9, strike the end quotation marks and the second period.

On page 420, between lines 9 and 10, insert the following new section:

"SEC. 408. COORDINATION OF PUBLIC LAW 480 AND OTHER FOREIGN ASSISTANCE PROGRAMS.

"(a) NOTIFICATION REQUIREMENT.—To facilitate the coordination of programs of assistance under this Act with other foreign assistance programs, the Committees on Agriculture, Foreign Affairs, and Appropriations of the House of Representatives, and the Committees on Appropriations, and Agriculture, Nutrition, and Forestry of the Senate, shall be notified at least 15 days—

"(1) prior to the entering into of any agreement under this Act (including any local currency agreement);

"(2) prior to the adoption, on behalf of the United States, of any amendment to agreement described in paragraph (1) that would increase the amount of assistance to be provided under the agreement or would change the purposes for which such assistance could be used, including any increase or change involving local currencies; or

"(3) prior to the waiver of any payments under section 403.

"(b) PROCEDURES AND PRACTICES APPLICABLE TO NOTIFICATIONS.—The notifications required by subsection (a) shall be treated in the same manner as reprogramming notifications pursuant to section 634A of the Foreign Assistance Act of 1961.".

On page 450, line 13, strike "commodities" and insert "agricultural commodities".

On page 451, line 5, strike "or".

On page 451, line 10, strike the period and insert "; or".

On page 451, between lines 10 and 11, insert the following new paragraph:

"(4) a tribal or inter-tribal organization that promotes the export and sale of one or more Native American agricultural products.".

On page 454, strike lines 20 through 24 and insert the following new paragraphs:

"(3) LEVEL OF COST SHARE ASSISTANCE.—Cost share assistance provided under this section to private organizations as described in subsection (d)(3) shall not exceed 50 percent of the cost of implementing the marketing plan, except that such 50 percent ceiling shall not apply in the case of agricultural commodities with respect to which there has been a favorable decision under section 301 of the Trade Act of 1974 (19 U.S.C. 2411).

"(4) STAGED REDUCTION IN ASSISTANCE.—In the case of any private entities that received assistance under section 1124 of the Food Security Act of 1985 prior to the date of enactment of this Act and with respect to which assistance under this section would be limited under paragraph (3), any such reduction in assistance shall be staged down to the 50 percent ceiling in equal increments over a 5-year period.

On page 468, line 18, strike "products." and insert "commodities.".

On page 499, between lines 9 and 10, insert the following new section:

SEC. 1136. WORLD LIVESTOCK MARKET PRICE INFORMATION.

(a) DEVELOPMENT OF METHODOLOGY.—The Secretary of Agriculture shall develop appropriate methodology for determining the world price of livestock and livestock products and shall gather and analyze appropriate price and cost of production information concerning such products in foreign countries for the purpose of price discovery and to aid in the sale of livestock and livestock products in foreign export markets.

(b) PUBLICATION OF INFORMATION.—Not later than 240 days after the date of enactment of this Act, and periodically thereafter, the Secretary of Agriculture shall publish the information gathered under subsection (a).

On page 519, line 20, strike "AGRONOMIC CROPPING" and insert "ALLEY-CROPPING".

On page 520, line 7, add "and" after the semicolon.

On page 520, strike line 8.

On page 520, line 9, strike "(D)" and insert "(C)".

On page 575, after line 20, add the following new sections:

SEC. 1278. INCREASE IN RESOURCE CONSERVATION AND DEVELOPMENT AREAS.

Section 1536 of the Agriculture and Food Act (7 U.S.C. 3459) is amended by striking "two hundred twenty-five" and inserting "450".

SEC. 1279. CONSOLIDATION OF USDA OFFICES ON INDIAN RESERVATIONS.

(a) ESTABLISHMENT OF DEMONSTRATION PROJECT.—The Secretary of Agriculture shall establish a demonstration project to improve the delivery of Department of Agriculture services to Indian tribes and Indian producers through the establishment of consolidated Federal agricultural offices on not less than 12 Indian reservations.

(b) ENTITIES AS PART OF CONSOLIDATED OFFICE.—An office established under subsection (a) on an Indian reservation shall be composed of representatives of Federal agricultural offices having jurisdiction over the area in which the reservation is located, including—

(1) the Agricultural Stabilization and Conservation Service;

(2) the Soil Conservation Service;

(3) the Farmers Home Administration; and

(4) other offices as determined appropriate by the Secretary of Agriculture;

with such representatives having the same responsibilities and authority to perform or provide such services on the Indian reservation as representatives of county offices of such Federal agricultural agencies.

(c) OTHER SERVICES ON NONPARTICIPATING INDIAN RESERVATIONS.—

(1) IN GENERAL.—With respect to an Indian reservation for which a consolidated Federal agricultural office is not established under subsection (a), the Secretary of Agriculture shall require the local office of the—

(A) Agricultural Stabilization and Conservation Service;

(B) Soil Conservation Service; and

(C) Farmers Home Administration;

that operates in a county in which such Indian reservation exists to establish a consolidated agricultural sub-office at the Tribal headquarters of such reservation and to provide staff for such sub-office as necessary, but in no event for less than one day a week.

(2) RESERVATIONS IN MORE THAN ONE COUNTY.—With respect to an Indian reservation that is located in more than one county, the Secretary of Agriculture, the relevant Federal county agricultural offices, and the Indian tribe shall enter into a cooperative agreement for the provision of the services required under paragraph (1) to avoid duplication of effort.

(3) NUMBER OF RESERVATIONS.—The Secretary of Agriculture ensure the provision of services under this subsection on not less than 12 Indian reservations during the first year after the date of enactment of this Act, and on not less than 10 additional reservations each year during which this section remains in effect.

(d) SELECTION OF RESERVATIONS.—In selecting those Indian reservations on which offices will be established under this section, the Secretary of Agriculture, in consultation with the Bureau of Indian Affairs, the Intertribal Agricultural Council, and the Southwest Indian Agriculture Association, shall consider agricultural acreage within the boundaries of the reservation or tribal jurisdiction, the soil classification of such acreage, and the population of such reservation of tribal jurisdiction.

(e) REPORT.—Not later than 3 years after the date of enactment of this Act, the Secretary of Agriculture shall prepare and submit, to the appropriate Committees of Congress, a report concerning the implementation of this section.

(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated in each fiscal year, such sums as may be necessary to carry out this section.

On page 584, between lines 17 and 18, insert the following new subsection:

(d) RIGHT OF FIRST REFUSAL.—Section 335(e)(1)(A) is amended by adding at the end the following new clause:

"(iv) In the case of real property described in clause (i) that was acquired by the Secretary before January 6, 1988, that is (or has been at any time during the 12-month period preceding the date of enactment of this clause) under lease to a person described in subparagraph (C), and that has not been conveyed (or contracted to be conveyed) by the Secretary prior to the date of enactment of this clause, the Secretary shall, during the 30-day period following the date of enactment of this clause, make the person an offer, to be held open for a period of 90 days, to purchase the property on the same terms and conditions that such offers are made in the case of property coming into inventory on or after the date of enactment of this clause.".

On page 584, line 18, strike "(d)" and insert "(e)".

On page 585, line 1, strike "(e)" and insert "(f)".

On page 585, line 18, strike "(f)" and insert "(g)".

On page 585, line 22, strike "(g)" and insert "(h)".

Beginning on page 586, strike line 3 and all that follows through page 588, line 2, and insert the following new subsection:

(i) CONSERVATION EASEMENTS ON WETLANDS ON FMHA INVENTORY PROPERTY.—Section 335 is amended by adding at the end the following new subsection:

"(g)(1) Subject to paragraphs (2) through (5), in the disposal of real property under this section, the Secretary shall establish perpetual wetland conservation easements to protect and restore wetlands or converted wetlands that exist on inventoried property, as determined by the Secretary in accordance with title XII of the Food Security Act of 1985 (16 U.S.C. 3801 et seq.).

"(2) In establishing the wetland conservation easements on land that is considered to be cropland as of the date of enactment of this subsection, the Secretary shall avoid, to the extent practicable, an adverse impact on the productivity of the croplands, as provided in this subsection.

"(3) In order to avoid the adverse impact, the Secretary shall—

"(A) not establish the wetland conservation easements with respect to wetlands that were converted prior to December 23, 1985, and that have been in cropland use, as determined by the Secretary, in excess of 10 percent of the existing cropland available for production of agricultural commodities on the particular parcel of inventoried property;

"(B) not establish the wetland conservation easements with respect to wetlands that have been frequently planted to agricultural commodities and wetlands described in subparagraph (A), in excess of 20 percent of the existing cropland available for production of agricultural commodities on the particular parcel of inventoried property;

"(C) ensure that the buffer area adjacent to the wetland is generally not more than 100 feet in average width; and

"(D) ensure that access to other portions of the property for farming and other uses is provided.

"(4) The wetland conservation easements shall be placed on wetlands that have a history of haying and grazing, as determined by the Secretary, except that in no case shall the quantity of the wetland subject to the easements exceed 50 percent of the existing forage lands on the parcel of inventoried property. All haying and grazing practices on the wetlands (including the timing and intensity of haying and grazing) shall conform to forage management standards designed to protect wetlands.

"(5) If, despite the limitations contained in paragraph (3), wetland conservation easements established under paragraph (1) would prevent a particular parcel of inventoried property that is to be sold or leased to a borrower described in clause (i), (ii), or (iii) of subsection (e)(1)(C), or to a borrower who is a beginning farmer or rancher, from being a marketable agricultural production unit that is comparable to the parcel as acquired, the Secretary may—

"(A) establish wetland conservation easements on wetland that was converted prior to December 23, 1985, in a quantity that is less than 10 percent of the existing croplands available for production of agricultural commodities on the particular parcel; and

"(B) if the reduction provided in subparagraph (A) is not applicable, or is not sufficient to ensure that the particular parcel would be a marketable agricultural production unit, amend the wetland conservation easements established on the wetlands that have been frequently planted to agricultural commodities to permit the production of agricultural commodities (consistent with title XII of the Food Security Act of 1985) on the wetlands, to the extent necessary to maintain the parcel as a marketable agricultural production unit.

"(6) The Secretary shall provide prior written notification to a borrower considering preservation loan servicing that a wetlands conservation easement may be placed on land for which the borrower is negotiating a lease option.

"(7) The appraised value of the farm shall reflect the value of the land due to the placement of wetland conservation easements.

"(8) Notwithstanding the limitations described under paragraphs (3) and (4), the limitations may be voluntarily, knowingly waived by any person with respect to real property described in paragraph (3) or (4).".

On page 615, line 10, strike "System institution" and insert "insured System institution".

On page 615, between lines 15 and 16, insert the following new subsection:

(a) AUTHORITY TO TERMINATE.—Notwithstanding any other provision of law, effective on the date of enactment of this Act, the California Livestock Production Credit Association may terminate the status of the Association as a Farm Credit System institution.

On page 615, line 16, before "Notwithstanding", insert "(b) REQUIREMENTS.—".

On page 618, between lines 2 and 3, insert the following new section:

SEC. 1352. AUTHORITY OF FARM CREDIT ADMINISTRATION TO REGULATE FEDERAL AGRICULTURAL MORTGAGE CORPORATION.

Section 8.11 of the Farm Credit Act of 1971 (12 U.S.C. 2279aa-11) is amended—

(1) in subsection (a), by striking paragraph (1) and inserting the following new paragraph:

"(1) AUTHORITY.—Notwithstanding any other provision of this Act, the Farm Credit Administration shall have the authority to—

"(A) provide for the examination of the condition of the Corporation and its affiliates; and

"(B) provide for the general supervision of the safe and sound performance of the powers, functions, and duties vested in the Corporation and its affiliates by this title, including through the use of the enforcement powers of the Farm Credit Administration under part C of title V."; and

(2) by adding at the end the following new subsection:

"(e) DEFINITION OF AFFILIATE.—As used in this title, the term 'affiliate' shall mean an entity effectively controlled or owned by the Corporation, except that such term shall not include a certified facility or an originator (as defined in paragraphs (3) and (7), respectively, of section 8.0).".

On page 618, line 3, strike "1352" and insert "1353".

On page 618, between lines 7 and 8, insert the following new section:

SEC. 1354. GAO STUDY OF RURAL CREDIT COST AND AVAILABILITY.

(a) STUDY.—The Comptroller General of the United States shall conduct a study of certain matters related to the cost and availability of credit in rural America, including a study of—

(1) the relationship of the role and lending volume of the Farm Credit System to the ability of the System to repay the assistance provided under the Agricultural Credit Act of 1987 (Public Law 100-233) and amendments made by such Act;

(2) the ability of Farm Credit System institutions to be competitive taking into consideration the costs of rebuilding capital, repaying assistance, and capitalizing the Farm Credit Insurance Fund established under section 5.60 of the Farm Credit Act of 1971 (12 U.S.C. 2277a-9);

(3) the rates Farm Credit Banks charge for credit and the rates prevailing in the market for credit of comparable risk and maturity;

(4) the potential for credit pricing practices of rural lending institutions to adversely affect the financial soundness of other lending institutions that provide agricultural credit;

(5) the pricing practices of commercial lending and insurance institutions and whether the practices adequately address the level of risk in agricultural lending;

(6) whether the assistance authorized under the Agricultural Credit Act of 1987, and amendments made by such Act, is being utilized in accordance with the purposes intended by Congress;

(7) the availability and adequacy of credit in rural America for the purpose of financing agricultural production, infrastructure (roads, bridges, and water systems), and rural development;

(8) the prudence and desirability for commercial lenders and Farm Credit System institutions who serve primarily agriculture to broaden lending activity to provide diversity in their portfolios;

(9) the level of competitiveness among the major sector lenders in agriculture, whether competition has increased or decreased in the last 5 years, and whether American producers have benefited from the competitive situation; and

(10) the level of farm lending activity, in relation to the total asset level, of agricultural lending institutions in rural America and the level of investment by the institutions outside of the rural community or area in which the lending institutions are located.

(b) REPORT.—Not later than 2 years after the date of enactment of this Act, the Comptroller General shall submit a report on the study conducted under subsection (a) (including any related recommendations) to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

On page 636, line 13, strike "and".

On page 636, strike line 21 and insert "genebanks with the United States; and

"(12) research that develops technology that will ascertain the lean content of animal carcasses that will be used for human consumption.' ".

On page 660, line 23, insert "(a) IN GENERAL.—" before "Section".

On page 661, between lines 6 and 7, insert the following new subsection:

(b) COST-REIMBURSABLE AGREEMENTS.—Section 1473 of the Act (7 U.S.C. 3319a) is amended by inserting before "without regard" the following: "and State departments of agriculture and associations thereof".

On page 661, line 11, strike "each" and all that follows through line 12 and insert "fiscal year 1991, $430,000,000 for fiscal year 1992, $440,000,000 for fiscal year 1993, $450,000,000 for fiscal year 1994, and $460,000,000 for fiscal year 1995.' ".

On page 777, strike lines 4 through 11, and insert the following:

SEC. 1485. TRIBALLY CONTROLLED COMMUNITY COLLEGES.

(a) ANNUAL GRANTS.—The Secretary of Agriculture shall make annual grants to accredited tribally controlled community colleges, as defined in section 2(4) of the Tribally Controlled Community Colleges Assistance Act of 1976 (25 U.S.C. 1801(4)), in the amount of $50,000 per institution for the purpose of enabling such colleges to carry out the agriculturally-related research and higher education programs of such colleges.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary in each fiscal year to carry out the activities described in subsection (a).

On page 802, after line 24, add the following new section:

SEC. 1497. RURAL HEALTH INFRASTRUCTURE IMPROVEMENT.

(a) GRANT FOR DEMONSTRATION PROJECT.—The Secretary of Agriculture shall award a grant for the establishment of a project to demonstrate a model approach to improving rural health infrastructure. The project established with such grant shall—

(1) carry out systematic, community-based rural health needs assessments;

(2) identify and coordinate available health services resources;

(3) improve community infrastructure through health education and information and leadership development and training; and

(4) develop community generated health improvement strategies.

(b) PROJECT IMPLEMENTATION.—The project established under subsection (a) shall be implemented through the cooperation of—

(1) an academic medical center with accredited health professions schools, including schools of medicine, dentistry, public health, nursing, and allied health;

(2) the Cooperative Extension System of a land-grant university; and

(3) county-based citizens' organizations concerned with rural health services.

(c) AUTHORIZATION OF APPROPRIATIONS.—There authorized to be appropriated such sums as may be necessary in each fiscal year to carry-out subsection (a). Amounts appropriated under this subsection shall remain available until expended.

On page 861, between lines 19 and 20, insert the following new subtitle:

Subtitle E—Miscellaneous Provisions

SEC. 1571. TALLADEGA NATIONAL FOREST EXPANSION.

(a) ACQUISITION OF LAND BY SECRETARY.—

(1) IN GENERAL.—To protect and manage the timber resources and the scenic, natural, recreation and other resource values associated with certain forest lands in the State of Alabama, the Secretary of Agriculture (hereinafter in this section referred to as the "Secretary"), in cooperation with State and private entities as provided in this section, shall acquire by purchase, donation, exchange or otherwise, lands and interests lying within the boundaries depicted on maps dated December 31, 1990, and entitled "Talladega Forest Expansion", that are on file with the Chief of the Forest Service in Washington D.C.

(2) TECHNICAL ERRORS.—The Chief of the Forest Services may correct technical and clerical errors that appear on the maps referred to in paragraph (1).

(3) REFERENCE.—The lands included within the boundaries depicted on the maps described in paragraph (1) are hereinafter referred to as the "Talladega Expansion Lands."

(b) CONDITIONS.—

(1) IN GENERAL.—Acquisitions made under this section shall be commensurate with appropriated and donated funds and shall be completed by the Secretary notwithstanding any other provision or requirement of law or of any condition precedent.

(2) EXCLUSIONS.—The Secretary may exclude from an acquisition of land under this section—

(A) such rights-of-way, easements and other outstanding rights determined to be unacceptable to the Secretary; and

(B) any small or isolated parcels of land that the Secretary determines are not manageable.

(c) ADMINISTRATION OF ACQUIRED LANDS.—All lands acquired by the Secretary under this section shall be administered under the Act of March 1, 1911 (36 Stat. 961, as amended) (commonly referred to as the Weeks Act). In managing such lands the primary emphasis shall be on the sustained yield of forest products from such land consistent with the traditional uses, including hunting, hiking, public access and conservation of other resource values.

On page 924, line 19, insert "papayas," after "plums,".

On page 981, between lines 11 and 12, insert the following new subtitle:

Subtitle E—Miscellaneous Provisions

SEC. 1771. NATIONAL AGRICULTURAL PEST CONTROL INFORMATION PROGRAM.

(a) PURPOSES.—The purposes of this section are—

(1) to compile a national database on the use of chemical and nonchemical pest control methods on commercially raised crops and livestock; and

(2) to provide information from the national database to the Office of Pesticide Programs of the Environmental Protection Agency for benefit and risk assessments of pesticides.

(b) DEFINITIONS.—As used in this section:

(1) PESTICIDE.—The term "pesticide" means a pesticide as defined in section 2(u) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136(u)).

(2) PEST CONTROL INFORMATION.—The term "pest control information" means the information collected by the States under subsection (d)(1).

(3) SECRETARY.—The term "Secretary" means the Secretary of Agriculture.

(4) STATE.—The term "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, and American Samoa.

(c) NATIONAL AGRICULTURAL PEST CONTROL INFORMATION PROGRAM.—

(1) ESTABLISHMENT.—The Secretary shall establish in the Agricultural Research Service a national agricultural pest control information program.

(2) INFORMATION.—In carrying out the program established under paragraph (1), the Secretary shall—

(A) specify by regulation the type of information to be submitted, and the manner of submission, by States under subsection (d);

(B) receive, verify, coordinate, and evaluate pest control information;

(C) in conjunction with the Administrator of the National Agricultural Statistics Service, establish and maintain a database containing pest control information; and

(D) publish pest control information not later than 36 months after the date of enactment of this Act, and at the end of each 3-year period thereafter.

(3) LIAISON.—The Secretary shall establish a liaison between the Department of Agriculture and the Environmental Protection Agency on issues concerning the national agricultural pest control information program.

(4) COOPERATION.—In establishing the database and publishing pest control information under subparagraphs (C) and (D) of paragraph (2), the Secretary shall cooperate, to the maximum extent possible, with the Administrator of the Environmental Protection Agency and other users of the pest control information.

(d) PRIORITY PROGRAM.—

(1) ESTABLISHMENT.—The Secretary shall establish and maintain, within the National Agriculture Pesticide Impact Assessment Program (established in Department of Agriculture regulation 9500-2, March 7, 1983), a continuing priority program as described in paragraph (2) to compile data concerning chemical and nonchemical pest controls used in each State for each pesticide or other methods of pest control for the purpose of obtaining timely information on—

(A) crops treated;

(B) number of acres treated in a crop year;

(C) applications in a crop year;

(D) rates of application; and

(E) methods of application.

(2) DATA COLLECTION.—

(A) IN GENERAL.—Except as provided in subparagraph (B), each State shall conduct a survey to collect pest control information.

(B) EXISTING INFORMATION.—No State with a continuing program to collect pest control information shall be required to collect additional information.

(3) DATA SUBMISSION.—Not later than 30 months after the date of enactment of this Act, and at the end of each 3-year period thereafter, to be eligible to receive any Federal funds for the collection of pest control information, a State shall submit the information described in paragraph (1) to the Secretary.

(4) GRANTS.—

(A) IN GENERAL.—The Secretary may make grants to States for purposes of collecting pest control information under paragraph (1).

(B) ALLOCATION.—The Secretary shall allocate grants under this subsection among the States based on such regulations as the Secretary prescribes to carry out this subsection.

(C) REIMBURSEMENT.—The Secretary may make grants under subparagraph (A) to any State that has collected and submitted pest control information to reimburse the State for all, or any portion of, the costs incurred by the State in collecting the information.

(D) APPLICATION.—In order for a State to be eligible for a grant under subparagraph (A), the State shall submit an application to the Secretary at such time, in such manner, and containing such agreements, assurances, and information, as the Secretary determines to be necessary to carry out this subsection.

SEC. 1772. NATIONAL AGRICULTURAL CHEMICAL PLASTIC CONTAINER COLLECTION AND RECYCLING STANDARDS.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—Not later than January 1, 1993, the Administrator of the Environmental Protection Agency may, in consultation with heads of other interested Federal and State agencies, promulgate standards for national agricultural chemical plastic container collection and recycling.

(2) REQUIREMENTS.—The standards shall be designed, to the fullest extent practicable, to—

(A) provide an immediate option to the landfilling of containers;

(B) provide a safe, effective, voluntary, and workable solution to plastic container disposal;

(C) be economically and environmentally sound;

(D) be coordinated with appropriate State, county, and regional entities;

(E) promote incentives to encourage the collection or return of empty containers;

(F) encourage the participation of the private sector;

(G) not be unduly burdensome to small businesses and retail dealers;

(H) not require the submission of confidential business data from registrants for pesticide packaging prior to July 1, 1988; and

(I) not affect the authorities or requirements concerning pesticide containers established under the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.) or the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.).

(3) CONSULTATION.—The Administrator shall consult with the heads of other interested Federal agencies, State lead agencies, agricultural chemical industry groups, plastic industry groups, recycling groups, business groups, environmental groups, agricultural grower groups, and other persons to developing reasonable, practicable, and economic standards to carry out this subsection.

(b) STUDY.—

(1) IN GENERAL.—The Administrator of the Environmental Protection Agency shall conduct a study to determine the feasibility of standards for national agricultural chemical plastic container collection and recycling referred to in subsection (a).

(2) REQUIREMENTS.—In carrying out the study, the Administrator shall to the fullest extent practicable—

(A) determine the feasibility of recycling at least 40,000,000 pounds of plastic, assess the need for and potential uses of recycled plastic containers, and determine if there are any technical, scientific, and geographic barriers to recycling;

(B) recommend criteria for identifying and selecting plastic recyclers who can recycle containers;

(C) recommend criteria for container collection site selection and evaluate the utilization of existing county landfill or designated solid waste regional sites provided for in the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.) as sites for containing collection with the goal of eliminating overlapping and duplicative sites;

(D) consider procedures for the proper handling, storage, and transportation of containers to collection sites;

(E) identify and define procedures, criteria, and persons responsible for the inspection and certification of empty containers at collection sites;

(F) define procedures for the identification, separation, and preparation of empty containers in a manner that will ensure the reliability of the recycling standards;

(G) suggest a system for the transportation of collected containers, including (if appropriate) transportation from local sites (through central collection processing sites) to approved recycling operations;

(H) analyze the costs and benefits of recycling agricultural chemical plastic containers produced for the domestic market;

(I) examine methods of funding the collection and recycling of plastic containers and suggest a reasonable, practicable, effective, and efficient means of collecting monies;

(J) recommend the appropriate agency to administer a funding mechanism, including consideration of the Environmental Protection Agency, the Department of Agriculture, the Department of the Treasury, and the Internal Revenue Service;

(K) determine the nature, scope, costs, and benefits of incentives to encourage all agricultural chemical users (including commercial and private applicators, farmers,

and ranchers) to return containers to a central or county location;

(L) specify what additional information needs to be collected by the Administrator;

(M) recommend the appropriate Federal and State role in the implementation and enforcement of national collection and recycling, including consideration of—

(i) amendments to State pesticide plans to include recycling and collection standards;

(ii) necessary enforcement criteria; and

(iii) all applicable Federal laws and regulations;

(N) develop a verification process to ensure that a funding mechanism referred to in subparagraph (I) is collected to carry out collection and recycling, including consideration of the feasibility of—

(i) establishing a tamper-proof seal, hologram, indelible ink-jet code, or some other equivalent method; and

(ii) allotting redemption tickets to persons who return properly-rinsed containers;

(O) identify the effects of plastic material differences between closures and containers, and recommend solutions to any problems;

(P) conform to provisions of law and regulations promoting the safe storage and disposal of pesticides; and

(Q) coordinate Federal regulatory requirements with the Secretary of Transportation to permit appropriate use of recycled plastic into agricultural pesticide plastic containers.

(3) HIGH DENSITY POLYETHYLENE CONTAINERS.—As part of the study required under this subsection, the Administrator shall, in consultation with the heads of other interested Federal agencies, applicable State agencies, agricultural chemical industry groups, plastics industry groups, recycling groups, business groups, environmental groups, agricultural grower groups, and other persons, determine and assess the practical and economic feasibility and environmental benefits of a national agricultural plastic pesticide container collection and recycling project for high density polyethylene containers.

(4) REPORT AND RECOMMENDATIONS.—Not later than September 1, 1991, the Administrator shall submit to Congress—

(A) a report describing the results of the study required under this subsection;

(B) a legislative recommendation for implementation of standards for national agricultural chemical plastic container collection and recycling; and

(C) a legislative recommendation for implementing a funding mechanism for collecting and recycling plastics.

(5) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this subsection $1,500,000 for fiscal year 1991.

On page 1081, after line 10, add the following new subtitles:

Subtitle C—Investment of Certain Fees

SEC. 1951. PERISHABLE AGRICULTURAL COMMODITIES ACT.

Section 3(b) of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499c) is amended by striking "referred to above:" and inserting the following: "referred to above, except that any operating balances and interest earned may be invested by the Secretary of the Treasury, at the request of the Secretary of Agriculture, in public debt securities with maturities suitable to the needs of the funds, as determined by the Secretary of Agriculture, and bearing interest at rates determined by the Secretary of the Treasury, taking into consideration the current market yields on outstanding obligations of the United States of comparable maturities. All interest earned shall be credited to the fund to pay for the services provided under this Act."

SEC. 1952. TOBACCO ADJUSTMENT ACT OF 1983.

Section 213(d) of the Tobacco Adjustment Act of 1983 (7 U.S.C. 511r) is amended by adding at the end the following new sentences: "Any fees collected, late payment penalties, and interest earned shall be credited to the account referred to in this section and may be invested by the Secretary of the Treasury, at the request of the Secretary of Agriculture, in public debt securities with maturities suitable to the needs of the fund, as determined by the Secretary of Agriculture, and bearing interest at rates determined by the Secretary of Treasury, taking into consideration the current market yields on outstanding obligations of the United States of the comparable maturities. Fees and charges, including late payment penalties, and interest earned from the investment of such funds shall be credited to the account referred to in this section.".

SEC. 1953. USER FEES FOR REPORTS, PUBLICATIONS, AND SOFTWARE.

Section 1121 of the Agriculture and Food Act of 1981 (7 U.S.C. 2242a) is amended by adding at the end the following new subsection:

"(d) INVESTMENT.—Any fees collected, late payment penalties, and interest earned shall be credited to the account referred to in this section and may be invested by the Secretary of the Treasury at the request of the Secretary of Agriculture, in public debt securities with maturities suitable to the needs of the fund, as determined by the Secretary of Agriculture, and bearing interest at rates determined by the Secretary of Treasury, taking into consideration the current market yields on outstanding obligations of the United States of the comparable maturities. Fees and charges, including late payment penalties and interest earned from the investment of such funds shall be credited to the account that incurs such costs.".

Subtitle D—Nutrition

SEC. 1955. COMMERCIAL WAREHOUSING AND DISTRIBUTION.

Section 3(d) of the Commodity Distribution Reform Act and WIC Amendments of 1987 (Public Law 100-237; 7 U.S.C. 612c note) is amended—

(1) by striking "Before the expiration of the 270-day period beginning on the date of the enactment of this Act, the" and inserting "The"; and

(2) by striking paragraphs (1), (2) and (3) and inserting the following new paragraphs:

"(1) evaluate its system for warehousing and distributing donated commodities to recipient agencies designated in section 13(3)(A) (hereinafter in this Act referred to as 'child nutrition program recipient agencies');

"(2) in the case of State distribution agencies that require payment of fees by child nutrition program recipient agencies for any aspect of warehousing or distribution, implement the warehousing and distribution system that provides donated commodities to child nutrition program recipient agencies in the most efficient manner, at the lowest cost to those recipient agencies, and at a level that is not less than the basic level of services determined by the Secretary;

"(3) in determining the most efficient and lowest cost system, consider the use of commercial facilities for providing warehousing and distribution services and both the direct and indirect costs of the child nutrition program recipient agencies;".

SEC. 1956. COMMODITY ACCEPTABILITY INFORMATION.

Section 3(f)(2) of the Commodity Distribution Reform Act and WIC Amendments of 1987 (Public Law 100-237; 7 U.S.C. 612c note) is amended by striking "semiannually" and inserting "annually".

Subtitle E—Miscellaneous

SEC. 1961. CONFIDENTIALITY OF INFORMATION

Section 1770 of the Food Security Act of 1985 (7 U.S.C. 2276) is amended—

(1) in subsection (a)(1)—

(A) by inserting "in a manner such that the data supplied by any particular respondent is not discernable and" after "aggregate data"; and

(B) by striking "person" and inserting "respondent";

(2) in subsection (a)(2)—

(A) by inserting "the data supplied by any particular respondent or" after "identification of"; and

(B) by striking "person" and inserting "respondent";

(3) in subsection (b)(2)(B), by striking "person" and inserting "respondent";

(4) in subsection (c), by striking "section (a)" and inserting "subsection (a)"; and

(5) by adding at the end the following new subsections:

"(e) For purposes of this section, the term 'respondent' means any—

"(1) individual;

"(2) corporation, partnership, or other business establishment;

"(3) group or association;

"(4) State or local agency or instrumentality; and

"(5) any other entity that provided information to the Department of Agriculture pursuant to a provision of law referred to in subsection (d) of this section.

"(f) Nothing in this section will affect the availability of such information under State or local law.".

SEC. 1962. RECORDKEEPING AND SERVICE CENTER IMPROVEMENT.

(a) PURPOSE.—The Secretary of Agriculture shall establish and implement a program that is designed to minimize the amount of paperwork, and the time needed to complete such paperwork, required of producers that participate in programs administered by the Secretary of Agriculture.

(b) REPORT.—Not later than 240 days after the date of enactment of this Act, the Secretary of Agriculture shall prepare and submit, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate, a report that contains specific proposals for—

(1) reducing and simplifying the recordkeeping and other paperwork required of agricultural producers and cooperatives (hereinafter referred to in this section as "producers") who apply for participation in, or attempt to comply with the requirements of—

(A) Federal agricultural price and income support programs administered by the Secretary of Agriculture, including programs under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.);

(B) Voluntary or mandatory soil or water conservation programs administered by the Secretary of Agriculture, including programs under title XII of the Food Security Act of 1985 (16 U.S.C. 3801 et seq.); and

(C) other agriculturally related programs administered by the Secretary of Agriculture and related agency heads; and

(2) consolidating and relocating county offices of various agencies and operations of the Department of Agriculture to provide for more convenient and efficient public access to, and the more efficient use of, publicly owned or leased property; and

(3) statutory changes that are required to reduce paperwork burdens on producers.

(c) EVALUATION.—

(1) IN GENERAL.—In preparing the report required under subsection (b), the Secretary of Agriculture shall undertake a thorough examination of the feasibility of reducing paperwork and recordkeeping requirements imposed on agricultural producers by the Department of Agriculture by permitting such producers to have access to an existing subsequently developed computer network or system with the capability to—

(A) receive electronic transmissions, from computer terminals on farms or other remote locations, of all or a portion of any information required to be provided by such producers;

(B) provide any such producer with updated electronic information and data pertinent to the agricultural operation and marketing of such producer; and

(C) provide producers with information-sharing through audio conferencing.

(2) COMPUTER FEES AND USER CATEGORIES.—

(A) COMPUTER FEES.—In determining the feasibility and costs of providing a computer network or system as described in paragraph (1), the Secretary of Agriculture may consider the imposition of a nominal user fee on producers and others who desire to have access to and the use of such a network or system. The amount of such fee should be sufficient to partially or entirely defray the costs (after considering any savings to the Department of Agriculture) associated with the operation, maintenance, and future expansion of such network or system attributable to producer use thereof, but shall not include any reimbursement for existing equipment or equipment capability or for any costs associated with the initial establishment of such network or system.

(B) USER CATEGORIES.—In determining an appropriate amount to be imposed as a user fee under subparagraph (A), the Secretary of Agriculture shall examine additional categories of users who may be permitted access to the computer network or system, and examine safeguards that would be reasonably necessary to limit file access consistent with the provisions of the Privacy Act of 1974 (5 U.S.C. 552a et seq.) and any other relevant statutory or regulatory provisions governing disclosure of individuals or proprietary information.

(3) RECOMMENDATIONS.—In the report required under subsection (b), the Secretary of Agriculture shall include a detailed summary of the examination conducted under this section and recommendations regarding the feasibility of providing producers and other users with access to such computer network or system, and the appropriate amount of user fees that shall be imposed for such access and use, if any, and the categories of users who should be granted access to such network or system.

(d) IMPLEMENTATION.—

(1) IN GENERAL.—To the extent practicable, the Secretary of Agriculture shall take steps necessary to implement the recommendations contained in the report required under subsection (b).

(2) REPORT.—Not later than 180 days after the submission of the report required under subsection (b), the Secretary shall prepare and submit, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate, a report that describes the steps taken to implement the recommendations contained in the report required under subsection (b).

SEC. 1963. WINE AND WINE GRAPE INDUSTRY STUDY.

(a) STUDY.—The Secretary of Agriculture shall conduct a study to determine the most effective manner in which the Department of Agriculture may work with and support the United States wine and wine grape industry. Such study shall—

(1) be designed to determine whether existing Department of Agriculture programs could be improved to more effectively assist and support the United States wine and wine grape industry;

(2) be designed to determine whether new methods or programs implemented by the Department of Agriculture could enhance wine and wine grape production and processing and expand markets for United States wine and wine grapes; and

(3) be conducted in consultation with local, State, and national associations or organizations of the United States wine and wine grape industry.

(b) REPORT.—Not later than December 31, 1991, the Secretary of Agriculture shall prepare and submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate, a report that contains a description of the determinations made in the study conducted under subsection (a). Such report shall also include any recommendations for legislation that the Secretary determines may be necessary to implement the programs or methods described in subsection (a).

SEC. 1964. GRAIN-BASED ALCOHOL FUELS RESEARCH.

(a) ESTABLISHMENT.—The Secretary of Agriculture, in consultation with the Secretary of Energy, shall establish an alcohol fuels research program to determine the methods for, and the economic advantages of, utilizing offgrade grain in the production of clean fuels from renewable resources.

(b) PRIORITY RESEARCH.—The primary objective of the program established under subsection (a) shall be to encourage alcohol fuels research concerning grain and other agricultural crops and waste materials that would—

(1) convert cellulose and hemicellulose into sugars;

(2) convert 5- and 6-carbon sugars into ethanol;

(3) convert off-grade grains into ethanol, especially its derivative, ethyl tertiary butyl ether;

(4) utilize membranes to separate ethanol from process streams rather than using fossil fuel energy;

(5) improve the quality and value of by-products to increase digestibility and performance of livestock, poultry, and fish; and

(6) develop new markets for such byproducts.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $20,000,000 for each of the fiscal years 1991 through 1995 to carry out the program established under subsection (a).

REID AMENDMENT NO. 2305

Mr. REID proposed an amendment to the bill S. 2830, supra, as follows:

At the end of the bill, add the following new section:

SEC. . It is the sense of the Senate that Federal nutrition programs are important elements of our national food and agricultural policy. It is further the sense of the Senate that when legislation reauthorizing Federal nutrition program is considered in the Senate, such programs should be authorized at levels that will meet recognized national needs.

REID (AND OTHERS) AMENDMENT NO. 2306

Mr. REID (for himself, Mr. RUDMAN, Mr. CHAFEE, Mr. BRYAN, Mr. BRADLEY, Mr. PELL, Mr. KERRY, and Mr. LAUTENBERG) proposed an amendment to amendment No. 2305 proposed by him to the bill S. 2830, supra, as follows:

At the end of the amendment, add the following new section:

SEC. . MEANS TEST FOR AGRICULTURAL PAYMENTS.

The Food Security Act of 1985 is amended by inserting after section 1001C (7 U.S.C. 1308-3) the following new section:

"SEC. 1001D. MEANS TEST FOR AGRICULTURAL PAYMENTS.

"Notwithstanding any other provision of law, a person (as defined in section 1001(5)(B)(i) shall be ineligible to receive payments under any of the annual programs established for a commodity under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) (other than disaster payments or payments received under conservation reserve programs established under subtitle D of title XII of the Food Security Act of 1985 (16 U.S.C. 3831 et seq.) and as amended by subsequent legislation) for a crop year if the average amount of gross sales of agricultural commodities by the person during the 5 previous crop years is in excess of $500,000 per year.".

PRESSLER AMENDMENT NO. 2307

Mr. PRESSLER proposed an amendment to the bill S. 2830, supra, as follows:

At the end of title XII insert the following new section:

SEC. . REPORT CONCERNING AN INTERNATIONAL AGRICULTURAL CONSERVATION RESERVE.

(a) FINDINGS.—The Congress makes the following findings:

(1) Approximately one-fifth of the world's cropland is experiencing an intolerable rate of soil erosion;

(2) The cost of farm program subsidies is at record levels in many nations;

(3) The United States has taken the initiative of enrolling nearly 34 million acres of agricultural land in a ten-year Conservation Reserve Program;

(4) World food production historically has increased at an annual rate of 2.5 percent, but world food production during the 1980's has increased at an average rate of over 3 percent annually;

(5) All nations would benefit from the decreased agricultural subsidies and stabilized food production an international agricultural conservation reserve could provide.

(b) REPORT TO CONGRESS.—

(1) Not later than one year after the date of the enactment of this Act, the Secretary of Agriculture shall, in consultation with other federal agencies, prepare and submit a

report to the Congress on the feasibility of negotiating an international agreement or treaty to establish an international agricultural conservation reserve to protect fragile agricultural soils.

(2) The report shall examine the potential for the establishment of an international agricultural conservation reserve under which:

(a) All signatory nations would agree not to subsidize farmers who bring highly erodible virgin land into crop production.

(b) All signatory nations would agree to return a certain percentage of highly erodible cropland to its natural state and keep it out of production for a minimum of 10 years and implement sound conservation practices on such land to control soil erosion.

(c) Provisions would be established to allow a portion of the land placed by signatory nations into the reserve to be returned to production if stocks fell below those levels needed to maintain adequate commodity and food supplies.

KOHL AMENDMENT NO. 2308

(Ordered to lie on the table.)

Mr. KOHL submitted an amendment intended to be proposed by him to the bill S. 2830, supra, as follows:

On page 33, between lines 19 and 20, insert the following new section:

"SEC. 117.

"Not later than January 1, 1992, the Secretary of Agriculture shall—

"(1) conclude the national hearings announced by the Secretary on March 29, 1990, regarding changes in the pricing provisions of Federal milk marketing orders issued under section 8(c) of the Agricultural Adjustment Act (7 U.S.C. 608(c)), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, in order to effect any changes in the Federal orders setting minimum prices that milk processors must pay for Grade A milk received from producers; and

"(2) implement the changes referred to in paragraph (1).".

MURKOWSKI AMENDMENT NO. 2309

Mr. MURKOWSKI proposed an amendment to the bill S. 2830, supra, as follows:

Insert at the appropriate place title XIX in the section entitled "Collection of Fees for Inspections Services."

SEC. . ADDITIONAL INSPECTION SERVICES.

(a) AGREEMENTS.—The Secretary of Agriculture, in carrying out regulations prohibiting or restricting the entry of materials that may harbor pests, or diseases, is authorized to enter into agreements with operators or owners of vessels for the purpose of providing inspection services at ocean ports of entry in the United States in addition to the regular or on-call basis currently available in connection with such ships. Any such agreement shall provide for the payment by the operator or owner of an amount determined by the Secretary to be necessary to defray the costs of providing additional service pursuant to such agreement.

DOMENICI AMENDMENT NO. 2310

Mr. DOMENICI proposed an amendment to the bill S. 2830, supra, as follows:

On page 929, between lines 18 and 19, insert the following new section:

SEC. 1730. CHECKOFF PROGRAM FOR WOOL.

Section 708 of the National Wool Act of 1954 (7 U.S.C. 1787) is amended by striking out "two thirds" each place that such appears and inserting in lieu thereof "a majority".

GRASSLEY AMENDMENT NO. 2311

Mr. GRASSLEY proposed an amendment to the bill S. 2830, supra, as follows:

Strike out paragraph (5) of section 1617(a) and insert in lieu thereof the following new paragraph:

"(5) use any packaging materials, storage containers or bins that contain fungicides, preservatives, or fumigants;".

FEDERAL COMMUNICATIONS COMMISSION REAUTHORIZATION ACT

INOUYE AMENDMENT NO. 2312

Mr. CRANSTON (for Mr. INOUYE) proposed an amendment to the bill (S. 1022) to amend the Communications Act of 1934 to provide authorization of appropriations for the Federal Communications Commission, and for other purposes, as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Federal Communications Commission Authorization Act of 1990".

AUTHORIZATION OF APPROPRIATIONS

SEC. 2. (a) Section 6 of the Communications Act of 1934 (47 U.S.C. 156) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 6. (a) There are authorized to be appropriated for the administration of this Act by the Commission $109,831,000 for fiscal year 1990 and $119,831,000 for fiscal year 1991, together with such sums as may be necessary for increases resulting from adjustments in salary, pay, retirement, other employee benefits required by law, and other nondiscretionary costs, for each of the fiscal years 1990 and 1991.

"(b) In addition to the amounts authorized to be appropriated under the section, not more than 4 percent of the amount of any fees or other charges payable to the United States which are collected by the Commission during fiscal year 1990 are authorized to be made available to the Commission until expended to defray the fully distributed costs of such fees collection.

"(c) Of the amounts appropriated pursuant to subsection (a) for fiscal year 1991, such sums as may be necessary not to exceed $2,000,000 shall be expended for upgrading and modernizing equipment at the Commission's electronic emissions test laboratory located in Laurel, Maryland.".

COMMERCIAL RADIO OPERATOR EXAMINATIONS

SEC. 3. Section 4(f) of the Communications Act of 1934 (47 U.S.C. 154(f)) is amended by adding at the end the following new paragraph:

"(5)(A) The Commission, for purposes of preparing and administering any examination for a commercial radio operator license or endorsement, may accept and employ the services of persons that the Commission determines to be qualified. Any person so employed may not receive compensation for such services, but may recover from examinees such fees as the Commission permits, considering such factors as public service and cost estimates submitted by such person.

"(B) The Commission may prescribe regulations to select, oversee, sanction, and dismiss any person authorized under this paragraph to be employed by the Commission.

"(C) Any person who provides services under this paragraph or who provides goods in connection with such services shall not, by reason of having provided such service or goods, be considered a Federal or special government employee.".

TRAVEL REIMBURSEMENT PROGRAM

SEC. 4. Section 4(g)(2)(D) of the Communications Act of 1934 (47 U.S.C. 154(g)(2)(D)) is amended by striking "1989" and inserting in lieu thereof "1992".

COMMUNICATIONS SUPPORT FROM OLDER AMERICANS

SEC. 5. Section 6(a) of the Federal Communications Commission Authorization Act of 1988 (47 U.S.C. 154 note) is amended by striking "and 1989" and inserting in lieu thereof ", 1989, 1990, and 1991".

HAWAII MONITORING STATION

SEC. 6. (a) Section 9(a) of the Federal Communications Commission Authorization Act of 1988 (Public Law 100-594; 102 Stat. 3024) is amended—

(1) by striking "and 1990" and inserting in lieu thereof ", 1990, 1991, and 1992";

(2) in paragraph (4) by striking "a facility at the new location" and inserting in lieu thereof "facilities at new locations"; and

(3) in paragraph (6) by striking "a facility at a new location" and inserting in lieu thereof "facilities at new locations".

(b) Subsection (b) of section 9 of the Federal Communications Commission Authorization Act of 1988 (Public Law 100-594; 102 Stat. 3024) is amended to read as follows:

"(b) The Administrator of General Services is authorized to dispose of, only to the State of Hawaii, as much of the real property (including improvements thereon) at the present location of the Hawaii Monitoring Station as is necessary for the purposes of relocating, at a minimum, the antennas associated with the Monitoring Station.".

(c) Section 9 of the Federal Communications Commission Authorization Act of 1988 (Public Law 100-594; 102 Stat. 3024) is amended by striking subsections (c) and (d), by redesignating subsection (e) as subsection (i), and by inserting immediately after subsection (b) the following new subsections:

"(c) Pursuant to the authority provided in subsection (b), the Administrator of General Services shall sell and convey to the State of Hawaii the real property and improvements thereon described in subsection (b) on an expedited basis, including provisions for lease-back as required.

"(d) In consideration of such sale, the State of Hawaii shall agree to—

"(1) pay to the General Services Administration an amount not less than the fair market value, as determined by the Administrator of General Services, of the property to be conveyed under subsection (c), or

"(2) convey to the Federal Communications Commission real property that would be suitable, as determined by the Commission, for the relocation of the Hawaii Monitoring Station and, in addition, pay to the General Services Administration an amount

equal to the difference between the fair market value of the two properties, as determined by the Administrator of General Services, if the Federal property conveyed is of greater value.

"(e) The General Services Administration shall reimburse the Federal Communications Commission from the net proceeds of such sale for all of the expenditures of the Commission associated with the relocation of the Hawaii Monitoring Station. Any such reimbursed funds received by the Commission shall remain available until expended.

"(f) The net proceeds of such sale, less any funds reimbursed to the Federal Communications Commission pursuant to subsection (e), and less normal and reasonable charges by the General Services Administration for costs associated with such sale, shall be deposited in the general funds of the Treasury.

"(g) If the General Services Administration and the State of Hawaii are unable to execute a contract for sale as required by this section or complete any other transaction necessary to carry out such sale, the Administrator of General Services shall not proceed to public sale of the property described in subsection (b).

"(h) The Hawaii Monitoring Station shall continue its full operations at its present location until new facilities have been built and are fully operational.".

(d) Subsection (i) of section 9 of the Federal Communications Commission Authorization Act of 1988 (Public Law 100-594; 102 Stat. 3024), as so redesignated by subsection (c) of this section, is amended by striking ", in fiscal years 1989 and 1990".

TARIFF NOTICE PERIOD

SEC. 7. (a) Section 203(b)(1) of the Communications Act of 1934 (47 U.S.C. 203(b)(1) is amended by striking "ninety days notice" and inserting in lieu thereof "one hundred and twenty days' notice".

(b) Section 203(b)(2) of the Communications Act of 1934 (47 U.S.C. 203(b)(2)) is amended by striking "ninety days" and inserting in lieu thereof "one hundred and twenty days".

AMATEUR RADIO SERVICE RECIPROCAL PERMITS

SEC. 8. (a) Section 303(*l*)(3) of the Communications Act of 1934 (47 U.S.C 303(*l*)(3) is amended by striking "bilateral agreement between the United States and the alien's government" and inserting in lieu thereof "multilateral or bilateral agreement, to which the United States and the alien's government are parties,".

(b) Section 301(c) of the Communications Act of 1934 (47 U.S.C. 310(c)) is amended by striking "bilateral agreement between the United States and the alien's government" and inserting in lieu thereof "Multilateral or bilateral agreement, to which the United States and the alien's government are parties,".

WILLFUL OR MALICIOUS INTERFERENCE

SEC. 9. Part I of title III of the Communications Act of 1934 (47 U.S.C. 301 et seq.) is amended by adding at the end the following new section:

"WILLFUL OR MALICIOUS INTERFERENCE

"SEC. 333. No person shall willfully or maliciously interfere with or cause interference to any radio communications of any station licensed or authorized by or under this Act or operated by the United States Government.".

APPLICABILITY OF FORFEITURES TO APPLICANTS

SEC. 10. The first sentence of section 503(b)(5) of the Communications Act of 1934 (47 U.S.C. 503(b)(5)) is amended by inserting "and if such person is not an applicant for a license, permit, certificate, or other authorization issued by the Commission," immediately before "unless, prior".

CHILDREN'S TELEVISION ACT

WIRTH (AND OTHERS) AMENDMENT NO. 2313

Mr. CRANSTON (for Mr. WIRTH) (for himself, Mr. INOUYE, Mr. HOLLINGS, Mr. METZENBAUM, Mr. LAUTENBERG, and Mr. BURNS) proposed an amendment to the bill (S. 1992) to require the Federal Communications Commission to ensure that broadcasters provide children's television programming that meets the educational and informational needs of the child audience, and for other purposes; as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Children's Television Act of 1990".

TITLE I—REGULATION OF CHILDREN'S TELEVISION

FINDINGS

SEC. 101. The Congress finds that—

(1) it has been clearly demonstrated that television can assist children to learn important information, skills, values, and behavior while entertaining them and exciting their curiosity to learn about the world around them;

(2) as part of their obligation to serve the public interest, television station operators and licensees should provide programming that serves the special needs of children;

(3) the financial support of advertisers assists in the provision of programming to children;

(4) special safeguards are appropriate to protect children from over commercialization on television;

(5) television station operators and licensees should follow practices in connection with children's television programming and advertising that take into consideration the characteristics of this child audience; and

(6) it is therefore necessary that the Federal Communications Commission (hereinafter referred to as the "Commission") take the actions required by this title.

STANDARDS FOR CHILDREN'S TELEVISION PROGRAMMING

SEC. 102. (a) The Commission shall, within 30 days after the date of enactment of this Act, initiate a rulemaking proceeding to prescribe standards applicable to commercial television broadcast licensees with respect to the time devoted to commercial matter in conjunction with children's television programming. The Commission shall, within 180 days after the date of enactment of this Act, complete the rulemaking proceeding and prescribe final standards that meet the requirements of subsection (b).

(b) Except as provided in subsection (c), the standards prescribed under subsection (a) shall include the requirement that each commercial television broadcast licensee shall limit the duration of advertising in children's television programming to not more than 10.5 minutes per hour on weekends and not more than 12 minutes per hour on weekdays.

(c) After January 1, 1993, the Commission—

(1) may review and evaluate the advertising duration limitations required by subsection (b); and

(2) may, after notice and public comment and a demonstration of the need for modification of such limitations, modify such limitations in accordance with the public interest.

(d) As used in this section, the term "commercial television broadcast licensee" includes a cable operator, as defined in section 602 of the Communications Act of 1934 (47 U.S.C. 522).

CONSIDERATION OF CHILDREN'S TELEVISION SERVICE IN BROADCAST LICENSE RENEWAL

SEC. 103. (a) After the standards required by section 102 are in effect, the Commission shall, in its review of any application for renewal of a television broadcast license, consider the extent to which the licensee—

(1) has complied with such standards; and

(2) has served the educational and informational needs of children through the licensee's overall programming, including programming specifically designed to serve such needs.

(b) In addition to consideration of the licensee's programming as required under subsection (a), the Commission may consider—

(1) any special nonbroadcast efforts by the licensee which enhance the educational and informational value of such programming to children; and

(2) any special efforts by the licensee to produce or support programming broadcast by another station in the licensee's marketplace which is specifically designed to serve the educational and informational needs of children.

PROGRAM LENGTH COMMERCIAL MATTER

SEC. 104. Within 180 days after the date of enactment of this Act, the Commission shall complete the proceeding known as "Revision of Programming and Commercialization Policies, Ascertainment Requirements and Program Log Requirements for Commercial Television Stations", MM Docket No. 83-670.

TITLE II—ENDOWMENT FOR CHILDREN'S EDUCATIONAL TELEVISION

SHORT TITLE

SEC. 201. This title may be cited as the "National Endowment for Children's Educational Television Act of 1990".

FINDINGS

SEC. 202. The Congress finds that—

(1) children in the United States are lagging behind those in other countries in fundamental intellectual skills, including reading, writing, mathematics, science, and geography;

(2) these fundamental skills are essential for the future governmental and industrial leadership of the United States;

(3) the United States must act now to greatly improve the education of its children;

(4) television is watched by children about three hours each day on average and can be effective in teaching children;

(5) educational television programming for children is aired too infrequently either because public broadcast licensees and permittees lack funds or because commercial broadcast licensees and permittees or cable television system operators do not have the economic incentive; and

(6) the Federal Government can assist in the creation of children's educational televi-

sion by establishing a National Endowment for Children's Educational Television to supplement the children's educational programming funded by other governmental entities.

SEC. 203. (a) Part IV of title III of the Communications Act of 1934 (47 U.S.C. 390 et seq.) is amended—

(1) by redesignating section 394 as section 393A;

(2) by redesignating subparts B, C, and D as subparts C, D, and E, respectively; and

(3) by inserting immediately after section 393A, as so redesignated, the following new subpart:

"SUBPART B—NATIONAL ENDOWMENT FOR CHILDREN'S EDUCATIONAL TELEVISION

"ESTABLISHMENT OF NATIONAL ENDOWMENT

"SEC. 394. (a) It is the purpose of this section to enhance the education of children through the creation and production of television programming specifically directed toward the development of fundamental intellectual skills.

"(b) There is established, under the direction of the Secretary, a National Endowment for Children's Educational Television. In administering the National Endowment, the Secretary is authorized to make grants to persons proposing to create and produce educational television programming for children. The Secretary shall consult with the Advisory Council on Children's Educational Television in the making of the grants. The grants shall be made on the condition that the programming shall—

"(1) during the first two years after its production, be made available only to public television licensees and permittees and noncommercial television licensees and permittees; and

"(2) thereafter be made available to any commercial television licensee or permittee or cable television system operator, at a charge established by the Secretary that will assure the maximum practicable distribution of such programming, so long as such licensee, permittee, or operator does not interrupt the programming with commercial advertisements.

The Secretary may, consistent with the purpose and provisions of this section, permit the programming to be distributed to persons using other media, establish conditions relating to such distribution, and apply those conditions to any grant. The Secretary may waive the requirements of paragraph (1) of this subsection if the Secretary finds that neither public television licensees and permittees nor noncommercial television licensees and permittees will have an opportunity to air such programming in the first two years after its production.

"(c)(1) The Secretary, with the advice of the Advisory Council on Childen's Educational Television, shall establish criteria for making grants under this section. Such criteria shall be consistent with the purpose and provisions of this section and shall be made available to interested parties upon request.

"(2) Applications for grants under this section shall be submitted to the Secretary in such form and containing such information as the Secretary shall require by regulation.

"(d) Upon approving any application under this section, the Secretary shall make a grant to the applicant in an amount determined by the Secretary, except that such amounts shall not exceed 75 percent of the amount determined by the Secretary to be the reasonable and necessary cost of the project for which the grant is made.

"(e)(1) The Secretary shall establish an Advisory Council on Children's Educational Television. The Secretary shall appoint ten individuals as members of the Advisory Council and designate one of such members to serve as Chairman.

"(2) Members of the Advisory Council shall have terms of two years, and no member shall serve for more than three consecutive terms. The members shall have expertise in the fields of education, psychology, child development, or television programming, or related disciplines. Officers and employees of the United States shall not be appointed as members.

"(3) While away from their homes or regular places of business in the performance of duties for the Advisory Council, the members of the Advisory Council shall serve without compensation but shall be allowed travel expenses, including per diem in lieu of subsistence, in accordance with 5703 of title 5, United States Code.

"(4) The Advisory Council shall meet at the call of the Chairman and shall advise the Secretary concerning the making of grants under this section.

"(f)(1) Each recipient of a grant under this section shall keep such records as may be reasonably necessary to enable the Secretary to carry out the Secretary's functions under this section, including records which fully disclose the amount and the disposition by such recipient of the proceeds of such grant, the total cost of the project, the amount and nature of that portion of the cost of the project supplied by other sources, and such other records as will facilitate an effective audit.

"(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purposes of audit and examination to any books, documents, papers, and records of the recipient that are pertinent to a grant received under this section.

"(g) The Secretary is authorized to make such rules and regulations as may be necessary to carry out this section, including those relating to the order of priority in approving applications for projects under this section or to determining the amounts of grants for such projects.

"(h) There are authorized to be appropriated $10,000,000 for fiscal year 1991 for the Secretary to carry out the provisions of this section. Sums appropriated under this subsection for any fiscal year shall remain available for payment of grants for projects for which applications approved under this section have been submitted within one year after the last day of such fiscal year.

"(i) For purposes of this section—

"(1) the term 'educational television programmming for children' means any television program which is directed to an audience of children who are 16 years of age or younger and which is designed for the intellectual development of those children, except that such term does not include any television program which is directed to a general audience but which might also be viewed by a significant number of children; and

"(2) the term 'person' means an individual, partnership, association, joint stock company, trust, corporation, or State or local governmental entity.".

(b) Section 397 of the Communications Act of 1934 (47 U.S.C. 397) is amended—

(1) in paragraph (2) by striking "subpart C" and inserting in lieu thereof "subpart D"; and

(2) in paragraph (15)—

(A) by inserting "and subpart B" immediately after "subpart A"; and

(B) by striking "subpart B, subpart C" and inserting in lieu thereof "subpart C, subpart D".

NOTICES OF HEARINGS

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

Mr. FORD. Mr. President, I would like to announce for the Senate and the public that a hearing before the Subcommittee on Energy Research and Development has been rescheduled.

The purpose of the hearing is to receive testimony on the current operations and future mission of the Department of Energy's national laboratories.

The hearing, originally scheduled to take place on Thursday, July 26, 1990, at 9:30 a.m., will take place on Wednesday, July 25, 1990, at 9:45 a.m. in room SD–366 of the Senate Dirksen Office Building in Washington, DC.

Those wishing to provide written testimony for the printed hearing record should send it to the Subcommittee on Energy Research and Development, U.S. Senate, Washington, DC 20510, Attn: Mary Louise Wagner.

For further information, please contact Mary Louise Wagner at (202) 224–7569.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON GOVERNMENT AFFAIRS

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Thursday, July 19, at 9:30 a.m. for a hearing on the subject: Oversight and reauthorization of McKinney Act programs.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on July 19, 1990, at 10 a.m. on the Federal collection of information on foreign investment in the United States.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Thursday, July 19, 1990, at 10 a.m. to conduct a hearing on modernizing the regulation of financial services.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Thursday, July 19, 1990 at 2 p.m. to conduct hearings on S. 2827, legislation to limit liability of financial institutions and bank regulatory agencies for nonculpable liabilities and consideration of other environmental risks to lenders.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. CRANSTON. Mr. President, I ask unanimous consent that the full committee of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate, 9:30 a.m. Thursday, July 19, 1990, for a hearing to receive testimony from Presidential nominees Calvin A. Kent to be Administrator of the Energy Information Administration; Paul L. Ziemer to be Assistant Secretary of Energy for Environment, Safety and Health; and David H. Leroy to be nuclear waste negotiator.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Thursday, July 19, at 1:30 p.m., for a hearing on work force preparedness.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, July 19, 1990, at 2 p.m. to hold a closed hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet on July 19, 1990, beginning at 2 p.m., in 485 Russell Senate Office Building, on S. 2645, the Urban Indian Health Equity Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on July 19, 1990, at 2 p.m., to hold a hearing on the nomination of Michael Boudin, to be U.S. district judge for the District of Columbia, Carol Bagley Amon, to be U.S. district judge for the Eastern District of New York, Charles W. Pickering, Sr., to be U.S. district judge for the Southern District of Mississsippi, and William M. Skreyny, to be U.S. district judge for the Western District of New York.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON IMMIGRATION AND REFUGEE AFFAIRS

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Subcommittee on Immigration and Refugee Affairs, of the Committee of the Judiciary, be authorized to meet during the session of the Senate on July 19, 1990, at 11:45 a.m., to hold a markup on S. 1629, a bill to establish clearly a Federal right of action by aliens and U.S. citizens against persons engaging in torture or extrajudicial killings, and for other purposes; S. 953, a bill to amend the Immigration and Nationality Act to revise the grounds of exclusion for admission into the United States; S. 1263, a bill to treat Hong Kong as a separate foreign state for purposes of applying the numerical limitations on immigration; and H.R. 639, a bill to amend the Immigration and Nationality Act to provide for special immigrant status for certain aliens who have served honorably in the Armed Forces of the United States for 4 years.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

RUNNING THE BASES WITH FAY VINCENT: A BASEBALL COMMISSIONER FOR THE NINETIES

● Mr. WIRTH. Mr. President, all of us enjoy a rousing game of baseball. There's no substitute for the crack of a bat, the thrill of a high fly to left, or the call of the ump: "Play ball." Baseball is truly the national sport and a proud part of our American heritage.

The man who reigns over the baseball kindgom is a soft-spoken, but determined baseball fan, Fay Vincent. I have had the pleasure of getting to know Fay well over the last 2 years or so, first while he served as deputy to the late baseball commissioner, Bart Giamatti, and more recently, as he serves in that capacity himself. As chairman of the Senate Task Force on Expansion of Major League Baseball, I have had the opportunity to work closely with Fay and always found him approachable, a good listener, and a hard—but fair—negotiator.

Recently, the Washington Post wrote a delightful article on Fay that I believe catches many of the facets of this good man's character. For those of my colleagues who may have missed it, I ask that it be reprinted in the RECORD.

The article follows:

[From the Washington Post, July 10, 1990]

UP TO BAT FOR BASEBALL—COMMISSIONER FAY VINCENT'S FIELD OF DREAMS

(By Paul Hendrickson)

BOSTON.—The apparent contradictions of an ungainly man, who finds it difficult just to walk, presiding over an enterprise, a pastime, that offers such displays of godlike physical grace. "Yes, I've thought of that," Francis T. Vincent Jr. says, savoring the irony. "And maybe that's some of the reason they seem to like me."

He's in a little white golf cart and he's moving on the rim of the infield. His yellow cane is propped between his legs. One shoelace is untied. The contest is about 90 minutes off and early evening New England land light, a painter's light, is splashing across the playing surface of Fenway Park. Somewhere inside, concessionaires are boiling thousands of Fenway Franks, wrapping soggy tasty buns in little wedges of tinfoil for the night's vending onslaught.

But down here, on the edge of this napkin of immaculate clipped green, Beantown autograph hounds are leaning in for a signature. They're handing over ticket stubs, game programs, new balls, their grade school catchers' mitts. The commissioner of baseball—such a lovely and sonorous title—is signing them all, whatever they got, is signing in his small, neat hand his Irish American and almost girlish-sounding name, "Fay Vincent."

All the while he keeps up the steady patter, the expert pepper.

"Hiya, commish."

"Hi yourself."

"So whaddaya think of Fenway, Fay?"

"What do I think? I think Fenway's one of the cathedrals of the game."

"You been to Chicago yet, Mr. Commissioner?"

"I'll be there at the All-Star Game on the 10th."

"Fay, who makes the rules?

"Depends on the rules."

"How 'bout that Canseco's 23 million?"

"He did okay, wouldn't you'd say?"

"So you gonna punish ol' Steinbrenner and make him sell his Yankees, Mr. Vincent?"

"You're not trying to rush our investigation, are you? You want me to be fair in this thing."

(Mystified little kid loudly at the rail to his baseball mom:) "Mommy, who is this man?"

(Mom in a stage-whisper answer, her pan as dead as dishwater:) "Herbie, that's the guy who never has to sit behind a pole."

He's been in the job 10 months, and he hasn't sat behind a pole yet—nor will he in tonight's 61st All-Star Game at Wrigley Field. It wouldn't be wholly accurate to call him giddy over his good fortune, but on the other hand he says, "The wonderful thing is I finally got it lined up this time, avocation and vocation."

If initially the eighth czar in the game's history was perceived by some to be a drab business type following the late lamenated Renaissance scholar, what Fay Vincent has been steadily proving ever since is that first impressions are often wrong, and sometimes the No. 2 guy turns out to be the biggest surprise of all.

"It's more visible than I ever would have imagined, it's more fun than I ever would have imagined," he says, sounding like somebody in Booth Tarkington. That would be one level of truth about him, the seeming

boyish Booth Tarkington guilelessness. There are other levels.

The circumstances by which Fay Vincent became commissioner of baseball was the sudden death last Sept. 1 of his great good friend, A. Bartlett Giamatti. Vincent was Bart Giamatti's deputy, a post that Giamatti had specially created for Vincent, who'd come into baseball after a career in law and the corporate world. But relatively few outside those spheres knew him. Baseball certainly hadn't heard of him. In retrospect it almost seems as if Fay Vincent was Bart Giamatti's great secret, one he was going to empower much sooner than anybody dreamed.

If Vincent was a great secret, Bart Giamatti was a celebrity in America, a bearish little orator who subscribed to Variety and wore a Vandyke and had degrees in comparative literature and possessed the soul of a natural hambone. He brought both intellectuality and fandom to the office. He'd once been president of Yale, not a bad preparation for the complexities of the $1.1 billion business that is modern baseball. But Bart Giamatti died at 51 of a coronary after just five months in the job. The loss to baseball seemed huge. Fate had its own designs. A best friend got in.

And thus far the marks on Vincent are high.

"In my view he's got everything you'd want in a baseball commissioner, but more importantly I think he's got everything you'd want in a human being," Says Larry Lucchino, president of the Baltimore Orioles.

"What you see with Fay is what you get—and isn't that the ultimate compliment?" says Bud Selig, president of the Milwaukee Brewers.

"Nothing I've ever seen suggests this is a guy who has to go out and impress other people," says Donald M. Fehr, executive director of the players' union, and as such a man not naturally disposed to saying nice things about commissioners. Commissioners, after all, come into the job from the owners' side of things. Some commissioners have been perceived as little more than the stooges of greedy owners.

Some Fay Vincent bio and stats, not particularly the kind you'd get on the back of a Topps bubble gum card:

He's 52 and wears plain suits and plain watches and plain ties and even plainer shoes—never mind that he is worth somewhere in excess of $20 million.

He loves Cuban cigars.

He carries a small Swiss Army knife.

He's against the designated hitter rule.

He's been reading a biography of Coleridge and another of George Marshall. Just finished a book on Wordsworth.

He has a moonish face and a receding hairline and thick ankles and a triple chin. And yet, for such inelegance, there is the strangest elegance about him.

He was once president of Columbia Pictures. Under his leadership the studio produced "Kramer vs. Kramer" and "Tootsie." But also, it should be noted, "Ishtar."

"I never read a script," he says. You also wouldn't have found him hanging out at Spago. His office was in New York and movies were never the passion, they were the business. He was a CEO. "Running a movie company is very much an exercise in risk management," he says, something bracing in his voice.

When Coca-Cola bought out Columbia, Vincent went along. He held several key executive posts at Coke but never the top job, and eventually he saw the writing on the wall. He was taken out of the entertainment division and put into Coke International. "I couldn't get motivated about selling Sprite in Thailand," he says, though there is probably a little more to it than that. But anyway, baseball and Bart Giamatti's offer came along at just the right moment.

He used to play for the Putnam Avenue Grammer School nine. This was back in Hamden, Conn., in the late '40s. Putnam's uniforms were gray flannel and the commish can see them yet, because somewhere in their hearts, no matter what heights they've gone to, these are all just small-town boys in baggy woolen uniforms dreaming of the bigs.

"You see, we learn failure from baseball as kids," he says. "It's one of our earliest significant failures. We know by 14 it's over. But that's all right, it's a failure we can live with. That's why we come back to the game. That's why our devotion is so lifelong. You don't feel betrayed by yourself when you fail in baseball."

His Greenwich phone number is listed in the book. Doesn't believe in unpublished numbers.

He can say things such as, "Well, I don't know the answer to that. Sorry."

And yet . . . during the Pete Rose investigation, which wracked baseball for months, Vincent—who was overseeing the case for Giamatti—asked Rose flatly if he'd ever bet on baseball. Rose said no, he wasn't that stupid. Vincent said that was a very significant answer. It was ground-zero for the investigation, he said. It was an on-the-record denial, and if it was a lie, he said, that was going to be a very important fact.

Hardball. Today the disgraced Pete Rose is locked on the outside of a game he'd give anything to get back into. (Under baseball's rules, he can apply for reinstatement next month).

Asked at a Boston sports editors' convention what expectations he had for the outcome of the investigation of George Steinbrenner, owner of the Yankees, the Commissioner responded immediately: "My expectations are well under control."

The Steinbrenner case seems just one more larger or smaller black eye for the game. It is a murky case and at issue are the bad-boy owner's antagonistic relationship with former Yankee outfielder Dave Winfield, and the exact nature of a $40,000 payment Steinbrenner made to admitted gambler Howard Spira in January. (According to a spokesman for the commissioner, the results of the investigation will probably not be announced for at least two more weeks.) Vincent himself took charge of the recent hearings; last Thursday's went 7½ hours.

This is Vincent's third crisis in less than a year on the job. The other two crises—seemingly more difficult than this one—were the San Francisco earthquake during the World Series, and the bitter 32-day owners' lockout this past spring. Of the quake, the game's commissioner seemed to get things in focus awfully fast. The series, he said in a much-quoted remark, was "our modest little sporting event," and what was that next to the needs of a devastated community?

He practiced high-powered law in New York and Washington and also worked briefly at the Securities and Exchange Commission. In the '70s, when he lived in Washington, he was just another weekend fan eating hot dogs at Memorial Stadium in Birdland. He'd take his twin sons with him, which is probably one reason the boys have turned into passionate fans themselves. Last summer, one of the Vincent twins and a pal drove across America, hitting every major league ballpark and some minor ones too. Then they came home and wrote up a report for Dad. It's an unfair world but somebody's got to do these jobs.

In the mid-'50s, he fell off an icy ledge in a crazy prank in his first semester at college and crushed several vertebrae and almost paralyzed himself for life. Struggling to learn to walk again, the boy who would never make it to the bigs used to lie in bed and wait for the Yankees to come on TV. If it was a rainout, the disappointment was total.

And that boy's legs? Well, he eventually recovered them to 50 percent, which is to say he couldn't run, or even walk very far, but on the other hand he could go for short distances so that you couldn't really tell about his injury if you didn't know. That state lasted for about 25 years. Then about four years ago the arthritis set in, ruined his hip, and now it's pretty much torture for Fay Vincent to get across a room, or off a dais, or down a stadium ramp.

"Yes, I was trying to walk again," he says, remembering the summer of '57, when the Yankees meant so much. "There was a lot of therapy. I remember feeling hurt, yes, and somewhat embarrassed and foolish. My father was devastated because he was so much a man of . . . the body. In a way, *he* was the one depressed. On the other hand he was older, of course, so maybe he saw what it would mean. I was 18. When you're 18, you're A, immortal, and B, omnipotent."

Fay Vincent the elder was captain of the Yale football team. The son never came close to living up to the father's athletic legends. Fay Vincent doesn't say it in so many words, but his father is a major reason he didn't attend Yale as an undergraduate: The shadow was too long. (He did get to Yale for law school.) But this isn't a father-conflicted son. Mention his dad now and his voice drops soft as a bunt down third.

"He would have so enjoyed this," he says. "Particularly my relationship with umpires. The fact that I can hang around with *umpires*, that's an amazing thing." There's no irony here. Vincent's dad, deceased, was an umpire of amateur Connecticut baseball games until he was 76. Before that, Francis T. Vincent Sr. was an official in both the National Football League and the old All-American Conference. "My father would come home and tell us what people yelled at him all day," he says, in the kind of remark that can encapsulate a history.

How well does Fay Vincent know baseball? It's a little hard to tell. Yes, he goes for the lyric slant of light across the grass, but also for the 3-6-3 double play. He says he's not a box score maven.

Like Giamatti, Vincent is something of an intellectual on the game he loves, but one with the good sense not to try to mess with unknowables. "We really don't know what makes up this special relationship between baseball and the American soul," he says. "We just know that it's so. So let's leave it alone. . . . Baseball's relationship to the American people is not something you can define. It can't be done."

At a game in Baltimore a couple weeks ago, he got to ask DiMaggio himself about hitting the fastball. Think of it, Joltin' Joe and the Hamden Kid together in a box seat. If the old man could see him now. "I asked if he guessed what they'd be throwing. He said he did, at least to the extent of the fastball." One can almost hear that conversation: The great DiMaggio, ever laconic,

ever gracious, allowing as how he could pretty much tell by a sixth sense when the heater was coming in.

Though the marks are high, Vincent has not played an error-free game. Midway through this spring's lockout, he bonered a big one by suddenly announcing at a press conference his proposal that the owners open the camps in return for a promise by the players not to strike during the season. Don Fehr and the others in the union denounced that as a publicity stunt. He seemed momentarily to lose the goodwill he had built up in so brief a time. But he got it back.

Similarly, there was a moment of seeming bad judgment during the Pete Rose case. Vincent, a skilled lawyer, coordinated the legal aspects for Giamatti. Before the case was resolved, Giamatti signed a letter to a federal sentencing judge on behalf of one of Rose's chief accusers, who was an admitted felon. Rose and his attorneys contended the letter was evidence that Giamatti has prejudged Rose. For a moment it seemed as if the whole touchy Rose investigation might blow up in the faces of the commissioner and the deputy commissioner.

Fay Vincent used to hang around with George Bush's kid brother, Bucky. This was back before being George Bush's kid brother was a lot of cheese. In prep school Bucky Bush as 6 feet 5 and weighed 270 and played on the line for Hotchkiss. (Now he's in investments in St. Louis.) Fay Vincent—another lineman on that Connecticut preppie football eleven—was 6 feet 3 and 240.

One summer (this wasn't long before the accident) the two New England behemoths went West with the country and worked as apprentice roughnecks in the Texas oil fields. Some of the oil rigs belonged to a future president of the United States. Bucky and Fay drove out to Midland in a Renault that was so tiny it couldn't take both of them in the front seat at the same time. They used to pick the car up for kicks at gas stations, just to thrill the locals.

"We made $150 a week that summer and worked seven days a week," he says. "Johnny Cash was big on the radio. The oil workers used to call me Big'un. They'd say, 'Big'un, we're going down to Del Rio tonight, you coming'? I'd say, 'Uh, no, I don't think I'll go this time.' See, they were going to whorehouses in Mexico."

One more fact about him: Fay Vincent once wanted to be a Jesuit. The Jebbies, ever farsighted—at least insofar as delivering to America a future all-star commissioner—said sorry, couldn't take him, because a priest has to be able to say mass publicly, and he had a physical affliction. "Maybe they were right," a devout man says, letting another youthful dispppointment go.

With something of the quality of dream: "The experience of going to a game. I mean, white uniforms at night on grass. It's so . . . beautiful." You're sure he's going to add, "If you build it, he will come."

He's sitting in a suite in a Boston hotel. He's been talking about baseball for almost two hours. The Red Sox will play Toronto at Fenway this evening, and this fact alone seems to lighten Fay Vincent's heart.

His watch, with its inexpensive-looking expandable band, has slid halfway down his wrist, to the backside of his beefy hand. He is rumpled and easy. No airs here.

He's talking about Giamatti. It was a midlife friendship, and how many people ever got a chance at one of those? They met in 1978 at a dinner for seven in Princeton. It just clicked.

Memory-click:

"Something happened one time, I can't remember what it was, I was walking slowly. And of course Bart wasn't a great walker either, Bart has lots of physical problems, you know, not just his heart. Anyway, maybe I said something about the people who run other big-time sports, how much better shape they must be in than we are. And Bart said, 'Well, Fay, don't worry, we won't challenge Pete Rozelle to a race. We'll challenge him to a think."

Fay Vincent, Williams College, class of '60, Phi Beta Kappa, cum laude.

The weekend before Giamatti died, the two were in a chartered King Air going to their respective homes, Fay's on the Cape, Bart's on Martha's Vineyard. (Because of his walking problems, he often flies charter; airport corridors are murder.) The Rose case had just been settled and Giamatti was even more expansive than usual. There had been tough moments, and some mistakes, but they had saved the game, "You know, it was an experiment, Fay, the two of us," Giamatti said, "It's working."

The next weekend, same charter, they said goodbye again at the Vineyard airport. Vincent flew on to Harwich. He was having a cigar on his deck in the sunshine when the call came. The report was incomplete, but he somehow knew Bart was dead. There was something just too final in the words "cardiac arrest." Call it sixth sense.

"Why, Valerie Vincent," Fay Vincent says suddenly, his whole face lighting. "Where are your bags?" The commissioner's wife has just walked into the room. She's thin and pert. People say she's the one who raised the three Vincent children. The two have been married 25 years.

"I'm such a gracious winner," Fay Vincent says, turning back to the interview. It's as though a man is taking a puff on an imaginary cigar.

The phone rings. An assistant gets up to get it. The extension cord won't reach over to the chair where Vincent is. "It's okay, Rich, I'll get up," he says easily. He pulls himself up with his cane, hanging for several tentative seconds in the smooth climatized air. There's something slack and concave about him, as though he's destined to go crashing to the floor. He doesn't.

He's had sodas and ice cream bars and a couple of Fenway Franks, onto each one of which he's squirted Gulden's mustard out of a little plastic tube. He keeps asking everybody around him if he or she won't have something else to eat. He's like a benevolent monarch.

"I predict Hall of Fame," he says when Dwight Evans smashes one.

The commissioner's box, right at the Red Sox dugout, has nine seats. They're filled with some old friends, his wife, a bodyguard named Phil Knect, Knect's a former New York cop who's looked after the boss since Columbia Pictures.

The lights are on. White uniforms are moving on a field of dreams with godlike physical grace.

The mayor of Boston, Raymond L. Flynn, son of Eire, comes up to gas. The pastor of St. Monica's in South Boston is with the mayor. Both the padre and the pol are in mufti, two Boston boys cheering on the lads at the local ball yard.

"It's a Catholic game, you know, Mr. Commissioner," the priest says to Vincent. "It allows for mistakes and forgiveness."

On the mound, Roger Clemens is throwing aspirin tablets. Which is to say the Sox ace has some heat this evening. (Boston will win, 4-3, sweeping the series with Toronto, and permitting the morning scribes to enthuse, in spite of themselves, about pennant fever.)

"I went to high school with his sister," Valerie Vincent tells you, when you ask how they met. "He's a real fan. He's probably never been happier in a job. Back when I met him, I knew there were three teams. The Yankees, the Red Sox and the Cleveland Indians."

Is he in pain most of the time? She nods.

Harry Mazadoorian, Vincent's law school roomie, who's made his own effort at depleting the hot dog industry in New England: "He especially likes to remember his old friends. I think you'd find that's one of his most endearing traits. He invites me to games all the time."

The man himself, softly: "Bart never got here. This was his favorite team, his favorite ballpark. And he never got here. The Rose thing just kept him tied down."

An hour later, the commissioner of baseball is making his way in the dark along Van Ness Street. He's trying to get to his car. Several aides are with him. The car can't be brought to the commissioner because the street is clogged with revelers and TV semi-trailers. But that's okay, the commish will walk. Beantowners don't recognize him in these shadows. Fay Vincent's just some ungainly, contented fan with a cane, going home.●

RECENT PROBLEMS AT HUD

● Mr. MACK. Mr. President, below is an article, Julian L. Simon's "Why More HUD's May Lie Ahead," from the July 17 edition of the Washington Times. Simon writes of the recent problems at HUD, suggesting that too much emphasis has been on "who is to blame" rather than the system from which the problems stemmed.

As ranking member of the HUD Investigative Subcommittee, created specifically to examine recent problems at HUD, I have heard testimony which is consistent with Simon's suggestions.

Since the 1930's, America's housing policy has focused largely the supply. This method of providing housing assistance has often been associated with middlemen, consultants, and lawyers benefiting from the system. And it is precisely these middlemen who continue to oppose changing the system. Conversely, it is the low-income tenants themselves who often seek to change Federal housing policy by supporting changes that would result in their empowerment; that is, tenant management and ownership and tenant-based direct rental assistance.

On June 27, the Senate passed a housing bill which includes some of these concepts of empowerment. Although the bill's major emphasis still retains much of the current system that empowers middlemen, it has elements of change that hopefully represent the beginning of a new direction in our housing policy.

Mr. President, I ask that the article mentioned earlier be printed in the RECORD.

The article follows:

[From the Washington Times, July 17, 1990]

WHY MORE HUDs MAY LIE AHEAD

(By Julian L. Simon)

The HUD scandal is juicier than ever. It is a journalist's dream at a time when there is so little international and domestic bad news to write about. It meets the crucial criterion for newsworthiness—opportunity to analyze who is to blame.

The latest "blamee" to take the fall is Congress. The Washington Post faults legislators for their lack of oversight and forecasts more scandals because "So Many Share the Scandal's Blame . . . And So Few Will Pay."

That analysis is wrong. Blame and punishment may make us feel good, but no amount of fingerprinting or jail sentences will prevent repetitions in the future.

The real problem is a system in which bureaucrats are given responsibility for allocating goodies—in this case, spreading funds among suppliers of housing services. The newly announced congressional plan to "plug loopholes" offers just Band-Aids, not a cure.

As long as we focus on people rather than structure, we will have abuses and scandals. But journalists and politicians are drawn to analyses of personal characteristics as a moth is attracted to the flame.

For example, when the story broke last June, the Wall Street Journal's front-page story talked about how Deborah Dean, 33, ran a shoddy operation involving billions of dollars at the Department of Housing and Urban Development. The story referred to her and her associates as young adults and a "kiddie corps." It asked: "Where were the grown-ups?"

Two pages later, a headline spoke about "China's Old Men" in a story about the transfer of power after the Tiananmen Square massacre and crackdown. The story referred to the Chinese leaders as "old guys in their 80s."

Both stories imply that officials' ages are important determinants of their activities and decisions. They suggest that if people of more "appropriate" ages were put into office, the public would be better served.

Those stories illustrate a recurrent fallacy in human thinking. In a book titled "Human Inference," Robert Nisbet and Lee Ross review extensive studies showing that people are likely to err by explaining events by recourse to the characteristics of the actors instead of the structural conditions of the situation. In both China and HUD, the key element is the existence of a governmental entity that puts money or power, or both, at the disposal of officials. As long as that condition exists, the likelihood of abuse exists. Sometimes the public gets lucky and the officials are honest and humble. But inevitably some officials will take advantage of the opportunities.

Consider, for example, a current bone of contention—HUD's method of setting rents for housing it subsidizes. A developer in Washington state took HUD to court and won a suit charging that HUD's formula is unsound. But any conceivable bureaucrat-set formula will favor some developers over others. That opens the door to a never-ending cycle of lobbying and bribery intended to alter the formula is set.

The solution, then, is not to call for better officials—of the right age, say. The solution is to change the system.

A letter to the editor in The Washington Post agrees in placing the blame on the structure of the HUD program: "What they are trying to clean up is inherently corrupt and corruptible." But the writer offers a different solution of "direct construction of socially owned housing." That is the Polish system. As a result, Polish couples register newborn babies for apartments, hoping that the children will reach the top of the list by the time they marry. And of course that "solution" provides huge opportunity for corruption.

The only solution that does not create new opportunities for corruption is to put the market to work, not just on the supply side but on the demand side as well. On the demand side, that means giving poor people the money they need, either as straight income grants or as money earmarked for housing. The former is much better, but the latter is more politically palatable. Like any shift from centralization toward markets, such a program is opposed by the bureaucrats who would lose their jobs and opportunities for graft.●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 35, PARAGRAPH 4, PERMITTING ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN ORGANIZATION

● Mr. HEFLIN. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD notices of Senate employees who participate in programs, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The select committee has received a request for a determination under rule 35 for Mr. Brad Figel, a member of the staff of Senator BOB PACKWOOD, to participate in a program in the Republic of Indonesia, sponsored by the United States-Asia Institute, from August 15 to 25, 1990.

The committee has determined that participation by Mr. Figel in the program in the Republic of Indonesia, at the expense of the United States-Asia Institute, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Joan Hogan Gillman, a member of the staff of Senator CHRISTOPHER DODD, to participate in a program in England, funded by the British Council and cosponsored by the Liaison Group for International Educational Exchange, from May 27 to June 2, 1990.

The committee has determined that participation by Ms. Gillman in the program in England, at the expense of the Liaison Group for International Educational Exchange, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Pamela Kruse, a member of the staff of Senator JAMES M. JEFFORDS, to participate in a program in England, funded by the British Council and cosponsored by the Liaison Group for International Educational Exchange, from May 27 to June 2, 1990.

The committee has determined that participation by Ms. Kruse in the program in England, at the expense of the Liaison Group for International Educational Exchange, is in the interest of the Senate and the United States.●

BALANCED BUDGET AMENDMENT

● Mr. MACK. Mr. President, I was very disappointed to see that the House of Representatives again turned down a balanced budget amendment to the Constitution. The House's action made an article in Wednesday's Wall Street Journal by James M. Buchanan very timely. Buchanan argues that the death of socialism throughout the world has accentuated the need for constitutional constraints on governments. I commend his article to my colleagues and I ask consent that the article be reprinted in the RECORD.

The article follows:

SOCIALISM IS DEAD; LEVIATHAN LIVES

(By James Buchanan)

More than a century ago, the German philosopher Friedrich Nietzsche announced the death of God. This dramatic statement was intended to suggest that religion had cease to serve as an organizing principle for the lives of individuals or for the rules of their association. Since Nietzsche, the God pronounced dead was replaced in man's consciousness by "socialism." and I want to match Nietzsche's announcement with the comparable one that "socialism is dead"—a statement that seems much less shocking than Nietzsche's because it is being heard throughout the world in 1990.

In a very real sense, the loss of faith in socialism is more dramatic than the loss of faith in God, because the god that was socialism took on forms that were directly observable. There were no continuing unknowns waiting to be revealed only in another life, and the promised realization of the socialist ideal could not be infinitely postponed. Socialism promised quite specific results; it did not deliver.

One can only look back in amazement at the monumental folly that caused the intellectual leaders of the world, for more than a century, to buy into what F.A. Hayek called the "fatal conceit" that socialism embodies. How did we come to be trapped in the romantic myth that politically organized authority could satisfy our needs more adequately than we might satisfy them ourselves through voluntary agreement, association and exchange?

SOCIALISTS EVERYWHERE

This fatal conceit was almost universal. Let us now beware of current attempts to limit acceptance of the socialist myth to

those who were the explicit promulgators and defenders of the centrally planned authoritarian regimes of the Soviet Union and its satellites. There were socialists everywhere, in all societies and, even in the face of the evidence that continues to accumulate, there are many who still cannot escape from the socialist mind-set. And even for those of us who have, however begrudgingly, acknowledged that the socialist god is dead, there may not have emerged any faith or belief in any non-socialist alternative. We may not accept the alternative represented by the free market or enterprise system, even as tempered by elements of the welfare state.

Socialists everwhere, confronted with the evidence that economics organized, wholly or partially, on socialist principles cannot deliver the goods, are now making desperate efforts to redefine the term "socialism," which British socialist and scholar Alec Nove defined in 1987 as a society in which "the means of production of goods and services are not in private hands."

It is now almost universally acknowledged that a private-ownership, free-enterprise economy "works better" than Mr. Nove's socialized economy, in which decisions are made by state or cooperative agencies. The individualized market economy "works better" than the socialized economy in the sense that it produces more goods. But it also works better in the sense that it allows individuals more liberty to choose where, when and to what purpose they will put their capacities to produce values that they expect others to demand.

A threshold was crossed in the 18th century when we learned how the rule of law, stability of private property and the withdrawal of political interference with private choices could unleash the entrepreneurial energies that are latent within each of us. Humankind seemed near to the ultimate realization of its social potential. How did the socialist vision emerge to threaten, and in part forestall, this future? And why did the principles of classical political economy, which seemed so strongly to suggest the relative superiority of a market economy, lose their persuasive powers so quickly?

We must, I think, appreciate the rhetorical genius of Marx and his ability to convert arguments advanced in support of market organization into what could be made to appear to be support for a particular distributional class, the capitalists. By clever substitution of emotion-laden terminology, the market system became "capitalism," and the search of every person for his own advantage became the profit-seeking of the greedy capitalists. This rhetorical genius, coupled with totally erroneous economic analysis embedded into pseudoscientific jargon about the laws of history, was highly successful in elevating the distributional issue to center stage, to the relative neglect of the allocational and growth elements that were central in the classical teachings.

(I speak as one who shared fully in the socialist mind-set, from which, thanks to Frank Knight, I escaped relatively early in my career. But I appreciate the appeal of the Marxist-socialist ideas even if, now, I cannot explain it.)

Recall that during its early decades, the Soviet Union was held out as paradise by socialists in the West. After World War II, Eastern Europe was absorbed into the Soviet political orbit and the countries of Western Europe socialized their economies to greater or lesser degrees. Even where economies were largely allowed to remain free, Keynesian-inspired macromanagement was supported by arguments about the tendency of capitalism to generate massive unemployment.

Between the early 1960s and today, socialism became ill and died. What happened? There were two sides to the coin: "market success" and "political failure." The accumulation of empirical evidence must ultimately dispel romance. And the evidence did indeed accumulate to demonstate that free-market economies performed much better than politically directed or planned economies. Contrast, for example the West German Wirtschaftwunder with the demonstrable failures of the socialist experiments in Britain in the late 1940s and early 1950s. Honest evaluation suggested that the centralized economies of the Soviet Union, China and East European countries were not successful in producing goods and services.

Ideas also matter. And here the record of the academic economists remains, at best, a very mixed bag. The welfare economists of the early and middle decades of this century were almost exclusively concerned with demonstrating the failures of markets, in order to provide a rationale for political interferences. But the public-choice revolution in ideas about politics, and political failures, was also sparked primarily by academic economists.

When the behavioral models of economics are applied to "public choosers"—to those who participate variously in political roles, as voters, politicians, bureaucrats, planners, party leaders, etc.—the romantic vision that was essential to the whole socialist myth vanishes. If those who make decisions for others are finally seen as just like everyone else, how can the awesome delegation of authority that must characterize the centralized economy be justified?

This loss of faith in politics, in socialism broadly defined, has not, however, been accompanied by any demonstrable renewal or reconversion to a faith in markets, the *laissez-faire* vision that was central to the teachings of the classical political economists. There remains a residual unwillingness to leave things alone, to allow the free market, governed by the rule of law, to organize itself. We are left, therefore, with what is essentially an attitude of nihilism toward economic organization. There seems to be no widely shared organizing principle upon which persons can begin to think about the operations of a political economy.

It is in this setting, which does seem to be descriptive of the era into which we are so rapidly moving, that the natural forces that generate the Leviathan state emerge and assume dominance. With no overriding principle that dictates how an economy is to be organized, the political structure is open to exploitation by the pressures of well-organized interests. The special-interest, rent-seeking, churning state finds fertile ground for growth in this environment. And, depending on the relative strength of organized interests, we observe quite arbitrary, politicized interferences with markets.

This setting, which I have referred to as Leviathan, has much in common with the mercantilist-protectionist politics that Adam Smith attacked so vehemently in "The Wealth of Nations" in 1776. The same barriers that Adam Smith sought to abolish are everywhere resurging; and the same arguments are heard, both in support and in opposition. The arguments for Leviathan's extensions are not versions of the socialist's dream; they are, instead, simple efforts to claim a public interest in a single sector's private profit.

CONSTITUTIONAL CONSTRAINTS

There will be no escape from the protectionist-merchantilist regime that now threatens to be characteristic of the post-socialist politics in both Western and Eastern countries so long as we allow the ordinary or natural outcomes of majoritarian democratic processes to operate without adequate constitutional constraints. If we know that politics fails and that its natural proclivity is to extend its reach beyond tolerable bounds, we must incorporate constraints into a constitutional structure. A depoliticized economic order is within the realm of the possible, even if the accompanying faith in market organizations is not fully regained. We can protect ourselves against the appetites of the monster that the Leviathan state threatens to become.

The organized polities of the nation-states, and the associations among those states, must be kept within constitutional boundaries. The death throes of socialism should not be allowed to distract attention from the continuing necessity to prevent the overreaching of the state-as-Leviathan, which becomes all the more dangerous because it does not depend on an ideology to give it focus. Ideas, and the institutions that emerge as these ideas are put into practice, can be killed off and replaced by other ideas and other institutions. The machinations of interest-driven politics are much more difficult to dislodge. Let us get on with the task.

(Mr. Buchanan, a Nobel laureate in economics, is professor of economics at the Center for Study of Public Choice at George Mason University. This article is adapted from a speech he delivered in Sydney, Australia, in March.)●

TOTAL FORCE POLICY

● Mr. SYMMS. Mr. President, as we face the probability that the U.S. defense budget will continue to be an area from which we make spending cuts, we will have to address the topic of military force mix and structure. As the defense budget undergoes transition, so must our existing military force mix and structure policies. Yet, before we hastily begin to slash various areas of military resource allocation, we must first determine what military challenges confront us now and in the future. Neglecting to responsibly assess new global military requirements before we decide how or where to make defense cuts, Mr. President, would certainly be putting the cart before the horse.

Facing inevitable budgetary cuts, the size of our Armed Forces is very likely to be smaller. How then will we manage force structure and mix to achieve the best possible defense in the most efficient and economical manner? We have a feasible solution to this problem in our total force policy. Unfortunately, however, total force policy has not yet been adequately implemented. For the total-force concept to function as it was intended by Congress, our Reserve Force must be readily available to augment what will soon be smaller Active

Forces. Congress provided for this by approving 10 U.S.C. 673(b).

This provision has yet to be employed despite its need in Grenada, the Persian Gulf, and Panama where proper use of this authority would have provided necessary support to the Active Force involved. I would like to bring to the attention of my colleagues an article written by Admirals Zumwalt and Bagley, both of whom have distinguished military careers and extensive international and defense expertise. I commend their thoughts about total force policy to you and agree with them completely that an increased reliance on our Guard and Reserves means that it is absolutely imperative that we be able to access these means with the full confidence that they will be able to perform as required. If we cannot confidently depend on them, or if they cannot perform adequately, then we have not a total force, but a hollow force.

I call upon the civilian and uniformed leaders within the administration to take a strong and supportive role in affirming ready and reliable access to our Reserves through appropriate use of 10 U.S.C. 673(b). I would add that interest conflicts within the services as well as on the political front must be set aside while we find a successful solution to this pressing matter of national security.

Mr. President, I request that the text of the article by Admirals Zumwalt and Bagley be printed in the RECORD following my remarks.

The article follows:

[From Aerotech News and Review, Mar. 30, 1990]

THE ZUMWALT-BAGLEY REPORT: A NEW "TOTAL FORCE" FOR THE NINETIES?

(By Elmo R. Zumwalt, Jr. and Worth H. Bagley)

Faced with sweeping changes around the world, the wheels have begun to turn in a laborious, bureaucratic process to redefine America's force structure for the "nineties" and into the next century. By means of legislative fiat, an uneasy Congress mandated that the Department of Defense (DOD) conduct a "Total Force" assessment to update what many in the Congress considered an enfeebled defense policy for the structuring and employment of our armed forces.

The assessment, as per the legislative directive, is being conducted by a high level body of DOD, Service, and uniformed manpower officials. As might be expected, this effort will involve a "cast of thousands."

With deadlines set for an initial report in September and the final report by year's end, the members have now met twice. With each of the Services generally comfortable with their present methods of determining force structure and mix, it's doubtful they will strongly suggest any change in the status quo. However, budget realities and Congressional pressure will be the determining factor and undoubtedly will compel change if DOD and the Services are less than forthcoming in their review of the "Total Force."

But, as it is, the Total Force Policy should take little review; it is as viable and logical a plan today as when it came into existence as a concept in the early '70s. It is as flexible an approach to defense manning and structuring as we could hope to devise. All that is needed are decision makers with the will to implement it.

With its genesis in an earlier era not dissimilar to that of today—major cuts in defense spending, withdrawal of U.S. forces from critical geopolitical arenas, and the ending of the draft—the Total Force concept was implemented to meet the worldwide defense and other interests of the U.S., given our reduced resources to do so. Its basic approach was to maintain an active duty force capable of meeting anticipated day-to-day defense needs while having a substantially larger and better trained and equipped Guard and Reserve structure readily available to augment and reinforce their active counterparts as needed. Such a policy had as one of its chief objectives economy of force in that major manpower and mission resources could be placed in the less costly Reserve system and yet be available in times of a national need in situations short of national mobilization. The linchpin in this new policy was access to the Reserve Force. If there were no ready access to the Reserve for operational missions and contingencies, then the "Total Force" would be a hollow shell and collapse. Taxpayers would rightly question the multi-billion dollar investment in a conventional force that could be used only in a general (and increasingly unlikely) mobilization for global war. Congress solved the accessibility issue of the Guard and Reserve by legislation known widely as the "200K" call-up authority (Title 10, Section 673(b)).

The legislative history of Section 673(b) is quite clear in its intent. First starting with a ceiling of 50,000, then increasing the number of drilling Reservists which the President may recall to 100,000 and then to 200,000 the Congress clearly meant to give the President the authority and flexibility to access the manpower and resources of the Reserve component for any operational mission. This authority was to be exercised on a regular basis to "reinvigorate" the Guard and Reserve and make the "Total Force" a reality in both fact and deed.

There is today nothing in the dual problems of force structure and force mix that the Total Force Policy cannot address, as long as DOD and Administration decision makers are willing to take an affirmative stand on the use of the "200K" callup. Unfortunately, many in DOD—both uniformed and civilian—have not the foggiest idea of what Section 673(b) is, others do not want to disturb present arrangements, while for still others it falls into the "hard political problem/make head hurt" category.

Further, to say, as some do, that, "no service has ever asked for an involuntary recall" is slightly disingenuous, masks how this town conducts business, and neatly sidesteps the real issue. Section 673(b), as the Congress envisioned it, could have (many say should have) been used to provide needed Reserve support in Grenada, the Persian Gulf, present drug interdiction activities and in Panama. In each of these instances where Reserve volunteers provided and continue to provide inestimable service, the burden has been on them and their relationships with their civilian employers have been jeopardized.

It will be interesting then to read the conclusions of the DOD panel. Will they state clearly, as has the Reserve Forces Policy Board, that accessibility of Reserve manpower and resources is the key to a continued, viable total Force Policy? Then will they have the courage to state that with guaranteed accessibility to the Reserve component, the Total Force Policy has the flexibility to adapt and meet present and future force structure and force mix needs as circumstances dictate? Or, will the panel follow the Army's weak approach subsequent to Panama? There, as in Grenada, certain specialized units which exist predominantly in the Reserves were desperately needed and not readily accessible because political authority was unwilling to exercise the Section 673(b) call up, resulting in unnecessary operational problems. Having been twice stung, the Army does not want to face the unavailability issue in future contingencies. Unfortunately, in seeking a resolution of this problem, rather than making the Reserves accessible for future needs by calling for use of the unused Section 673(b), they seek the insufficient and costly approach of transferring. Reserve units back into the active Army.

Let us hope that DOD will show the common sense and leadership to keep a good policy; one that can meet our needs for the future—a "Total Force" in word and deed that capitalizes on the strengths and advantages of both active and Reserve components. This cannot be done without ready access to our Guard and Reserve.●

ANNIVERSARY OF CYPRUS INVASION

● Ms. MIKULSKI. Mr. President, tomorrow marks the 16th anniversary of the Turkish invasion of Cyprus.

In 1974 the Turks used a moment of political instability in Greece to send troops to Cyprus and created an artificial division on the island that persists to this day.

Repeated attempts to negotiate a settlement and reunite the island have failed. Most recently, a vigorous effort by U.N. Secretary General Perez de Cuellar met with the same fate.

Many of us felt that this U.N. initiative might meet with some success in light of the efforts of the highly capable new President of Cyprus George Vassiliou. President Vassiliou showed himself to be accommodating and flexible during the talks, but Turkish Cypriot leader Rauf Denktash once again scuttled any chance of an agreement.

Most recently the Government of Cyprus has turned to the European Community for assistance. Not only has Cyprus applied for EC membership, but it has also appealed to the EC membership to help resolve the partition crisis. In response, the EC has stated that a lasting solution to the Cyprus problem must be based on the independence, unity, sovereignty, and territorial integrity of the Republic of Cyprus, in accordance with the relevant U.N. resolutions.

I am pleased to see the EC taking a constructive role in this issue, but EC participation is no substitute for a per-

sistent, forceful engagement by the U.S. Government.

Once again, I encourage the Bush administration to make Cyprus a high priority in its foreign policy agenda.●

THE CONFLICT IN CYPRUS

● Mr. SIMON. Mr. President, tomorrow, July 20, is the 16th anniversary of the Turkish invasion of Cyprus. It is tragic that, at a time when walls are crumbling around the world and long-standing conflicts are being peacefully resolved, the green line between the Republic of Cyprus and the Turkish-occupied northern part of the island remains in place.

I have spoken on this issue several times in recent weeks, Mr. President, because frankly, I am increasingly frustrated with the lack of progress toward good faith negotiations. The conflict in Cyprus has festered for too many years and caused too much suffering. Ankara, unfortunately, has not been cooperative in the United Nations' effort to bring about a solution. And there is frustration in great part because we know that this conflict could have been and should have resolved years ago. And it is clear that the United States has to be a greater catalyst for change than we have been to date.

At the end of June, I introduced a bill, S. 2808, that I think will send a strong and clear message to our friends in Turkey that the United States wants to see a resolution in Cyprus. My bill would gradually wind down United States military and economic assistance to Turkey over the 5-year period beginning in fiscal year 1991 and running through fiscal year 1995, reducing funds by 20 percent each year. The cuts are conditioned on one simple step: All Turkish military forces in excess of the 1960 Treaty of Guarantee must leave Cyprus, and all illegal colonists must be withdrawn as well. This is not an unreasonable step.

Mr. President, the time has come for progress on this issue. Relationships among former adversaries in Europe have improved dramatically. We should be encouraging more positive movement between Turkey and Greece. I believe that my bill, S. 2808, will have that effect. We have to say to our good friends in Turkey, and they are our good friends, that there is a price to pay for violating international law. There is a price to pay for military occupying 40 percent of a sovereign state.

I hope that this bill will be overtaken by the course of events. Turkey and Greece are two of our closest allies, and I hope that in Cyprus, as in so many other European nations of late, the cause of freedom will triumph and will lead to a peaceful settlement.

But tomorrow we will recall the unhappy anniversary of the Turkish invasion, and we must recognize that 40 percent of the island is still occupied. Mr. President, I invite my colleagues to join with me and cosponsor S. 2808, and I urge Mr. Denktash in northern Cyprus and the Turkish Government in Ankara to negotiate a quick and fair settlement to end the division of Cyprus.●

REMEMBERING CAPTIVE NATIONS WEEK

● Mr. DECONCINI. Mr. President, 31 years ago, in July 1959, President Eisenhower signed into law a congressional resolution that calls on the President to designate the third week in July as Captive Nations Week. The resolution has since become a heartfelt American tradition as well as part of our legislative history. Its purpose is to demonstrate solidarity with those Europeans and others whose liberty had been snuffed out by Communist regimes, and to remind the leaders of those regimes that the American people and the American Government would neither forget nor accept the abrogation of the right of peoples to determine their own fate.

Today, in July 1990, America's hopes for the restoration of freedom, sovereignty and self-determination for all peoples are closer to realization than at any time since the end of World War II. The revolutions of 1989 and the elections of 1990 have resulted in the formation of non-Communist governments in most of Eastern Europe and the Baltic States, and the impending reunification of Germany under a democratically elected government. The forcible division of Europe is about to be overcome. Within the Soviet Union, people of many nationalities are awakening to proclaim their right to sovereignty and to decide how they will live. Their inspiring efforts remind us that the spirit of freedom is inherent in all humankind and that the striving for freedom by one people buoys and bolsters others engaged in the same struggle.

The events of the recent past testify to the determination of peoples to realize this most fundamental human dream, even at great risk and cost. And as we look at Europe in July 1990, we see the vindication of our hopes in the indomitable will of the peoples of Europe to rule themselves. The annual commemoration of Captive Nations Week has for 31 years served the noble cause of rememberance. Let us today anticipate a commemoration that goes farther than merely remembering. Let us today anticipate a commemoration that greets the free people of Europe, and welcomes them into the democratic community of nations. We look forward to the day when all captive nations can share in the blessings of liberty.●

YOUTH AND DRUGS

● Mr. SIMON. Mr. President, some weeks ago, I had the opportunity to visit the White Oak Center in Peoria, IL, that is doing a remarkable job of dealing with people who have some serious problems.

White Oak Center is a center for people who have a chemical dependency problem.

I have read an article by Dr. John F. Gilligan that appeared in the Peoria Journal Star, and I realize I should not simply keep it in my files but share it with my colleagues in the Senate and those who read the CONGRESSIONAL RECORD.

While the article is about drugs, it is really much more than an article about drugs. It is an article that calls upon us to redirect our society and our leadership.

Frankly, we had leadership, particularly under the Reagan administration, that appealed to the greed in us rather than the noble in us.

There has been an improvement in that regard in the Bush administration, though it still is a long way from the solid, committed, dedicated humanitarian leadership that the Nation needs.

In the article, Dr. Gilligan says,

> Our young are more concerned about acquiring Gucci shirts than community involvement.

He also says,

> What is it that youth hear from adults? Don't do drugs! Don't smoke! Don't drink, but if you do, don't drive! Finish school, so you won't be a bum. Study hard, so you can get a good job! Don't have sex, but if you do, don't get pregnant or get her pregnant! This is what youth hear most from adults.
>
> These are not ideals. These are not visions. They are only prescriptions to avoid the sinkholes of life. They don't tough young hearts or sire their enthusiasm.

Dr. Gilligan then says,

> A call for greatness is required. We adults, however, must first resolve our own uncertainties and ambivalences about how life ought to be lived. Convictions just don't sound very convincing when there is no belief within.
>
> How about us challenging youth to make the world a little bit better? There are numerous challenges: poverty, the environment, the homeless, racism, hunger, hate, illiteracy, and mental retardation are just a few examples. Who knows, calling youth to greatness might even change us in the process.
>
> Such involvement liberates one from self-centeredness, inspires hope in others, promotes commitment to the common good, and in general just cleanses the social fabric of a community.

Dr. Gilligan's immediate audience is for parents, it could just as well been written for the U.S. Senate.

His article suggests that what we need to deal with the problem of chemical dependents in our society is not simply tougher law enforcement,

but a vision, a dream, a sense of compassion of all of humanity.

I ask that the article be printed in the RECORD at this point.

The article follows:

[From the Peoria (IL) Journal Star, Mar. 4, 1990]

YOUTH AND DRUGS: PARAMOUNT NEED IS LEADERSHIP, VISION—NOT PRESCRIPTIONS TO AVOID THE SINKHOLES OF LIFE

(By John F. Gilligan, Ph.D.)

Let's not kid ourselves, there is more to the American drug problem than meets the eye. It is also a symptom of a deeper malaise within society itself. And, what is it?

Simply stated, it's spiritual atrophy. There has been a loss of beliefs, values and convictions that use to provide direction and guidance in living life.

The slow erosion of convictions that at one time unified families, communities and our nation has created a psyche of doubt and uncertainty. "I just don't know what to believe anymore," is frequently heard in private conversations. In such a climate, it is little wonder that an addiction to immediate gratification takes root.

Look at youth as an example. Why? Because youth usually reflect the trends and values shaping society. Furthermore, the future of our country resides in them.

There is, sadly, more truth than comedy in young people's statements that "greed is good." Recent polls reveal that our young are more concerned about acquiring Gucci shirts than community involvement. Where do they get this from? Is Ivan Boesky the only one to blame?

What is it that youth hear most from adults? Don't do drugs! Don't smoke! Don't drink, but if you do, don't drive! Finish school, so you won't be a bum. Study hard, so you can get a good job! Don't have sex, but if you do, don't get pregnant or get her pregnant! This is what youth hear most from adults.

These are not ideals. These are not visions. They are only prescriptions to avoid the sinkholes of life. They don't touch young hearts or stir their enthusiasm.

Where will youth learn and from whom will they learn that there is more to life than money, power, fame and self-interest?

Youth need to see and hear our ideals and visions. If they don't hear them from us—parents, teachers, coaches, employers, ministers—then we abandon them to a culture of flux not known for its articulation of ideals and convictions.

So, what is to be done?

A call for greatness is required. We adults, however, must first resolve our own uncertainties and ambivalences about how life ought to be lived. Convictions just don't sound very convincing when there is no belief within.

How about us challenging youth to make the world a little bit better? There are numerous challenges: poverty, the environment, the homeless, racism, hunger, hate, illiteracy and mental retardation are just a few examples. Who knows, calling youth to greatness might even change us in the process.

Such involvement liberates one from self-centeredness, inspires hope in others, promotes commitment to the common good, and in general just cleanses the social fabric of a community.

Youth need leadership that sets forth a vision to be pursued. And, we adults have the responsibility to provide that leadership. As the Book of Proverbs says: "Where there is no vision the people perish."

SUPERFUND LIABILITY DRIES UP CREDIT

● Mr. D'AMATO. Mr. President, a credit crunch is devastating many farmers, small businesses, contractors, and manufacturers. This credit crunch is different, because it is not based on economics or interest rates. Instead, lenders are refusing to lend any amount at any price if they suspect that a property might be contaminated with hazardous waste.

The reason is that the lender, rather than the owner or borrower, can be held responsible for the full cost of cleaning up a hazardous waste site. The cost of such a cleanup may run into the millions of dollars.

The problem stems from a series of court decisions that have reversed the intent of Congress in enacting the Comprehensive Environment Response Compensation and Liability Act [CERCLA], which we all know as Superfund. Congress originally included protection in the law that insulated innocent lenders from liability for hazardous spills. Lenders have been shocked by court decisions that have held lenders responsible for the full cost of cleaning up hazardous waste, even if the lender in no way caused or contributed to the contamination.

Cleanups of this sort can be very expensive, easily running into the millions of dollars. Lenders therefore not only risk losing the amount of their loan, but face an open-ended liability for cleanups that can exceed the value of the property.

CERCLA contained three provisions that were intended to protect lenders from liability for releases of hazardous substances by their borrowers. The first proviso exempted from liability a person "who, without participating in the management of a vessel or facility, holds inidicia of ownership primarily to protect his security interest." In other words, if a lender merely collateralized a loan with a lien on property he would not be liable.

The second lender protection in the Superfund law is called the innocent landowner defense. If a lender can show that the property was acquired after the hazardous substance was placed there, and that the lender did not know the property was contaminated after making reasonable inquiries in the previous uses of the property, the lender is not liable.

Finally, Congress provided that if the release of a hazardous substance was caused solely by "an act of omission of a third party" the lender is relieved of liability.

Clearly, Congress intended to exempt innocent lenders from liability. On the other hand, if a lender was in fact responsible for contamination, the lender should have the same liability for cleanup as anyone else.

The number of businesses affected by this situation is very large. Every farmer uses pesticides, fertilizers, and fuels. Every gasoline station, auto dealer, and trucking company has fuel tanks and handles waste petroleum products. Dry cleaners, metal finishers, chemical manufacturers, paint stores, and many other businesses all use hazardous materials of various sorts.

Let me cite two examples from New York State of the impact of CERCLA on lenders.

An upstate New York Farm Credit Association foreclosed on a large fruit farm. Later, they discovered that pesticides had been stored in a building with a leaking roof. Before the farm could be sold, the association had to spend $60,000 to remove and dispose of soil from the barn floor and other tainted material. In addition, the association has established a reserve fund of $200,000 just in case additional cleanup is required, even though the property has been sold.

In another case, the Marine Midland Bank was asked to make a $50 million loan to finance the acquisition of a western New York company that is an industrial solvents manufacturer and metal processor. Because of potential CERCLA liability, the bank thought an environmental audit was necessary. However, the buyer refused to pay the $250,000 cost of an audit, and the deal fell through. The bank missed out on the interest, fees, and related business the transaction would have produced.

In order to protect themselves, lenders are increasingly requiring environmental audits before they make loans. These audits can be quite expensive, and obviously add to the cost of borrowing, since the borrower must pay for them. An initial environmental assessment ususally costs about $1,500 to $2,000. If that preliminary check indicates the presence of contamination, a thorough audit can routinely cost up to $150,000 or more.

Private lenders are not the only parties that can be found liable under these court interpretations. Governmental agencies, such as the Small Business Administration or even State guaranty agencies can be held liable. I am certain that Congress did not intend that.

Furthermore, liability under CERCLA may extend not only to a lender, but to a trustee or fiduciary who holds title to or controls a property that is contaminated as part of a trust or estate. Thus, if a bank trust department accepts an assignment to administer an estate, the bank could find itself liable for the full cost of any necessary environmental cleanup. Congress surely never intended that.

This is a crisis that need never have happened. It certainly was never the intention of Congress to create such a situation. It is a problem that cries out for prompt resolution.

Fortunately, my colleague, the senior Senator from Utah [Mr. GARN] has introduced S. 2827, the Federal Deposit Improvement Act of 1990, which contains provisions that restore the original intent of the Superfund legislation, and will restore the confidence of lenders to make loans to deserving and creditworthy borrowers.

Let me stress that this legislation protects innocent lenders who are not responsible for hideous spills. But if a lender is indeed responsible for any contamination, he is held to the same standard of liability as any other polluter. I think that is fair and right.

The other provisions of this bill address deficiencies in FIRREA that have been identified by the FDIC. Some of these have merit and others may require additional scrutiny. However, I do believe that it is important to look at what we can do this year to ameliorate some of the more glaring shortcomings of FIRREA. Nevertheless, I am cosponsoring S. 2827, and I look forward to its speedy passage.●

PUBLIC BROADCASTING

● Mr. SIMON. Mr. President, a few years ago, I wrote a column expressing my concern about the future of public broadcasting. The Public Broadcasting System [PBS] has an excellent reputation for quality programming, but I see a trend that concerns me.

Increasingly, the programs on PBS are preceded by "The following program is brought to you through the courtesy of * * *." While those corporations who support PBS are to be commended, it is troublesome that public broadcasting is turning to the private sector for an ever-growing share of its budget. The implications of this trend are clear: PBS will be forced to show only those programs that attract a large audience and, therefore, attract sponsors. This is not my vision of public broadcasting, and I do not believe we should continue heading in this direction.

I recently had the opportunity to meet Jerry Landay, a visiting associate professor in the Journalism Department at the University of Illinois. He shared with me an op-ed piece that makes several important points about financing public broadcasting. I urge my colleagues to take a few minutes to read and think about what Professor Landay has written. I am grateful to Professor Landay for his concern, and I hope that what he has written will persuade others to join in this dialog.

I ask that the text of Dr. Landay's article be printed in the RECORD.

The article follows:

PAYING PUBLIC BROADCASTING'S WAY

(By Jerry M. Landay)

The radio-television critic of the New York Times, Walter Goodman, raises the right question in a passing reference to corporate funding of programs on public television (5/28/90): how best to pay for the system. The matter, sadly, has never had much sex appeal. It's an issue whose time has come.

Radio and television sets are the most potent instruments ever given to a society for informing and educating the body politic, for provoking democratic discourse, for setting a public agenda. In Eastern Europe, broadcasting has been the spark for fundamental political and economic change.

But the American commercial broadcasting system, by design, remains dedicated to the engineering of consent through electronic bread and circuses.

In the hands of the ad-mass industry, commercial broadcasting is a Johnny One-Note which produces and distributes back-to-back amendments designed to deliver huge audiences to commercial clutter, with hardly a concession to intelligence.

The networks spend $3 billion a year developing and producing an appallingly narrow range of program product, from sitcom to mayhem. Compare that with the 44 million federal dollars a year we grudgingly give public broadcasting for alternative program services that attempt to reflect the wider horizons of human affairs.

Only public broadcasting has devoted a sensible amount of air space to a timely understanding of Gorbachev's Russia. PBS's American Experience is the only regular, original program series on U.S. history. In this age of science and technology, NOVA is the only regular long-form science series on the American airwaves. In the entire 10,000-station "electric" spectrum in America, only the 300 stations of PBS carry sensible, non-polluting children's programming on-air, including instructural services to classrooms. National Public Radio provides the only mature daily news service on the airwaves. Its budget is small, and getting smaller.

It's impossible to get a true sense of our world from the abbreviated product of commercial broadcast newsrooms. We've bought into the specious industry myth that the "electric" media can't tell us a complicated story without being wallpapered by moving images; in fact, that television news can't tell us a complicated story of any kind. Thus, the commercial industry frees itself from having to explore the gray zones where provocative journalism must go.

So, television audiences have been denied probing examinations of possible presidential involvement in Iran-Contra, the S&L bail-out, the complexities of the budget deficit and the national debt.

Fifty-five per cent of American households can't receive, or afford, cable. With all the hullaballoo about the global reach of C-N-N, its staple is a recycled and extended version of precisely what network newsrooms do.

In the mid-'60s, a broadcasting industry embattled by payola and quiz-show scandals capitulated to the creation of a public broadcasting alternative. But a coalition of political gatekeepers and yahoos manacled the new system by refusing to provide adequate financing on a long-term basis.

In 1989, the average public television station received a scant 17 percent of its funding from the federal government. States and localities provided another 23 percent. Foundation grants dwindled to only four percent of the total. About 22 percent was raised by unrelenting, audience-eroding on-air solicitation campaigns. So-called "enhanced underwriting" by business and industry, an ill-disguised concession to the commercial system, delivered 16 percent last year, a growth of four percent in five years.

As of April, viewer giving was off by about seven percent, making the public system more dependent than ever on largesse from business. Its interests hardly foster diversity. A decided lack of corporate interest nearly scuttled the airing of a recent documentary series on the history of the civil rights movement, and an upcoming series on the '60s.

Federal deficit problems offer little hope for fiscal relief from Congress.

There is a sensible way to put public broadcasting on a sound, long-term footing, reversing the "unregulation" of the Reagan years. Just as truckers effectively pay a "use" fee for public highways through gasoline taxes, commercial communicators must help pay for their hugely profitable exploitation of the public air; specifically, through a tax on on-air advertising billings, or on the profits of commercial stations, networks, and cable providers, or through a "spectrum" access fee on their frequency or cable-box channel allocations.

Viewers and listeners who benefit directly from public broadcasting must help as well, through an excise tax on their set purchases, or an annual set-licensing fee, as in Great Britain. A positive side-effect would be to spare them from those nettlesome fund drives.

It's also time to consider the formation of a public entity, which might be called P-P-B, People for Public Broadcasting. The citizens' group would lobby for the system, raise public funds for it, and provoke the kind of public debate and discussion on the role of "electric" media in society that America has so far managed to evade.

Political maturity is required here. The "tube-face" is where 98 percent of American homes plug into the world. It's time for politicians and ideologues to affirm that the audience's right to programs of quality is not a partisan matter.●

CORRECTING THE ENGROSSMENT OF S. 1970

Mr. LUGAR. Mr. President, I ask unanimous consent that in the engrossment of S. 1970, the language that was amendment No. 2116 be modified by the following technical corrections that I now send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. I have been informed by Senator ROTH who has drafted these modifications that he has discussed the changes with Senator SIMON and Senator DIXON, as well as Senator HEINZ and Senator WIRTH. There is agreement the language referred to needs to be modified. I urge my colleagues to agree to this unanimous-consent request.

The PRESIDING OFFICER. The request has been agreed to.

The modification is as follows:

MODIFICATION TO THE LANGUAGE OF AMENDMENT No. 2116 OF S. 1970

On page 55, line 20 and 21, strike out "EMBEZZLEMENT".

On page 55, line 23, insert "Institutions" after "Financial".

On page 57, line 4, strike out "412" and insert "411".

On page 57, line 14, insert "new" after "1".

On page 59, line 16, strike out "401" and insert "411".

On page 63, line 19, strike out "the" after "for".

On page 64, line 7, strike out "to".

On page 66, line 10, strike out "PETITION" and insert "REQUEST".

On page 68, line 10, strike out "425( )" and insert "435(c)".

On page 69, in the matter which follows line 9, strike out "special awards" and insert "special rewards".

On page 70, line 14, strike out "rewards" and insert "awards".

On page 71, line 5, strike out "3059A(d)" and insert "3059A(e)".

On page 72, line 25, strike out "(c)" and insert "(3)".

On page 74, line 11, insert "," after "nature".

On page 75, line 20, strike out "(1)".

On page 75, line 24, insert "the" after "if".

On page 76, line 19, strike out "to".

On page 77, line 13, strike out "435(b) or (c)" and insert "435(c)".

On page 78, line 16, strike out "PETITION" and insert "REQUEST".

On page 78, line 19, strike out "436(d)(2)" and insert "436(d)(1)(B)".

On page 79, line 1, strike out "436(d)(2)" and insert "436(d)(1)(B)".

On page 79, line 22, strike out "3059A(d)" and insert "3059A(e)".

On page 81, line 16, insert "Institutions" after "Financial".

On page 81, line 18, strike out "this".

On page 82, line 10, strike out "this".

On page 87, line 12, strike out "General;" and insert "General's".

AUTHORIZATION OF APPROPRIATIONS FOR THE TAFT INSTITUTE

Mr. CRANSTON. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1939.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1939) entitled "An Act to extend the authorization of appropriations for the Taft Institute," do pass with the following amendment:

Strike out all after the enacting clause and insert:

That section 1373 of the Education Amendments of 1980 is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 1373. There are authorized to be appropriated to carry out this subpart—

"(1) $750,000 for fiscal year 1990;

"(2) $500,000 for fiscal year 1991; and

"(3) $250,000 for fiscal year 1992.

No funds are authorized to be appropriated to carry out this subpart for fiscal year 1993 or any succeeding fiscal year.".

SEC. 2. It is the sense of the House of Representatives to reject any extraneous amendments not related to the subject of this bill.

Mr. CRANSTON. Mr. President, I move that the Senate disagree with the House amendment, agree to a request for a conference, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer [Mr. BINGAMAN] appointed Mr. KENNEDY, Mr. PELL, Mr. DODD, Mr. HATCH, and Mrs. KASSEBAUM conferees on the part of the Senate.

FEDERAL COMMUNICATIONS COMMISSION AUTHORIZATION ACT

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 406, S. 1022, the Federal Communications Commission reauthorization.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1022) to amend the Federal Communications Act of 1934.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment to strike all after the enacting clause, and inserting in lieu thereof the following:

That this Act may be cited as the "Federal Communications Commission Authorization Act of 1989".

AUTHORIZATION OF APPROPRIATIONS

SEC. 2. (a) Section 6 of the Communications Act of 1934 (47 U.S.C. 156) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

SEC. 6. (a) There are authorized to be appropriated for the administration of this Act by the Commission $109,831,000 for fiscal year 1990 and $119,831,000 for fiscal year 1991, together with such sums as may be necessary for increases resulting from adjustments in salary, pay, retirement, other employee benefits required by law, and other nondiscretionary costs, for each of the fiscal years 1990 and 1991.

"(b) In addition to the amounts authorized to be appropriated under this section, not more than 2 percent of the amount of any fees or other charges payable to the United States which are collected by the Commission shall be available to the Commission until expended to defray the fully distributed costs of such fees collection.".

COMMERCIAL RADIO OPERATOR EXAMINATIONS

SEC. 3. Section 4(f) of the Communications Act of 1934 (47 U.S.C. 154(f)) is amended by adding at the end the following new paragraph:

"(5)(A) The Commission, for purposes of preparing and administering any examination for a commercial radio operator license or endorsement, may accept and employ the services of persons that the Commission determines to be qualified. Any person so employed may not receive compensation for such services, but may recover from examinees such fees as the Commission permits, considering such factors as public service and cost estimates submitted by such person.

"(B) The Commission may prescribe regulations to select, oversee, sanction, and dismiss any person authorized under this paragraph to be employed by the Commission.

"(C) Any person who provides services under this paragraph or who provides goods in connection with such services shall not, by reason of having provided such service or goods, be considered a Federal or special government employee.".

TRAVEL REIMBURSEMENT PROGRAM

SEC. 4. Section 4(g)(2)(D) of the Communications Act of 1934 (47 U.S.C. 154(g)(2)(D)) is amended by striking "1989" and inserting in lieu thereof "1991".

COMMUNICATIONS SUPPORT FROM OLDER AMERICANS

SEC. 5. Section 6(a) of the Federal Communications Commission Authorization Act of 1988 (47 U.S.C. 154 note) is amended by striking "and 1989" and inserting in lieu thereof ", 1989, 1990, and 1991".

HAWAII MONITORING STATION

SEC. 6. (a) Section 9(a) of the Federal Communications Commission Authorization Act of 1988 (Public Law 100-594; 102 Stat. 3024) is amended by striking "and 1990" and inserting in lieu thereof ", 1990, 1991, and 1992".

(b) Section 9(e) of the Federal Communications Commission Authorization Act of 1988 (Public Law 100-594; 102 Stat. 3025) is amended by striking ", in fiscal years 1989 and 1990".

TARIFF NOTICE PERIOD

SEC. 7. (a) Section 203(b)(1) of the Communications Act of 1934 (47 U.S.C. 203(b)(1)) is amended by striking "ninety days notice" and inserting in lieu thereof "120 days' notice".

(b) Section 203(b)(2) of the Communications Act of 1934 (47 U.S.C. 203(b)(2)) is amended by striking "ninety days" and inserting in lieu thereof "120 days".

AMATEUR RADIO SERVICE RECIPROCAL PERMITS

SEC. 8. (a) Section 303(l)(3) of the Communications Act of 1934 (47 U.S.C. 303(l)(3)) is amended by striking "bilateral agreement between the United States and the alien's government" and inserting in lieu thereof "multilateral or bilateral agreement, to which the United States and the alien's government are parties,".

(b) Section 310(c) of the Communications Act of 1934 (47 U.S.C. 310(c)) is amended by striking "bilateral agreement between the United States and the alien's government" and inserting in lieu thereof "multilateral or bilateral agreement, to which the United States and the alien's government are parties,".

WILLFUL OR MALICIOUS INTERFERENCE

SEC. 9. Part I of title III of the Communications Act of 1934 (47 U.S.C. 301 et seq.) is amended by adding at the end the following new section:

"WILLFUL OR MALICIOUS INTERFERENCE

"SEC. 333. No person shall willfully or maliciously interfere with or cause interference to any radio communications of any station licensed or authorized by or under this Act or operated by the United States Government.".

MOBILE RADIO SERVICE

SEC. 10. Part I of title III of the Communications Act of 1934 (47 U.S.C. 301 et seq.), as amended by section 9 of this Act, is further amended by adding at the end the following new section:

"MOBILE RADIO SERVICE

"SEC. 334. (a) When any public or private mobile radio services licensee is notified in writing by a Federal, State, or local law enforcement agency, acting within its jurisdiction, that such agency has obtained a judicial determination that there is probable cause to believe that a mobile radio unit is being used by any individual for the purpose of transmitting or receiving information in connection with the manufacture, distribution, importation, exportation, or sale of a controlled substance in violation of Federal, State, or local law, the licensee shall, after reasonable notice to the subscriber, discontinue service to the mobile radio unit being used by such individual. The licensee shall not be subject to damages or to any civil or criminal penalty or forfeiture for discontinuing such service.

(b) When a public or private mobile radio services licensee obtains notification in writing of a determination by a Federal, State, or local court or administrative body, acting in accordance with its jurisdiction and authority, that a person receiving, or seeking to receive, mobile radio service from the licensee is not lawfully in possession of the mobile radio unit through which service is or would be provided, the licensee shall, after reasonable notice to the subscriber, discontinue service or refuse service to such person. The licensee shall not be subject to damages or to any civil or criminal penalty or forfeiture for discontinuing or refusing such service.

"(c) Nothing in subsection (a) or (b) shall be deemed to prejudice the right of any person affected thereby to secure an appropriate determination, as otherwise provided by law, in a Federal court or a State or local tribunal or agency, that mobile radio service to such person should not be discontinued or refused or should be restored.".

AMENDMENT NO. 2312

Mr. CRANSTON. Mr. President, on behalf of Senator INOUYE, I send a substitute amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from California [Mr. CRANSTON], for Mr. INOUYE, proposes an amendment numbered 2312.

Mr. CRANSTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Federal Communications Commission Authorization Act of 1990".

AUTHORIZATION OF APPROPRIATIONS

SEC. 2. (a) Section 6 of the Communications Act of 1934 (47 U.S.C. 156) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 6. (a) There are authorized to be appropriated for the administration of this Act by the Commission $109,831,000 for fiscal year 1990 and $119,831,000 for fiscal year 1991, together with such sums as may be necessary for increases resulting from adjustments in salary, pay, retirement, other employee benefits required by law, and other nondiscretionary costs, for each of the fiscal years 1990 and 1991.

"(b) In addition to the amounts authorized to be appropriated under this section, not more than 4 percent of the amount of any fees or other charges payable to the United States which are collected by the Commission during fiscal year 1990 are authorized to be made available to the Commission until expended to defray the fully distributed costs of such fees collection.

"(c) Of the amounts appropriated pursuant to subsection (a) for fiscal year 1991, such sums as may be necessary not to exceed $2,000,000 shall be expended for upgrading and modernizing equipment at the Commission's electronic emissions test laboratory located in Laurel, Maryland.".

COMMERCIAL RADIO OPERATOR EXAMINATIONS

SEC. 3. Section 4(f) of the Communications Act of 1934 (47 U.S.C. 154(f)) is amended by adding at the end the following new paragraph:

"(5)(A) The Commission, for purposes of preparing and administering any examination for a commercial radio operator license or endorsement, may accept and employ the services of persons that the Commission determines to be qualified. Any person so employed may not receive compensation for such services, but may recover from examinees such fees as the Commission permits, considering such factors as public service and cost estimates submitted by such person.

"(B) The Commission may prescribe regulations to select, oversee, sanction, and dismiss any person authorized under this paragraph to be employed by the Commission.

"(C) Any person who provides services under this paragraph or who provides goods in connection with such services shall not, by reason of having provided such service or goods, be considered a Federal or special government employee.".

TRAVEL REIMBURSEMENT PROGRAM

SEC. 4. Section 4(g)(2)(D) of the Communications Act of 1934 (47 U.S.C. 154(g)(2)(D)) is amended by striking "1989" and inserting in lieu thereof "1992".

COMMUNICATIONS SUPPORT FROM OLDER AMERICANS

SEC. 5. Section 6(a) of the Federal Communications Commission Authorization Act of 1988 (47 U.S.C. 154 note) is amended by striking "and 1989" and inserting in lieu thereof "; 1989, 1990, and 1991".

HAWAII MONITORING STATION

SEC. 6. (a) Section 9(a) of the Federal Communications Commission Authorization Act of 1988 (Public Law 100-594; 102 Stat. 3024) is amended—

(1) by striking "and 1990" and inserting in lieu thereof ", 1990, 1991, and 1992";

(2) in paragraph (4) by striking "a facility at the new location" and inserting in lieu thereof "facilities at new locations"; and

(3) in paragraph (6) by striking "a facility at a new location" and inserting in lieu thereof "facilities at new locations".

(b) Subsection (b) of section 9 of the Federal Communications Commission Authorization Act of 1988 (Public Law 100-594; 102 Stat. 3024) is amended to read as follows:

"(b) The Administrator of General Services is authorized to dispose of, only to the State of Hawaii, as much of the real property (including improvements thereon) at the present location of the Hawaii Monitoring Station as is necessary for the purposes of relocating, at a minimum, the antennas associated with the Monitoring Station.".

(c) Section 9 of the Federal Communications Commission Authorization Act of 1988 (Public Law 100-594; 102 Stat. 3024) is amended by striking subsections (c) and (d), by redesignating subsection (e) as subsection (i), and by inserting immediately after subsection (b) the following new subsections:

"(c) Pursuant to the authority provided in subsection (b), the Administrator of General Services shall sell and convey to the State of Hawaii the real property and improvements thereon described in subsection (b) on an expedited basis, including provisions for lease-back as required.

"(d) In consideration of such sale, the State of Hawaii shall agree to—

"(1) pay to the General Services Administration an amount not less than the fair market value, as determined by the Administration of General Services, of the property to be conveyed under subsection (c), or

"(2) convey to the Federal Communications Commission real property that would be suitable, as determined by the Commission, for the relocation of the Hawaii Monitoring Station and, in addition, pay to the General Services Administration an amount equal to the difference between the fair market value of the two properties, as determined by the Administrator of General Services, if the Federal property conveyed is of greater value.

"(e) The General Services Administration shall reimburse the Federal Communications Commission from the net proceeds of such sale for all of the expenditures of the Commission associated with the relocation of the Hawaii Monitoring Station. Any such reimbursed funds received by the Commission shall remain available until expended.

"(f) The net proceeds of such sale, less any funds reimbursed to the Federal Communications Commission pursuant to subsection (e), and less normal and reasonable charges by the General Services Administration for costs associated with such sale, shall be deposited in the general funds of the Treasury.

"(g) If the General Services Administration and the State of Hawaii are unable to execute a contract for sale as required by this section or complete any other transaction necessary to carry out such sale, the Administrator of General Services shall not proceed to public sale of the property described in subsection (b).

"(h) The Hawaii Monitoring Station shall continue its full operations at its present location until new facilities have been built and are fully operational.".

(d) Subsection (i) of section 9 of the Federal Communications Commission Authorization Act of 1988 (Public Law 100-594; 102 Stat. 3024), as so redesignated by subsection (c) of this section, is amended by striking ", in fiscal years 1989 and 1990".

TARIFF NOTICE PERIOD

SEC. 7. (a) Section 203(b)(1) of the Communications Act of 1934 (47 U.S.C. 203(b)(1)) is amended by striking "ninety days notice" and inserting in lieu thereof "one hundred and twenty days' notice".

(b) Section 203(b)(2) of the Communications Act of 1934 (47 U.S.C. 203(b)(2)) is amended by striking "ninety days" and inserting in lieu thereof "one hundred and twenty days".

AMATEUR RADIO SERVICE RECIPROCAL PERMITS

SEC. 8. (a) Section 303(*l*)(3) of the Communications Act of 1934 (47 U.S.C. 303(*l*)(3) is amended by striking "bilateral agreement between the United States and the alien's government" and inserting in lieu thereof "multilateral or bilateral agreement, to which the United States and the alien's government are parties,".

(b) Section 310(c) of the Communications Act of 1934 (47 U.S.C. 310(c)) is amended by striking "bilateral agreement between the United States and the alien's government" and inserting in lieu thereof "multilateral or bilateral agreement, to which the United States and the alien's government are parties,".

WILLFUL OR MALICIOUS INTERFERENCE

SEC. 9. Part I of title III of the Communications Act of 1934 (47 U.S.C. 301 et seq.) is amended by adding at the end the following new section:

"WILLFUL OR MALICIOUS INTERFERENCE

SEC. 333. No person shall willfully or maliciously interfere with or cause interference to any radio communications of any station licensed or authorized by or under this Act or operated by the United States Government.".

APPLICABILITY OF FORFEITURES TO APPLICANTS

SEC. 10. The first sentence of section 503(b)(5) of the Communications Act of 1934 (47 U.S.C. 503(b)(5)) is amended by inserting "and if such person is not an applicant for a license, permit, certificate, or other authorization issued by the Commission," immediately before "unless, prior".

Mr. INOUYE. Mr. President, we now have before us S. 1022, legislation to reauthorize the Federal Communications Commission [FCC or Commission] for fiscal years 1990 and 1991. We have been meeting with our House counterparts to resolve any differences between the bill already passed by the House and the Senate bill as reported out of committee. I believe we have reached agreement on most, if not all, of the differences between the two bills. The substitute has been cleared with the ranking members on both sides of the aisle, and I am aware of no objection to it. I thus would like to take up my substitute to S. 1022 as reported and move for its passage by the full Senate at the conclusion of my remarks.

Before I do so, I would like to review briefly the provisions of the substitute I am offering:

FUNDING LEVELS

The substitute authorizes $109,831,000 in funding for fiscal year 1990, which is the same amount contained in the Senate and House bills and is the same amount requested by the President. For fiscal year 1991, the substitute retains the figure of $119,831,000 contained in the Senate bill, as reported, rather than the figure of $121,478,000 contained in the House bill. The President requested an appropriation of $117,998,000 for fiscal year 1991. Since the President's request is well below the amount authorized by the Senate bill, as reported, we have chosen to accept the figure in the Senate bill, as reported, in order to be fiscally responsible.

FCC FEES RETENTION

The substitute accepts the provision in the House bill that authorizes 4 percent of any fees or other charges collected by the Commission during fiscal year 1990 to be "authorized to be made available to the Commission until expended." This provision is intended to help defray the FCC's fully distributed costs of enforcing the fee collection provisions in section 8 of the Communications Act.

The House bill had authorized the FCC to retain 4 percent of these fees for both fiscal years 1990 and 1991. The Senate bill, as reported, declares that 2 percent of the fees collected by the Commission "shall be available" for both fiscal years.

The substitute accepts the House's 4-percent figure for fiscal year 1990 only and the House wording out of recognition that the FCC's costs of enforcing this congressionally mandated fees provision will be substantial and that even the 4-percent figure will not compensate the Commission completely for its costs of collecting the fees. Even at the 4-percent level, the FCC informs us that it is likely to incur costs in collecting these fees that are $1.5 million greater than the amounts retained in fiscal year 1990. Because the FCC's fiscal year 1990 appropriation passed the Senate before the reconciliation bill was enacted, the appropriation level did not account for this additional expense. The substitute bill would allow the FCC to retain 4 percent of these fees for only fiscal year 1990 in recognition of the unfairness of this unique situation.

LAUREL LABS

The substitute includes the House statutory provision concerning the upgrading and modernizing of the Commission's test laboratory in Laurel, MD. As in the House bill, the substitute directs that no more than $2 million "shall be expended" for upgrading this laboratory. Although the Senate bill, as reported, did not contain statutory language directing the expenditure of funds for the laboratory, the Commerce Committee explicitly expressed its intention that the FCC expend such funds for this purpose. The committee amended S. 1022 as introduced to increase the FCC's authorized funding for fiscal year 1991 by $2 million—from $117,831,000 to $119,831,000—before reporting the bill. The committee report accompanying the bill expressly declares that the $2 million "is to be used for the sole purpose of modernizing the FCC's Electronics Emissions Test Laboratory in Laurel, MD." (Senate Report 101-215, p. 2). Thus, by accepting the House statutory language a requirement that the Commerce Committee has already imposed in its report.

TRAVEL REIMBURSEMENT PROGRAM

The substitute bill also extends the FCC's travel reauthorization program until 1992. Both the Senate bill, as reported, and the House bill would have extended the program until 1991. The substitute extends the program an additional year because of its demonstrated success. Such an extension should also permit the FCC to continue to implement the travel reimbursement program through the end of fiscal year 1992 even if the next FCC authorization bill is not passed until after the end of 1991.

HAWAII MONITORING STATION

In the FCC Authorization Act of 1988, the Congress included a provision permitting the FCC to move the Waipahu, Oahu, monitoring station to a new suitable location. The bill reported by the Senate would have extended by 2 years the FCC's authority to relocate the monitoring facility. The House bill contained no provisions concerning this monitoring station.

The substitute extends the FCC's authority to relocate the monitoring station for 2 years until 1992. The substitute also, however, makes some substantial changes in the authorizing language to ensure that the land currently being used for the Hawaii monitoring station is sold to the State of Hawaii, which has a strong public interest in acquiring the property.

Under the new language contained in this substitute, the Administrator of the General Services Administration [GSA] shall sell to the State of Hawaii as much of the land associated with the Hawaii monitoring station as is necessary to relocate, at a minimum, the antennas associated with the monitoring station. The State of Hawaii is permitted either to pay their fair market value, as determined by the Administrator of the GSA, of the property it acquires or to swap another piece of property for the property acquired from GSA and pay the difference in price between the two properties, if the value of the property conveyed by the State of Hawaii is less than the value of the property it receives. These provisions do not foreclose the State of Hawaii from buying or selling these properties in conjunction with or as an agent for a third party that the State of Hawaii deems appropriate. Together, these provisions should provide the FCC, the GSA, and the State of Hawaii with sufficient flexibility to allow them to reach an agreement on the disposition of this property expeditiously.

As in the Senate bill, the substitute ensures that the Hawaii monitoring facility will continue to fully operate in the present location until new facilities are fully operational at a new location. The GSA shall reimburse the FCC for the expenses of the relocation from the net proceeds of the sale. Any

excess funds from the sale of the property will be deposited into the general funds of the Treasury.

The language further directs that the provisions of this section should in no way disrupt or defer the ongoing programs or regulatory activities of the Commission by diverting appropriated funds to the relocation of the Hawaii facilities. While we assume that the sale of the property will result in adequate funds for the relocation of the monitoring facilities, if this does not occur, the FCC should immediately inform the committee, and a supplemental appropriation can then be considered that would cover any shortfall.

STOLEN MOBILE TELEPHONES OR TELEPHONES USED FOR DRUG DISTRIBUTION

The substitute does not contain the provisions in the Senate bill, as reported, concerning the procedures to be followed if there is a suspicion that a mobile radio unit is stolen or is being used to engage in the illegal distribution of a controlled substance. These provisions were not included in the House bill. These provisions raise several important issues which deserve to be studied in greater detail before they are adopted into law. We have thus agreed to drop these provisions so that both Houses of Congress can explore these issues more fully.

TECHNICAL AMENDMENT

In the Omnibus Budget Reconciliation Act of 1989, Public Law No. 101-239, Congress amended section 503(b)(2) of the Communications Act in a manner that, as the conference report made clear, was intended, inter alia, to "clarif[y] and confim [] the FCC's authority to impose forfeitures on applicants who engage in misconduct during the application process." Unfortunately, however, Congress did not amend section 503(b)(5) of the act, which by its terms requires that a citation, rather than a forfeiture, be issued to a first-time offender who does not hold a Commission authorization. In order to correct this apparent anomaly, and to clarify that the Commission need not first issue a citation before imposing a forfeiture on an applicant for a Commission authorization, the substitute includes a technical amendment to section 503(b)(5). This provision was not contained in either the Senate bill, as reported, or the House bill but is not controversial and is consistent with the intent of Congress.

FCC TRADE AUTHORITY

The House adopted a provision—Section 9 of the House bill—that would have given the FCC explicit authority to assess the impact of its public interest decisions "on the foreign commerce of the United States." The substitute bill being considered today does not contain any similar provision. This omission should not be taken as an indication of any less concern about the FCC's ability to consider trade matters when making its decisions. Rather, the decision not to include this provision simply reflects the belief of the Congress that the FCC already has ample authority to consider the impact of its decisions on foreign commerce before making those decisions.

UNCHANGED PROVISIONS

The substitute bill includes all the other provisions that were contained in both the Senate bill, as reported, and the House bill. These provisions are as follows:

The Commission is given additional authority to prevent willful or malicious interference to radio communications.

The Commission can extend the tariff notice period from 90 to 120 days with the extra time used primarily for the processing of access charge tariffs.

The Commission may accept and employ the services of qualified persons to prepare and administer commercial radio operator exams for a fee that the Commission determines is appropriate, without those persons being considered Federal employees.

The Older Americans Program is extended for an additional 2 years until the end of 1991.

The Commission may permit aliens to operate over the amateur radio frequencies based on multilateral treaties as well as bilateral treaties.

Mr. President, this consensus bill reflects the efforts of the members on both sides of the aisle. I appreciate the concerns and the cooperation shown by the chairman of the Commerce Committee, Senator HOLLINGS, the ranking minority member of the Commerce Committee, Senator DANFORTH, the ranking minority member of the Communications Subcommittee, Senator PACKWOOD, and their staff. I believe that this bill accomplishes several objectives that will help smooth the regulatory and administrative process and also reflects the goodwill shown by the new Chairman and Commissioners at the FCC. For all these reasons, I offer my substitute amendment and urge my colleagues to support it.

Mr. HOLLINGS. Mr. President, I support the substitute amendment being offered by my colleague Senator INOUYE to S. 1022, the Federal Communications Commission reauthorization bill. I commend the distinguished chairman of the Commerce Committee's Communications Subcommittee for his leadership in crafting this bipartisan piece of legislation and bringing it to the floor. I believe it is important for us to continue our efforts to oversee the activities of the FCC. The FCC is dealing with a number of critical issues—for example, the financial interest and syndication rules, price caps for the telephone companies, the deregulation of AT&T, the comparative broadcast proceedings, and cable regulation—that have tremendous implications for the communications industry. This bill has provided us with a useful vehicle for monitoring the FCC's recent activities and includes a number of noncontroversial provisions that should be helpful in shaping and enforcing our communications policies of the future.

As you know, Mr. President, the FCC and I have had our differences over the years. Nevertheless, the new group of FCC Commissioners, led by the new FCC Chairman, Mr. Al Sikes, appears to be more receptive to the concerns of Congress than their predecessors. Let me remind them, however, I, and the rest of my colleagues, will continue to subject their decisions to a high degree of scrutiny because of the importance of the issues they must consider. I look forward to working with the FCC on the issues before the Commission and Congress this year and in the future.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2312) was agreed to.

Mr. CRANSTON. I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DANFORTH. Mr. President, today the Senate is considering legislation to reauthorize the Federal Communications Commission for fiscal years 1990 and 1991. I want to express my support for the substitute amendment offered by Senator INOUYE, chairman of the Communications Subcommittee.

This legislation authorizes the continued operation of a very important governmental body. Now more than ever, the Commission plays a crucial role in the oversight and regulation of the communications industry in this country. As we have moved into the Information Age, a premium has been placed on the need for rapid and efficient communication. Television and radio broadcasts, along with our telecommunications network, are the roadways by which information travels within American society. In their role, Chairman Alfred Sikes and the Commissioners have continued to encourage the economic strength and technological leadership of U.S. industry. This is reflected in the Commission's work to set a standard for high-definition television by 1993.

The amendment currently before the Senate authorizes $109,831,000 for fiscal year 1990 and $119,831,000 for fiscal year 1991. The FCC has been appropriated the full $109,831,000 for fiscal year 1990. The bill will also allow the FCC to keep 4 percent of the cost of regulation fees it collects in

fiscal year 1990 in order to defray the costs of collecting such fees, which is consistent with the House FCC authorization. Finally, the bill will allow the FCC to upgrade its laboratory testing facilities.

Mr. President, I would like to commend Senator INOUYE for his work in developing this legislation. I urge its passage.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Commerce Committee be discharged from further consideration of H.R. 3256; that the Senate proceed to its immediate consideration; that all after the enacting clause be stricken; that the text of S. 1022, as amended, be inserted in lieu thereof; that the bill be read for a third time and passed; and a motion to reconsider the vote be laid on the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (H.R. 3256), as amended, was passed.

Mr. CRANSTON. Mr. President, I ask unanimous consent that S. 1022 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

CHILDREN'S TELEVISION ACT

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 424, S. 1992, the Children's Television Act of 1990.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (S. 1992) to require the Federal Communications Commission to ensure that broadcasters provide children's television programming that meets the educational and informational needs of the child audience, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to the immediate consideration of the bill.

Mr. INOUYE. Mr. President, we are here today to consider S. 1992, legislation to ensure that television stations better serve our Nation's children. The legislation imposes limits on the amount of time that can be devoted to commercials during a children's television program and requires the FCC to consider at renewal time whether the licensee has met the educational and informational needs of children in its programming.

This legislation is the result of the efforts of the members of the Commerce Committee and other Senators, including Senators WIRTH, METZENBAUM, and LAUTENBERG. Senator WIRTH has been working on this issue for over 15 years and without his persistence, we would not be here today to take this step for our children. I also want to thank Senators METZENBAUM and LAUTENBERG for their dedication and assistance in getting us to this point today. Finally, I want to thank the broadcasters for their cooperation and assistance on this legislation.

For the past 25 years, Federal policymakers have discussed the obligations of broadcasters to program for children. As far back as 1960, the FCC decided to include children as one of the groups whose programming needs had to be met by television broadcasters. Over a decade later, in 1974, the Commission issued the Children's Television Report and Policy Statement which concluded that broadcasters have a special obligation to serve children as a "substantial and important" community group and that children's programming should be aired throughout the weekly schedule.

In 1984, the FCC issued a report, "Television Programming for Children." The thrust of this report was to adhere to the general, voluntary obligations in the 1974 report. It concluded that broadcasters should not have any specific programming requirements. In another proceeding, the Commission determined that broadcasters should not be subject to any advertising restrictions. In both cases the Commission stated that it believed that the interests of children could be best protected by having the marketplace work, with virtually no interference by the Government.

In 1987, the Court of Appeals ruled that the FCC had not sufficiently justified its repeal of the advertising guidelines for children's programming and ordered the FCC to review its decision. The court then required the FCC to reconsider its action. So far, no Commission action has been taken. It was because of the Commission's reluctance to act to enhance children's television that the Congress has had to step in.

The amendment being offered today to this legislation has several provisions:

First, it extends the commercial time limits to children's programming carried on cable television;

Second, it revises the language concerning the obligation of television licensees to serve the needs of children by requiring that the FCC consider, at renewal time, whether a licensee met the educational and information needs of children through its overall programming, including programming specifically designed to meet such needs;

Third, it deletes the provision of this legislation that requires the FCC to act within 90 days when it considers complaints concerning advertising matter broadcast during children's programming; and

Fourth, it incorporates the National Endowment For Children's Educational Television Act of 1989 as a new title II—this provision is identical to S. 797 as passed by the Senate last year.

As to the consideration of children's television service in licensee renewal, the congressional concern is obvious. Our children are this Nation's most valuable resource, and we need to pay special attention to their needs. Child by child, we build this Nation. They are the future of the Nation, and we need to ensure that they are equipped to meet this enormous responsibility.

Children, especially young children, watch television a great deal. You are all familiar with the startling statistic that by the time a child graduates from high school, he or she will have spent more time in front of the television set than in the classroom. Television is thus the child's window to the world. To some reasonable extent, it should not only entertain, but also inform and educate.

The commercial broadcaster is a public trustee, given free use of a valuable portion of the spectrum in exchange for volunteering to serve the public interest. There is no greater obligation in this respect than to provide some reasonable amount of public service for the unique child audience. The FCC has stressed this obligation since 1974.

What Congress is saying, in S. 1992, is that broadcasters must focus on this critically important area of public service to children throughout its license term, and at the time of renewal, must submit a showing to the FCC that it has reasonably met this bedrock duty. That requirement of a specific showing at renewal is new. Congress is singling out this area for special focus by both the broadcaster and the FCC.

We have left the licensee the greatest possible flexibility in how it discharges its public service obligation to children. We recognize that there is a great variety of ways to serve this unique audience—including programming specially designed to entertain and inform children; family and adult programming that can also contribute to the information needs of children; and cooperative efforts with noncommercial stations to produce and

present educational fare. The list can be extended as far as the imagination of the creative broadcaster and must rely on the good-faith, dedicated judgment of the broadcaster. As the Commission aptly stated in 1974:

> There can be success here only if the broadcaster, to a reasonable extent, puts the profits second and the children first.

Some question has been raised as to the constitutionality of this requirement. I am frankly amazed and baffled. The premise of the Communications Act is that from the many who wish to broadcast, the Government selects some entities to be short-term licensees serving the public interest, and enjoins anyone else using the channel. The licensee is thus a fiduciary for all of those prevented by the Government from using the channel, and its license will be renewed as long as it meets this fiduciary obligation. If the licensee cannot be required to render public service—to children as in this legislation—because that interferes with the editorial discretion of the licensee, that means that the entire act is a farce. We have given away free a precious resource on a wholly unenforceable basis—the licensee is free to play old movies or run advertisements all day and cannot be called into account.

The previous administration opposed this measure on the ground of improper interference with editorial autonomy. The administration would have overturned a 50-year old broadcast scheme that has well served this Nation. The Supreme Court has sustained the constitutionality of the broadcast scheme in an unbroken series of decisions, from 1943 to last month's *Metro Broadcasting Inc.* versus *FCC* (No. 100-453, decided June 27, 1990).

In meeting its obligations under this section, the committee believes that a broad range of both programming and nonbroadcast efforts can meet the standard of service to the child audience required by new section 4. The committee notes that general purpose programming, including programming that is not subject to the commercial guidelines under section 3, can have an informative and educational impact [see "Children's Television Programming," 96 FCC 2d 634, n.39 (1984)] and thus can be relied upon by broadcast licenses as contributing to meeting their obligation in this important area. This is particularly true where special nonbroadcast efforts are undertaken in connection with a licensee's programming to enhance the educational or informational value of such programming to children, and the bill provides that the Commission shall take such efforts into account in determining whether a licensee has met the standard required by section 4. Such efforts might include, for example, the distribution of study guides or reading scripts prior to the broadcast of a program.

Similarly, the committee believes that licensees can serve the educational and informational needs of children by producing or supporting programming which is specifically designed to meet those needs and is intended for broadcast by other—primarily public—stations. The committee believes such efforts, which increase the overall availability of educational children's programming in the licensee's marketplace, should be encouraged. Therefore, the bill provides that the Commission shall also consider any efforts made by a licensee in this area in determining whether the licensee has met the standard required by section 4.

The Commission would, of course, expect that each station will itself broadcast some programming specifically designed for children to serve their educational and informational needs. Educational and informational needs encompass not only intellectual development, but also the child's emotional and social development. Prosocial programming which assists children to discover more about themselves, their families, and the world would qualify. In order to fulfill the obligation imposed under this new subsection, each broadcast licensee must demonstrate that it has provided the child audience with programming which serves its unique educational and informational needs. Under this legislation, the mix is left to the discretion of the broadcaster taking into account what other stations, including noncommercial ones, are doing in this important area. See, Action for Children's Television, supra, 756 F2d at 901-02. The committee thus expects that, in devising this programming, broadcasters shall consider the special characteristics of various segments of the child population and its needs in the current situation. The committee expects that the Commission will continue to defer to the reasonable programming judgments of licensees in this field.

The committee does not intend that the FCC interpret this legislation as requiring or mandating quantification standards governing the amount or placement of children's educational and informational programming that a broadcast licensee must air to pass a license renewal review pursuant to this legislation.

The committee expects licensees to be in compliance with the commercial time limits and the programming standard set forth in title I by September 1991. To facilitate compliance with this act, the committee directs the FCC to provide prompt notice of the requirements of this act.

Concerning the commercial time limits, set forth in subsection (3)(c), the committee intends that the Commission shall evaluate whether the advertising duration limitations for the weekends and weekdays should be equalized. The committee recognizes that it is reimposing regulations similar to those existing prior to deregulation. The committee encourages the FCC to examine the issue of equalization in light of subsequent changes in the children's marketplace that might make equalization appropriate.

Just as with other requirements imposed on broadcasters, such as equal opportunities, it is not the intention of the committee that a cable operator incur any liability for violation of the Commission's rules promulgated pursuant to this act for any secondary transmission of a primary transmission of a broadcast television station licensed by the Commission.

In closing, I urge my colleagues to support this important measure.

Mr. HOLLINGS. Mr. President, today I urge my colleagues to support the Children's Television Act of 1990, and I join wholeheartedly in the remarks of my colleague, Senator INOUYE, on this bill. S. 1992, as amended, represents a consensus of Commerce Committee members. It also represents the culmination of years of work by the Commerce Committee, and in particular the chairman of the Communications Subcommittee, Senator INOUYE, and by many other members, including Senators WIRTH, METZENBAUM, and LAUTENBERG. In addition, I want to commend the broadcast industry for their efforts to help craft legislation to further the interests of this Nation's children.

S. 1992, as amended, is designed to ensure that television programming aimed at our children is responsive to their needs and interests. It also limits the amount of time that can be devoted to commercials during children's programming. In view of the educational crisis this country faces today, we must do all we can to enhance and increase the educational material to which our children are exposed.

American children spend more time watching television than any activity other than sleep. Furthermore, it is well-documented that children under certain ages, unlike adults, are not capable of distinguishing programs from commercials. Thus, television has the ability to influence significantly our children's development. Moreover, it is clear that market forces alone have not worked to improve the quality or quantity of meritorious children's programming available on commercial television. The FCC has has ample opportunity to address these concerns, but has failed to act. Consequently, the responsibility to protect the interests of our Nation's children has fallen on Congress. The legislation before us today represents a sound exercise of that important responsibility.

In addition, we are adding to this legislation the provisions of a bill we already have passed, S. 797, authored by my colleague Senator INOUYE, and which I cosponsored, establishing an Endowment for children's educational programming. This Endowment would provide funding for educational and informational children's programming. The programming produced with the assistance of the Endowment ultimately will be available to anyone who wants to air it, including broadcast stations, cable systems, and schools. This program also will further the important educational interests of our children and enhance significantly the educational function of children's television programming.

Mr. President, at this point I would like to take a few moments to clarify and amplify several of the provisions in this bill relating to the endowment.

There is an emerging bipartisan consensus in this Nation that we must focus more of our collective attention and national resources on educating our Nation's children. The next generation likely will confront enormous challenges, international in scope and extraordinarily complex in nature. America's ability to retain its primacy as a worldwide economic and technological leader ultimately will depend on how well-prepared and well-educated our children are in relation to their peers in other nations.

The National Endowment for Children's Educational Television of 1990, which is incorporated in the legislation before us today and which was developed with the cooperation of dedicated producers and public television leaders, is an important and historic component of a multifaceted program to improve our children's educational experience. Although the medium of television has enormous potential as an educational tool, as illustrated by the success of programs such as "Sesame Street," "Reading Rainbow," "Square One TW," "3-2-1 Contact," and "The Electric Company," far more needs to be done to realize the educational promise of children's television.

This legislation directly addresses one of the keys to enhanced utilization of television for educational purposes: funding of educational programming. For a variety of reasons, funding to develop high-quality educational programming has been scarce and generally inadequate. The creation of the endowment will provide targeted funds for grants to help rectify that marketplace problem.

It is the intent of the committee that moneys authorized to be appropriated under this act be used in a manner that will yield the maximum educational results per dollar expended. The Secretary of Commerce should determine whether this goal can be realized by concentrating funding on a few projects that really can make a difference, rather than by spreading the amounts among many small projects. The eligible programming should be specifically designed to serve the educational, informational, and developmental needs of children, with the objective of improving intellectual skills and better preparing young viewers to learn by establishing a solid emotional and social foundation for intellectual advancement. The programs may range form instructional material primarily intended for classroom use across a wide array of programming formats, including prime-time environment.

Consistant with the goal of maximizing the return on these programming dollars, grants may cover the costs of public awareness and ancillary materials that are program related. for example, they could be used to provide companion printed materials such as books or manuals or computer software for interactive video applications.

The committee recognizes that the enthusiastic participation of the creative production community is critical to the success of the Endowment. There must be sufficient marketplace incentives and a sufficient comfort level within that community to ensure such involvement. To that end, the committee intends that producers of programming funded by endowment grants own the rights to the programming so long as such rights are consistent with the purposes of this act. The Secretary shall ensure that programming funded through the endowment is widely available to commercial broadcasters, cable television, home video, and other distribution systems that will reach our Nation's children, after it has been carried on public or noncommercial television for 2 years. Furthermore, although programming is to be exhibited only on public or noncommercial television for the first 2 years after its production, the Secretary retains the discretion to establish arrangements to meet the legitimate needs of producers, licensees, and the public regarding exhibition and distribution of such programming, so long as these arrangements also meet the goal of distributing the programs as widely as possible. In exercising such discretion, the Secretary shall take into account the continued level of support for this programming, as demonstrated by the willingness of public television licensees across the Nation to continue to exhibit such educational programming for more than 2 years following production.

I believe that this legislation represents a giant step forward for our Nation's children. Our responsibility today is to enact this legislation to protect our children and enhance their educational opportunities. I urge my colleagues to support S. 1992 as amended.

Mr. WIRTH. Mr. President, I have been concerned with the state of children's television in this country for many years. Television is a unique medium that offers incredible opportunties to enrich the lives of America's children. Virtually every developed country in the world devotes more resources than we do on educational television for children. In contrast, our broadcasters often ignore the child audience or offer cartoon programs that are principally designed to promote toys to children. We can do better than this. Indeed, we must do better if we expect America's youth to enjoy the same opportunities to learn from television as children from countries where television is used more wisely as an educational resource.

America's television broadcasters are licensed to serve the public interest. That obligation ought to include programming designed to serve the educational and informational needs of children. But that is not the case today. Because the Federal Communications Commission has loosened its previous requirements in this area, commercial broadcasters have virtually abandoned any efforts to provide children's educational content. Hearings on this topic have revealed study after study which demonstrates that educational programs have literally disappeared from the airwaves on all but PBS stations. Clearly, television's potential to benefit the child audience is not being adequately tapped. Approval of the legislation now at hand could finally reverse this trend.

Today, I offer a substitute amendment to S. 1992 that I am convinced will make important improvements in television's service to America's children. The amendment incorporates the most important element of the legislation I have proposed during the last several Congresses—a requirement that each television licensee provide programming specifically designed for children. Under this new programming standard, a station must serve children's educational and informational needs and in doing so must provide programs devised with children's special learning needs and capabilities in mind. I believe this aspect of the legislation is crucial and a most important accomplishment.

To stipulate that stations must provide programming "specifically designed for children" might seem redundant to some. How could one provide programs to serve the child audience without designing the content with the children's unique interests, needs, and information-processing capabilities in mind? That's a good question, and one I puzzled over long and hard as discussions about this measure proceeded. Earlier attempts to establish a children's programming standard seemed to suggest that content di-

rected at general audiences could somehow fulfill a licensee's obligation in this area. But that perspective overlooks all that we know about how children understand and learn from television.

Children differ tremendously from adults in their thinking and reasoning capacities. While even very young children can make some limited sense out of most television content, the most effective way to communicate to children is to target their particular level of cognitive abilities. Just as one wouldn't try to teach a third-grader how to read by using a college-level text, it makes little sense to suggest that children's needs can be adequately served by programming primarily intended for adults, even if that programming is wholesome family viewing that includes important social lessons.

Under the standards included in this legislation, each television licensee must provide at least some programming specifically designed for children in order to qualify for license renewal. This requirement is unequivocal. Stations may also strengthen their efforts at serving the needs of children in their community by distributing support materials to enhance the value of the educational programming they provide, or by producing or otherwise supporting educational programming broadcast on another station in the same community. Either of these actions could be considered by the FCC in evaluating compliance with this legislation. Finally, licensees must also adhere to appropriate limits on the amount of commercial content presented during their children's programming, another area in which FCC deregulation has led to abuses of the child audience.

Since the FCC rescinded its previous limits on children's advertising in 1984, the marketplace has responded by continually increasing the commercial pitches on children's television. Such increases take unfair advantage of young children who lack the capability to recognize and defend effectively against commercial persuasion.

If a policy limiting children's advertising is appropriate for broadcast television, it is equally important to apply that policy to cable programming. A child is affected no differently by an advertisement seen on a broadcast or a cable station, and thus it makes good sense to apply the advertising limits included in this measure to both sources of children's programming, as the amendment I offer will do.

I should note that program-length commercials [PLC's] are not directly addressed by the substitute legislation. In my original proposal, S. 1215, a provision was included that would categorize such programming as advertising content and thus subject it to the time restrictions on commercial minutes. Let me be emphatic—I continue to support this approach and think it is badly needed.

How bad have things gotten? Consider the case of "Video Power," a new syndicated children's program set to debut in the fall. According to the Wall Street Journal, April 30, 1990, the show's child-host, Johnny Arcade, will "rattle off news items, such as countdowns of top hit video games. Sandwiched in the minute-long countdowns will be 10-second or 20-second commercials, without so much as a pause between the news and the commercials." I wonder how much sense it makes to limit the commercial minutes a station can present during program breaks when there are no limits at all on the advertising permitted during the programs themselves.

At a time when the Federal Trade Commission [FTC] is moving against program-length commercials targeted to adults, it is unfortunate that no one is taking action to limit such crass commercialism directed at children. In the spirit of compromise, my amendment excludes the restriction I had previously proposed for the PLC's in order to accomplish the important gains that the rest of this legislation will realize.

By no means, however, does this measure abandon the issue of children's product-related programming. Under my amendment, the FCC would be required to complete its pending rulemaking on children's advertising policies within 6 months after enactment of this legislation. This rulemaking proceeding, which was ordered by the U.S. Court of Appeals more than 3 years ago, requires the Commission to evaluate the special needs of children in reassessing whether restrictions should be maintained on the overall amount of commercial content presented during children's programming. Included among the issues addressed is the topic of children's program-length commercials.

Because the Commission has already gathered extensive information on this topic, and their final report is long overdue, the most expeditious course is clearly to force the FCC to act. My amendment does just that. Should the Commission fail to adequately resolve this issue, I will again pursue appropriate legislative remedies, and have been pledged the support of my good friends Senators HOLLINGS and INOUYE, who both share my concerns in this area.

Finally, I should not that my amendment also incorporates Senator INOUYE's legislation to create a National Endowment for Children's Television. The need for such a program to support and promote the development of worthwhile educational children's programming has been clearly demonstrated over the years. The marketplace has simply failed to produce such content on its own, in large part because the advertiser-driven television industry does not find children's programming to be a particularly lucrative venture. The endowment will help ensure that television's potential to influence the lives of America's children in a positive fashion is at last fully realized.

The endowment has already been approved by this body, but has not yet been addressed by the House. The proposal remains unchanged from the previous version the Senate has already approved.

This amendment provides for meaningful reform and improvement in children's television. Though there is always more that could be done, I have no reservations about endorsing this proposal. It is a substantial accomplishment, and heralds a major shift in the way in which television will address America's children. Broadcasting in this country remains a privilege, not a right, and those who hold that privilege reap substantial economic benefits. With the enactment of this measure, we can soon expect America's broadcasters to meet the very specific obligation of serving the educational needs of America's children. I am pleased that this package is before us now and I thank Senators INOUYE and HOLLINGS for their assistance in crafting this amendment and bringing the legislation to the floor. I urge my colleagues to join me in supporting this important measure.

Mr. LAUTENBERG. Mr. President, I rise in support of the Children's Television Education Act of 1990.

America's educational system must work harder and harder to prepare our children to compete. Television, with its immense power, has the capacity to assist in that effort, to help educate and inform our children. It can arouse their curiosity about the world around them.

Educating and informing our children should not be an option that broadcasters can choose to pursue or not pursue. It is part of their legal obligation to serve the public. In return for the privilege of using the public's airwaves, as public trustees, they should use the medium to serve our children.

Unfortunately, commercial television broadcasters have failed the children of this Nation. They air precious little programming directed toward children, even less of some educational or informational value. They overwhelm our children with advertising messages; some programs are nothing more than commercials, hawking toys or other products.

When one looks at the market's incentives, their performance is no surprise. Left to their own devices, broadcasters will sell children short. Indeed,

broadcasters who want to serve children, do so at their commercial peril.

This is a classic case that justifies regulation. For years under different leadership, the FCC agreed. In 1974, the FCC adopted its children's television policy statement that set out broadcasters' duty to serve the unique needs of children. Broadcasters were required to air a reasonable amount of programming designed for specific child audiences.

However, in 1984, the Commission in its report on children's television programming and advertising practices let it be known to broadcasters that they need not pay special attention to our Nation's children. The FCC dropped the requirement for age-specific programming. It stated that a broadcaster's duty to serve children could be reduced if children were served by other, unrelated media, like cable TV or VCR's. The Commission also removed the limits on the amount of time that could be taken by commercial ads during a children's program. The U.S. Court of Appeals found that decision unfounded.

Mr. President, the legislation we have before us establishes in the law some minimum requirements on broadcasters.

It limits the amount of time that can be consumed by commercials in each hour of children's programming. The limit would be 10.5 minutes on the weekend and 12 minutes on the weekdays. The limit would also apply to cable television.

It requires the FCC to complete a proceeding on the issue of program length commercials.

Lastly and most important, it restores the special obligation of broadcasters to serve the education and informational needs of children, through not just its overall programming, but programming specifically designed to such children's needs.

Passage and enactment of this legislation—to restore a basic obligation of television broadcasters to serve our children—is long overdue.

Mr. President, I urge my colleagues to support this legislation.

Mr. BURNS. Mr. President, I would like to join my distinguished colleagues in supporting passage of this substitute to S. 1992, the Children's Television Act of 1990.

This substitute is a vast improvement over the original bill that was reported by the committee last November. I opposed that bill, and was prepared to urge the administration to veto it if necessary. It simply went too far in too many areas, and destroyed the compromise that had been in place since the 100th Congress, among Members, the broadcast industry, and public interest groups.

As a result, it took a lot of hard work by a lot of people to get us here today. But first, however, it took Senator INOUYE's willingness to listen to the concerns that I had, and a lot of other people had, about the original version of S. 1992. I commend him for being openminded in this process, and for agreeing to postpone further action on the bill in an effort to see if a new compromise could be reached. He and I agree that while children are our Nation's most precious resource, and that part of a television station's public interest obligations includes serving the child audience, legislation to further those goals is more easily achieved through consensus, not confrontation.

What emerged from these ultimately successful efforts for a compromise is a good bill. It protects children from overcommercialization in their television and cable programs, while acknowledging that advertising is what makes these programs possible.

For the first time, broadcasters' public interest obligations will be spelled out in statute, but unnecessary and unconstitutional programming standards included in earlier bills are avoided.

As they compete in an increasingly complex video marketplace, television stations will have the flexibility they need to serve the child audience in their local communities. Stations will be able to take into account what other children's programming is available in their community in determining their own programming mix.

The bill establishes that each station will have to provide some programming specifically designed for children to serve their educational and informational needs, yet it recognizes that children also are served by family and overall programming aired by a station. Therefore, the FCC also must take that programming into account.

Stations also will be able to help fulfill their obligations to children if they voluntarily engage in nonbroadcast efforts that enhance the educational and informational value of their programming. Similarly, stations that voluntarily support children's educational and informational programming that airs in their markets also will receive credit for that support at the FCC.

To sum up, Mr. President, a bill that had committee members on board, together with the National Association of Broadcasters and Action for Children's Television, is worthy of passage. I urge all of my colleagues to join me in voting for this compromise.

Mr. DANFORTH. Mr. President, I am pleased to support the substitute amendment that Senator INOUYE is offering today to S. 1992, the Children's Television Act. This measure has three main provisions. First, it limits the time that can be devoted to advertising in all children's television programming. Second, it requires the Federal Communications Commission to determine, in broadcast license renewal proceedings, whether the television broadcaster has served the educational and informational needs of children in its programming. Third, it establishes a national endowment to fund educational children's television programming.

I did not support the bill that was ordered reported by the Commerce Committee last October. That bill was unacceptable to most of my fellow Republicans on the committee and was strongly opposed by the broadcasting industry. Over the past several months, however, Senators CONRAD BURNS, DANIEL INOUYE, TIM WIRTH, and others have engaged in lengthy negotiations in an effort to forge a consensus. Mr. President, they have succeeded, and I applaud the results of their hard work.

Mr. President, this substitute retains the best elements of the earlier bills, while solving problems with those bills. The substitute satisfies the concerns that many raised by deleting programming standards that were unnecessarily intrusive in the broadcasters' programming decisions, and indeed, unconstitutional.

I am especially pleased that this measure includes my amendment to apply the advertising limits to children's programming on cable television. Children do not distinguish between cable and over-the-air broadcasts when they watch television. This language ensures that they will be protected from excessive advertising from either source.

This is a good bill. It serves the interests of children without imposing unreasonable burdens on broadcasters and cable operators. Therefore, I recommend its immediate passage.

AMENDMENT NO. 2313

(Purpose: To make an amendment in the nature of a substitute)

Mr. CRANSTON. Mr. President, in behalf of Senators WIRTH, INOUYE, and HOLLINGS, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from California [Mr. CRANSTON], for Mr. WIRTH, (for himself, Mr. INOUYE, Mr. HOLLINGS, Mr. METZENBAUM, Mr. LAUTENBERG, and Mr. BURNS), proposes an amendment numbered 2313.

Mr. CRANSTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Children's Television Act of 1990".

TITLE I—REGULATION OF CHILDREN'S TELEVISION

FINDINGS

SEC. 101. The Congress finds that—

(1) it has been clearly demonstrated that television can assist children to learn important information, skills, values, and behavior while entertaining them and exciting their curiosity to learn about the world around them;

(2) as part of their obligation to serve the public interest, television station operators and licensees should provide programming that serves the special needs of children;

(3) the financial support of advertisers assists in the provision of programming to children;

(4) special safeguards are appropriate to protect children from overcommercialization on television;

(5) television station operators and licensees should follow practices in connection with children's television programming and advertising that take into consideration the characteristics of this child audience; and

(6) it is therefore necessary that the Federal Communications Commission (hereinafter referred to as the "Commission") take the actions required by this title.

STANDARDS FOR CHILDREN'S TELEVISION PROGRAMMING

SEC. 102. (a) The Commission shall, within 30 days after the date of enactment of this Act, initiate a rulemaking proceeding to prescribe standards applicable to commercial television broadcast licensees with respect to the time devoted to commercial matter in conjunction with children's television programming. The Commission shall, within 180 days after the date of enactment of this Act, complete the rulemaking proceeding and prescribe final standards that meet the requirements of subsection (b).

(b) Except as provided in subsection (c), the standards prescribed under subsection (a) shall include the requirement that each commercial television broadcast licensee shall limit the duration of advertising in children's television programming to not more than 10.5 minutes per hour on weekends and not more than 12 minutes per hour on weekdays.

(c) After January 1, 1993, the Commission—

(1) may review and evaluate the advertising duration limitations required by subsection (b); and

(2) may, after notice and public comment and a demonstration of the need for modification of such limitations, modify such limitations in accordance with the public interest.

(d) As used in this section, the term "commercial television broadcast licensee" includes a cable operator, as defined in section 602 of the Communications Act of 1934 (47 U.S.C. 522).

CONSIDERATION OF CHILDREN'S TELEVISION SERVICE IN BROADCAST LICENSE RENEWAL

SEC. 103. (a) After the standards required by section 102 are in effect, the Commission shall, in its review of any application for renewal of a television broadcast license, consider the extent to which the licensee—

(1) has complied with such standards; and

(2) has served the educational and informational needs of children through the licensee's overall programming, including programming specifically designed to serve such needs.

(b) In addition to consideration of the licensee's programming as required under subsection (a), the Commission may consider—

(1) any special nonbroadcast efforts by the licensee which enhance the educational and informational value of such programming to children; and

(2) any special efforts by the licensee to produce or support programming broadcast by another station in the licensee's marketplace which is specifically designed to serve the educational and informational needs of children.

PROGRAM LENGTH COMMERCIAL MATTER

SEC. 104. Within 180 days after the date of enactment of this Act, the Commission shall complete the proceeding known as "Revision of Programming and Commercialization Policies, Ascertainment Requirements and Program Log Requirements for Commercial Television Stations", MM Docket No. 83-670.

TITLE II—ENDOWMENT FOR CHILDREN'S EDUCATIONAL TELEVISION

SHORT TITLE

SEC. 201. This title may be cited as the "National Endowment for Children's Educational Television Act of 1990".

FINDINGS

SEC. 202. The Congress finds that—

(1) children in the United States are lagging behind those in other countries in fundamental intellectual skills, including reading, writing, mathematics, science, and geography;

(2) these fundamental skills are essential for the future governmental and industrial leadership of the United States;

(3) the United States must act now to greatly improve the education of its children;

(4) television is watched by children about three hours each day on average and can be effective in teaching children;

(5) educational television programming for children is aired too infrequently either because public broadcast licensees and permittees lack funds or because commercial broadcast licensees and permittees or cable television system operators do not have the economic incentive; and

(6) the Federal Government can assist in the creation of children's educational television by establishing a National Endowment for Children's Educational Television to supplement the children's educational programming funded by other governmental entities.

SEC. 203. (a) Part IV of title III of the Communications Act of 1934 (47 U.S.C. 390 et seq.) is amended—

(1) by redesignating section 394 as section 393A;

(2) by redesignating subparts B, C, and D as subparts C, D, and E, respectively; and

(3) by inserting immediately after section 393A, as so redesignated, the following new subpart:

"SUBPART B—NATIONAL ENDOWMENT FOR CHILDREN'S EDUCATIONAL TELEVISION

"ESTABLISHMENT OF NATIONAL ENDOWMENT

"SEC. 394. (a) It is the purpose of this section to enhance the education of children through the creation and production of television programming specifically directed toward the development of fundamental intellectual skills.

"(b) There is established, under the direction of the Secretary, a National Endowment for Children's Educational Television. In administering the National Endowment, the Secretary is authorized to make grants to persons proposing to create and produce educational television programming for children. The Secretary shall consult with the Advisory Council on Children's Educational Television in the making of the grants. The grants shall be made on the condition that the programming shall—

"(1) during the first two years after its production, be made available only to public television licensees and permittees and noncommercial television licensees and permittees; and

"(2) thereafter be made available to any commercial television licensee or permittee or cable television system operator, at a charge established by the Secretary that will assure the maximum practicable distribution of such programming, so long as such licensee, permittee, or operator does not interrupt the programming with commercial advertisements.

The Secretary may, consistent with the purpose and provisions of this section, permit the programming to be distributed to persons using other media, establish conditions relating to such distribution, and apply those conditions to any grant. The Secretary may waive the requirements of paragraph (1) of this subsection if the Secretary finds that neither public television licensees and permittees nor noncommercial television licensees and permittees will have an opportunity to air such programming in the first two years after its production.

"(c)(1) The Secretary, with the advice of the Advisory Council on Children's Educational Television, shall establish criteria for making grants under this section. Such criteria shall be consistent with the purpose and provisions of this section and shall be made available to interested parties upon request.

"(2) Applications for grants under this section shall be submitted to the Secretary in such form and containing such information as the Secretary shall require by regulation.

"(d) Upon approving any application under this section, the Secretary shall make a grant to the applicant in an amount determined by the Secretary, except that such amounts shall not exceed 75 percent of the amount determined by the Secretary to be the reasonable and necessary cost of the project for which the grant is made.

"(e)(1) The Secretary shall establish an Advisory Council on Children's Educational Television. The Secretary shall appoint ten individuals as members of the Advisory Council and designate one of such members to serve as Chairman.

"(2) Members of the Advisory Council shall have terms of two years, and no member shall serve for more than three consecutive terms. The members shall have expertise in the fields of education, psychology, child development, or television programming, or related disciplines. Officers and employees of the United States shall not be appointed as members.

"(3) While away from their homes or regular places of business in the performance of duties for the Advisory council, the members of the Advisory Council shall serve without compensation but shall be allowed travel expenses, including per diem in lieu of subsistence, in accordance with 5703 of title 5, United States Code.

"(4) The Advisory Council shall meet at the call of the Chairman and shall advise the Secretary concerning the making of grants under this section.

"(f)(1) Each recipient of a grant under this section shall keep such records as may

be reasonably necessary to enable the Secretary to carry out the Secretary's functions under this section, including records which fully disclose the amount and the disposition by such recipient of the proceeds of such grant, the total cost of the project, the amount and nature of that portion of the cost of the project supplied by other sources, and such other records as will facilitate an effective audit.

"(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purposes of audit and examination to any books, documents, papers, and records of the recipient that are pertinent to a grant received under this section.

"(g) The Secretary is authorized to make such rules and regulations as may be necessary to carry out this section, including those relating to the order of priority in approving applications for projects under this section or to determining the amounts of grants for such projects.

"(h) There are authorized to be appropriated $10,000,000 for fiscal year 1991 for the Secretary to carry out the provisions of this section. Sums appropriated under this subsection for any fiscal year shall remain available for payment of grants for projects for which applications approved under this section have been submitted within one year after the last day of such fiscal year.

"(i) For purposes of this section—

"(1) the term 'educational television programming for children' means any television program which is directed to an audience of children who are 16 years of age or younger and which is designed for the intellectual development of those children, except that such term does not include any television program which is directed to a general audience but which might also be viewed by a significant number of children; and

"(2) the term 'person' means an individual, partnership, association, joint stock company, trust, corporation, or State or local governmental entity.".

(b) Section 397 of the Communications Act of 1934 (47 U.S.C. 397) is amended—

(1) in paragraph (2) by striking "subpart C" and inserting in lieu thereof "subpart D"; and

(2) in paragraph (15)—

(A) by inserting "and subpart B" immediately after "subpart A"; and

(B) by striking "subpart B, subpart C" and inserting in lieu thereof "subpart C, subpart D".

Mr. INOUYE. I would like to ask my good friend, Senator WIRTH, to clarify with me the nature of the programming that would be required by this substitute amendment. What must a broadcaster do to comply with this act?

Mr. WIRTH. As I am sure Senator INOUYE and many of my colleagues appreciate, this legislation is intended to reverse the trend of the 1980's, which has seen commercial television broadcasters virtually abandon their efforts at children's educational programming. My concern throughout the drafting of this legislation has been to ensure that the final language we employ results in just such a reversal. My concern has been that stations might claim that general audience programs that have merit for children, as some family-oriented shows certainly do, alone would fulfill this new obligation. If this outcome occurred, then our effort would have failed. Nothing would have changed in terms of the absence of educational programs uniquely designed for children. That is the area where the marketplace has clearly failed to deliver content essential to the public interest.

To meet the license renewal standard in the amended S. 1992, the broadcast licensee must do two things. First, it must comply with the advertising limits included in this legislation. These are clearly stated and leave little room for interpretation. Second, and more to the point of Senator INOUYE's question, a broadcast licensee must demonstrate it has provided programming specifically developed with the educational and informational needs of children in mind.

Programming that is provided to fulfill this obligation can certainly be designed to be entertaining to children. Indeed, one might hope this would be the case in order to maximize the attractiveness of such content to child viewers, thereby increasing its reach and impact on America's youth. There are several examples of very educational children's programs provided on public broadcasting stations that are so entertaining that they are among children's favorite shows.

But regardless of the entertainment value of the programs offered, the essential element this legislation requires is that some content is offered that takes into account the unique characteristics of the child audience. Young children possess a more limited ability to comprehend programming intended for general audiences. An effort must be made by the licensee to take into account the special characteristics of the various segments of the child audience and their needs.

At the same time, broadcasters can also count among their service to childen programs primarily intended for general audiences which also serve the needs of children. It would be arbitrary and against common sense to suggest that such efforts hold no value for children. However, a licensee cannot rely only on general audience programming to meet its obligation under this legislation. No matter how worthwhile and educational a general purpose adult program may be for the older child, standing alone, it often does not meet the needs of younger children.

Under this act, the FCC will have the responsibility to weigh broadcaster's efforts at serving the educational and informational needs of children in their community, both in the ordinary and comparative renewal situation. To fulfill the required standards, each licensee must demonstrate that some educational and informational programming targeted specifically at children was provided. Of course, it is expected that the FCC, in evaluating the licensee's compliance with this provision, will defer to the licensees judgement to determine how to serve the educational and informational needs of children in its community.

Mr. INOUYE. I am pleased with this explanation. This legislation will prod the Nation's broadcasters to deliver educational children's programming of great value to America's youth. That is not too much to ask of those licensed to operate on the publicly owned airwaves, and such service is clearly in the public interest.

Mr. WIRTH. I have one further concern related to the use of programs primarily to promote products to children—a practice the FCC has termed "program-length commericals." As you know, I have proposed restrictions on such programming when it is targeted at children, but that proposal has been opposed by others and is not included in the amended legislation. It would be a shame if the educational programming stimulated by this measure was wrapped in such a cloak of commercialism, which conceivably could occur. How are we to proceed on this other important issue?

Mr. INOUYE. The limitation on the amount of commercial content that is included as part of this act is based on a recognition that children deserve special protection from excessive television advertising. There is research evidence documenting that young children possess a more limited ability to recognize commercial persuasion. For these same reasons, the FCC currently has a policy that requires licensees to maintain a clear separation between programs and commercials targeted at children. At one time the Commission restricted program length commercials. That policy was effectively eliminated in the mid-1980's.

Thus, as my friend Senator WIRTH suggests, we have a problem with policy in this area. The FCC holds that children's programs and commercial content must be clearly separated.

However, concerns have been raised about programs whose primary purpose appears to be the promotion of products to children. I believe the most expeditious means of reaching a resolution here is to get the FCC to act on this topic. This legislation instructs the FCC to complete its related proceeding within 6 months of enactment of this bill. The Commission has been weighing evidence on this topic as the result of a court-ordered remand of their 1984 deregulation of its children's advertising policies. A report from the FCC on this topic is long overdue. Should the Commission fail to adequately resolve this issue promptly, I will support Senator WIRTH in efforts to address this concern.

Mr. METZENBAUM. Mr. President, I am pleased to cosponsor this substitute amendment to S. 1992, the Children's Television Act of 1990.

This legislation works out the differences between the three different bills which have been introduced in the Senate to help improve the quality of children's television programming. As the author of one of those bills, I applaud my friend and colleague, the distinguished senior Senator from Hawaii and chairman of the Communications Subcommittee, for putting together this thoughtful compromise.

The legislation which the Senate is about to adopt will help minimize the commercial pitch and maximize education in television programming geared for kids.

It is long overdue. For far too long, Federal regulators have been allowing broadcasters to focus not on children's developmental needs but on crass commercialism. Instead of inspiring kids to learn, television has been pushing them to buy, buy, buy.

This legislation will improve the situation. But it will not solve all the problems regarding children's television. Advertising manipulation will still be there. There is still, for instance, the problem of those ads involving 900 telephone lines.

Mr. President, I wonder if I could ask my distinguished colleague from Hawaii a question about this matter?

Mr. INOUYE. I would be glad to answer the question of the Senator from Ohio.

Mr. METZENBAUM. The legislation before us does not address the problem of TV advertisements which induce children to call toll telephone lines and which result in driving up parents' phone bills. I understand the Federal Trade Commission is currently investigating a complaint filed by Action for Children's Television regarding this matter. I wonder if my colleague from Hawaii, in his capacity as chairman of the Communications Subcommittee, is also planning to investigate this matter?

Mr. INOUYE. First let me say that I share the Senator from Ohio's concern about pushing small children to pick up the phone to call taped messages. No parental involvement is necessary and the children are encouraged to keep calling and calling. It can be very costly.

I will hold a hearing this year on the general issue of 900 numbers or toll telephone line services. One of the critical topics we will examine will be the advertising of such services to children. I welcome the Senator from Ohio's involvement.

Mr. METZENBAUM. I look forward to working with the Senator from Hawaii on the matter.

Mr. President, I urge my colleagues to vote for the substitute amendment which is currently before us. It is an important piece of legislation.

Mr. INOUYE. Title II of this legislation authorizes the appropriation of funding for the National Endowment for Children's Education Television. This endowment is intended to provide funding for the production of children's educational television programs. Under this legislation, the Secretary of the Department of Commerce, with the advice of the Advisory Council on Children's Educational Television, is required to establish criteria to be used by the Secretary in making grants for the production of such programming. To provide Congress an opportunity to review the criteria developed under this act, we expect the Secretary to submit the criteria to the Congress for review 60 days prior to the date on which the criteria become effective.

Mr. HELMS. Mr. President, when title II of this legislation was first introduced as a separate bill last fall, the distinguished Senator from Hawaii accommodated some reservations I had about the measure. I was concerned that yet another independent endowment with Federal funding would be created without establishing any criteria for picking and choosing among applicants for the funds.

My reservations about this new Endowment for Children's Educational Television were similar to those that I expressed last year in the controversy involving the National Endowment for the Arts [NEA]. The genesis for the NEA controversy, Mr. President, was that the NEA was established with very little guidance as to the quality of what the NEA was suppose to support with our taxes. We have a duty to avoid that same mistake as we create this new endowment.

I remind Senators that the NEA was established in 1965 with an annual budget of $2 million much as this National Endowment for Children's Educational Television was originally meant to be funded with a budget of $2.5 million. Since 1965, however, the NEA's budget has blossomed to around $170 million a year and has created a federally subsidized constituency for its funding that makes it almost impossible to debate commonsense restrictions on what the NEA sees fit to fund with the taxpayers' money.

It is only prudent, therefore, that Congress get some idea of what criteria the National Endowment for Children's Educational Television will use in subjectively choosing among numerous applicants for taxpayer funding. I commend the Commerce Committee and the Senator from Hawaii for recognizing these concerns by requiring the Children's Endowment to establish such criteria and to provide Congress an opportunity to review the suggested criteria before they become effective.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Colorado.

The amendment (No. 2313) was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1992

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Children's Television Act of 1990".

TITLE I—REGULATION OF CHILDREN'S TELEVISION FINDINGS

SEC. 101. The Congress finds that—

(1) it has been clearly demonstrated that television can assist children to learn important information, skills, values, and behavior while entertaining them and exciting their curiosity to learn about the world around them;

(2) as part of their obligation to serve the public interest, television station operators and licensees should provide programming that serves the special needs of children;

(3) the financial support of advertisers assists in the provision of programming to children;

(4) special safeguards are appropriate to protect children from overcommercialization on television;

(5) television station operators and licensees should follow practices in connection with children's television programming and advertising that take into consideration the characteristics of this child audience; and

(6) it is therefore necessary that the Federal Communications Commission (hereinafter referred to as the "Commission") take the actions required by this title.

STANDARDS FOR CHILDREN'S TELEVISION PROGRAMMING

SEC. 102. (a) The Commission shall, within thirty days after the date of enactment of this Act, initiate a rulemaking proceeding to prescribe standards applicable to commercial televison broadcast licensees with respect to the time devoted to commercial matter in conjunction with children's television programming. The Commission shall, within one hundred and eighty days after the date of enactment of this Act, complete the rulemaking proceeding and prescribe final standards that met the requirements of subsection (b).

(b) Except as provided in subsection (c), the standards prescribed under subsection (a) shall include the requirements that each commercial television broadcast licensee shall limit the duration of advertising in children's television programming to not more than ten and one-half minutes per

hour on weekends and not more than twelve minutes per hour on weekdays.

(c) After January 1, 1993, the Commission—

(1) may review and evaluate the advertising duration limitations required by subsection (b); and

(2) may, after notice and public comment and a demonstration of the need for modification of such limitations, modify such limitations in accordance with the public interest.

(d) As used in this section, the term "commercial television broadcast licensee" includes a cable operator, as defined in section 602 of the Communications Act of 1934 (47 U.S.C. 522).

CONSIDERATION OF CHILDREN'S TELEVISION SERVICE IN BROADCAST LICENSE RENEWAL

SEC. 103. (a) After the standards required by section 102 are in effect, the Commission shall, in its review of any application for renewal of a television broadcast license, consider the extent to which the licensee—

(1) has complied with such standards; and

(2) has served the education and informational needs of children through the licensee's overall programming, including programming specifically designed to serve such needs.

(b) In addition to consideration of the licensee's programming as required under subsection (a), the Commission may consider—

(1) any special nonbroadcast efforts by the licensee which enhance the educational and informational value of such programming to children; and

(2) any special efforts by the licensee to produce or support programming broadcast by another station in the licensee's marketplace which is specifically designed to serve the educational and informational needs of children.

PROGRAM LENGTH COMMERCIAL MATTER

SEC. 104. Within one hundred and eighty days after the date of enactment of this Act, the Commission shall complete the proceeding known as "Revision of Programming and Commercialization Policies, Ascertainment Requirements and Program Requirements for Commercial Television Stations", MM Docket Numbered 83-670.

TITLE II—ENDOWMENT FOR CHILDREN'S EDUCATIONAL TELEVISION

SHORT TITLE

SEC. 201. This title may be cited as the "National Endowment for Children's Educational Television Act of 1990".

FINDINGS

SEC. 202. The Congress finds that—

(1) children in the United States are lagging behind those in other countries in fundamental intellectual skills, including reading, writing, mathematics, science, and geography;

(2) these fundamental skills are essential for the future governmental and industrial leadership of the United States;

(3) the United States must act now to greatly improve the education of its children;

(4) television is watched by children about three hours each day on average and can be effective in teaching children;

(5) educational television programming for children is aired too infrequently either because public broadcast licensees and permittees lack funds or because commercial broadcast licensees and permittees or cable television system operators do not have the economic incentive; and

(6) the Federal Government can assist in the creation of children's educational television by establishing a National Endowment for Children's Educational Television to supplement the children's educational programming funded by other governmental entities.

SEC. 203. (a) Part IV of title III of the Communications Act of 1934 (47 U.S.C. 390 et seq.) is amended—

(1) by redesignating section 394 as section 393A;

(2) by redesignating subpart B, C, and D as subparts C, D, and E, respectively; and

(3) by inserting immediately after section 393A, as so redesignated, the following new subpart:

"SUBPART B—NATIONAL ENDOWMENT FOR CHILDREN'S EDUCATIONAL TELEVISION

"ESTABLISHMENT OF NATIONAL ENDOWMENT

SEC. 394. (a) It is the purpose of this section to enhance the education of children through the creation and production of television programming specifically directed toward the development of fundamental intellectual skills.

"(b) There is established, under the direction of the Secretary, a National Endowment for Children's Educational Television. In administering the National Endowment, the Secretary is authorized to make grants to persons proposing to create and produce educational television programming for children. The Secretary shall consult with the Advisory Council on Children's Educational Television in the making of the grants. The grants shall be made on the condition that the programming shall—

"(1) during the first two years after its production, be made available only to public television licensees and permittees and noncommercial television licensees and permittees; and

"(2) thereafter be made available to any commercial television licensee or permittee or cable television system operator, at a charge established by the Secretary that will assure the maximum practicable distribution of such programming, so long as such licensee, permittee, or operator does not interrupt the programming with commercial advertisements.

The Secretary may, consistent with the purpose and provisions of this section, permit the programming to be distributed to persons using other media, establish conditions relating to such distribution, and apply those conditions to any grant. The Secretary may waive the requirements of paragraph (1) of this subsection if the Secretary finds that neither public television licensees and permittees nor noncommercial television licensees and permittees will have an opportunity to air such programming in the first two years after its production.

"(c)(1) The Secretary, with the advice of the Advisory Council on Children's Educational Television, shall establish criteria for making grants under this section. Such criteria shall be consistent with the purpose and provisions of this section and shall be made available to interested parties upon request.

"(2) Applications for grants under this section shall be submitted to the Secretary in such form and containing such information as the Secretary shall require by regulation.

"(d) Upon approving any application under this section, the Secretary shall make a grant to the applicant in an amount determined by the Secretary, except that such amounts shall not exceed 75 percent of the amount determined by the Secretary to be the reasonable and necessary cost of the project for which the grant is made.

"(e)(1) The Secretary shall establish an Advisory Council on Children's Educational Television. The Secretary shall appoint ten individuals as members of the Advisory Council and designate one of such members to serve as Chairman.

"(2) Members of the Advisory Council shall have terms of two years, and no member shall serve for more than three consecutive terms. The members shall have expertise in the fields of education, psychology, child development, or television programming, or related disciplines. Officers and employees of the United States shall not be appointed as members.

"(3) While away from their homes or regular places of business in the performance of duties for the Advisory Council, the members of the Advisory Council shall serve without compensation but shall be allowed travel expenses, including per diem in lieu of subsistence, in accordance with section 5703 of title 5, United States Code.

"(4) The Advisory Council shall meet at the call of the Chairman and shall advise the Secretary concerning the making of grants under this section.

"(f)(1) Each recipient of a grant under this section shall keep such records as may be reasonably necessary to enable the Secretary to carry out the Secretary's functions under this section, including records which fully disclose the amount and the disposition by such recipient of the proceeds of such grant, the total cost of the project, the amount and nature of that portion of the cost of the project supplied by other sources, and such other records as will facilitate an effective audit.

"(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purposes of audit and examination to any books, documents, papers, and records of the recipient that are pertinent to a grant received under this section.

"(g) The Secretary is authorized to make such rules and regulations as may be necessary to carry out this section, including those relating to the order of priority in approving applications for projects under this section or to determining the amounts of grants for such projects.

"(h) There are authorized to be appropriated $10,000,000 for fiscal year 1991 for the Secretary to carry out the provisions of this section. Sums appropriated under this subsection for any fiscal year shall remain available for payment of grants for projects for which applications approved under this section have been submitted within one year after the last day of such fiscal year.

"(i) For purposes of this section—

"(1) the term 'educational television programming for children' means any television program which is directed to an audience of children who are sixteen years of age or younger and which is designed for the intellectual development of those children, except that such term does not include any television program which is directed to a general audience but which might also be viewed by a significant number of children; and

"(2) the term 'person' means an individual, partnership, association, joint stock company, trust, corporation, or State or local governmental entity."

(b) Section 397 of the Communications Act of 1934 (47 U.S.C. 397) is amended—

(1) in paragraph (2) by striking "subpart C" and inserting in lieu thereof "subpart D"; and

(2) in paragraph (15)—

(A) by inserting "and subpart B" immediately after "subpart A"; and

(B) by striking "subpart B, subpart C" and inserting in lieu thereof "subpart C, subpart D".

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NASA AND THE INTERNATIONAL SPACE YEAR

Mr. CRANSTON. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on Senate Joint Resolution 75.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the resolution from the Senate (S.J. Res. 75) entitled "Joint resolution relating to NASA and the International Space Year," do pass with the following amendments:

Page 3, line 9, after "applications;", insert "and".

Page 3, strike out lines 10 through 12.

Page 3, line 13, strike out "(6)", and insert "(5)".

Page 3, line 14, strike out "June" and insert "September".

Page 3, line 15, strike out "(5)" and insert "(4)".

Mr. CRANSTON. Mr. President, I move that the Senate concur in the House amendments.

The motion was agreed to.

Mr. CRANSTON. I move to reconsider the vote by which the motion was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL AMERICAN INDIAN HERITAGE MONTH AND NATIONAL SENIOR CITIZENS DAY

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged en bloc from further consideration of the following resolutions: House Joint Resolution 577, designating "National American Indian Heritage Month"; House Joint Resolution 591, designating "National Senior Citizens Day"; and that the Senate proceed to their immediate consideration, en bloc; that the joint resolutions be deemed read a third time and passed; that the preambles be agreed to, and, that the motion to reconsider the passage of these joint resolutions be laid upon the table. I further ask unanimous consent that the consideration of these items appear individually in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the joint resolutions (H.J. Res. 577 and H.J. Res. 591) were passed.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I ask unanimous consent that Senator BRADLEY be recognized at 9 a.m. on Friday, July 20, to offer an amendment relating to the sugar price support level; that there be 60 minutes equally divided and controlled in the usual form; that at the conclusion or yielding back of time, the amendment be laid aside until 9 a.m. on Tuesday, July 24; that there be 60 additional minutes for debate, equally divided and controlled in the usual form; that no amendment to the amendment be in order; and that, at 10 a.m. on Tuesday, the Senate vote on or in relation to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I ask unanimous consent that on Friday, July 20, Senator BOSCHWITZ be recognized at 10 a.m. to offer an amendment relating to maximum ARP levels; that there be 80 minutes equally divided in the usual form; that no other amendments be in order to the Boschwitz amendment; that when all time is used or yielded back the Senate proceed without any intervening action or debate to vote on or in relation to the Boschwitz amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR TOMORROW

MORNING BUSINESS; JOURNAL

Mr. CRANSTON. Mr. President, on behalf of the majority leader, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 8:45 a.m., Friday; that following the prayer, the time for the two leaders be reserved for their use later in the day; that upon reservation of the leaders' time, there be a period for morning business not to extend beyond 9 a.m., with Senators permitted to speak therein for up to 5 minutes each.

I also ask unanimous consent that following the prayer the Journal of the proceedings be deemed approved.

THE PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 8:45 A.M. TOMORROW

Mr. CRANSTON. If there is no further business to come before the Senate today, I ask unanimous consent now that the Senate stand in recess under previous order until 8:45 a.m., Friday, July 20.

There being no objection, the Senate, at 7:45 p.m., recessed until Friday, July 20, 1990, at 8:45 a.m.

NOMINATIONS

Executive nominations received by the Senate July 19, 1990:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

STEVEN B. KELMAR, OF PENNSYLVANIA, TO BE AN ASSISTANT SECRETARY OF HEALTH AND HUMAN SERVICES, VICE GERALD L. OLSON, RESIGNED.

EXECUTIVE OFFICE OF THE PRESIDENT

JOSEPH FRANCIS GLENNON, OF FLORIDA, TO BE A MEMBER OF THE ADVISORY BOARD FOR CUBA BROADCASTING FOR A TERM EXPIRING OCTOBER 27, 1991. (REAPPOINTMENT.)

NATIONAL MEDIATION BOARD

KIMBERLY A. MADIGAN, OF ILLINOIS, TO BE A MEMBER OF THE NATIONAL MEDIATION BOARD FOR THE TERM EXPIRING JULY 1, 1993, VICE WALTER C. WALLACE, TERM EXPIRED.

IN THE NAVY

THE FOLLOWING NAMED OFFICER TO BE PLACED ON THE RETIRED LIST IN THE GRADE INDICATED UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 1370:

To be vice admiral

VICE ADM. JOSEPH S. DONNELL III, U.S. NAVY, xxx-x... xx...

HOUSE OF REPRESENTATIVES—July 19, 1990

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Grant us, O God, the vision to see the people of our communities brought together in respect and mutual assurance, teach us the wisdom to choose the way of justice and mercy, and give us the strength and commitment to walk the road toward those good goals. May we not grow weary in well doing but walk the way of truth and faithfulness and so do Your will. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from New York [Mr. PAXON] please come forward and lead the House in the Pledge of Allegiance.

Mr. PAXON led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 4328. An act to authorize appropriations for fiscal years 1991 and 1992 for the customs and trade agencies, and for other purposes.

PERMISSION FOR SUBCOMMITTEE ON SURFACE TRANSPORTATION AND SUBCOMMITTEE ON ECONOMIC DEVELOPMENT OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO SIT TODAY DURING THE 5-MINUTE RULE

Mr. TRAFICANT. Mr. Speaker, I ask unanimous consent that the Subcommittee on Surface Transportation and the Subcommittee on Economic Development of the Committee on Public Works and Transportation be permitted to sit today, July 19, 1990, while the House is under the 5-minute rule.

This request has been cleared by the minority leadership of both the House and the Committee on Public Works and Transportation.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

APPOINTMENT AS MAJORITY MEMBER TO SELECT COMMITTEE ON NARCOTICS ABUSE AND CONTROL

The SPEAKER. Pursuant to the provisions of section 303 of House Resolution 84, 101st Congress, the Chair appoints the gentleman from New Jersey [Mr. PAYNE] as a majority member to the Select Committee on Narcotics Abuse and Control, to fill the existing vacancy thereon.

WHY NOT BUY OUT RUSSIAN DEFENSE?

(Mr. DOWNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOWNEY. Mr. Speaker, I am sure you were amazed, as was I and many other Americans when earlier this week Chancellor Kohl convinced Soviet President Gorbachev to allow a unified Germany into NATO with Russian blessing.

This was astonishing to us and to our President, and a welcome development.

I have been thinking for some time, Mr. Speaker, that our approach to defense spending is probably all wrong. What we should be offering the Russians is to buy the most threatening aspects of their defense establishment. We could start with strategic weapons. Offer them $50 million for each SS-18's. This would work wonders in two ways: One, the Russians would get the money they need to help their economy, and two, it would reduce the threat to the United States. We could pay for it from our own defense budget.

I know it sounds preposterous to buy part of the Russian arsenal, but I would have said a week ago it was preposterous to think that Chancellor Kohl could have offered $3 billion to the Russians to allow a unified Germany into NATO.

REAGAN REVOLUTION HAS TURNED INTO HERBERT HOOVER RERUN

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, the record bankruptcies, underfunded pensions, failed savings and loans and now the oldest bank in the District of Columbia, the National Bank of Washington, has announced it is in trouble. It cannot meet its capital obligations.

Mr. Speaker, the Reagan revolution has turned into a Herbert Hoover rerun, and what worries me it is on fast forward, Mr. Speaker. Think about it.

If you take away unemployment compensation, workmen's compensation, take away FDIC, welfare, and Social Security, we would be in worse shape today than in 1929.

I am saying today on the House floor that America is approaching a depression that will make the 1929 crash look like a fender-bender, and we are still giving away billions in foreign aid, still protecting nations that are wealthier than we are, and we have a trade law that is killing American jobs and destroying our economy, and we are doing nothing because Congress is taking care of lobbies. The White House is taking care of powerful lobbies. They are not taking care of the American people.

ADMINISTRATION'S SHIFT ON CAMBODIA DOES NOT GO FAR ENOUGH

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, the administration's shift on Cambodia is welcome, but not enough. By seeking new talks with Vietnam and dropping recognition at the United Nations of a three-part coalition that includes the Khmer Rouge, the administration is recognizing that our previous policy of collaboration with the Khmer has been bankrupt and leading us nowhere. We need to do more. We need to start talking to Son Sann and his Cambodian Government. We need to stop covert and overt aid to Sihanouk and his coalition because of their coziness with the Khmer and increasing reports of military cooperation between the Khmer Rouge and the Sihanouk forces.

We need to get behind a policy of free elections and a provisional government sponsored by the United Nations, and we need to bring China, the main protectors of the Khmer, to that point of view.

Mr. Speaker, let us stop the killing fields in Cambodia. The end of the cold war should apply to our Cambodia policy also.

NEW TELEPHONE TO INQUIRE ABOUT S&L ASSETS, 1-800-782-DOOM

(Mr. WISE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WISE. Mr. Speaker, does the telephone company know something about the S&L crisis that many working Americans have been fearing? The new toll-free telephone number assigned to the Resolution Trust Corporation for people inquiring what S&L assets are for sale is 1-800-782-DOOM.

This suggests a whole new approach to keeping the public informed. Do you want to find out how S&L prosecutions are going?

I urge the White House to install a new toll-free line. Dial 1-800-JUSTICE. Even if the Department of Justice charges a penny per name, do not worry, you will not be out more than the price of a quarter-pounder.

The budget deficit numbers change all the time. Six months ago, it was $100 billion. This week, $70 billion more.

Dial 1-800-DEFICIT to find out the hourly projections.

Finally, for the politically perverse, why not be able to call one of those charge numbers to hear the President whisper the words you never thought you would ever hear him say. That is right, dial 1-900-33-TAXES.

REPUBLICAN CAUCUS DECISION NO SURPRISE

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, yesterday the Republican Party Caucus unanimously voted not to raise taxes.

Mr. CONTE. Mr. Speaker, if the gentleman will yield, he took my name in vain. I did not vote for that.

Mr. SCHUMER. Well, yesterday the Republican Party voted almost unanimously, with certain exceptions, not to raise taxes.

I would say that while the Republican Party fights over its soul, the economy is sliding slowly down the drain.

It is no surprise that this is going on. As one of our leading papers said, "The no fingerprints party has avoided responsibility on the deficit for the past 10 years, and yesterday's Caucus was another example."

The American people are asking their President, how can President Bush lead the country and the Congress if he cannot lead the Republican Party? The answer is simple. All the machinations in smoke-filled rooms and in little closets and summits is not going to bring us deficit reduction until the American people realize the gravity of the crisis.

□ 1010

Mr. Speaker, I would say to the President to step up to the plate and educate and lead the American people. Let them know how bad the situation is and then maybe actions like that that occurred in the Republican caucus yesterday will not call this summit to a grinding halt.

PUTTING AMERICA BACK ON TRACK

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute.)

Mr. DORGAN of North Dakota. Mr. Speaker, there are a lot of accusations being thrown across the political fence these days about a lot of things. And I suppose that is the way politics will always work.

But in a more serious moment, all of us should be asking some tough questions about why things that used to succeed in America are now failing. Why do we have 33 indictments for fraud over in the Defense Department with 60 of the 100 largest defense contractors under investigation?

Why the scandal in public housing over at HUD?

What caused the S&L scandal and the Federal deficit? What is wrong? They say it is getting better, when it is actually getting worse.

And other things—like the Hubble telescope. The question is, What is going wrong here? There seems to be almost systematic failure in a whole range of areas. Who is at fault and what is causing it? When the political dust settles, it is time for Republicans and Democrats to ask serious questions about what is going wrong and how we set it right.

Our country used to be the country of achievement, innovation, management. We had the biggest, the best, the most. Now things are not working. We used to figure out what is wrong, and we need to put America back on track.

DRIFT NET FISHING IN THE SOUTH PACIFIC

(Mr. FALEOMAVAEGA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FALEOMAVAEGA. Mr. Speaker, just 2 days ago the Associated Press issued a release announcing that the Government of Japan has made a decision to suspend the use of drift nets in its fishing operations in the Pacific.

Mr. Speaker, just last November, the House passed a strongly worded resolution condemning drift net fishing operations in the Pacific, as it was brought to the attention of Chairman STEPHEN SOLARZ, myself and the gentleman from California, Mr. BOB DORNAN, who visited with the several leaders of Pacific island nations.

Mr. Speaker, I want to personally thank the officials of the Japanese Government for conducting a major change in its policy toward driftnet fishing.

Mr. Speaker, I also want to personally commend the outstanding performance of sumotori, Ozeki Konishiki Saleva'a Atisanoe, in this month's Nagoya Sumo Tournament. We are all rooting for this young Samoan athletic for his many accomplishments in the sport of sumo.

And may I say, Mr. Speaker, to Konishiki in the Samoan language, "Konishiki, ou mama na."

JAPAN SUSPENDS DRIFT NET FISHING IN THE SOUTH PACIFIC

Japan has decided to suspend driftnet fishing in the South Pacific in the coming 1990/91 fishing season. This cessation of driftnet fishing takes effect one year ahead of the July 1, 1991 cessation date specified in the U.N. resolution on this matter.

The above measure will be continued until such time as the appropriate conservation and management arrangements specified in the U.N. resolution for South Pacific albacore tuna resources are put into place and appropriate regulatory measures for driftnet fishing are established.

In making this decision, Japan has taken into account the grave concerns of the South Pacific island countries over driftnet fishing in the region, and the intentions by these countries to develop albacore fisheries as an indigenous economic resource.

[From the New York Times, July 18, 1990]

TOKYO IS TO BAN FISH NETS EARLY

CANBERRA, AUSTRALIA.—Japan will stop drift-net fishing in the South Pacific this season, a year before the date set by a United Nations resolution, the Japanese Embassy said today.

The statement, forwarded from Tokyo's Foreign Ministry, said Japan would suspend drift-net fishing in the 1990-1991 season.

Drift nets can sweep as much as 30 miles of ocean and have been criticized by conservationists for indiscriminately killing marine life. Australia has joined many other Pacific nations in calling for their use to be banned.

Taiwan announced in June that it would ban its drift-net fleet from fishing in the South Pacific by July 1991.

TOKYO BAN SCHEDULED FOR 1992

New Zealand's Prime Minister, Geoffrey Palmer, immediately hailed the Japanese decision.

"I see it as a very clear indication of their understanding of the depth of feeling which the people of the South Pacific have about drift-net fishing," Mr. Palmer said.

Japan, which has the world's largest drift-net fishing fleet, last year announced that it would ban the use of such nets by its vessels worldwide in 1992. It has also been criticized for its drift-net fishing in the North Pacific.

The Japanese statement said the suspension of drift-net fishing operations would continue until appropriate conservation and management arrangements outlined by the United Nations were established for South Pacific albacore-tuna fisheries.

It said Japan had taken into account the "grave concerns" of South Pacific island nations about drift-net fishing.

"Through this decision, Japan wishes to further promote good relations with the South Pacific island countries," the statement said.

NO GASOLINE TAX FOR DEFICIT REDUCTION

(Mr. ANDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANDERSON. Mr. Speaker, it is budget time so once again we are treated to calls for an increase in gasoline taxes for deficit reduction. Such a suggestion was a bad idea in the past, is a bad idea now, and will remain a bad idea in the future.

Any gasoline tax increase for deficit reduction by its very nature would be regressive, recessionary, and will generate massive unemployment. Study after study has shown the regressivity of such an increase, since only a small percentage of the revenue generated will come from upper income taxpayers who benefited most from the tax cuts of the eighties. It is simply unfair to force the burden of reducing the deficit onto the backs of low- and middle-income American workers. It is absurd to assess this burden based on the number of miles that someone drives.

A 30-cent increase this year would force more than half a million Americans out of work over the next 3 years and would reduce our gross national product by nearly $30 billion in the first year alone. With our economy already slowing down, can we really afford a gas tax increase at this time?

Mr. Speaker, any suggestion of a gas tax increase for deficit reduction should be immediately removed from consideration in the budget negotiations. It is a terrible idea with tragic implications for America's economic future.

SELECT COMMITTEE ON WASTE, FRAUD AND ABUSE PROBLEMS IN THE SBIC PROGRAM

(Mr. RUSSO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUSSO. Mr. Speaker, I and a number of my colleagues recently called for the creation of a select committee to investigate Government waste, fraud, and abuse. Such an independent body is needed to discover the causes of the endemic government mismanagement which has led to the savings and loan industry debacle as well as costly scandals at HUD and in the defense procurement industry.

Well, I am sorry to say that it is not just these we have to worry about. There are plenty of other black holes—legacies of the Reagan years—which are waiting to suck in more taxpayer money.

Last month the inspector general of the SBA testified at a Senate hearing that of the 50 Government-insured small business investment corporations he studied, 23 were in trouble, 13 of those in serious trouble. The potential cost to U.S. Treasury is $363 million. And this study purposely excluded SBIC's which had already been identified as potential risks. Business Week reports that the number of SBIC defaults has doubled since 1986, at a total cost of $563 million.

And I have discovered that these SBIC's, which are set up to serve small businesses, are not just lending to mom and pop stores. Incredible as it sounds, some are lending money to fortune 500 companies to help them execute leveraged buyouts. A loophole in the law allows these huge companies to gain from a program set up to benefit small businesses. I have introduced a bill, H.R. 4411, which would put a stop to this practice.

The mismanagement and neglect of the Reagan years will be with us for many years. It is almost certain there will be more unpleasant surprises for the taxpayers, all with a price tag.

DEDICATION OF THE RICHARD NIXON LIBRARY

(Mr. DREIER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER of California. Mr. Speaker, later this morning the dedication of the Richard Nixon Library in Yorba Linda, CA, will take place. I regret that our schedule here has prevented a number of us from being able to attend.

I am not one who in any way would be an apologist for some of the problems of the Nixon administration, but I will say that I truly believe that as we look toward the future, especially in the area of foreign policy, that Richard Nixon has provided us with a great deal of direction.

It seems interestingly ironic that as the dedication of the library takes place, dramatic changes are taking place in Southeast Asia which I hope very much will lead to and bring about that peace which President Nixon and all in the free world have sought for decades.

PRESIDENT MUST PUT HIS OWN HOUSE IN ORDER

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, it was President Bush who initiated the current budget negotiations and who pointed specifically to tax increases as part of the solution. He acted because the fiscal policies of the last decade were bankrupt and leading the Nation toward bankruptcy.

Yesterday the House Republicans repudiated their leader, the President. The summit negotiations are now threatened and can work only if the President repudiates the Republican House repudiation of him, doing so in his actions if not words.

Successful negotiations require good faith and a willingness by all parties to bargain. What the House Republicans have done is risk shattering the cooperative atmosphere that has been carefully cultivated. They have said, "Let somebody else stand up and make the tough decisions. We will just stand in the way."

The President can successfully negotiate with the House and the Senate only if he puts his own house in order.

PERSONAL EXPLANATION

Mr. DORGAN of North Dakota. Mr. Speaker, on yesterday's vote on the final passage of H.R. 5268, fiscal year 1991 Agriculture appropriations, I was present and voting. Due to an apparent electronic malfunction, my vote was not recorded in the RECORD.

I wish to have the RECORD show that I voted "aye."

DISAGREEMENT IS NOT WITH THE PRESIDENT

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, I was fascinated by the comments of the gentleman a moment ago about the House Republican Party's action yesterday with regard to taxes.

We took our action based upon the stand that most of us have taken over a period of years, that taxes are in fact bad for the economy and so, therefore, ought not be countenanced as a part of a summit agreement. Our disagreement, though, is not with the President of the United States. Our disagreement is with the Democrats in this body who have decided to go ahead and spend money as though there is no tomorrow that we have to deal with.

Why do I say that? I say that because of the appropriation bills that are now being brought onto the floor having been deemed, as we were told yesterday by a House budget resolution that is completely unacceptable and is a big-spending document.

□ 1020

The break of faith with the budget summit process was when the House deemed spending to be essential. That is the break of faith. We are not as a party willing to raise taxes in order to have money spent that was deemed not handled properly under the budget laws of the land. So I think it is time to understand that when the budget summit broke down was when Democrats deemed it so.

REPORT ON H.R. 5311, DISTRICT OF COLUMBIA APPROPRIATIONS ACT, FISCAL YEAR 1991

Mr. DIXON, from the Committee on Appropriations, submitted a privileged report (Rept. No. 101-607) on the bill (H.R. 5311) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1991, and for other purposes, which was referred to the Union Calendar and ordered to be printed.

Mr. CONTE reserved all points of order on the bill.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT ON DEPARTMENT OF DEFENSE APPROPRIATIONS BILL, FISCAL YEAR 1991

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on a bill making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1991, and for other purposes.

Mr. CONTE reserved all points of order on the bill.

The SPEAKER pro tempore (Mr. MCNULTY). Is there objection to the request of the gentleman from Kentucky?

There was no objection.

GENERAL LEAVE

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that all members may have 5 legislative days in which to revise and extend their remarks on H.R. 5257, and to include extraneous matter, along with tables and charts.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 1991

Mr. NATCHER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5257) making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1991, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to 1 hour, the time to be equally divided and controlled by the gentleman from Massachusetts [Mr. CONTE] and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Kentucky [Mr. NATCHER].

The motion was agreed to.

The SPEAKER pro tempore. The Chair designates the gentleman from Indiana [Mr. SHARP] as chairman of the Committee of the Whole, and requests the gentleman from New York [Mr. DOWNEY] to assume the chair temporarily.

□ 1024

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5257) with Mr. DOWNEY (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

By unanimous consent, the bill was considered as having been read the first time.

The CHAIRMAN pro tempore. Under the unanimous-consent agreement, the gentleman from Kentucky [Mr. NATCHER] will be recognized for 30 minutes, and the gentleman from Massachusetts [Mr. CONTE] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Kentucky [Mr. NATCHER].

Mr. NATCHER. Mr. Chairman, I yield myself 7 minutes.

Mr. Chairman, H.R. 5257, which we present to the House today, makes appropriations for the fiscal year 1991 for the Departments of Labor, Health and Human Services, and Education and for 15 related agencies, including the Corporation for Public Broadcasting and the Railroad Retirement Board.

Our committee has worked hard to bring a good bill to the floor. We held 36 days of hearings spanning 11 weeks: 631 witnesses testified, including 80 Members of Congress. We received and considered 894 separate requests from Members.

The bill includes appropriations totaling $170,443 million for these departments and agencies, which is $4,212 million over the amounts requested by the President, and $17,309 million over the comparable amounts available for 1990. This amount includes advance appropriations of $19,453 million for fiscal year 1992 for various public assistance entitlements.

Entitlement programs, whose funding levels are determined by authorizing legislation, comprise more than 74 percent of the bill's total appropriations. The bill includes $126,568 million for these entitlements, an increase of $1,034 million above the amount requested by the President and $12,371 million above the amounts available for these programs in fiscal year 1990.

For discretionary programs, whose spending is controlled through the annual appropriations process, the bill includes $43,875 million for fiscal year 1991, which is an increase of $3,178 million over the President's budget and $4,938 million above the amount available for fiscal year 1990. In addition to these amounts, consideration of $5,505 million of budget estimates for 1991 has been deferred because reauthorizations have not yet been enacted for these programs. These unauthorized programs include Head Start, Low Income Energy Assistance, Community Service Block Grant, Refugee and Entrant Assistance, Family Planning, Vocational Education, and research training. The committee has reserved $8.9 million of funds for these unauthorized programs including important new program authorizations expected to be enacted such as child care, AIDS prevention and services, breast and cervical cancer screening, and the minority health initiative. Every woman in the House signed a letter to the committee asking for funds for the new breast cancer screening program. We want everyone of these Members to know that this is a high priority once the bill is signed into law. This includes in particular, Mrs. BOGGS who has been a tireless advocate for this program.

Taking into account the reserve established for unauthorized programs, the bill fully utilizes, but does not exceed, its section 302(b) allowances for both budget authority and outlays. The reserve is described on page 5 of the report.

Mr. Chairman, I have been pleased to serve with my friend, the distinguished gentleman from Mississippi, my chairman, for 35 years. He is also a member of our subcommittee. He always helps us and we appreciate it. It has also been a distinct honor and privilege for me to serve with my friend, the distinguished gentleman

from Massachusetts, the ranking minority member on this subcommittee and on the full Committee on Appropriations. We are friends on this subcommittee, and I want you to know that we have never had a vote on the subcommittee to resolve any differences of opinion.

The committee takes very seriously its responsibility to provide for the health and well-being of our country, especially for its vulnerable populations—the children, the disadvantaged, the elderly, and the handicapped. I have often said that if you educate your children and take care of the health of your people, you live in the strongest country in the world. The bill reflects these priorities, providing more than a $4 billion increase in function 500 education and training programs above 1990 levels, and more than a $1.3 billion increase for function 550 health programs.

The committee has emphasized programs that enhance the education of our young people. For the second year in a row, a $1 billion increase has been provided for chapter 1 compensatory education. Student financial assistance has been increased by $692 million over 1990, allowing the maximum Pell grant to be maintained at $2,300. Education for the handicapped receives a $728 million increase, and, as a result, the Federal share of the excess cost of educating a handicapped child will increase from 7 to approximately 10 percent.

The committee has made a major commitment to our biomedical research enterprise by providing a $1,041 million, or 14.3 percent, increase for the authorized activities of the National Institutes of Health. This funding will support approximately 6,000 new research grants, more than 1,400 above the 1990 level. Research conducted by the Alcohol, Drug Abuse and Mental Health Administration receives an increase of $108 million, or 13 percent.

The committee has recognized the continuing funding needs associated with the social problems of homelessness and drug abuse. $102 million is provided for the homeless assistance programs authorized by the Stewart B. McKinney Act, which is approximately the same as funding for comparable programs in 1990.

The various drug abuse programs within the bill's jurisdiction receive $2,613 million, which is $27 million above the 1990 level. In 1990, these programs were increased by $872 million; since 1988, their funding has more than doubled. I plan to offer an amendment today which will add $231,443,000 to the bill for various drug abuse activities at the Departments of Education and Health and Human Services. This action is intended to restore funding for four activities which the committee bill funds at levels below the President's request. The committee recommendation was based upon data indicating that States were having difficulty absorbing increases in funding for their drug treatment activities. The committee has been told, for example, that as of June 30, States had drawn down only 24 percent of their 1990 funds. Notwithstanding these concerns, many Members have expressed to me their belief that these amounts can be utilized in 1991 and that we should restore funding to the President's request.

Acquired immune deficiency syndrome [AIDS] continues to be a major concern of the committee. When combined with funding provided in other appropriations bills for the Food and Drug Administration and the Indian Health Service, it is expected that AIDS funding for currently authorized programs will total approximately $1.7 billion in 1991—an increase of 13 percent over 1990. Spending government-wide for AIDS, including treatment services provided through entitlement programs such as Medicaid and Medicare, is expected to reach almost $3.5 billion in 1991. In addition to these amounts, the committee has reserved funds for major new legislation in the area of AIDS prevention and services. This legislation is currently in conference.

DEPARTMENT OF LABOR

The bill provides a total of $7,649 million for the Department of Labor, including $5,874 million for discretionary programs and $1,775 million for entitlements. The bill exceeds the President's request for discretionary programs at Labor by $449 million and the 1990 level by $426 million, or 7.8 percent. The bill also includes $3,157 million in trust fund transfers, an increase of $140 million over the President's request and $215 million over the 1990 level. These trust fund transfers are principally for the administrative costs of the State employment security agencies.

The bill includes $4,211 million for programs under the Job Training Partnership Act, an increase of $293 million over the 1990 level. This total includes $90 million for the Job Corps, which is $98 million over last year's level. This amount is sufficient to maintain the 107 current centers and 41,500 training slots; 2 new centers will also be opened in 1991. The Dislocated Workers Program receives $514 million, which represents a $50 million increase over last year's rate. Community services employment for older Americans is supported at $400 million, an increase of $33 million over 1990. Trust funds and general funds for State unemployment insurance and employment service operations total $2,826 million, $189 million above the 1990 level.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

The bill includes $135,749 million for activities administered by the Department of Health and Human Services. This includes $19,453 million in advance appropriations for fiscal year 1992 for various public assistance entitlements. For discretionary activities, the bill includes $16,717 million, which is an increase of $998 million over the amount requested by the President and $2,186 million, or 15 percent, over the comparable amount available for these programs in 1990. The bill also includes $6,279 million in trust fund transfers, which is $191 million above the request and $512 million above the 1990 level.

HEALTH RESOURCES AND SERVICES ADMINISTRATION

The bill provides a $33 million increase over 1990 levels for community health centers and a $45 million increase for the maternal and child health block grant. The bill restores the President's proposed reductions in health professions training, providing a total of $227 million in 1991 for these activities, $12 million above last year's level. Within the agency's total AIDS funding of $77 million, $20 million is provided for pediatric health care demonstrations and $27 million is targeted to adult health care demonstrations.

CENTERS FOR DISEASE CONTROL

The bill includes $998 million for the Centers for Disease Control, which is $119 million above the 1990 level. Among the increases provided are $9 million above the 1990 funding level for sexually transmitted diseases and $13 million for chronic and environmental disease prevention. The agency's AIDS funding increases from $443 to $509 million.

NATIONAL INSTITUTES OF HEALTH

The bill includes $8,318 million for the 20 appropriations which together fund the programs of the National Institutes of Health [NIH], including funding for AIDS research. The total for NIH is $694 million above the administration request and $1,041 million above the amount available for 1990. The funds provided will support approximately 6,000 new research grants, about 1,400 more than the 1990 level. The committee has developed a long-range management plan that assumes a stable grant pool of 24,000 with 6,000 new grants each year. Implementation of this system will require NIH to put in place management changes to better control costs.

In addition to the larger number of grants, the increase provided above the President's request is targeted to the following areas: Partial restoration of funding for biomedical research support grants; an increase in the average size of grant awards; intramural buildings and facilities; and high priority research areas, such as Alzheimer's

disease, pediatric AIDS, asthma, breast cancer, and Lyme disease. The largest increases for the institutes are $150.9 million for cancer, $107.7 million for heart, lung and blood, and $129.6 million for allergy and infectious diseases. Smaller institutes also receive increases, such as the $25.4 million increase for eye research and $26.2 million for environmental health. In allocating its increase, the NIEHS is encouraged to devote more research dollars to studies which validate different animal and nonanimal models used to test potential toxic substances.

The committee has provided $66.1 million for the human genome project, which is $9.6 million, or 17 percent, over the 1990 level and $36.8 million below the President's request. In addition, the committee permits the new Director to allocate up to $18 million of his discretionary fund to the genome project if he determines it to be in the best interests of NIH and biomedical research in general. The committee believes it is prudent to carefully examine the genome project before agreeing to further major funding increases, due to budgetary and ethical concerns raised by Members of Congress and some in the scientific community.

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION

The bill includes $2,649 million for these activities, which is $75 million above 1990 and $114 million below the administration request. Mental health and substance abuse research funding increases by $108 million over 1990, or 13 percent. The services block grant is funded at the 1990 level of $1,193 million.

OFFICE OF THE ASSISTANT SECRETARY FOR HEALTH

Within the amount provided for this account, the bill includes $10 million for the National Vaccine Program, a $4 million increase over 1990.

AGENCY FOR HEALTH CARE POLICY RESEARCH

The bill includes $74.6 million in general funds and Medicare trust funds, an increase of $6.4 million over the budget request and $18.8 million over the 1990 amount. This is a new agency which replaces the National Center for Health Services Research and also includes the Medical Treatment Effectiveness Program. The committee has included a limitation of $13.8 million on transfers from the other Public Health Service agencies, including NIH, CDC, ADAMHA, and HRSA.

HEALTH CARE FINANCING ADMINISTRATION

The bill includes $45,015 million for the 1991 program level for the Medicaid Program, which is $113 million above the administration request and $4,785 million higher than the 1990 level: $1,583 million is provided for Medicare contractors, including $136 million in contingency funds, which is the same as the President's total request and $129 million above last year's level. Twenty-three million dollars is provided to continue the rural hospital transition demonstrations and $10 million is included for the new essential access community hospitals program. The bill includes $195 million for facility survey and certification activities which was not requested in order to meet current law survey requirements.

SOCIAL SECURITY ADMINISTRATION

The committee recommends that $4,167 million be expended from the Social Security trust funds for administrative costs of the Social Security Retirement, Survivors and Disability Program. This is $330 million more than the 1990 amount and the same as the administration request. With a reallocation of funds, staffing will be increased by 1,500 positions above the level proposed by the administration.

FAMILY SUPPORT ADMINISTRATION

The bill includes $12,657 million for the 1991 program level for family support payments to States, which is $965 million above the 1990 level and the same as the administration request. One billion dollars is provided for the Job Opportunities and Basic Skills Training Program. The committee has deferred funding for programs which are not currently authorized. These include Low Income Home Energy Assistance, Refugee and Entrant Assistance, and the Community Services Block Grant. The committee has rejected the President's proposal to reduce funding for State Legalization Impact Assistance Grants, thereby making the entire $1 billion, less the Federal offset, available in 1991.

OFFICE OF HUMAN DEVELOPMENT SERVICES

The bill increases child welfare assistance funding to $280 million, $27 million above the 1990 level. The bill provides $20 million for a new program of emergency protection grants for children of substance-abusing parents. Administration on Aging programs receive $808 million, $61 million above last year's level. The Head Start Program has been deferred because of a lack of authorizing legislation.

DEPARTMENT OF EDUCATION

For the Department as a whole, the bill includes $26,028 million, an increase of $2,478 million over the President's request and $3,016 million over the 1990 level. The amount for discretionary programs is $20,267 million, which is $1,723 million above the request and $2,897 million, or 16.7 percent above the 1990 funding. These comparisons do not include amounts for unauthorized activities such as vocational education and special handicapped programs which will be considered later in the year.

COMPENSATORY EDUCATION FOR THE DISADVANTAGED

The bill includes $6,215 million for chapter 1 of the Elementary and Secondary Education Act, which is $1,003 million above the 1990 level and $757 million above the administration request. The amount provided includes $5,121 million for basic grants to local school districts and $569 million for concentration grants. Also included is $60 million for the Even Start Program, and $26 million for capital expenses for private school students. Up to $100 million of these funds may be transferred to initiate the President's proposed merit schools program if this program should become authorized prior to January 1991.

IMPACT AID

The committee bill provides $800 million for Impact Aid, an increase of $68 million over 1990 and $139 million over the budget request. This amount includes $600 million for category A and $140 million for category B payments.

SCHOOL IMPROVEMENT

The bill includes $1,474.7 million for the 38 activities which together comprise the school improvement account. This total is $64.2 million above last year but $230.2 million less than the President's request: $132.6 million of the reduction is based on the deferred consideration of funding requests for programs which are not currently authorized, such as Magnet Schools of Excellence, Presidential teacher awards and alternative certification systems. Funding for the chapter 2 block grant has been maintained at the 1990 level for a savings of $18.4 million from the President's request. Last, math and science programs would increase by $64.9 million to a total of $200 million.

HANDICAPPED EDUCATION-REHABILITATION SERVICES

The bill provides $2,748 million for education for the handicapped programs, which is $728 million above the 1990 level and $646 million above the administration request. These comparisons include funding for the chapter 1 State handicapped program which has been consolidated by the committee with the regular education of the handicapped account. The consolidation was recommended by the General Accounting Office. In allocating increases for education of the handicapped account activities, the States are expected to give the highest priority to funding those services previously funded under chapter 1. Since States will receive increases of a minimum of 25 percent over their combined education of the handicapped account and chapter 1 funding for 1990, the committee believes that the consolidation can be managed without a disruption in essential services.

The rehabilitation services and handicapped research account is funded at $1,852 million, which exceeds the request by $13 million and the 1990 appropriation by $72 million.

ADULT EDUCATION

There is $244 million provided for adult education, which is $51 million above the 1990 level and $5 million above the administration request.

STUDENT FINANCIAL ASSISTANCE

The bill provides $6,777 million for student financial assistance, which is an increase of $692 million over 1990 levels and $425 million above the administration request. This amount restores $160 million to Perkins loans and $60 million to State student incentive grants, both of which the President proposed to eliminate. The committee bill maintains the maximum Pell grant at $2,300, the same level payable in 1990. Pell grant funds are available under the same conditions as the current year except that eligibility has been restored for less-then-half-time students.

GUARANTEED STUDENT LOANS

The bill includes $3,900 million for guaranteed student loans, which is the most recent estimate by the Congressional Budget Office of the funding that will he required for the program under current law. This amount is $743 million above the request, and $44 million above the 1990 appropriation, The committee is aware that this may need to be further increased based on revised estimates of interest rates and other economic indicators and will be monitoring this situation closely.

HIGHER EDUCATION

There is $100 million provided for historically black colleges and universities, an increase of $4 million over both the 1990 level and the President's request. This includes both graduate and undergraduate programs. Special programs for the disadvantaged [TRIO] receive $342 million, an increase of $100 million over 1990 and $72 million over the President's request.

RELATED AGENCIES

The bill includes $1,018 million for 15 related agencies. This amount is $9 million above the request and $6 million above the 1990 funding level. The total includes $307 million for 1993 funding for the Corporation for Public Broadcasting, including $47 million for the satellite replacement. Full funding of $328 million is provided for railroad retirement dual benefits.

□ 1030

Mr. Chairman, this is a good bill. We present it to you and to the committee for your consideration and we ask approval of the bill.

The CHAIRMAN pro tempore. (Mr. DOWNEY). The gentleman from Kentucky [Mr. NATCHER] has consumed 7 minutes.

Mr. CONTE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise today in strong support of H.R. 5257—the Labor, Health and Human Services, and Education Appropriations bill for 1991.

Mr. Chairman, when I called this bill "America's bill" in the full-committee markup, my colleagues responded with a patriotic chorus from the "Battle Hymn of the Republic."

When you think about what this bill contains—all the Federal funds to keep our people well-educated, healthy, and productive—it is easy to see why it is America's bill.

It tells America of our continued commitment to keep this Nation strong by providing a safety net for those who need help. It tells the homeless, there is hope. It tells children who can't afford college, there is help. To those who are ill, it says we are fighting to find the cure. And to those wanting to be gainfully employed, it says there is a way.

For these noble goals, the bill provides $167.8 billion total budget authority, a $17 billion increase over last year and $4 billion over President Bush's request. At first blush, those numbers might seem high enough to warrant a chorus of "Cry me a river."

But before singing the blues, it is important to realize 75 percent of the total, or $123 billion, is for entitlement programs—Medicaid, Medicare, black lung benefits, aid to families with dependent children and supplemental security income—money that must be appropriated.

The discretionary programs, over which we do exercise control, total $43.9 billion, $5.6 billion more than last year and $4.2 billion more than requested.

And for programs that are either being reauthorized, like low-income energy assistance and Head Start, or are being authorized for the first time, like increased AIDS services, we have kept nearly $8.6 billion of the 302(b) allocation in reserve for when they are signed into law.

There is no denying these are big numbers. This bill, like the other appropriations bills, takes its share of an overall spending target that is based on the House budget resolution.

That resolution assumes a $5 billion increase in outlays for all domestic discretionary spending. By the time the summit reaches a conclusion, I doubt the overall target will remain as high. This bill is very likely the high water mark.

But we do have to move our bills forward. At this point, any target we pick will likely need to be adjusted. So if you look at anything, look at the priorities. They are priorities of which I am proud.

I would point out that the loudest criticism of the bill to this point from a member of the administration has been not that it spends too much money, but that it spends too little.

In our preoccupation with targets, and summits, and numbers, it is easy to forget about the people whose very lives may hinge on the programs supported by this bill. The ones whose letters are so tough to answer.

Those letters remind us of the commitments we made to the handicapped, the disadvantaged, the ill and infirm, the illiterate, the promising scholars, the old, and the young. This bill, America's bill, is our response to each and everyone of them.

And once they see this bill, they will be whistling Dixie, thanks to the dedicated efforts and the evenhanded leadership of BILL NATCHER, the pride of Bowling Green, KY, and the most respected chairman in this entire body.

It responds to the educationally disadvantaged with a $1 billion increase for chapter 1, our main program to assist elementary and secondary education.

If we want to have an impact on our education system, make it competitive, this is where the money should go.

For handicapped education we provide a $727 million increase, raising the Federal share to 10 percent of the excess cost, but still billions short of our commitment to help disabled students get the type of education they deserve.

It provides $700 million more than last year for student financial assistance, with a $609 million increase for Pell grants, of which $371 million goes to cover prior year shortfalls. And supplemental educational opportunity grants get a $75 million increase to help the lowest income college-bound students.

For TRIO, the successful higher education program for disadvantaged students, the bill provides $100 million more than last year.

We are providing a $1 billion increase for the National Institutes of Health. Last year, we could not provide all the funds needed for NIH, and the number of new grants funded slipped to a low of 4,600. Of all the approved and worthy health research grants submitted, fewer than 2 in 10 are being funded. This bill raises that number to 6,000. It responds to the bench scientists who have pressed their case this year with renewed vigor and done an excellent job.

To cure and treat AIDS, $1.7 billion, a 13-percent increase in funding is expected.

For the homeless there is $131 million, $30 million more than last year, almost a 30-percent increase.

To help dislocated workers, the unfortunate casualties on the economic battlefront, we provide $513 million,

$50 million more than last year and $113 million over the President's request.

For workers affected by the slowdown in defense spending, this may be a critical addition. And for Job Corps we provide an increase of $98 million to put teenagers on the path to productive lives.

In addition to all these big programs, I am also quite proud of several new starts. There is the $5 million for new centers to help with the implementation of the Americans With Disabilities Act.

We double the disability prevention activities at CDC to $10 million. We fund a $1 million grant program to help local libraries purchase foreign language materials. And we provide $800,000 for new ways to restructure middle schools.

Mr. Chairman, as you can see this bill touches the lives of just about everybody in our country. This is truly America's bill—encompassing the aspirations of millions.

This year with all the changes worldwide we have an unprecedented opportunity through H.R. 5257 to strike a blow for freedom—freedom from ignorance, disease, and unemployment.

I congratulate our distinguished chairman, the gentleman from Kentucky [Mr. NATCHER]. I also want to thank his staff for their hard work. And I want to thank each subcommittee member, including the members on my side of the aisle, CARL PURSELL, JOHN PORTER, BILL YOUNG and VIN WEBER.

I urge your support for this bill.

Mr. Chairman, many other programs operated by the Departments and related agencies are funded by this bill.

DEPARTMENT OF LABOR

H.R. 5257 provides the Department of Labor with $7.6 billion, $1 billion more than fiscal year 1990 and $453 million above the administration's request. For the discretionary programs that is a $425.5 million increase over the fiscal year 1990 level and $449 million over the President's request.

The bill proposes to fund the programs under the Job Training and Partnership Act at $4.2 billion, $291 million more than last year and $371.5 million above the administration's request. Included in the JTPA total is $900.7 million for Job Corps, a $98 million increase. This will enable the Job Corps Program to continue serving about one out of every seven eligible youth. There is $700 million for the summer youth programs, the same amount as last year, and $513 million for dislocated worker assistance, a $50 million increase. The JTPA block grants to the States will receive $1.9 billion, a $155 million increase.

Another Labor Department program for which the bill recommends an increase is the Community Service Employment for Older Americans. The bill provides CSEOA with $400 million, $32.987 million more than last year and $57.18 million above the President's request. Of the CSEOA total, $312 million will go to national contracts and $88 million to State grants.

The Department's unemployment insurance and service programs are slated for $8.1 billion, $766 billion more than last year and $559 million above the President's request. This includes allotments to the States of $825 million.

Under the bill the Labor-Management Services Program would receive $90 million, $16 million more than last year, the amount requested by the President.

Established by title IV of the ERISA Act of 1975 the Pension Benefit Guaranty Corporation is a wholly owned, self-financing corporation. The bill permits usage of trust funds totaling $71.1 million, $744,000 more than last year and the amount the President requested.

The bill provides the Employment Standards Administration with a total of $223.4 million, $6.3 million more than last year and $1.08 million above the President's request.

For special benefits the bill provides $297 million, $102.9 million above last year and the amount requested by the administration. Of this amount $4 million is for the longshore and harbor workers' benefits.

Black lung would receive $919 million through this bill, $277 million more than last year and $3.95 million above the administration's request.

The bill provides the Occupational Safety and Health Administration with $291 million, $24 million more than last year and $3.35 above the administration's request. Of the total, $30 million is for safety and health statistics and $190 million for Federal and State enforcement.

The Mine Safety and Health Administration would receive $177.7 million under this bill, that is $9.6 million more than last year and $5.27 million above the administration's request.

The bill provides the Bureau of Labor Statistics with $260 million, $18.7 million more than last year and $7.3 million above the administration's request. This amount includes funds to continue the mass layoffs and plant closing survey.

For departmental management, the bill contains $133 million, $15 million more than last year and $1.48 million above the administration's request. This includes $7.45 million for the Women's Bureau, an increase of $600,000 over the amount requested, which will be used to continue expansion of the Displaced Homemakers' Network. Also, an increase of $7.6 million is provided for the Office of the Solicitor to handle the increased number of cases being referred to that Office.

The bill includes $172 million, $11.1 million more than last year and $10.5 million above the administration's request for veterans employment and training. The total includes $79 million for the Disabled Veterans Outreach, $4.6 million over the budget request and $72.8 million for Local Veterans' Employment Representative Program, an increase of $4.2 million. Funding for the National Veterans' Training Institute was restored to $2.5 million, $1.6 million more than requested, but equal to the previous years funding.

For the inspector general the bill provides $49.9 million, $3.3 million more than last year and $1.25 million above the administration's request. The total includes $1 million to cover administratively uncontrollable overtime costs mandated in Public Law 101-173.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

For the Department of Health and Human Services the bill provides a total of $135.7 billion, $13.2 billion over last year, and $1.27 billion over the administration's request.

Regarding the discretionary programs within HHS, we have sustained the momentum in biomedical research, AIDS activities, health programs, and disease control.

At the Health Resources and Services Administration, $1.63 billion is appropriated, $86 million above last year and $229 million over the request. We have fully restored cuts proposed by the administration in health professions training. Important health professions such as nursing, allied health, public health, and several others will continue.

The bill provides $33 million more for community health centers, for a total of $490 million. This valuable program will be able to provide additional primary care in economically disadvantaged areas of the country, including rural regions.

The maternal and child health block grant will also receive a major increase of $45 million from last year for a total of $598,627,000. This program provides for preventive nutritional, health and social services for families with children. This increase is needed to combat the continuing high rates of infant mortality in America.

At the Centers for Disease Control, we provide $997.7 million for a wide array of epidemic tracking, disease prevention, and education efforts. Over half of the agency's budget, or $509 million, is devoted to AIDS prevention and control activities. In other areas, we have doubled the disability prevention program to $10 million. These new funds will enable an expansion of current State programs in disability prevention, increase the

number of States starting new programs and provide for better coordination of State and nationwide activities related to this growing field. With the signing of the American With Disabilities Act, it is imperative that we make a special effort to reducing the incidence of disabilities.

We have also doubled CDC's lead poisoning prevention programs to $8 million and doubled breast and cervical cancer programs to $10 million. Should new authorizing legislation be passed enabling an expansion of breast and cervical cancer screening, the committee will make every effort to provide for a substantial increase in funding at the earliest possible opportunity. Lyme disease control will receive $5 million, up $3 million from last year. These new funds will help those States with the heaviest burden of cases, including Massachusetts and New York. With the growing numbers of diseases of worldwide significance, we have provided $750,000 to enable CDC's International Health Program office to respond to emergency outbreaks of disease, famine, and disasters around the world.

For the National Institutes of Health, this bill provides for $8.3 billion, $1.04 billion above last year and $694 million over the administration's request.

Biomedical research is our Nation's best investment against disease. Doctors and scientists labor day and night to find the cures for the thousands of diseases afflicting mankind. I am heartened by the progress we are making in conquering the tough diseases. Just last week, scientists found the gene causing neurofibromatosis, giving thousands of people around the world hope in finding a cure soon for their painful affliction. I am pleased with the progress we are making, but so much more remains to be done.

The amount of money in this bill will bring the number of new and competing research grants back up to 6,000 from the 4,600 being funded this year. This is an investment in our young investigators and gives them the confidence to go forth with new theories on the cause and manifestations of disease. By increasing the percentage of funding of approved grants, we will sustain more projects of scientific importance and increase the chances of finding more cures.

The decade of the brain initiative signed into law last year is now well underway. With Federal efforts coordinated by the White House Office of Science and Technology Policy, the NIH is taking the lead in making neuroscience a national health priority. For the National Institute of Neurological Disorders and Stroke, we have provided for $545 million, an increase of $67 million from last year. A substantial amount of this increase is dedicated for decade of the brain activities for the coming year. We have also provided the Fogarty International Center with funds for international conference(s) on the neurosciences in conjunction with the decade of the brain.

The National Cancer Institute is the world's leader in cancer research. With millions of lives at stake and with tremendous progress being made in basic research, it is essential that the NCI continue to grow and sustain its challenging mission. For NCI, we have provided nearly $1.75 billion, an increase of $151 million from last year.

The National Heart, Lung, and Blood Institute also deserves our highest level of support. With hypertension, asthma, myocardial infarction continuing to be a threat to our citizens, especially minorities, we are investing $1.136 billion, an increase of $108 million over last year.

On Cooley's anemia, a major blood disease afflicting Americans of Mediterranean and Asian descent, we understand NHLBI has already begun the development of a protocol for appropriate human clinical trials on oral chelators, when animal testing has been satisfactorily completed. NHLBI is working with the National Institute of Diabetes, Digestive and Kidney Diseases [NIDDK] on Cooleys anemia. We hope to be able to develop an oral chelator for human use which would eliminate the need for daily injections.

For the human genome project, the bill provides for $66 million, with an additional $18 million available through the Director's discretionary fund. Should the new NIH Director review the scientific and medical merits of the project, in consultation with Congress, and determines that the project is worthwhile, then he/she may devote additional funds to the program. However, there are strong ethical concerns that must be addressed in order to fully advance the program. This compromise allows continuation of current genome activities, gives additional time to a full consideration of the merits of the program, and leaves room for future growth.

With regards to the Alcohol, Drug Abuse and Mental Health Administration [ADAMHA] we have provided $2.8 billion, $252 million over last year and $63 million over the budget request. Research at the National Institute of Mental Health, a key player during the decade of the brain, will total $430 million, an increase of $40 million over last year. With these additional funds, NIMH will begin new initiatives in children's mental health, brain imaging relating to mental disorders, and basic research on the biological basis of mental illness.

At the National Institute for Drug Abuse we have provided $266 million for basic research, $45 million above last year and $7 million over the administration's request. This will give NIDA research programs, especially in the crucial field of medications development, the momentum to find the answers in treating drug addiction. The National Institute on Alcohol Abuse and Alcoholism will receive $143 million, an $11 million increase over last year, which will enable them to reduce the risk of alcohol abuse nationwide.

The Office of Treatment Improvement is a new agency responsible for developing more effective approaches in the therapy of addictive and mental disorders. The bill provides for $35 million for crisis area treatment grants and $86 million for basic treatment improvement grants which is intended to help those areas with large numbers of at-risk individuals and special populations.

At the Office of the Assistant Secretary for Health, the National Vaccine Program will receive $10 million, nearly double last year's amount and $3 million over the request. The NVP is responsible for the coordination and development of new vaccines which would reduce the incidence of infectious diseases such as whooping cough and measles.

For the new Agency for Health Care Policy and Research, the bill includes $68.6 million in general funds, an increase of $29.5 million over the request and $18.8 million over 1990. This agency was created by last year's reconciliation bill. For the Medical Treatment Effectiveness Program we have provided $48 million, the amount requested, in order to find out which treatments are the most cost effective and medically useful. The results from this research have important policy and reimbursement implications.

Many of the key programs of the Family Service Administration, including low-income home energy assistance, refugee assistance, and community services block grants require reauthorization. I remain fully committed to increasing appropriations for LIHEAP. Last winter saw great demand among low-income households for heating assistance. I made sure $50 million in supplemental funds were provided for the program. Already I understand that 32 States have submitted applications for a total of over $133 million in supplemental funds. Clearly, the need is substantial and I will do all I can to ensure the energy needs of the poor are adequately sustained.

At Human Development Services, we have provided a total of $6.86 billion, $1.45 billion above last year and $256 million over the request. The key component of HDS, Head Start, is awaiting reauthorization and will be funded after its enactment. We have provided major increases for family crisis programs, including child abuse State and challenging grants, runaway and

homeless youth and family violence. For the Administration on Aging which administers HDS's aging programs, we provide for $781 million, $58.8 million over last year and over the administration's request.

For AIDS programs throughout the Public Health Service, the bill provides for approximately $1.7 billion, $114 million above last year, a 13 percent increase. I'm especially pleased to be able to accelerate our efforts in combatting pediatric AIDS, which is fast becoming a top cause of mortality among children ages 0 to 5. At HRSA, we have provided $20 million for pediatric AIDS demonstration projects and at the NIH we have doubled the funding for pediatric AIDS clinical trials to $47.5 million. These substantial increases will help pave the way to reducing the incidence of HIV infection among infants and children.

For homeless programs authorized under the McKinney Act, we have provided $102 million in this year's bill and $29 million in forward funding from last year for a total of $131 million, $30 million more than last year. These programs will go a long way towards helping the homeless become more self-sufficient and to sustain their health.

Also included is report language stating no funds are provided for the reorganization of the Public Health Service regional offices, prior to the approval of a reprogramming request.

EDUCATION

The bill provides the Department of Education with a total of $26.02 billion, $3.02 billion more than fiscal year 1990 and $2.478 above the administration's request. For discretionary programs there is $16.74 billion, a $2.2 billion increase over the previous year. These figures represent the most money we have ever been able to provide the Department.

Included in the overall increase for chapter 1 is an increase that means a great deal to me, the $36 million increase for Even Start, raising the total for that program to $60 million. Its a wonderful program that meets the educational needs of disadvantaged children and parents simultaneously. As provided in the authorizing statute when the total funding exceeds $50 million, Even Start must convert to a State formula grant activity; that will be the case in fiscal year 1991. I started funding for this program 2 years ago and I'm thrilled to see it grow.

For impact aid the bill provides $800 million, $67.6 million more than last year and $139 million above the administration's request. Of the amount provided, $600 million will go for category A students, $140 million will go for category B students, $17 million is for payments for section 2—Federal property, and $2 million for section 3E—base closings. Since the current process makes it difficult for some districts to budget appropriately I have asked the Department to look into the aid allocation process to determine if changes in the application process are warranted.

The school improvement programs are slated to receive $1.47 billion, $64 million more than last year and $230 million less than the administration's request. Let me highlight just a few of the increases provided by this bill. Included in the total are a $1.2 million increase for the national diffusion network, a $924,000 increase for inexpensive book distribution, $649,000 for arts in education, $62,000 for law related education and $406,000 for blue ribbon schools.

Included in the school improvement programs are $593 million for the Drug-Free Schools and Communities Program, this is a $54 million increase, a large amount of money for a program that only received $161 million in 1987.

The bill provides $200 million for the Eisenhower Mathematics and Science Education Program, $64 million more than last year but $30 million less than requested by the administration. I hope the Department will work with the Department of Energy and the National Science Foundation, who are also working to strengthen the math-science capacity of this Nation.

For the fund for the improvement and reform of schools and teaching the bill contains $9 million, a $642,000 increase, and for the fund for innovation in education it contains $25 million, a $6 million increase. Of the increase for FIE, $4.5 million is for the Comprehensive School Health Program and $4.5 million, a $1.1 million increase, is earmarked to continue expansion of the underachiever initiative that I started last year. I've long been concerned about the large number of students who aren't being reached by our educational system and hope that this initiative will foster innovative ways to reach youngsters who have been left by the wayside of the educational assembly line.

The administration requested $1 million for the Women's Equity Act program, the bill provides $2 million. Of that amount some funds will be used to fund fiscal year 1990 applications that weren't funded last year.

For bilingual and immigrant education the bill provides $205 million, $16.3 million more than last year and $537,000 less than the administration's request. I am concerned about the inability of the present educational structure to meet the needs of limited English-speaking students. So, included in this total is $800,000 for two middle school developmental bilingual instructional projects that foster academic achievement and retention by using an arts-based curriculum. The projects will feature site-based decisonmaking, voluntary magnet schools, parent involvement, community support, and collaboration with colleges and universities.

The education for the handicapped programs will receive $2.75 billion, $727 million more than last year and $645.8 million above the administration's request in this bill. This amount will bring the Federal share of the excess costs for education disabled children to 10 percent, the highest point in almost a decade. The bill also provides for the consolidation of the handicapped education programs in Public Law 89-313 and Public Law 94-142, as recommended by GAO. The Hawkins-Stafford Amendments of 1988 required that the administration of these programs be consolidated by fiscal year 1991. I hope that this increase will help us learn more about the unique needs of children with attention deficit disorders so that they can be better served in the future.

In the bill, the rehabilitative services and handicapped research will get $1.85 billion, $71.69 million more than last year and $12.8 million above the administration's request. Of this increase, as the original sponsor of the Americans With Disabilities Act, I am pleased $5 million will go to the National Institute on Disability and Rehabilitation Research for the creation of up to 10 special assistance centers to help employers respond to the challenges of implementing the new disabilities rights law.

The bill provides special institutions for the handicapped with $117.65 million, $8.3 million more than last year and $325,000 below the administration's request because $500,000 was transferred to another account for an evaluation.

The bill would increase vocational and adult education by $51 million, $5.3 million above the administration's request for a total of $245 million.

For student financial assistance a total of $6.78 billion is proposed, $692 million more than last year and $424.6 million above the administration's request. I'm particularly pleased that of this amount the SEOG Program would receive $533 million, a $75 million increase. SEOG targets the students with the greatest financial need and is free of all the abuses that sometimes taint other programs. The Pell grant program gets $5.4 billion, a $609 million increase. Of that increase $371 million goes to cover prior year shortfalls and $113 million is placed in a contingency fund in case the Departments cost-saving assumptions are inaccurate. The other financial aid programs are held at about the same level as the previous year. Work-Study gets $600 million, income contingent loans gets $10 million, Perkins loans $160 million, and State student incentive grants get $60 million.

The guaranteed student loans program would receive $3.9 billion, $43.6 million more than last year and $742 million above the administration's request. More than $2 billion of this bill goes to pay for loan defaults. This is a serious problem that undermines the student aid programs.

For the categorical higher education programs the bill provides $763.6 million, $140 million more than last year and $105.97 million above the administration's request. There are several increases of which I am very pleased and want to highlight. One is Aid for Institutional Development that receives $215 million, an $18 million increase. Another is TRIO, where we're recommending $342 million, a $100 million increase. In the foreign language studies we're continuing the work started last year with the creation of critical languages program between the Department of Education and the Defense Department. The fund for innovation in postsecondary education, where we're recommending $15 million, a $3 million increase is the first increase in over a decade.

For research and statistics the bill provides $133.86 million, $38.619 million more than last year and $40.9 million less than the administration's request. This represents the largest research and development increase in the history of the Department. In addition to the regular activities in these accounts there are a couple of items that deserve special attention. One is the $3 million for evaluation of education reforms in the States. Since States frequently replicate each others reforms, this program should help us prevent replication of ineffective practices. Another is the $10 million for following-up with the President's educational summit held last fall. The types of policymakers included in this activity is expanded to include State legislators, State board members and local school board members—folks that were excluded from the summit, but who play an important role in the education reform.

For libraries the bill provides $140.8 million, $4.154 million more than last year, $101.7 million more than the administration's request. I am pleased the bill provides $1 million to fund for the first time a grant program for local libraries to purchase native language materials.

□ 1040

Mr. Chairman, I yield 6 minutes to the gentleman from Wisconsin [Mr. OBEY].

Mr. OBEY. Mr. Chairman, I want to bring to your attention today two concerns I have with the human genome project which is funded by the Labor, Health and Human Services and Education Appropriations bill.

The human genome project is a $3 billion research plan to completely identify 100,000 genes that comprise the human being. The purpose of the project is to identify genetic causes for diseases and to use that knowledge in providing health care planning for human beings and we hope to eventually find ways to prevent or deal with disease.

The project has grown from $17.2 million in 1987 to $59.5 million last year. This year the administration asked for an increase of $36.8 million. This committee limited the increase to $9.5 million and we provided for the possible expenditure of an additional $18 million if approved by, as of yet unnamed director of the NIH.

We cut the administrations' spending plan for two reasons. First, this project is expected to cost the taxpayers $3 billion over the next 15 years. In other appropriations bills the science projects receiving the most funding are the high profile, sexy, and glitzy projects that gobble press attention as fast as they gobble dollars. The supercollider which was supposed to cost $4.4 billion in 1988 will now cost almost double that amount. Costs for the space station have grown from $8 billion to $30 billion. The Hubble telescope is another example. Its public relations program was dazzling until its mismanagement produced a Hubble that needed to be fitted with glasses. Promoters of the human genome project tell you that the funding for the project is not coming from other research. I'm sorry but it is.

In 1987, the NIH awarded 6,453 new and competing grants. This year, it is estimated that there will only be 4,577 new and competing grants. This bill tries to partially reverse this decline. But by the time the budget summit is in effect all medical research will be under excruciating pressure.

Some of the biggest names and biggest institutions and some of the most senior scientists in America are supporting the genome project. I'm glad because the project is a worthy one and we want it to succeed, but not if we do not make careful choices.

The overall squeeze on medical research funding will cut deeply into the support NIH is able to provide to a whole generation of young new scientists and we will pay a very big price. To be fair, the genome project is not in any one year as big a dollar gobbler as some projects I have cited, but $3 billion is big money.

The second reason for the committees' action concerns ethical questions such as who will have access to the information developed as a result of this project and how will they use it.

ETHICAL CONCERNS

We are living in an era where large institutions have an overwhelming impact on public policy and often at the expense of the individual. We see the drive toward mandatory drug testing by employers. It is a short leap from mandatory drug testing to other kinds of testing that employers may demand. Will employers be able to use this information to deny jobs? Will insurance companies be able to demand this information to quadruple your insurance premiums?

If the information that will be gained through the genome project is not accompanied by governmental and societal decisions that must be made concurrently with the development of genetic knowledge, we will destroy the principle of group insurance and we will be divided into two groups, those with pluperfect and imperfect genes. Just as surely as God made actuaries and accountants, there will be enormous pressures to give those who were lucky at birth, either through natural selection or genetic preselection, discounted health insurance premiums—and the rest of us, much higher "at risk" prices. Already we are seeing individuals with cystic fibrosis or Huntington's disease dropped from insurance plans and excluded from jobs. These discriminatory practices will only increase with advancements in genetic knowledge projects.

Taxpayers should not be put in the position of financing government programs without protections to ensure that those programs will not in the end lead to fencing them out of jobs or reasonably priced health insurance. I honestly believe that the development of information that surely will be gained through the genome project will necessitate a national health insurance program or some other kind of universal health coverage.

There are no Luddites on the committee. No one wants to hold back this research. We want to see it proceed but we want it to advance in a balanced way. There are critical societal choices that must be made concurrently with the development of the information that surely will come from dollars provided to the genome project. These ethical questions cannot be addressed by simply putting aside 3 percent of the funding for the genome project as the project managers have done. These questions will have to be addressed in a far broader way, not just within NIH but all across government and all across society. If we do not take care to develop answers to these questions before the knowledge genie is completely out of the bottle, the giant institutions which run the lives of so many Americans will use their leverage. And the knowledge gained through this project will be used in ways not consistent with American values, and a project which began with such promise will leave scars and tears in the social fabric.

We cannot allow that to happen. That is why I believe the committee made the right decision on funding levels for this program.

Mr. CONTE. Mr. Chairman, I yield 2 minutes to my good friend, the gentleman from Alaska [Mr. YOUNG].

Mr. YOUNG of Alaska. Mr. Chairman, I wonder if the distinguished chairman of the subcommittee would yield to me for the purposes of answering a question with respect to funding the Administration for Native Americans?

Mr. NATCHER. Mr. Chairman, if the gentleman will yield, I want to thank the gentleman from Alaska [Mr. YOUNG] for his assistance and his support all down through the years since he has been a Member of Congress, with our bill.

Mr. YOUNG of Alaska. Mr. Chairman, is it your understanding that funds provided for in the committee report with respect to the Department of Health and Human Services, Administration for Native Americans Programs, include $1 million for assistance to groups who are severely impacted by natural or manmade disasters such as large oilspills and that such funds would be available to communities impacted by the oilspill of March 24, 1989, in Prince William Sound, AK for the purposes of assessing socioeconomic impacts of the occurrence and to spur economic development which had been negatively impacted by the spill?

Mr. NATCHER. Mr. Chairman, if the gentleman will continue to yield, the gentleman is correct.

Mr. CONTE. Mr. Chairman, I want to support my good friend from Alaska [Mr. YOUNG]. I have been to his beautiful State many, many times, and I want to let the gentleman know we will do all we can to help those hurt by the big oilspill last summer.

Alaska's natural resources and beauty is a source of the gentleman's State's strength and economic viability, and its many environmental resources are valued throughout the country. These funds will greatly help to clean up the social and economic aftermath of the oilspill.

□ 1050

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Massachusetts [Mr. MAVROULES].

Mr. MAVROULES. Mr. Chairman, I want to thank the esteemed chairman, the gentleman from Kentucky [Mr. NATCHER] and my dear friend, the gentleman from Massachusetts [Mr. CONTE] for all their hard work and leadership on this bill.

As many of you know, for the last 2 years I have offered the amendment earmarking DOD funds for military drug interdiction. I believe, as many of you do, that we must utilize all our resources to fight the drug war, including the military. Last year the Speaker appointed four Members of this body to serve on the National Commission on Drug-Free Schools, pursuant to the Anti-Drug Abuse Act of 1988. In my capacity as one of the Commission members, I want to share with my colleagues the importance of the Drug-Free School Program. Education, not interdiction, is the best way and, in my opinion, the only way we are going to successfully eliminate our appetite for drugs. The Drug-Free Schools Program clearly represents the best tool we can provide our educators, to rid our communities of the drug scourge. These funds must be used for the development and implementation of drug and alcohol abuse education and prevention programs in our local schools so that our next generation—the little babies starting as young as Head Start, have a fighting chance to resist the tentacles of the drug cartels.

Let me ask the chairman and the ranking minority member if they agree with me that comprehensive drug and alcohol abuse education programs starting with Head Start and continuing through college represent the keys to reducing our demand for drugs?

Mr. NATCHER. Mr. Chairman, will the gentleman yield?

Mr. MAVROULES. I yield to the chairman of the subcommittee.

Mr. NATCHER. Mr. Chairman, I would like the gentleman from Massachusetts to know that I not only agree with him but at this time it gives me an opportunity to thank him for his support of our bill all down through the years. The gentleman from Massachusetts is an able Member of the House.

Mr. Chairman, I agree with the gentleman.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. MAVROULES. I yield to my colleague, the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, I thank the gentleman from Peabody and the chairman from Bowling Green for his heartfelt comments about the importance of fighting drug abuse through education. I wholeheartedly agree that comprehensive substance abuse education programs—getting kids off to a good start and keeping them on track—is one of the best investments we can make. That's why I have worked to expand support for all the substance abuse programs in this bill and the Comprehensive Health Education Program in the Department of Education. I also think it prudent to build linkages between the Departments covered by this bill and their various substance abuse prevention and treatment programs. I appreciate all your efforts on the Commission for Drug-Free Schools. Thank you, Mr. Chairman, and Mr. MAVROULES.

Mr. MAVROULES. Mr. Chairman, I thank the gentleman from Massachusetts [Mr. CONTE] and the chairman of the subcommittee, the gentleman from Kentucky [Mr. NATCHER].

Mr. CONTE. Mr. Chairman, I yield 4 minutes to my good friend, the gentleman from Pennsylvania [Mr. COUGHLIN].

Mr. COUGHLIN. Mr. Chairman, I want to applaud the work of the chairman of the subcommittee, the gentleman from Kentucky [Mr. NATCHER], and my good friend, the distinguished ranking minority leader, the gentleman from Massachusetts.

This is a good bill these gentlemen have put together, with funding for many sound programs.

There are, however, four essential antidrug programs which this bill has not adequately funded. And I understand that the gentleman from Kentucky [Mr. NATCHER] will offer an amendment at the appropriate time to fund these programs. First, there is the Drug Free Schools Program, the primary Federal tool for educating our Nation's children against the dangers of drug abuse, and that is funded at a level of $49 million below the President's request.

Mr. Chairman, we have evidence that these drug prevention programs are most effective when the entire community sends a strong antidrug message.

Finally, there is funding for two important drug treatment programs. The first program, treatment improvement grants, would help fund treatment demonstration programs for at-risk populations; $35 million more is necessary for these programs to meet the President's level.

Next, we must provide $99 million more for the Alcohol, Drug Abuse, and Mental Health Block Grant Program in order to meet the President's request. This program is the primary method the Federal Government uses to fund drug treatment programs.

Mr. Chairman, we are turning the corner on the drug problem. Our prevention and education programs have provided good results. Our citizens, and especially our children, are turning away from drugs, but there is a great deal more to do.

Mr. Chairman, it has been claimed that some of the funds in these programs have not been spent out as fast as they should be or that they are not being spent out, but, Mr. Chairman, no State has ever failed to spend its treatment funds within the existing time requirements, and the Federal Government has never been forced to recover a single dollar of unexpended treatment money. The law gives the States in education programs 27 months to spend the Federal funds, and they are doing so. In terms of the treatment block grants, let us consider the fiscal year 1989 Block Grant Program for a moment. That fiscal year began October 1, 1988. States, there-

fore, have until September 30, 1990, to spend their money; 96 percent of all involved funds have already been spent by June 15 of this year. So there should not be a problem in that area.

Mr. Chairman, I commend the distinguished chairman of the subcommittee and the distinguished ranking minority member for being willing to offer the amendment to restore the funding. It is not time to let down our guard, and I am glad we will be meeting the President's request in this area.

Mr. NATCHER. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from New York [Mr. RANGEL].

Mr. RANGEL. Mr. Chairman, let me join with my colleague, the gentleman from Pennsylvania [Mr. COUGHLIN], in praising the work that has been done over the years by the gentleman from Massachusetts [Mr. CONTE] and the subcommittee chairman, the gentleman from Kentucky [Mr. NATCHER]. Whatever problems Members of Congress have had with the Committee on Appropriations and this subcommittee, it has never been because they lacked the sensitivity or understanding as to what the human needs of our Nation have been.

That is why I hope that the press and the American people do not believe that this committee is responding to the reckless attacks that have been made on the Congress and this committee by Mr. BENNETT. He has seen fit to deal not with consultation but with more confrontation. He has come to my State and dealt with the press, and he has never even asked to meet with a member of our delegation. I would hope in the future as we try to work out a meaningful strategy to deal with an international problem that we will not find time for Republicans and Democrats to argue about the strategy which we are going to use to approach this very serious problem. The fact that the gentleman from Massachusetts [Mr. CONTE] and the subcommittee chairman, the gentleman from Kentucky [Mr. NATCHER] have come together to avoid a dispute on this issue on the floor again adds to the long tradition of this committee not being partisan but responding to a national need.

Mr. Chairman, I just want to let these gentlemen know that the Members, Republicans and Democrats, on the Select Committee on Narcotics Abuse and Control once again laud them for the leadership which they have provided.

Mr. CONTE. Mr. Chairman, I want to take this opportunity to thank my good friend of long standing, since I came to the Congress, for those kind words.

Mr. Chairman, I yield 2 minutes to my good friend, the gentleman from Indiana [Mr. MYERS].

Mr. MYERS of Indiana. Mr. Chairman, I join our colleagues today in thanking the chairman of the subcommittee, the gentleman from Kentucky [Mr. NATCHER], and the ranking member, the gentleman from Massachusetts [Mr. CONTE], and the other members of the subcommittee, as well as the staff for the very fine job they have done in bringing this bill forward.

I certainly support wholeheartedly H.R. 5257. I realize that there is criticism of the bill. There has never been enough money to solve the problems that this bill attempts to address.

This bill touches every American family every day of the year in some fashion, some more seriously than others.

I rise today to raise one issue which is of deep concern to me. It addresses the problem of disease treatment and, hopefully, disease control, elimination, and prevention. I refer particularly to those amounts of money that go to NIH for disease research.

Today we find more people in this country die from disease-related problems of heart and lung than any other disease. Yet we are appropriating in this bill less money for heart and lung, only about $1.1 billion, than we are for AIDS.

I am not critical of the money going to AIDS, but we are appropriating in this bill about $1.7 billion for AIDS research. But when we look at the number of people dying from AIDS each year, there is no comparison with the people who are dying from cancer. We are appropriating $1.7 billion for cancer research.

I am speaking now about cancer. Later on this year I am going to be talking to this committee and this Congress because we are on the verge possibly of developing a protection from cancer, particularly breast cancer. There is some suggestion now that there is a drug that may be applicable to preventing or at least reducing the incidence of breast cancer.

□ 1100

So, at the proper time I will be asking for additional funds for this research. We are now losing too many women each year, and men, from breast cancer. There is something that can be done. Mammography for early diagnosis is very important, but yet mammography today is inadequate.

First, many women do not appraise themselves, do not allow themselves to have mammography.

Second, it sometimes is not properly administered. The equipment presently in many hospitals and facilities is not appropriate, but adequate; so I am going to ask this committee a little bit later on that we might allocate more money for cancer prevention and research.

I think we just might be on the very verge at this time of eliminating or at least reducing the incidence of cancer; but I do rise in full support of this bill and thank the committee for what it has done.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsyvania [Mr. GAYDOS].

Mr. GAYDOS. Mr. Chairman, I rise in strong support of H.R. 5257, the appropriations bill for the Departments of Labor, Health and Human Services, and Education, because it reaffirms among other things the committee's long-time commitment to workplace health and safety.

We made that commitment in 1969 and 1970 when we passed the Federal Coal Mine Safety and Health Act of 1969 and the Occupational Safety and Health Act of 1970, and we have restated that commitment time and again in the intervening years.

As the chairman of the Subcommittee on Health and Safety, which has oversight and legislative jurisdiction in the occupational safety and health arena, I applaud the funding increases proposed for the Occupational Safety and Health Administration [OSHA], the Mine Safety and Health Administration [MSHA], and the National Institute for Occupational Safety and Health [NIOSH].

I especially want to commend the distinguished gentlemen from Kentucky, [Mr. NATCHER], chairman of the Appropriations Subcommittee, and the gentleman from Massachusetts [Mr. CONTE], the ranking Republican, for their continuing efforts on behalf of America's working men and women. In all of my years of working with them on worker health and safety issues and funding for the three agencies which have that responsibility, they have always been responsive and supportive.

In the measure before us, those two gentlemen have agreed with me and others that, even though these are times requiring fiscal constraints, we cannot ignore the threats to the health and safety of our workers.

The bill provides for funding levels for the three agencies above the recommendations from the administration which, in light of the increasing number of workplace fatalities, injuries, and illnesses, though modest, are vital.

Workplace fatalities have been averaging between 7,000 and 10,000 per year, depending on whether we use figures provided by NIOSH or the National Safety Council, respectively. The Bureau of Labor Statistics, on the other hand, has estimated that occupational fatalities for 1988, the most recent year for which data are available, at 3,300, about half of the NIOSH estimate.

Injuries and illnesses also are increasing. In 1987, the number of reported injuries and illnesses were just over 6 million. In 1988, the number had increased to 6½ million. More significantly, however, the number of lost workdays increased by more than 6,000, from just under 51,000 in 1987 to just under 57,000 in 1988. This suggests that the injuries and illnesses are becoming more severe and are resulting in longer hospitalization and convalescent periods.

We all know that we will never have a sufficient number of inspectors to visit every workplace, but the concept behind the OSHA Act and other occupational safety and health laws is to have enough so that there will be a presence. Two recent research papers by the National Bureau of Economic Research support the idea of more inspections.

A 1989 paper on assessing the impact of OSHA's enforcement on workplace accidents studied 6,842 manufacturing plants between 1979 and 1985. It was found that a 10-percent increase in inspections with penalties would reduce accidents by about 2 percent. The 1990 paper focused on the effectiveness of OSHA's health inspections and produced two major findings: First, the number of citations and the number of violations of worker exposure restrictions decrease with additional inspections in manufacturing plants, and second, the first health inspection has the strongest impact.

Given those findings, the proposed funding increases for OSHA and NIOSH are significant. The increase in funding from fiscal year 1990 of $267.1 million to the fiscal year 1991 level of $291.3 million as well as the addition of 34 full-time compliance officers are major steps forward.

The bill also provides a funding level of just over $87 million for NIOSH, an increase of $2.3 million from 1990's funding level and $1.88 million above the administration's request. Given some of the critical research projects being undertaken by NIOSH in the areas of farm health and safety, construction safety and health, ergonomics, and indoor air pollution, this proposed increase is very necessary.

Considerable concern has been expressed about the administration's proposed funding for MSHA and its intention to reduce full-time staff by 50 slots. I commend the Appropriations Subcommittee chairman and ranking Republican for restoring those 50 positions and increasing funding to $177.7 million for fiscal year 1991, an increase of $5.2 million over 1990 and more in keeping with the rate of inflation. The administration's proposed budget called for an increase of about 2 percent from 1990 to 1991, well below the 4 to 5 percent rate in inflation.

The administration must recognize the position of the House, as expressed by the Appropriations Subcommittee that—

* * * It would not be prudent to reduce staff and cut back on the number of safety and health inspections in our mines.

While it is true that the number of fatalities in the mining industry have continued to decrease, providing for fewer inspections is not the proper answer. We know that the drop in fatalities is probably due to two things: A continued reduction in the number of active mines and the mining work force, and the continued presence of MSHA inspectors.

Overall, Mr. Chairman, this is an excellent appropriations bill. It addresses many key issues appropriately and, even within the fiscal constraints we have, recognizes the importance of the health and safety of American workers.

Before I surrender my time, Mr. Chairman, let me also comment on the funding levels for Federal education aid, H.R. 5257. This bill commits an additional $3 billion for educational activities, including a substantial amount for student loan programs.

I have commented often that it should be a national goal to enable as many Americans as possible to continue their educations beyond the high school level, regardless of the form of education or kind of school to be attended—4-year private or public college, 2-year community college, or a career training school.

It is in the best interests of this Nation that we support those who wish to enhance their knowledge as well as those who seek career-specific training that would enable them to escape the chains of poverty and welfare.

The bill takes a significant step forward and I urge all of my colleagues to vote for passage of H.R. 5257.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan [Mr. PURSELL].

Mr. PURSELL. Mr. Chairman, I want to congratulate the committee chairman, the gentleman from Kentucky [Mr. NATCHER], and the ranking member, the gentleman from Massachusetts [Mr. CONTE]. It has been a great honor to serve on this committee with my colleagues. I think it is one of the most outstanding committees that I have ever known in my 20 years of public service.

There are a lot of great programs in this bill, but I would just like to emphasize today some that do not get a lot of attention in this Nation. One is infant mortality, which is a national disgrace. I want to congratulate our subcommittee and our staff for making additions to the Maternal and Child Care Program. The authorizing statute requires that 15 percent of those block grants moneys be set aside by the Secretary for projects including infant mortality programs in this Nation. So I think that is a credit to the committee to recognize that now as a national priority.

Also, biomedical research has been underfunded by the administration. I am not sure why. It depends on who you talk to, but this committee has made adjustments on the plus side to improve and strengthen biomedical research in this Nation.

The National Institutes of Health have gotten additional help this year. The gentleman from Massachusetts [Mr. EARLY] and other members of that committee have been national leaders.

I did want to mention the need for a new Director at NIH but I understand that Mr. Danforth has agreed to take that position. I think it is the second time it has been offered to him. So I think that position is going to be filled very shortly. That is very critical to the morale and leadership of the National Institutes of Health.

My last comment is that on the whole program of AIDS, I think the committee will have to reconcile someday balancing out the research dollars being spent on the AIDS program, now $1.7 billion. We are squeezing down research on many of the other chronic illnesses, such as heart disease, lung disease, hypertension, and diabetes.

My State of Michigan has the worst track record in chronic illnesses in this Nation, No. 1, at the bottom of the list, with the highest rate of death by chronic disease, and yet our State is spending money on AIDS which it should be changing around and getting a better balance to these other critical illnesses which are killing more people.

So in conclusion, Mr. Chairman, I would like again to thank the committee and thank the staff for an outstanding bill, and I recommend it to the members of the committee.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to the gentleman from New Mexico [Mr. SKEEN].

Mr. SKEEN. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, I rise today in support of H.R. 5257, appropriations for the Departments of Labor, Health and Human Services, and Education. And I congratulate Chairman NATCHER, a man for whom I have the greatest respect, and the ranking minority member, Mr. CONTE, my colorful good friend and erudite colleague, for the fine work they have done in crafting this legislation.

Yet, I also want to express my concerns regarding the funding of drug treatment and prevention programs. As the ranking minority member of the Treasury, Postal Appropriations

Subcommittee, I helped to manage the passage last week of our bill which funds the interdiction of drugs. The Customs Service, the Bureau of Alcohol, Tobacco and Firearms, and the Internal Revenue Service do an incredible job stopping the flow of illegal drugs into the United States.

But more must be done to reduce demand for drugs. Everyone says so. The one criticism that we hear in Congress every day is that the administration is not serious about reducing the demand side of the drug problem. There is a great deal of criticism from Congress that too much money is spent on interdiction and not enough is spent on education and treatment. If no amendment is adopted to correct this then I do not think Congress should ever again criticize the administration on this point.

Funds for the Alcohol, Drug Abuse and Mental Health Administration Block Grant Program to States were cut $100 million from the President's request. The Education Department's Drug-Free Schools Program was cut $238,000 below current levels. And two other grant programs for drug treatment were cut over $77 million below the President's request.

In total, Congress is $230 million less committed to reducing the demand for drugs than the administration is.

Bill Bennett, the Director of the Office of National Drug Control Policy, has a tough job. He is charged by the President to end this shame of America—to end our addiction to drugs. He must accomplish this in two ways: stop the supply and reduce the demand. My subcommittee has given the drug czar and the administration the means to fight the supply side, we now need to fund the reduction side.

I am sure that my colleagues on the Appropriations Committee have legitimate concerns regarding the expenditure of these funds. I hope that these concerns will be resolved by the time this bill goes to conference so that we can fully fund a total war on drugs.

Again, I thank Chairman NATCHER and the gentleman from Massachusetts [Mr. CONTE] for their efforts in crafting an overall bill that funds vital programs and services for the United States. And I urge the House to move quickly to pass this bill without any further cuts in funding.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Mississippi [Mr. MONTGOMERY], the chairman of the Veterans' Affairs Committee, and one of the most able Members of the House.

□ 1110

Mr. MONTGOMERY. Mr. Chairman, I want to thank the distinguished gentleman from Kentucky [Mr. NATCHER] and the gentleman from Massachusetts [Mr. CONTE] and also the subcommittee members for the support they have given the veterans of this Nation.

I say to the gentleman from Kentucky [Mr. NATCHER] that he has never let us down as far as veterans, and we thank him very much.

Mr. Chairman, the bill provides $79 million for the disabled veterans' outreach program which is known as DVOP, an increase of $4 million over the budget request. The bill also provides $72 million for the local veterans' employment representatives program, known as LVER's. The bill also provides $2.5 million for the National Veterans' Training Institute.

Mr. Chairman, the gentleman from Kentucky [Mr. NATCHER] and the ranking minority member, the gentleman from Massachusetts [Mr. CONTE], as well as the distinguished chairman of the full committee, the gentleman from Mississippi [Mr. WHITTEN], and the full committee have again shown their support and commitment to our veterans by the amounts contained in this bill for employment programs for veterans.

With the reduction in the military force that is contemplated in all branches of the military service during the next fiscal year, and there will be other cuts to follow of our military, we must do what we can to help these young men and women readjust to civilian life, and a big part of that readjustment is finding a decent job.

This appropriation bill would carry out our responsibilities of finding veterans jobs when they are discharged from the military.

Mr. CONTE. Mr. Chairman, I yield 2 minutes to my friend, the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding me this time.

The gentleman knows, and the House knows, the respect with which he is held by this entire institution, as is the gentleman from Kentucky, for the work that they do in bringing this bill to the floor. I think many of the policy options as defined in this bill are precisely those which the majority of the Congress feels are important for the future of the country.

I am concerned, however, about funding simply because we are engaged in budget summitry. We are engaged in talk of tax increases. We are engaged in an awful lot of questions about the direction of the future, and I think we need to understand that we started with a process here that is continuing in this bill in terms of funding which is somewhat disturbing.

The President's request, as it arrived on Capitol Hill, provided for an increase of $1.5 billion in budget authority and $3.6 billion in outlays over fiscal year 1990. Those are big increases, and they are increases which, in light of the talk about tax increases, are probably far too big.

This bill that we have before us increases the total budgetary resources, including the limitations on obligations, by $4.6 billion over the President's request. That total represents an increase in outlays of over $1.6 billion and has significant outyear implications.

Why is that important? Well, because in the budget summit that we are talking about we are supposedly going for a 5-year agreement. If, in fact, in this bill we are not only increasing this year but are increasing significantly in the outyears, that has real dire results in terms of the overall budget summitry.

So I am concerned about that, and I would say to both the good chairman and to the gentleman from Massachusetts that there are some areas of increase that I think we ought to look at specifically. I will be offering some amendments to take away some of the increases.

Mr. NATCHER. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio [Mr. STOKES], a member of the subcommittee and one of our best members.

Mr. STOKES. Mr. Chairman, I rise in support of H.R. 5257, the fiscal year 1991 Labor-Health and Human Services-Education appropriations bill. This is one of the finest bills the Appropriations Committee has ever sent forward. I believe that it clearly expresses the priorities of this Nation.

Let me first say that it has been a great privilege and pleasure to work with the distinguished chairman of our committee, WILLIAM NATCHER. He has been extremely fair and has worked exceedingly hard on behalf of programs that are of vital importance to the people of this Nation. I deeply appreciate the consideration he has given me and the programs in which I have a special interest. I would also like to express my appreciation to the ranking minority Member, Mr. SILVIO CONTE, who, too, worked long and hard on this bill. It is an honor to serve on the Labor-HHS-Education Subcommittee with these distinguished gentlemen.

Mr. Chairman, the Labor-HHS-Education appropriations bill is certainly one of the most important of the 13 approriations bills. It determines the quality of life for our citizens and is the foundation for our Nation's health, productivity, and competitiveness. This bill provides for all segments of our society, but particularly those who are most vulnerable—children, the elderly, the disabled, and the homeless.

The entire Nation will benefit from this bill's passage. This bill puts our people to work, maintains and enhances our health, and provides for the education of our children. H.R. 5257 appropriates $170.4 billion in

fiscal year 1991 for Labor Health, Human Services, and Education programs. These programs are where our priorities must lie.

Mr. Chairman, I agree with the high priority given education in this bill. We have recommended that over $26 billion be invested in educating our citizens. The education President only recommended that we spend only $23.5 next year in this critical area. Within the funds provided for education, proven programs, such as chapter 1, were given major increases in recognition of their effectiveness; $6.2 billion has been included for chapter 1, the Federal Compensatory Education Program for disadvantaged elementary and secondary schoolchildren. This amount is a $1 billion increase over the 1990 level and $757 million over the President's budget.

I am pleased to note that H.R. 5257 also includes a $728 million increase for State grants for handicapped education. This amount will increase the Federal share of the cost of educating a handicapped child from 7 percent to approximately 10 percent.

In the area of higher education, the committee's action increased funding for special programs for the disadvantaged—the so-called TRIO programs—by $100 million. With a total of $342 million, TRIO will be able to provide opportunities in higher education to 196,000 more students than it could under the 1990 level.

For student financial assistance, the bill includes $6.7 billion. This is an increase of $692 million over the 1990 level and $425 million above the amount requested by the President's budget. This level enables the restoration of $160 million to Perkins loans and $60 million to State student scholarships. Both of these programs were slated for elimination by the President.

The bill before us also emphasizes training, providing $4.2 billion to carry out the Job Training Partnership Act. Included in this amount is $901 million for the Job Corps, one of the most successful programs in preparing extremely disadvantaged young people for productive lives. This represents an increase of $98 million over the fiscal year 1990 level.

The bill also recognizes the needs of older Americans. It includes $400 million for community services employment for older Americans, and increase of $57 million over the President's budget and nearly $33 million over fiscal year 1990. This increase will enable expansion of part-time employment opportunities in community service activities for unemployed, low-income persons aged 55 and over.

H.R. 5257 addresses the health concerns of our Nation. It provides $135.7 billion for the Department of Health and Human Services. This is an increase of $13.2 billion over 1990 and approximately $1.3 billion above the President's budget. This bill would allow us to continue to mount a national campaign to deal with the problems of AIDS, homelessness, and substance, abuse. All of these programs received increases in the bill. The AIDS program will receive a 13-percent increase, the Stewart B. McKinney Act homeless programs will receive a 30-percent increase, and substance abuse programs will receive a 10-percent increase. Included among the substance abuse programs is first-time funding for emergency protection grants to assist States in providing protective services to children of drug-abusing parents.

The strengthening of our biomedical research capabilities is also addressed in this bill. It provides $8.3 billion for the National Institutes of Health—$1 billion more than the fiscal year 1990 level and $694 million over the President's budget. The committee's report also includes cost-management requirements to ensure that we as a Nation get the most from our investment in research.

We all know that we are facing severe budget constraints. However, we cannot afford to renege on our commitment to the disadvantaged and to children. The committee was able to provide needed funds for many health and human services programs that serve the poor, the elderly, and our children. The $33 million increase for community health centers is one example of our support for these programs.

Mr. Chairman, I strongly endorse the passage of the fiscal year 1991 Labor-HHS-Education appropriations bill, and urge my colleagues to support it. H.R. 5257 recognizes the budgetary constraints that we face without sacrificing important safety net programs. A vote in support of this bill is a vote to invest in the future of our Nation. I strongly urge the adoption of this bill.

Mr. CONTE. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois [Mr. PORTER].

Mr. PORTER. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, I commend to the Members the fiscal year 1991 appropriation bill for the Departments of Labor, Health and Human Services, and Education. As usual, the gentleman from Kentucky [Mr. NATCHER], and the gentleman from Massachusetts [Mr. CONTE], and the members of the subcommittee have done an outstanding job bringing this bill to the floor. I also want to commend the very fine staff of the subcommittee, Mr. Chairman. It is an ongoing pleasure for me and my staff to work with these very fine people, Mike Stevens, Bob Knisely, Sue Quantius, and, on the minority side, Jack Chow, who have done a flawless job of guiding the subcommittee through markup.

Mr. Chairman, as a gentleman from Kentucky [Mr. NATCHER] would and does say, this is a good bill. Although we all know that these will not and cannot be the final numbers, we are sending a strong message about our Nation's priorities. This bill has large increases for health and for education programs.

We are including a $1 billion increase for the National Institutes of Health to continue important work on the whole spectrum of biomedical research opportunities. In particular, I am encouraged to see continued progress on chronic fatigue syndrome. We are vigorously pursuing several promising avenues of investigation that I believe will eventually lead to effective treatments for the many people afflicted with this disease.

Mr. Chairman, on the education side, we have large increases for impact aid, assistance to local school districts that serve large populations of military children. For the first time in many years, we are beginning to recognize our obligation to these school districts.

Finally, we have continued our strong commitment to several of the independent agencies including the U.S. Peace Institute where Ambassador Sam Lewis and his staff are doing such fine and important work, and the Corporation for Public Broadcasting, which provides quality programming throughout the United States.

Mr. Chairman, this is an excellent bill which sends a strong message to this country that we are committed to the education and health of our people. I thank the distinguished gentleman from Kentucky and the able gentleman from Massachusetts for their leadership.

Mr. NATCHER. Mr. Chairman, I yield such time as he may consume to the chairman of the full committee, the dean of the Congress, the House, and the Senate, the gentleman from Mississippi [Mr. WHITTEN].

Mr. WHITTEN. Mr. Chairman, I thank the gentleman, the chairman, for yielding me this time.

Mr. Chairman, may I say that it is a pleasure for me to be here. It is a pleasure to work as a member of this subcommittee and be associated with my good friend, the gentleman from Kentucky [Mr. NATCHER], an outstanding Member of the Congress and my close friend over the years, and the gentleman from Massachusetts [Mr. CONTE], another able friend, and my other colleagues on this subcommittee.

At this time when we have so many people looking around the world to find a place to look after, we should know by now that we cannot control the world and we certainly know that we cannot finance it.

It is wholesome to see our subcommittee under the chairmanship of the gentleman from Kentucky [Mr. NATCHER] give attention to Americans and America. We have got to give our country that attention, because our country is what all of our money is based on. An educated, healthy population, with adequate housing, food, and nutrition from a strong agricultural base, provides the foundation for our national strength and future.

This is a bill that is supported by all members of the Committee on Appropriations who agree on the importance of the education and health of the citizens of the United States.

Mr. Chairman, ours is a great country. We need to take care of all of it in order to maintain a strong, healthy Nation. Strength and health that can come only from protection and developing the Nation's resources—our real wealth—our highways, our bridges, our schools, our harbors, our health facilities, our national parks and wildlife refuges, and our research programs.

We face a difficult financial situation. But we cannot eliminate a $3 trillion national debt by cutting back or eliminating that which we need as a basis for economic growth. We will get out of our fiscal problem only when we return to producing more than we consume and selling the balance abroad. We need to regain our normal domestic and overseas markets. When we do that, we will be well on our way to eliminating the debt.

Mr. Chairman, this bill includes funds for all phases of education, both higher and secondary, including universities, colleges and community colleges, vocational education, disadvantaged education, adult education, and historically black colleges, including Mississippi Valley State University at Itta Bena, MS.

It is directed to meeting the health and other needs of our people, all of which is spelled out in the report accompanying this appropriations bill (H.R. 5257), which I shall not list here.

Mr. Chairman, I am especially thankful for the attention given to problems of my State and district.

Mr. Chairman, in addition to being a member of this subcommittee, I am serving my 12th year as chairman of the Appropriations Committee and I assure you no chairman, and no subcommittee, does a better job than BILL NATCHER and the members of this subcommittee.

□ 1120

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Arkansas [Mr. ALEXANDER].

Mr. ALEXANDER. Mr. Chairman, I thank the gentleman from Kentucky [Mr. NATCHER] for yielding.

I rise in support of this bill today and compliment the work of the subcommittee in bringing this bill to us today.

Last week my colleague, Mr. CONTE, proudly termed this legislation "America's bill." In my opinion, he could not have come up with a more appropriate name. The programs funded by this bill ensure a decent way of life for all Americans—even for our poor, our elderly, and our children. These services make good on the promise that America really is the land of opportunity—for each and every one of us.

This year's bill provides about $170 billion for employment and training programs, health care, biomedical research, substance abuse prevention, family support payments, educational assistance, and other social service programs.

The $170 billion seems like a lot of money as we talk about how important it is to put our fiscal house in order and reduce the deficits that are threatening our economy.

But as we think about our funding priorities, I urge my colleagues to look long and hard at how the Federal assistance provided for in this bill improves the daily lives of our constituents.

I'm pretty sure you'll discover, as I have, that the programs funded by H.R. 5257 are indispensable to many Americans.

Let me take a few mintues to share with you their importance in my district of northeast Arkansas.

This bill includes $490 million for community health centers—more than $50 million over the administration's request.

As many of my colleagues from medically underserved areas know, these centers are the only source of affordable health care in many communities.

Last year, Federal funds supported 13 community health centers in northeast Arkansas—in Rector, Imboden, Mammoth Spring, Lepanto, Augusta, Des Arc, Cotton Plant, West Memphis, Madison, Marianna, DeValls Bluff, Clarendon, and Lake View.

Recent figures show that the doctors in these clinics treat 34,955 of my constituents in a year. Over 83,000 visits with patients are made possible through the Community Health Center Program.

These clinics are located in poor, rural sections of my district—places where it's hard to find a doctor, and for many families, even harder to pay his bill. The physicians at these centers tell me that without our appropriation, they couldn't keep their doors open. Almost 35,000 people in northeast Arkansas would be without health care.

In addition, H.R. 5257 recommends over $250 million for health professions training.

Right now, Arkansas suffers from a crippling health manpower shortage. Every single one of the counties in my district has been designated as medically underserved.

Health education scholarships and grants can make a critical difference in health care accessibility in the years to come by training doctors and nurses who will return to rural areas.

Although the committee was not able to appropriate any funds for the National Health Service Corps because changes in the authorizing language are still incomplete, this program will also go a long way toward alleviating the shortage of primary health care providers.

Unless the corps is revitalized, 20 of the 27 slots in my State's program will soon be vacant—and many Arkansans will be without access to health care services.

Our bill also provides $1 billion for the new workfare project, jobs opportunities and basic training [JOBS]. Arkansas has taken the lead in implementing this program which couples eligibility for welfare benefits with participation in job training and placement programs.

By requiring young welfare recipients to take part in educational and training activities, the JOBS Program encourages them to turn their lives around and become productive members of the work force.

I would like to focus for one moment on one of the most crippling and chronic problems in our Nation today, and that is the drug problem. We have done a lot in this committee and in this Congress about fighting the drug war.

Mr. Chairman, some Members from urban areas may not believe it, but we in Arkansas have a persistent, critical drug problem as well. Drugs are in ample supply throughout Arkansas. As I travel around my district and visit the various schools in the area, I find that the toll that drugs are taking in small towns across the improverished Mississippi Delta region is devastating. Drugs are prevalent not only in Arkansas, but across the delta, in Mississippi, Tennessee, Louisiana, Kentucky, Illinois, and Missouri.

Mr. Chairman, we have appropriated a lot of money in this bill for substance abuse education and prevention. We have recommended $2.6 billion for the Alcohol, Drug Abuse, and Mental Health Administration, and $539 million for drug-free schools and community programs.

Mr. Chairman, now we need to ensure that the funds that are appropriated are distributed to the committees that need them. Our bill provides, for example, $220 million to the Office of Substance Abuse Prevention for high risk youth prevention programs and other community-focused grants.

Currently the Office of Substance Abuse Prevention funds only four

high risk youth programs in the Mississippi Delta region, and awarded just one Community Youth Activity Program grant throughout the entire delta area.

Mr. Chairman, the lower Mississippi Delta is the poorest region of the United States—and often the most overlooked. The 8.3 million people that live in my part of the country deserve our assistance.

In its final report, the Lower Mississippi Delta Development Commission found a clear need for school and community-based programs directed at high-risk youth.

With the proper assistance, we can give a hand to students, educators, law enforcement officers, and local leaders who are learning to say no to drugs and the destruction that they bring.

That is why I requested your support in asking that special attention be paid to areas with all of the characteristics that place our young people at risk—widespread poverty, high pregnancy rates, and low high school graduation rates.

If State and Federal officials in charge of these funds take the time to help delta communities develop effective substance abuse programs, we can make sure that these Federal dollars go to good use.

The commitment to fighting the drug war is already present at the local level. Just within the past week, I have visited with community and student leaders who are working to educate young people about the dangers of drugs from two different towns in my district.

The money we're appropriating today can help them succeed. But it will be effective only if its adminstrators reach out to the delta region with improved technical assistance, work with them in developing substance abuse projects, and give them their fair share of this aid.

Mr. Chairman, the programs supported by this legislation are our best hope for turning the dead ends of poverty, welfare, and despair into two-way streets where our children can find the road to becoming productive, successful citizens. I urge my colleagues to vote for this bill.

Mr. CONTE. Mr. Chairman, I yield 1 minute to my good friend, the gentleman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. Mr. Chairman, I too want to shower accolades that are duly deserved on the distinguished gentleman from Kentucky [Mr. NATCHER] and the distinguished gentleman from Massachusetts [Mr. CONTE] for the work they constantly do, year after year, in this and in other ways.

Mr. Chairman, I want to focus the attention of the membership just for a moment on something special these gentleman did. They listened very carefully to the scientific community, the scientific investigators, particularly in biomedical research, as they contended in the questions of grants under the National Institutes of Health.

Biomedical research being on the top of the list of advances that the United States leads in, we ought to, as they have done, pay greater attention to what the scientific community itself wants to say to the Congress about priorities and specialties in this special field. They have accommodated them, notwithstanding some of the criticism we have heard from other members of the scientific community. It was a benefit to these gentleman in drafting this bill to hear from the biomedical research special investigative scientific field, and I thank them for that.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Maryland [Mr. HOYER], one of the able members of the subcommittee.

Mr. HOYER. Mr. Chairman, I thank the gentleman from Kentucky [Mr. NATCHER].

Mr. Chairman, every time I rise to speak on this bill I say what a privilege it is to serve with two of the giants of this House and of this country, two giants who have supported education and health care to the great benefit of the American public. Of course, I refer to our chairman, the gentleman from Kentucky [Mr. NATCHER], and the ranking member, the gentleman from Massachusetts [Mr. CONTE], not only the ranking member of the Committee on Appropriations, but of our subcommittee as well. It is a privilege to serve with both gentlemen. They are able advocates, committed to the welfare of our country and the welfare of our people.

Mr. Chairman, there will be offered during the course of the consideration of this bill across-the-board cuts. There is no bill in my opinion that this House will consider that is any less deserving of any cuts than this bill. Furthermore, as I have said on many occasions, if there is a motion that would be appropriate on this bill, an amendment, it would be for an across-the-board increase on behalf of the health, education, and welfare of the citizens of this country.

Mr. Chairman, I am particularly pleased that we have included additional moneys in education, in Head Start, in chapter 1, programs that are vital to the ability of this country to compete in the coming decade and the coming century.

I am also very pleased that we have included as the gentleman from Arkansas [Mr. ALEXANDER] indicated, moneys in this bill to meet the incredible crisis that confronts children in crack families.

Mr. Chairman, crack is a drug like none other that we have known in this country, probably the most insidious attack on the stability of families that we have seen, placing children at high risk.

Mr. Chairman, I rise today to support the bill reported by the Labor, Health and Human Services, and Education Subcommittee. Once again, my colleagues on the committee led by Chairman NATCHER have worked long and hard on this bill. And it shows.

Chairman NATCHER, beginning with the hearings in February, through the 302(b) allocations and the markup has done a masterful job: First, in increasing the discretionary funds available for the "people's bill"; and second, in helping the subcommittee and the House make tough, wise choices on the programs that ensure the health, education, and welfare of our Nation.

Chairman NATCHER and the ranking member of the minority, SIL CONTE, and every member of the subcommittee are to be congratulated on a fine job.

This bill provides $26 billion, a $2.5 billion increase over the President's budget request, for education. The President's request provided less than an inflation increase for education programs.

In reviewing the education programs that will help ensure our Nation's competitiveness in a changing world and ensure equality of opportunity for our people, the committee provided a $3 billion increase over last year's funding level, including:

A $1 billion increase over last year's funding level to $6.2 billion for chapter 1 programs for the educationally disadvantaged. Chapter 1 serves about 6 million children in about 14,000 local districts. This increase will permit both an increase in the number of children served and more intensive services.

We must remember, however, that nearly 50 percent of low-achieving elementary school students do not presently receive services under chapter 1 or any other local or State compensatory program. Currently, services provided outside the regular classroom amount to only 30 to 35 minutes a day. Too many, about one-quarter, of our chapter 1 teachers are instructing too many students on average during that short span of time. We clearly have a long way to go before we can say that we've done our best for America's educationally disadvantaged children.

The committee included a $728 million increase over last year's funding level of $2 billion for education for the handicapped, almost $650 million more than the President requested.

The committee also provided $692 million over last year's level and $425 million over the Bush budget request for student financial assistance. The committee restored funding for Pell grant awards for less than halftime students and maintains the $2,300 maximum award.

The committee provided $342 million for special programs for the disadvantaged, the trio program. In 1990 trio assisted about 510,000 low-income students who are potential first generation college students to pursue their education. There is no more important priority in our higher education programs.

Pediatric AIDS is a rapidly growing problem which is devastating families and challenging

the health care, biomedical research, and social services systems throughout this Nation. In many communities, African-American and Hispanic-Americans are the largest and fastest growing segments of the population infected with the HIV virus.

It is also the case that women and children constitute the fastest growing segment of the AIDS population. The number of new cases increased by 9 percent in 1989, the number of cases of women exposed to HIV grew by 11 percent and the number of infants exposed to the virus through perinatal transmission grew by 17 percent.

Mr. Chairman, AIDS is now the sixth leading cause of death in young people from 15 to 20 years of age. It is the ninth leading cause of death among children between the ages of 1 and 4.

This disease has different manifestations and characteristics in children than in adults. There are unique problems associated with growth and development, maternal factors affecting infection, drug treatment, and vaccine development.

Worse still, these kids are often born into poor or fragmented familes with little access to the ancillary health and other services they need. The committee included an additional $24 million for the pediatric clinical trials for a total of $47.5 million to help provide the multidisciplinary services that this special population needs, including research.

The committee provides $20 million for pediatric AIDS health care demonstrations, more than $5 million more than the administration requested for these projects which provide family centered community-based services for infected infants and children and demonstrate ways to prevent the spread of the HIV-infection.

Finally the committee provided an additional $10 million for a total of more than $23 million for basic research at NIAID on pediatric AIDS.

Mr. Chairman there is a relatively small, but vitally important program that I wish to bring to the Members' attention that impacts on a group of kids that we all have thought about, but for whom the system too often falls short, for whom the system too often fails.

Until last year, a young boy named Dooney Waters who lived in an apartment with a single parent who was also a crack cocaine addict is one of my constituents.

Late last year, Prince Georges County and the entire Nation was introduced to this 6-year-old because he was the subject of a series of articles in the Washington Post and the President's State of the Union Address.

Dooney Waters is a fine young man who does not deserve to become poster child for our country's drug problems, but he was illustrative of why young children are the fastest growing segment of the child welfare population.

State child welfare records indicate that substance abuse may be a factor in as high as 80 to 90 percent of all abuse reports in many jurisdictions.

The National Committee for the Prevention of Child Abuse has reported that 675,000 children are seriously abused by a substance abusing parent each year. These numbers do not reflect the numbers of children who are, like Dooney Waters, never reported because of abuse but who suffer enormously living in homes with a substance abusing parent who provides inadequate care, guidance, and discipline.

I was touched, frightened, and angered by Dooney Waters' plight. I was also inspired to try to help find some answers for these kids. What we found was a newly authorized and as yet unfunded program—"emergency child protective services for the children of substance abusing parents."

This is a program which will provide resources to States, localities, and private entities to improve services for these children.

With the chairman's help, and that of other colleagues both on and off the subcommittee, we were able to obtain $20 million for first year funding for this program.

I want to especially thank the chairman, and the other members of the subcommittee, because in my view we have done especially good work here. Some of the most severely disadvantaged kids in this Nation are going to have a chance to make it because of their leadership.

Mr. Chairman, there are a few other programs that are of significant importance and of particular concern to me, but which are part of that "reserve" which some have interpreted as money that the subcommittee decided to simply "save."

Two of those programs include the child care and Head Start programs, both of which have passed the House, but which are not yet authorized.

The child care bill is currently in conference. That legislation, as it passed the House, includes $450 million in fiscal year 1991 in title XX earmarked for child care. Mr. Chairman, 5 of 10 preschool age kids have mothers in the work force. Half of the families headed by a single parent aged 25 to 44 are poor. If we are to protect our children and assure a strong work force in the future, we must provide a better child care solution for our people, and I will work diligently with the other members of our committee to fulfill that obligation before this bill is finally enacted.

Head Start is also among these unauthorized programs, and this year it celebrates its 25th anniversary. We have many problems in our country. One of the best strategies for trying to resolve many of them is dependent upon our reaching our children when they are most dependent and most at risk.

The Head Start Program is one of our best opportunities to help disadvantaged kids in our society make it.

President Bush wants to increase funding by $500 million in fiscal year 1991, bringing the funding up to $1.9 billion. The President only wants to assure inclusion of a fraction of eligible children.

Mr. Chairman, this subcommittee is working toward assuring inclusion of all eligible children, the 20 percent of the eligible children who are not yet involved in the program and who are in danger of losing.

I will work diligently with Chairman NATCHER and the other members of this subcommittee to ensure that all of America's eligible 3, 4, and 5 year olds actually get a chance at a Head Start. The bill passed by the House includes a fiscal year 1991 authorization of $2.9 billion, and I know that this subcommittee will do its very best to reach that goal.

In closing, I want to again commend the chairman and my other colleagues on the committee for their good work. As we all know, the process is incomplete. Neither the Senate nor the budget summit have completed their work, but it is clear that whatever lies ahead, the people's bill could be in no better hands. I urge every Member to support the bill.

Mr. CONTE. Mr. Chairman, I yield 1 minute to the gentleman from Missouri [Mr. COLEMAN].

Mr. COLEMAN of Missouri. Mr. Chairman, I want to commend and thank the chairman and ranking member, the gentleman from Kentucky [Mr. NATCHER] and the gentleman from Massachusetts [Mr. CONTE], for recognizing the need in this country to produce Ph.D.'s in areas of critical national need, where we have a shortage and are unable to produce our own people in these areas for science and technology. In the future we are going to have a shortage of some 7,000 individuals in these areas of very critical national importance. These gentleman have recognized this, and this bill contains in it a significant increase in this graduate program that will reduce that shortage from 7,000 down to 6,000 by contributing the aid and assistance for individuals to pursue advanced degrees so they can go to work for the American public and keep us technologically advanced and ahead on the curve and on the competitive edge of this world.

Mr. Chairman, I want to thank the gentlemen for recognizing the $25.5 million appropriation, which matched what the President asked for in this program, a significant increase over last year.

The CHAIRMAN. The gentleman from Kentucky [Mr. NATCHER] has 1 minute remaining, and the gentleman from Massachusetts [Mr. CONTE] has 30 seconds remaining.

Mr. NATCHER. Mr. Chairman, I yield myself 1 minute. I would like to say to the Members of this House that it is a distinct honor and a privilege for me to serve on this subcommittee with the subcommittee members. Not only that, Mr. Chairman, but to serve on our full Committee on Appropriations. We have 13 subcommittees. Each subcommittee has an excellent staff. We have an excellent staff.

Mr. Chairman, as I said in the beginning, this is a good bill. We recommend this bill to the House.

Mr. CONTE. Mr. Chairman, I yield myself 30 seconds.

Mr. Chairman, Secretary Sullivan personally called me and said how important the genome project is for genetic medicine.

There are over 4,000 genetic diseases and the genome project will give us a data base so that doctors can develop

curative treatments. Once we have a map of the human genome and sequenced the 3 billion base-pairs, we would have the Rosetta Stone of genetic medicine—a knowledge base that could be used forever in finding the causes of genetic diseases.

Mr. Chairman, we all recognize that the gentleman from Wisconsin [Mr. OBEY] was bringing up the ethical concerns of the project. We must guarantee the privacy rights of our individuals from unscrupulous institutions who might seek to use this knowledge to exclude certain groups of people. We have report language directing NIH to come up with a plan to address these ethical issues. It is a responsibility they should take very seriously.

Mr. FAZIO. Mr. Chairman, I strongly support H.R. 5257, the fiscal year 1991 appropriations bill for the Departments of Labor, Health and Human Services, Education, and related agencies.

I commend the chairman of the subcommittee, Congressman BILL NATCHER, for the excellent job that he and the ranking member, Congressman SILVIO CONTE, did in drafting this legislation. It is never easy putting together this appropriations bill, yet they managed to write a bill which meets their budget allocations and contains adequate funding for many vital programs. The subcommittee staff also deserves recognition for their outstanding efforts. I know that many hours of hard work were put into the development of this measure.

Since there are many programs contained in this bill, I would like to highlight a few which are especially important to me and my constituents.

First, this legislation contains increased funding for the National Marrow Donor Program [NMDP], an important program responsible for facilitating bone marrow transplants between unrelated donors.

The National Marrow Donor Program has been extremely successful in recruiting individuals willing to serve as bone marrow donors. In fact, approximately 400 transplants have been performed as a result of the registry's efforts. Unfortunately, however, budgetary constraints have prevented the national registry from testing enough individuals to meet the registry's goal of 250,000 listed potential donors. Although many individuals are willing to donate, there just isn't enough funding available to adequately test them.

This legislation adds $7.1 million to the National Heart, Lung, and Blood Institute budget request for NMDP for donor recruitment and other efforts. Further, the funding increase will allow for increased representation in the registry of certain ethnic and racial groups who have previously been underrepresented.

This funding increase will help alleviate the burden on those families who have had to assume the donor recruitment effort because of an inadequate number of individuals listed in the registry due to budgetary constraints. In fact, this concern about this burden led to my introducing authorizing legislation to increase funding for the purposes of bone marrow testing ethnically diverse individuals.

The legislation also includes report language which should help facilitate access by those in need of transplants to all bone marrow registries. An OTA study I requested earlier this year pointed to a lack of information about available U.S. registries. This language should help those families searching for a compatible bone marrow donor by increasing their access to all registries, public and private.

A second item in this bill involves polycystic kidney disease [PKD], which is a hereditary and potentially fatal disease of the kidney which affects approximately 500,000 Americans. PKD is the third leading cause of renal failure in the United States and 50 percent of those who have the disease will require dialysis—end stage renal disease.

Unfortunately, only a small amount of Federal funding has been spent at NIH-NIDDKD on research for PKD over the last 15 years. In 1987 alone, for example, 200 times as much money was spent by the Government on dialysis treatments for PKD patients as was spent on research for the same disease. Although I would have liked to see the bill include increased funding for this effort, I commend the committee for including report language encouraging the National Institute of Diabetes and Digestive and Kidney Diseases to expand its research efforts.

Another program which should be highlighted is impact aid. The Fourth Congressional District of California, which I represent, relies heavily on impact aid because of the presence of military facilities.

This legislation includes $800 million for impact aid, representing an increase of over $319 million above the amount the administration requests and almost $68 million over the current appropriation. Most importantly, the legislation completely rejects the administration proposal to allocate only $25 million for category "b" students. Without adequate funding, the quality of education in those areas heavily impacted by the presence of military facilities would be seriously compromised.

Finally, although I believe that overall this is a very good bill, I, nonetheless, have a major concern with one provision, and that is the treatment of rape and incest victims who are dependent on Medicaid for their health care.

Unfortunately, this legislation only allows for Medicaid funded abortions when the life of the mother is threatened. I do not believe that poor women, who have been victimized by rape or incest, should be further vicitmized by denying them access to Medicaid funded abortions.

Our Government policy should not be to force a woman who has been sexually assaulted to bear the child of her assailant. Economic justice demands that we not discriminate against women who depend on the Federal Government for their health care. Economically disadvantaged women should have the same ability as affluent women to choose to terminate pregnancies that result from sexual crimes.

The American people and the majority in Congress are on record in support of allowing Medicaid funding in cases of rape and incest. While for the most part we are silent here today on this issue, my colleagues and I who have been vocal on this issue have every intention of continuing our efforts the next time we see this bill.

Mr. AuCOIN. Mr. Chairman, one of our most neglected Federal programs is assistance for handicapped children. All children, including those with disabilities, should be our Nation's No. 1 priority.

The ultimate ability of our Nation to compete and to advance the common good depends on our willingness to provide an adequate education for these children.

Congress made a commitment to provide assistance for special education equal to 40 percent of the national average per pupil; last year, we scraped together only 9 percent, leaving the States and localities to pick up the rest of the tab.

In April, I introduced House Concurrent Resolution 85 expressing the sense of Congress that Federal funding for special education should be increased to provide more meaningful assistance to States and localities.

Today, I am pleased that we will be voting on a sizable increase for these special education programs—nearly $750,000, approximately $650,000 above the administration's request for the program.

Mr. Chairman, it's high time the Federal Government recognizes the need for improving our special education programs and begins to honor its previous commitment.

Unfortunately, this bill also discontinues funding for those special education programs funded through the Chapter 1 Program. Unless these programs would be eligible for funding under the 94-142 Program, this action will have serious consequences for some of our better special education progams in Oregon.

Oregon uses these chapter 1 funds to support students in State programs including students placed by the juvenile courts in private agency programs, the MaClaren School for Boys, State schools for the deaf and blind, Hillcrest School for Girls, and trainable mentally retarded students in State programs.

I am concerned about these programs and intend to work with the committee over the next few weeks to determine our options for future funding.

Mrs. COLLINS. Mr. Chairman, H.R. 5257, the Labor-HHS-Education appropriations for fiscal year 1991, includes provisions on a subject that has been among my top priorities for many years. Breast and cervical cancer continue to take a steep toll against American women and we in Congress must adopt strong measures for funding of research, prevention, early detection, and treatment of these diseases. H.R. 5257 commits funding for purposes of combating breast and cervical cancer in amounts sizable enough to make substantial progress. The prevention of breast cancer is an issue that must be of concern to everyone, and is immune from partisanship.

Breast cancer has become the second leading cause of cancer death for American women. It is estimated that there will be 150,000 new cases of cancer diagnosed in 1990, 44,000 of which are expected to result in death. Beast cancer incidence rates have increased about 1 percent per year since the early 1970's, including a 20-percent jump in

the first half of the 1980's. One in every 10 American women will be diagnosed with breast cancer. Additionally, about 900 American men will be diagnosed with breast cancer during 1990, of whom about 300 are expected to die.

In short, breast cancer incidence remains at a staggering level with no decrease in sight. However, the rate of breast cancer mortality is entirely subject to change.

Cervical and uterine cancers also poses great dangers. An estimated 46,500 new cases of these two forms of cancer are anticipated for 1990. It is estimated that there will be 6,000 deaths from cervical cancer, and 4,000 from uterine cancer this year. Statistically, low-income women have been the most frequent victims of cervical cancer.

The Pap test, however, has had a profound effect in minimizing the consequences of cervical cancer. The death rate for these cancers has decreased more than 70 percent over the past 40 years, due largely to these tests and regular checkups. But there remains a long way to go.

I have been involved in expanding coverage for screening mammographies and Pap tests through Federal programs for many years. In 1988, my effort to offer mammography benefits to Medicare patients was successful, as coverage was extended through the Catastrophic Care Act. But, with the act's repeal last year, no mammography benefits remained. Consequently, I introduced H.R. 3701 to restore those benefits. My effort to institute coverage for Pap tests was successful last year, as coverage was included through the Omnibus Budget Reconciliation Act of 1989.

Today, we have the opportunity to take another step in the right direction. The funding allotted by H.R. 5257 for advancement in breast and cervical cancer prevention is substantial. I am very optimistic that funding which continues at this level will yield benefits in terms of new techniques, tests, and technologies for limiting the occurrence of breast and cervical cancer as well as minimizing the consequences of these cancers when they do occur.

Mr. Chairman, this is an important provision which will benefit all American women. I encourage my colleagues to support it and H.R. 5257.

Mr. ROYBAL. Mr. Chairman, I rise today in strong support of H.R. 5257, the fiscal year 1991 appropriations for the Departments of Labor, Health and Human Services, and Education.

I would first like to take the time to applaud Chairman NATCHER for his commendable job of organizing and coordinating this truly bipartisan effort. I would also like to thank all the distinguished members of this committee for their hard work and unrelenting dedication. I feel privileged to be a part of such a cooperative effort and I am more than certain that this is the bill that is going to lead us into the new decade with the necessary firm and sound foundation for providing the American people with the health care, education, and labor programs that they so deserve.

In this regard, please allow me to highlight the many victories we as Members have achieved with this new bill. I for one, am particularly proud of the progress we have made in attaining funds for researching Alzheimer's disease. According to the current estimate from the National Institute on Aging, there are 4 million victims of this disease. A staggering figure such as this demands action from Congress and I wholeheartedly believe in the action we have taken.

Along these same lines, we have made further progress in addressing the health care needs of our people with the many increases in funds for care of the elderly. We have secured additional grants for programs such as congregate meals, supportive services for the elderly, and health care projects for elderly Indians. As chairman of the Select Committee on Aging, I have long been advocating the need to provide increased funding for these programs.

Also, I am very pleased that we have restored the number of positions for the community service employment program for older Americans and have brought this program up to its full funding level. This program has amply demonstrated the valuable contributions that older workers can make in their communities, I am happy to be a part of the effort to support such vital programs.

Significant headway has been made with the increased funding of programs like the JTPA which will train disadvantaged adults and youths to be geriatric certified home aides. In particular, there are additional funds for the job creation demonstration. I am hopeful that this will begin to resolve the existing crisis in long-term care due to the lack of available nursing personnel.

In addition, I am equally proud of the advances we have made in appropriating funds to improve our understanding of the relationship between AIDS and tuberculosis. With the devastating effects of AIDS beginning to surface these past few years, it is reassuring that Congress has acknowledged the need to finance projects which will safeguard the American people from future unforeseen dangers. In this respect, I compliment Chairman NATCHER and the members of the committee for their insight into this matter and for supporting programs such as the adult health care demonstration. This program will allow many AIDS patients the dental treatment they need by making funds available to partially offset the costs incurred by dental schools in providing oral health care for AIDS patients.

In terms of education, I am extremely happy with the advances we have made in this bill. We have increased our support for bilingual education and for the recruitment and training of minorities in the teaching profession. I am a faithful supporter of such programs. I believe we must work together to maintain the community spirit which has contributed to making America one of the most successful democracies in history by continuing policies that promote opportunities for members of all races.

And so, I wish to express my deepest gratitude to Chairman NATCHER and the members of this committee for a job well done. This most important bill will pave the way for a strong and healthy future. It will provide and protect and support the people of our Nation. Health care, education, workers' programs—these are most critical and essential to our country's progress and status for they take care of America's greatest asset—her people. Thus, in closing, I want to urge all my colleagues to vote in favor of this indispensable and invaluable legislation.

Mr. PANETTA. Mr. Chairman, I rise in support of H.R. 5257, Departments of Labor, Health and Human Services, and Education, and Related Agencies appropriations bill for fiscal year 1991, and request permission to revise and extend my remarks. This is the seventh reported of the 13 annual appropriations bills.

The bill provides $43.897 billion in discretionary budget authority and $50.419 billion in discretionary outlays. I am pleased to note that the bill is $8,856 million below the level of discretionary budget authority and $3,589 million below the outlays as set by the subdivision for this subcommittee.

As chairman of the Budget Committee, I plan to inform the House of the status of all spending legislation, and will be issuing a "Dear Colleague" on how each bill compares to the budget resolution.

I look forward to working with the Appropriations Committee on its other bills.

[Factsheet]

H.R. 5257, DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION, AND RELATED AGENCIES APPROPRIATION BILL, FISCAL YEAR 1991 (H. REPT. 101-591)

The House Appropriations Committee reported the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations bill for Fiscal Year 1991 on Thursday, July 12, 1990. This bill is scheduled for floor action on Thursday, July 19, 1990.

COMPARISON TO THE 302(b) SUBDIVISION

The bill, as reported, provides $43,897 million of discretionary budget authority, $8,856 million less than the appropriations subdivision for this subcommittee. The Committee has deferred consideration of all programs for which no authorization has been enacted for Fiscal Year 1991. The Budget Act provides a point of order if the target for discretionary budget authority is breached. Since the bill is $8,856 million under the subdivision for discretionary budget authority, there is no such point of order against this bill. The bill is $3,589 million below the estimated discretionary outlays subdivision. A detailed comparison of the bill to the spending and credit subdivisions follows:

COMPARISON TO SPENDING ALLOCATION

[In millions of dollars]

	Labor, Health and Human Services, and Education, and related agencies appropriations bill		Appropriations Committee 302(b) subdivision		Bill over(+)/ under(−) committee 302(b) subdivision	
	BA	O	BA	O	BA	O
Discretionary	43,987	50,419	52,753	54,008	−8,856	−3,589
Mandatory [1]	123,943	123,589	123,943	123,589		
Total	167,840	174,008	176,696	177,597	−8,856	−3,589

[1] Conforms to budget resolution estimates for existing law.

Note: BA—New budget authority; O—Estimated outlays.

The bill, as reported, provides $30 million in direct loan authority which is equal to the appropriations subdivision for this subcommittee. There are no primary guarantees. A detailed comparison follows:

COMPARISON TO CREDIT ALLOCATION

[In millions of dollars]

	Labor, Health and Human Services, and Education, and related agencies appropriations bill		Appropriations Committee 302(b) subdivision		Bill over(+)/ under(−) committee 302(b) subdivision	
	DL	LG	DL	LG	DL	LG
Discretionary	30		30			
Mandatory [1]						
Total	30		30			

Note: DL—New direct loan obligations; GL—New loan guarantee commitments.

The House Appropriations Committee reported the Committee's subdivision of budget authority, outlays and credit authority in House Report 101-545. Those subdivisions are consistent with the total "allocation of spending and credit responsibilities to Committee" as contained in House Report 101-455 to accompany H. Con. Res. 310, Concurrent Resolution on the Budget for Fiscal Year 1991 which was adopted by the House on May 1, 1990.

Following are major discretionary program highlights for the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations bill for Fiscal Year 1991, as reported:

PROGRAM HIGHLIGHTS

[In millions of dollars]

	Budget authority	New outlay
Department of Labor:		
Community services employment (Older Americans)	400	73
Job Training Partnership Act [JTPA]	4,211	164
Bureau of Labor Statistics	207	176
Department of Health and Human Services:		
Low-income home energy assistance [1]		
Community services block grant [1]		
Human Development Services	1,423	934
(Head Start) [1]		
Refugee and entrant assistance		
Alcohol, Drug Abuse and Mental Health Administration	2,649	936
Centers for Disease Control	998	538
National Institutes of Health	7,415	2,998
Department of Education:		
Compensatory education	6,225	747
School improvement programs (Chapter 2)	1,475	177
Bilingual and immigrant education	205	25
Education for the handicapped	2,748	330
Impact aid	800	610
Adult education	245	29
Student financial assistance	6,777	1,221
(Pell grants)	(5,301)	(1,060)

[1] Requires reauthorization.

Mr. MILLER of California. Mr. Chairman, I rise in support of H.R. 5257, the fiscal year 1991 Labor, Health and Human Services, and Education appropriations bill, and commend the leadership of Mr. NATCHER, chairman of the Appropriations Subcommittee, and Mr. CONTE, the ranking minority member, who have consistently restored and protected the most critical programs which benefit children and families.

A new sense of urgency has emerged about protecting and enhancing children's well-being, despite the significant expansions of many cost-effective early prevention programs. As the 1990's begin, growing numbers of children in the United States still remain at risk of poverty, ill health, and school failure.

U.S CHILD HEALTH CRISIS

Assuming that children have every opportunity to be as healthy as possible should begin even before birth. Almost 40,000 infants die before their first birthday—a tragedy still due largely to the incidence of low birth weight.

At a select committee hearing last fall, U.S. Assistant Secretary for Health James Mason testified that with present knowledge we could immediately save 10,000 of these 40,000 infants who die each year and save $2 billion annually in the cost of caring for low-birth-weight infants.

Yet, more than 1 million pregnant women receive insufficient prenatal care each year, and black women are more likely than white women to receive late or no care at all.

And still 40 percent of preschool children are not immunized. In some inner-city areas and isolated rural communities the percentage is as high as 55 percent. We're even beginning to see resurgences of childhood diseases, such as measles and whooping cough, that we had long since thought were eradicated. Increases are needed in the Childhood Immunization Program this year to cope with the rising measles epidemic as well as the ever-increasing cost of the vaccines themselves.

Again, this is not surprising given that some 11 million children have no health insurance and at least 7 million children don't even receive routine medical care.

CHILDREN'S WELL-BEING

More than children's overall health status is at stake—their very lives may be as well. We have failed to protect far too many children from harm or even grave danger.

Each year, more and more children are reported as battered or neglected—over 2.4 million in 1989, a 10-percent increase over the previous year and well over 90 percent since 1981—and more and more children die from abuse or neglect—over 1,200 in 1989 alone.

Each year, more and more children grow up in shelters, on the streets, or in one foster home or another. In fact, today, one out of four homeless persons is a child, and the fastest growing group among the homeless are children and their families. As testimony before the Select Committee on Children, Youth, and Families has revealed, the cognitive, emotional, developmental, and health consequences of homelessness for children can be devastating and long term.

And, each year, ever more children are born addicted to drugs and alcohol. According to a study conducted by the select committee last year, as many as one in six babies are born addicted to crack and other substances—a nearly fourfold increase over the past 3 years; yet two-thirds of surveyed hospitals had reported no place to send pregnant substance abusers for treatment.

The drug epidemic is taking its toll in other ways. The majority of child abuse cases now involve parental substance abuse and the most recent statistics warn that the number of children with AIDS is still on the rise, and congenital syphilis is reaching epidemic proportions.

Many of these problems are fueling record numbers of children in out-of-home placements. A recent select committee report, "No Place to Call Home: Discarded Children in America," warned that if current trends continue, by 1995, the number of children living in foster homes, mental hospitals, and juvenile detention facilities could exceed 840,000, up nearly 75 percent from the nearly 500,000 children now estimated to be in out-of-home placement.

THE COST TO SOCIETY

All the evidence is in. Report after report—from medical schools, universities, government agencies, and think tanks—and children's hospitals—warn that the United States is losing more than 20 percent of our children to poverty, and millions more to ill health, malnutrition, disability, and school failure.

The fiscal cost is enormous. The Committee for Economic Development, composed of CEO's from the Fortune 500, estimates that each year's high school dropouts cost the country $240 billion in lost productivity and foregone taxes. If we fail to implement a strategy for investing in young children, the losses resulting from youth who drop out of school over the next 4 years alone would amount to almost $1 trillion over their lifetimes.

The evidence also documents that it doesn't have to turn out this way. We know how to solve the problem. We have made the case that proven effective preventive programs such as prenatal care, early childhood education, and immunization save from $3 to $10 for every $1 invested.

Nonetheless, thousands are still turned away from these and other preventive infant and child health services, and they are suffering the consequences.

The cold truth is that the deficit is high and extraordinary competition exists for limited dollars. But, every day that we defer the problem, the worse it gets.

What we have failed to recognize is that when children start out with health, social, and educational deficits, they will be contributing to the Federal deficit every day of their lives.

LEARNING FROM DEVELOPED NATIONS

It is not as if we are lacking the tools, the knowledge, or the successful models.

Recently, the select committee released a U.S. Bureau of the Census report on international comparisons of children's well-being, a compilation of the most comparable international data on children and youth available. While the report raises a lot of significant policy questions, the findings are startling.

Every other Western industrialized nation studied does better than the United States in keeping children out of poverty; in minimizing health and safety risks to children in supporting and nurturing stable and healthy families.

Among six Western industrialized nations, the United States and Australia have more children and families in poverty even after we've provided tax and transfer benefits. And if you are a poor family in the United States, you are more likely to have lower earnings and less likely to receive any government aid than poor families in other Western industrialized nations. At least 99 percent of poor families with children in the developed countries studied received government assistance, compared with only 73 percent in the United States.

The most egregious disparities between the United States and other developed countries are in infant mortality, youth homicide, and teenage pregnancy and childbearing rates:

Among 11 developed countries with comparable infant mortality data, only Hungary had a

higher infant mortality rate than the United States.

Male youth in the United States are more than five times as likely to be murdered than those in the other developed nations studied.

The United States has the highest percentage of teenage women who become pregnant. Among the industrialized countries studied, teenage birth rates are almost twice as high in Hungary and the United States than in the countries with the next highest rates.

The select committee was also privileged to enage in discussion with the European and Canadian child health experts at a recent hearing about what we can learn from their national health policies that will result in better child health outcomes in the United States.

No pregnant women in Europe has to ask how or where she will receive prenatal care or who will pay for it.

And, compared with our friends in Europe, we fall far short of offering families in need support services such as respite care or home visiting.

And if there is any lesson to be learned from our international neighbors around the world, it may be how to budget more effectively. Other countries may spend less of their gross national product on education and health care—they are just spending it more wisely.

GOVERNMENT'S ROLE IN INVESTING IN COST-EFFECTIVE PROGRAMS

In my view, our Government should be providing at least the fundamental building blocks for young children, especially the most vulnerable, and the tools to help families stay together and be economically independent.

Mr. Chairman, I am especially pleased that the bill we are considering today provides increases for programs that provide early childhood education to promote school readiness, including comprehensive child development centers, preschool incentive grants, and the Infant and Toddler Program under the Education for the Handicapped Act, and Even Start.

Earlier this year, Mr. Chairman, we celebrated Head Start's 25th anniversary by passing a Head Start bill that builds on the Child Investment and Security Act, which I introduced last year, and provides a multiyear funding strategy for Head Start so that by 1994 all eligible, low-income preschool children can participate.

The benefits of Head Start are well documented. Studies are virtually unanimous that children show significant immediate gains in cognitive ability, self-esteem, achievement motivation, and social behavior as a result of Head Start participation. According to the administration's own study, Head Start also affects the long-term success of its enrollees. Children who attended Head Start are less likely to fail a grade in school or to be assigned to special education than children never enrolled in Head Start.

Given that only the most severely disadvantaged children currently can be served by the program—in 1988, 75 percent of all Head Start families had incomes below $9,000—the gains Head Start children receive are even more impressive.

Despite the increase Congress afforded Head Start last year, 80 percent of eligible, low-income children ages 3 to 5 are still excluded from the program. And with dwindling resources over the last quarter century, Head Start has had to struggle to maintain the high standards that have become its hallmark. The bill we are considering today sets aside funds in reserve to expand Head Start this year and to help maintain Head Start's legacy of quality. I urge this body to consider fully funding Head Start when the reauthorization becomes law later this year.

Mr. Chairman, I commend the Appropriations Committee for including funding in this bill for education programs so that we don't abandon children once they enter the schoolhouse door, including $1 billion for the highly successful Chapter 1 Compensatory Education for Disadvantaged Children and Concentration Grant Program, and over $700 million for the Education of the Handicapped Act Basic State Grant and Discretionary Programs.

In addition, this bill includes modest increases for programs to maximize the health and development of young children: the Maternal and Child Health Block Grant, the Lead Poisoning Prevention Program, and community health centers. Again, Mr. Chairman, it is my hope that the reserve funds will help us meet our obligation to fund the National Health Service Corps, which if not significantly expanded may result in the closure of 200 community health centers this year, and the critically important Childhood Immunization Program.

Mr. Chairman, I am also pleased that the bill includes modest increases for programs that support and ensure family stability: The Temporary Child Care for Children with Disabilities and Crisis Nurseries Act, the Child Abuse Prevention and Treatment Act, the Family Violence Prevention and Services Act, and provisions of the Stewart McKinney Homeless Assistance Act funded under this bill.

I am especially gratified that a provision I authored to provide emergency protective services, additional caseworkers, counseling, and related services to children whose parents are substance abusers was also funded at $20 million. This program is desperately needed by a child welfare system near collapse from the Nation's drug crisis.

To meet these increasingly difficult problems facing vulnerable children and families across the Nation, I am particularly pleased that the bill incorporates a nearly 10-percent increase for child welfare services, including prevention, crisis intervention, and other services to enable children to remain in their homes under the care of their parents, or where that is not possible, to provide alternative permanent homes for them.

And finally, child care. Over 5 years ago, the select committee identified child care as the greatest unmet need of America's families—to reduce barriers to work, to relieve stress and financial drains on parents, and to improve the cognitive and social development of children.

The House of Representatives passed landmark child care legislation that will give parents maximum choice and states the authority, guidance, and flexibility to significantly expand child care opportunities for families. The House-passed bill provides for the expansion of the highly respected Head Start Program to a full-year, full-day program to meet the needs of working parents, and assures that neighborhood schools are able to offer convenient and reliable before- and after-school care and comprehensive early childhood education.

It is especially gratifying that the House-passed bill includes criteria and fiscal incentives to ensure that children will be provided safe and developmentally appropriate care.

While the bill contains the guarantee of funding, both through a new entitlement for child care services for title III and through an expanded earned income tax credit for working parents, titles I, II, IV, V, and VI must go through the appropriations process to receive any funds. I fully expect this legislation to be enacted before the end of this Congress and if we are to have a truly comprehensive child care policy in this Nation, I urge my colleagues to consider funding for these titles at a later date.

We need to bolster, not cut, or sacrifice one program for another. While I would have preferred to see greater resources directed to important programs, such as Maternal and Child Health, and Child Abuse Prevention and Treatment, I urge passage of H.R. 5257 because it includes critical funding increases for many children's programs, and a reserve account dedicated to new progams not yet enacted and program expansions not yet reauthorized that will assure the health and well-being of the Nation's most vulnerable children, youth, and families.

Mr. MOAKLEY. Mr. Chairman, I rise today to express my strong support for the Labor, Health and Human Services, and Education appropriations bill for fiscal year 1991. I want to commend Chairman NATCHER for this legislation and for his continued, skillful leadership in producing an appropriations bill which, in spite of extreme budgetary difficulties and limitations, is able to meet the needs of the many vital programs and services which are included in this bill.

I particularly want to thank Chairman NATCHER for his assistance in supporting a request for $3 million to the John W. McCormack Institute of Public Affairs for pursuing a new initiative with an international focus to be undertaken at the Institute.

Mr. Chairman, the John W. McCormack Institute of Public Affairs was established in 1983, with Chairman NATCHER's assistance and that of the late Carl Perkins, as part of the University of Massachusetts at Boston's commitment to applied social policy research, public education, and public service. Named after former Speaker John W. McCormack, whose district I am now privileged to serve, the McCormack Institute serves as a living tribute to a life committed to public service. The primary activities of the McCormack Institute include a master of science in public affairs graduate program, a biannual publication of the New England Journal of Public Policy, and applied research on public policy topics. Additionally, the McCormack Institute sponsors special conferences, seminars, and educational programs involving Institute professors, staff, and fellows as well as other university faculty and area practitioners.

While the initial focus of the McCormack Institute's activities began with the diverse and

challenging needs of the New England region, the scope of the Institute's activities now reaches well beyond these borders. Over the past 5 years, a series of international projects have strengthened the Institute's mission with regard to public service and the democratic process. In the 1990's there is both a need and an opportunity for former political and economic adversaries to learn new behaviors and new languages in order to function together in an interdependent world.

There is a compelling need for cooperative projects that help to bring together individuals and institutions from politically and culturally disparate backgrounds. To this end, the McCormack Institute seeks to broaden its international efforts over the coming years, focusing on topics such as the political, economic, and philanthropic requirements of emerging democracies; the reemergence of ethnicity and nationalism in previously closed societies; and culturally based conflict management. Through applied policy research, educational programs, conferences, collaborative projects, and publishing, the Institute seeks to contribute to greater understanding and competence with regard to the global community.

The McCormack Institute has already been successfully involved in a variety of international programs designed to foster democratic institutions and nonviolent resolution of conflict, particularly related to Northern Ireland, South Africa, and most recently, Eastern Europe. In the past year, extraordinary events in Eastern Europe, and in Central and South America as well, have lead to an emergence of democracy in what had been Communist and other nondemocratic governments.

In Latin America, the exit of General Pinochet from Chile left Fidel Castro as the only unelected dictator in this section of the world. In Nicaragua, Marxist leader Daniel Ortega was defeated by Violetta Chammoro, and in Panama, Gen. Manuel Noriega was ousted in favor a democratically elected president. Civilian governments also were elected in El Salvador and Guatemala.

In Eastern Europe, the new policies of and changes made by Mikhail Gorbachev helped spur the people of East Germany, Poland, Czechoslovakia, Romania, and so forth, to renounce their Communist rule and seek freedom through democratically elected governments. East Germany is on its way to reunification with West Germany. Poland, Czechoslovakia, Hungary, Romania, and Bulgaria all have newly elected parliaments. Even Albania, long considered closed to any changes in its hardline Communist government, is making gestures for change and is beginning, on a limited basis, to open its borders to outsiders. In these countries, the institutional aspects of democracy are very new. For the first time in several generations, the people, through representative governments, have the power and authority to govern themselves, to consider new laws and changes and to have a real role in enacting such changes. In order to understand and create a new government, as well as carry out its goals, many of these nations have turned to the United States for help. It is extremely critical that these governments receive our support and assistance to help maximize their efforts to establish effective, representative governments. It is also equally important that we be available to help minimize the confusion and frustrations that are beginning to surface as leaders are faced with the pressures of the growing economic and social needs of their new populations.

A number of new programs and services, created to assist Eastern Europe's emerging democracies, have been set up by both the executive and legislative branches of the Government. In the Senate, language was inserted in the appropriations legislation which would provide equipment, personnel, and technology to Poland. In the House of Representatives, the Speaker has created an informal bipartisan congressional task force chaired by Representative MARTIN FROST to provide information on parliamentary procedure and technical assistance. This task force has recently traveled to Eastern Europe to assess first hand the needs of the parliaments. President Bush recently called for the formation of a corps, consisting of corporations and individual volunteers willing to provide assistance and funding to help these nations.

All these efforts, while certainly to be commended, lack an important component, that of an academic approach to these newly emerging democracies. Certainly it has been the experience in this country that the vitality of democracy depends upon independent legislatures—coupled with adequate resources and procedures for effective oversight of the executive branch. Our U.S. Legislature is a long and standing model of such vitality and independence and as such is the most studied and written about legislature in the world.

Mr. Chairman, John McCormack, long a fighter for the rights of the legislative component of government, helped develop resources for effective congressional oversight of the executive branch. The McCormack Institute is particularly intrigued by the opportunity of expanding our role in Eastern Europe and in bringing the resources of the American education system to bear on emerging problems in that area as well as in Latin America.

The Institute is uniquely qualified to provide research, historical and cross-cultural perspective, and technical training and advice to incipient democratic institutions in formerly authoritarian States. The McCormack Institute encompasses a wide range of expertise in American and other Western democratic institutions and processes as well as in international politics and political economy.

Boston has perhaps the Nation's most concentrated center of academic resources, all of which could play an important role in the development of a comprehensive academic program. I certainly anticipate that the McCormack Institute would need to establish a small liaison office in Washington, DC—possibly in cooperation with a local academic institution—to enhance their programs and activities with regard to emerging democracies as well as to effectively coordinate with congressional efforts in this area.

Again, I want to thank you, the chairman for his support and his interest in the McCormack Institute and their potential role in this vital international initiative. I greatly appreciate your efforts to include this funding in the fiscal year 1991 appropriations. I am certain that these funds will be well spent and will greatly enhance the efforts being made by the United States to assist these newly democratic nations.

Mr. RAHALL. Mr. Chairman, I am pleased to rise in strong support of the Labor, Health and Human Services, and Education appropriations bill for fiscal year 1991.

I wish to commend our esteemed subcommittee chairman, Mr. NATCHER of Kentucky, and our distinguished committee chairman, Mr. WHITTEN of Mississippi, for bringing this bill to the floor in a timely manner.

I am almost afraid to praise this bill—and praise it I will—because for the past 2 days we have seen and heard nothing but predictions of doom and gloom for our budgetary process, and we have been warned of the dire consequences of not balancing the budget, or of triggering the dreaded Gramm-Rudman sequester.

But this bill, Mr. Chairman, contains the largest increase in education appropriations of any bill in the history of the U.S. Congress. As Mr. NATCHER is proud to say, this bill is the one that takes care of the health of a nation and the education of its children.

Ranking minority member, Mr. CONTE of Massachusetts, has called it America's bill—one that embodies the values that have made our Nation strong.

The $3 billion investment in education contained in H.R. 5257 is the largest increase over 1 year ever recommended, and will bring the currently authorized programs from the fiscal year 1990 level of $23 billion to $26 billion in fiscal year 1991. While some of our favorite and special programs are deferred awaiting reauthorization, their funding will amount to $1.1 billion, bringing the total of the appropriation for education to $27.1 billion.

Highlights of the bill include an increase of $1.02 billion for chapter 1, $727 million for education of the handicapped, $692 million for student financial assistance, although of that amount $371 million was allocated for prior year shortfalls in the Pell Grant Program. Other increases include $64 million for math/science; $67 million for impact aid; $51 million for adult education, and $100 million for the TRIO programs.

Mr. Chairman, I represent an economically depressed area in southern West Virginia where there are many educationally and economically disadvantaged children. The increase for chapter 1 compensatory education means we will be able to serve approximately 1.6 million more children than we serve today, and many of those children live in West Virginia.

The increase in education for the handicapped will help schools improve the quality of instruction and build links to other social service agencies for 4.1 million disabled young people in our schools.

As a Member whose district includes one of this Nation's historically black colleges, the Bluefield State College in Bluefield, WV, I am pleased that they are strengthened by increased appropriations to enhance their fiscal stabiity. These colleges serve 290,000 students nationally at 171 historically black colleges.

For higher education, the bill maintains our long-term commitment to universities and colleges, and the 12 million students who attend them, signaling that educational progress is critically important to the Nation's future, and that it requires a substantial investment of resources.

This landmark bill bodes well for the well-being of America's people, and will go far to assuring that we have a thoroughly educated citizenry.

Other significant increases will go for educational research, statistics, and assessment, all of which are urgently needed if we are to measure our attainment of the national education goals we have set for the year 2000.

And while we often forget to mention them—this bill provides a 3-percent increase for our libraries, and funding for the first time for title V of the Library Services and Construction Act—purchase of foreign language materials.

Mr. Chairman, for the past 1½ years, I was privileged to serve on the Education Committee, chaired by my colleague and my friend, Mr. GUS HAWKINS of California. Mr. HAWKINS, who has announced his retirement plans beginning next year, is one of the most dedicated servants of public education I have ever met. He is strong in his resolve to educate young and old alike, he is brave in the face of adversity, and he won't stand for any nonsense when the programs his Education Committee has jurisdiction over are threatened.

I think that it is indeed fitting that in this, his last year as a Member of this body, Chairman HAWKINS will vote for the largest education appropriation bill in the history of Federal funding for education in the United States.

This bill contains $5.3 billion for employment and training, $4.2 billion of which is for programs authorized primarily under the Job Training Partnership Act [JTPA]. This amount represents $371.5 million more than the President requested, and $293 million more than last year's appropriation.

For job training there are $1.9 billion, supporting 444,000 training slots; for summer youth employment, $700 million; for Job Corps, $101 million; and last but not least, $513 million for the title III dislocated workers, which provides early identification of dislocated workers, rapid provision of services and training. This appropriation is $114 million more than the President requested, and $50 million more than last year. This funding level will support an estimated 135,000 training slots.

The bill provides $400 million for community services employment programs for older Americans aged 55 and over, who live on low, fixed incomes, reflecting an increase of $57 million over last year's funding.

Funding increases, however slight, are included also for Trade Act benefits and training, veterans employment and training, and of utmost importance to West Virginians, $919.5 million from the black lung disability trust fund—$277 million more than last year—for paying black lung compensation and medical and survivor benefits when no coal mine operator can be assigned liability.

Finally, Mr. Chairman, this bill provides a total of $1.7 billion for research, education, and other activities aimed at preventing and treating AIDS. The funds are appropriated to the Public Health Service or institute involved, and are not consolidated into one separate account.

Funding includes support for community and migrant health centers, health care for the homeless, health professions programs, maternal and child health, the National Institutes of Health, alcohol, drug abuse, and mental health, Medicaid, Medicare, Social Security, supplemental security income [SSI], AFDC, aging programs, and others.

The bill contains the Hyde amendment on prohibiting Federal funds from being used to perform abortions except when the mother's life is endangered, which has my full support as always.

Mr. Chairman, I strongly recommend passage of H.R. 5257, the fiscal year 1991 Labor, HHS, Education appropriations bill, without any amendments to cut funding across the board.

Mr. GREEN of New York. Mr. Chairman, Last year when we took up the Labor-HHS-Education appropriations bill, I expressed my dismay over the decision to deny less than half-time students eligibility for Pell grants. At that time I expressed my belief, and cited a report by Secretary of Education Cavazos which indicated that the majority of less than half-time students are serious, hard-working students. They are students who work full time, are enrolled in 2-year public colleges, not proprietary schools, and are working for an associate's or bachelor's degree. They are the students who will fulfill this country's need for a well-educated work force and they deserve our encouragement and support. So, I am extremely gratified to see that eligibility for Pell grants has been restored to those students and wish to thank the distinguished chairman of the Labor-HHS-Education Subcommittee and the distinguished ranking minority member for their efforts to bring that about.

In addition to my thanks I should also like to say that I hope the committee's support for the Pell Grant Program will remain strong. I certainly understand the constraints under which the committee must make its funding decisions, but it concerns me that of the $609.5 million increase, $371 million will fund the previous two years' shortfalls rather than to increase the maximum grant amount which has remained $2,300 for 3 years in a row. I hope that next year's deliberations will result in funding levels that take into account the impact of inflation vis-a-vis the rising costs of education and offer a maximum grant amount that is closer to the authorization level of $3,100.

Mr. GOSS. Mr. Chairman, I rise today because I am concerned about our Medicare system. The Medicare Program is vital to the seniors of southwest Florida and, I suspect, everywhere else in our Nation.

The Medicare budget under this appropriations bill is unacceptable. What looks like a $700 million increase over fiscal year 1990, is in reality a $5 billion decrease when taking into consideration inflation.

The proposed spending for Medicare will lead to cutbacks in Medicare part B and place a strain on the physicians and hospitals who practice and operate in high Medicare areas. Efforts to control costs by bureaucratic decree or payment limits generally do not work well, because they merely redirect them to other areas.

While I support the long overdue increase in the education budget, I am disappointed and frustrated over the lack of understanding for the effects that these cuts will have on the Medicare beneficiaries who live in a highly concentrated Medicare delivery area.

Of course, we are dealing with people in this program—people with real needs and hurts who are relying on Medicare to provide quality treatment. But hospitals and physicians are the delivery means of this quality care, and they are also being squeezed by these cuts to the degree they may not be able to stay in business and provide adequate services.

I hope that this year's funding does not lead to a rationing of health care and break this program beyond repair. No matter what, we must find a better way to provide health care services and an equitable, affordable way to pay for them.

Mr. CRAIG. Mr. Chairman, today we are taking action on the Labor, Health and Human Services and Education appropriations for 1991—a bill that provides funding for some of our Nation's most important programs—a bill that is filed with new and excessive spending.

Two days ago, some Members of this Congress discussed the "Backbone of Congress:" Our ability to resolve the problem of the budget deficit without a constitutonal amendment. The fiscal irresponsibility of this bill does not demonstrate any ability to face the reality of our national debt. There are some excellent Federal programs that promote the welfare of our Nation—for example, the National Institutes for Health, Medicare and Medicaid, Impact Aid, trio programs and employment training. I do not oppose adequate funding for these sorts of programs.

However, this Congress continues to go beyond this Nation's financial capablity. If we are going to continue to enjoy the kind of economic growth and stability that allows us to provide these important services to Americans, then we must work toward solving our budget problems, Mr. Speaker. Congress must be fiscally responsible.

Mr. STEARNS. Mr. Chairman I rise today to commend the Appropriations Committee for increasing the National Vaccine Program's funding. The committee included $10 million for his critical program, $4.1 million more than fiscal year 1990.

Vaccines are the safest, cheapest and most effective means of preventing many infectious diseases. Global eradication of smallpox is a dramatic example of the effective use of vaccines. Appropriate use of vaccines can eliminate the occurrence of many diseases with the U.S. and reduce the incidence of others.

As many of you know, I am a strong supporter of biotechnology research and moving the results of that research into the marketplace. Recent advances in biotechnology have made possible the development of new vaccines and improvements in the efficiency and safety of existing immunization products.

Mr. Chairman, no one can deny the cost effectiveness of disease prevention as opposed

to treatment. Each dollar we spend today on the National Vaccine Program, which will help prevent many diseases, will save us almost $2 in disease treatment. By getting new and improved vaccines out of the lab and into production, we could save billions. And, of course, there is no price tag on the improved quality of life the National Vaccine Program brings.

Once again, I commend my colleagues on the Appropriations Committee for their foresight in fund Vaccine Program.

Mr. WEBER. Mr. Chairman, I rise today in support of H.R. 5257, a bill making appropriations to Departments of Labor, Health and Human Services, and Education.

I would like to begin my comments by offering deserved praise to our chairman, Mr. NATCHER of Kentucky; and our ranking member, Mr. CONTE of Massachusetts. Once again, under their leadership, the committee has crafted an extraordinary bill to address the health, education, and welfare needs of our citizens.

There are many important things in this bill, but I'd like to particularly point out some of the things this bill does to help ease the crisis rural areas are facing in health care.

Mr. Chairman, rural areas face a very real crisis in the area of health care. Low reimbursement rates and rising costs per patient have forced a number of hospitals to close, and put many more in danger. Low reimbursements and retirement have also created a shortage of health care professionals in rural areas.

Mr. Chairman, many rural areas currently face great difficulties in recruiting and retaining health care professionals. This is creating a great amount of concern, and real hardship for many rural residents.

To begin to alleviate this problem, the bill includes almost $45 million to train new general practitioners, nurses, and physicians assistants. This money will literally train thousands of new young professionals needed in these three professions which are essential to rural areas.

The committee report also includes language recognizing the physician shortage problem in rural areas, and has directed the Department of Health and Human Services to evaluate its programs and make recommendations as to how they can better serve rural areas.

Mr. Chairman, declining and aging populations, combined with growing expenses and low medicare reimbursements have also created a crisis for rural hospitals and rural citizens. The committee has noted these problems in its report language, and has directed the Secretary to look for innovative ways to help rural hospitals stay feasible.

The committee has also provided $23 million for the Rural Transition Grant Program. This will fund about 100 new grants. This program provides grants to small, rural hospitals to fund innovative programs that both help rural hospitals become more financially viable while at the same time providing better service for Medicare beneficiaries.

And finally, Mr. Chairman, the bill includes funding for research project targeted for rural health issues such as Lyme disease, aging in rural areas, rural mental health, and numerous other areas.

I am particularly pleased to see funds included to address rural mental health needs. This past year, a national conference was held in my district to bring to light the unique needs and disproportionate difficulties rural citizens face in the area of mental health.

Mr. Chairman, today we will not pass a bill that ends the difficulties facing rural health care, but we will make an important start. Once again, I want to thank the chairman, the ranking member, and my colleagues on the committee for their continued support for rural health concerns.

Mr. GUNDERSON. Mr. Chairman, I am pleased to have this opportunity to speak in favor of the fiscal year 1991 appropriations bill for the Departments of Labor, HHS and Education. I commend the commitment both the President and Congress have made, again, to the important programs within these departments.

Let me state for the record that this bill can still be improved. For example, the Chapter 2 Block Grants Program has helped to create numerous innovative educational programs on the local level ranging from helping students who are at risk of failure, to purchase of educational material. According to a study done in 1986, these block grants provided some or all of the funding used to purchase computer technology. Yet, while the funding for education across the board has increased, these grants have been held constant or have decreased.

On the other hand, I am especially pleased that this bill includes a substantial increase for employment and training administration and programs, through the Department of Labor and the successful Job Training Partnership Act [JTPA] program. We are currently working on a reauthorization package to further fine-tune JTPA. Combined with this increased funding, our efforts will effectively improve the earnings of economically disadvantaged and dislocated workers.

Also under the Department of Labor, Congress will increase funding into the State unemployment insurance and employment service operations account and the Unemployment Trust Fund over current funding. My State of Wisconsin, like most States, faced serious funding shortfalls in these accounts earlier in the year, but found Congress willing to act quickly to ease the burden. Our efforts today follow up on action we took earlier in the year to maintain the integrity of the accounts for our unemployed.

We have also made great strides through this bill to improve our commitment to excellence in education, and to ensure greater opportunity for the disadvantaged in our society to move into the mainstream of a competitive national and international work force. By our action, we have given President Bush a leg up on his effort to make education a top national priority.

Specifically, this bill increases overall funding on education by $3 billion. While I applaud the refocusing of some of our funding efforts, as evidenced by the Education Excellence Act we'll pass this week, I am concerned over the fact that we've increased education funding $2.5 billion over current levels. The President requested over a half-billion dollar increase for education programs, including huge increases for Head Start. Congress has gone further.

While we cannot lose focus of the increased pressure on our budget deficit presented by this 10.5-percent funding increase, I appreciate the focus on increasing aid to programs for the handicapped, adult education and technology programs through the Carl Perkins Vocational Education Act, and student loan programs.

As an advocate and Board member of Gallaudet University, I had the opportunity to help justify President Bush's request for increased funding to the institution from current $67.6 million to $74.047 million next year. In testimony before the Appropriations Subcommittee on April 26, I outlined the needs and accomplishments at Gallaudet, as put forth by Gallaudet president, I. King Jordan. We can all be proud of the renewed spirit of optimism springing forth into the deaf community because of the new programs and efforts at Gallaudet.

And we can be proud of the manner in which Gallaudet has handled its responsibility of stewardship of public funds. While 5.8 percent of the funding increase will go to increase staff and faculty salaries and other operating expenses, the university is well into its reorganization process, which will reduce staff by 10 percent. Similarly, the university now counts on private donations for 72 percent of its funding. These efforts alone demonstrate the Gallaudet commitment to less and decreasing its dependence on Federal assistance, and stepping up its focus on tapping into new sources of support.

An example of this is the university's commitment to match, dollar for dollar, funding to expand and remodel the Hall Memorial Building to better facilitate the special needs of the school. I'm pleased we have provided in this bill the full $2.5 million appropriation requested to get this effort off the ground.

This appropriation bill makes similar strides in other handicapped education programs, increasing by over $71 million funding for rehabilitation services and handicapped research, and smaller increases in Special Institutions for the Handicapped, a 36-percent increase to Education for the Handicapped Act, a 4-percent increase for the National Institute for the Deaf, and increases in all other smaller programs.

We've also made similar strides in funding vocational and adult education by increasing overall funding 26.4 percent. As a conferee on the joint House-Senate effort to reauthorize the Perkins Vocational Education Act, I'm strongly supportive of the recognition appropriators have given to this successful program. The President's request of $929.7 million for the program is not included in this bill, but we have assurances the full amount will be made available upon reauthorization.

Finally, we've addressed the funding problems under our student loan programs by increasing overall funding 11.4 percent over current levels. We must immediately turn our focus to stopping the hemorrhaging of losses in our loan programs in the context of reauthorizing the Higher Education Act next year. In the interim, we have given adequate reas-

surance that a Federal commitment remains to all of our student loan programs.

Again, Mr. Chairman, I appreciate the general direction we have chosen in this funding bill. Though I encourage further efforts to pare back excessive funding where we can, the infrastructural needs we are meeting through this funding proposal follow appropriately on the President's and Congress' commitment to excellence and compassionate assistance in our labor, education, and health services.

Mr. LOWERY of California. Mr. Chairman, I rise today in support of H.R. 5257, the fiscal year 1990 Labor-HHS-Education appropriation bill and commend Chairman NATCHER and my colleague from Massachusetts, Mr. CONTE, for their diligence in bringing this bill to the floor.

In particular, I would like to recognize the funding included in the bill for the Impact Aid Program. H.R. 5257 provides $800 million for this program in fiscal year 1991, an increase of $68 million over last years' funding level.

As the Representative of a city which is the homeport to a quarter of the U.S. fleet and contains over 15 military installations, I certainly understand the importance of this program. Within the San Diego's school district's boundaries are nearly 22,000 federally connected students. I am proud to say San Diego has always provided a high quality, complete educational program for the dependents of military families.

However, with the rising cost of educating students at risk of dropping out or, those students from military families who transfer frequently from school to school, federally impacted schools bear a special burden of providing instruction without benefit of adequate revenues to cover cost. Fortunately, we have a bill here today which begins to address the shortfall in funding the Impact Aid Program has been experiencing in the past years. I commend the chairman, Mr. CONTE, and members of the subcommittee for their continued understanding and support for this program and urge my colleagues to support the bill.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

H.R. 5257

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1991, and for other purposes, namely:

TITLE I—DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

PROGRAM ADMINISTRATION

For expenses of administering employment and training programs, $70,030,000, together with not to exceed $54,751,000, which may be expended from the Employment Security Administration account in the Unemployment Trust Fund.

TRAINING AND EMPLOYMENT SERVICES

For expenses necessary to carry into effect the Job Training Partnership Act, including the purchase and hire of passenger motor vehicles, the construction, alteration, and repair of buildings and other facilities, and the purchase of real property for training centers as authorized by the Job Training Partnership Act, $4,136,447,000, plus reimbursements, to be available for obligation for the period July 1, 1991, through June 30, 1992, of which $58,193,000 shall be for carrying out section 401, $69,047,000 shall be for carrying out section 402, $9,345,000 shall be for carrying out section 441, $1,894,000 shall be for the National Commission for Employment Policy, $2,500,000 shall be for all activities conducted by and through the National Occupational Information Coordinating Committee under the Job Training Partnership Act, and $4,000,000 shall be for service delivery areas under section 101(a)(4)(A)(iii) of the Job Training Partnership Act in addition to amounts otherwise provided under sections 202 and 251(b) of the Act; and, in addition, $63,740,000 is appropriated for the Job Corps, in addition to amounts otherwise provided herein for the Job Corps, to be available for obligation for the period July 1, 1991 through June 30, 1994: *Provided,* That no funds from any other appropriation shall be used to provide meal services at or for Job Corps centers.

For Job Corps program operations authorized by the Job Training Partnership Act, $10,500,000, in addition to amounts otherwise provided herein for these purposes, to be available for obligation for the period July 1, 1990, through June 30, 1991.

COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS

To carry out the activities for national grants or contracts with public agencies and public or private nonprofit organizations under paragraph (1)(A) of section 506(a) of title V of the Older Americans Act of 1965, as amended, $312,000,000.

To carry out the activities for grants to States under paragraph (3) of section 506(a) of title V of the Older Americans Act of 1965, as amended, $88,000,000.

FEDERAL UNEMPLOYMENT BENEFITS AND ALLOWANCES

For payments during the current fiscal year of benefits and payments as authorized by title II of Public Law 95-250, as amended, and of trade adjustment benefit payments and allowances under part I, and for training, for allowances for job search and relocation, and for related State administrative expenses under part II, subchapter B, chapter 2, title II of the Trade Act of 1974, as amended, $230,500,000, together with such amounts as may be necessary to be charged to the subsequent appropriation for payments for any period subsequent to September 15 of the current year: *Provided,* That amounts received or recovered pursuant to section 208(e) of Public Law 95-250 shall be available for payments.

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE OPERATIONS

For activities authorized by the Act of June 6, 1933, as amended (29 U.S.C. 49-49l-1; 39 U.S.C. 3202(a)(1)(E)); title III of the Social Security Act, as amended (42 U.S.C. 502-504); necessary administrative expenses for carrying out 5 U.S.C. 8501-8523, and sections 225, 231-235 and 243-244, title II of the Trade Act of 1974, as amended; as authorized by section 7c of the Act of June 6, 1933, as amended, necessary administrative expenses under sections 101(a)(15)(H)(ii), 212(a)(14), and 216(g) (1), (2), and (3) of the Immigration and Nationality Act, as amended (8 U.S.C. 1101 et seq.), $25,600,000, together with not to exceed $2,800,400,000 (including not to exceed $2,000,000 which may be used for amortization payments to States which had independent retirement plans in their State employment service agencies prior to 1980), which may be expended from the Employment Security Administration account in the Unemployment Trust Fund, and of which the sums available in the basic allocation for activities authorized by title III of the Social Security Act, as amended (42 U.S.C. 502-504), and the sums available in the basic allocation for necessary administrative expenses for carrying out 5 U.S.C. 8501-8523, shall be available for obligation by the States through December 31, 1991, and of which $21,700,000 together with not to exceed $803,300,000 of the amount which may be expended from said trust fund shall be available for obligation for the period July 1, 1991, through June 30, 1992, to fund activities under section 6 of the Act of June 6, 1933, as amended, including the cost of penalty mail made available to States in lieu of allotments for such purpose, and of which $247,509,000 shall be available only to the extent necessary to administer unemployment compensation laws to meet increased costs of administration resulting from changes in a State law or increases in the number of unemployment insurance claims filed and claims paid or increased salary costs resulting from changes in State salary compensation plans embracing employees of the State generally over those upon which the State's basic allocation was based, which cannot be provided for by normal budgetary adjustments based on State obligations as of December 31, 1991.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For repayable advances to the Unemployment Trust Fund as authorized by sections 905(d) and 1203 of the Social Security Act, as amended, and to the Black Lung Disability Trust Fund as authorized by section 9501(c)(1) of the Internal Revenue Code of 1954, as amended; and for nonrepayable advances to the Unemployment Trust Fund as authorized by section 8509 of title 5, United States Code, and to the "Federal unemployment benefits and allowances" account, to remain available until September 30, 1992, $328,000,000.

LABOR-MANAGEMENT SERVICES

SALARIES AND EXPENSES

For necessary expenses for Labor-Management Services, $90,051,000.

PENSION BENEFIT GUARANTY CORPORATION

PENSION BENEFIT GUARANTY CORPORATION FUND

The Pension Benefit Guaranty Corporation is authorized to make such expenditures, including financial assistance authorized by section 104 of Public Law 96-364, within limits of funds and borrowing authority available to such Corporation, and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended (31 U.S.C. 9104), as may be necessary in carrying out the program through September 30, 1991, for such Corporation: *Provided,* That not to exceed $42,669,000 shall be available for administrative expenses of the Corporation: *Provided further,* That contractual expenses of such Corporation for legal and financial services in connection with the termination of pension plans, for the acquisition, protection or management, and investment of trust assets, and for benefits administration services shall be considered as non-adminis-

trative expenses for the purposes hereof, and excluded from the above limitation.

EMPLOYMENT STANDARDS ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Employment Standards Administration, including reimbursement to State, Federal, and local agencies and their employees for inspection services rendered, $222,388,000, together with $1,016,000 which may be expended from the Special Fund in accordance with sections 39(c) and 44(j) of the Longshore and Harbor Workers' Compensation Act.

SPECIAL BENEFITS

(INCLUDING TRANSFER OF FUNDS)

For the payment of compensation, benefits, and expenses (except administrative expenses) accruing during the current or any prior fiscal year authorized by title V, chapter 81 of the United States Code; continuation of benefits as provided for under the head "Civilian War Benefits" in the Federal Security Agency Appropriation Act, 1947; the Employees' Compensation Commission Appropriation Act, 1944; and sections 4(c) and 5(f) of the War Claims Act of 1948 (50 U.S.C. App. 2012); and 50 per centum of the additional compensation and benefits required by section 10(h) of the Longshore and Harbor Workers' Compensation Act, as amended, $322,000,000, together with such amounts as may be necessary to be charged to the subsequent year appropriation for the payment of compensation and other benefits for any period subsequent to August 15 of the current year: *Provided*, That balances of reimbursements from Federal Government agencies unobligated on September 30, 1990, shall remain available for the payment of compensation, benefits, and expenses through September 30, 1991: *Provided further*, That in addition there shall be transferred from the Postal Service fund to this appropriation such sums as the Secretary of Labor determines to be the cost of administration for Postal Service employees through September 30, 1991.

BLACK LUNG DISABILITY TRUST FUND

(INCLUDING TRANSFER OF FUNDS)

For payments from the Black Lung Disability Trust Fund, $918,796,000, of which $866,019,000 shall be available until September 30, 1992, for payment of all benefits as authorized by section 9501(d) (1), (2), (4), and (7), of the Internal Revenue Code of 1954, as amended, and interest on advances as authorized by section 9501(c)(2) of that Act, and of which $29,051,000 shall be available for transfer to Employment Standards Administration, Salaries and Expenses, and $23,355,000 for transfer to Departmental Management, Salaries and Expenses, and $371,000 for transfer to Departmental Management, Office of Inspector General, for expenses of operation and administration of the Black Lung Benefits program as authorized by section 9501(d)(5)(A) of that Act: *Provided*, That in addition, such amounts as may be necessary may be charged to the subsequent year appropriation for the payment of compensation, interest, or other benefits for any period subsequent to June 15 of the current year: *Provided further*, That in addition, such amounts shall be paid from this fund into miscellaneous receipts as the Secretary of the Treasury determines to be the administrative expenses of the Department of the Treasury for administering the fund during the current fiscal year, as authorized by section 9501(d)(5)(B) of that Act.

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Occupational Safety and Health Administration, $291,243,000, including not to exceed $65,220,000, which shall be the maximum amount available for grants to States under section 23(g) of the Occupational Safety and Health Act, which grants shall be no less than fifty percent of the costs of State occupational safety and health programs required to be incurred under plans approved by the Secretary under section 18 of the Occupational Safety and Health Act of 1970: *Provided*, That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, or order under the Occupational Safety and Health Act of 1970 which is applicable to any person who is engaged in a farming operation which does not maintain a temporary labor camp and employs ten or fewer employees: *Provided further*, That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, order or administrative action under the Occupational Safety and Health Act of 1970 affecting any work activity by reason of recreational hunting, shooting, or fishing.

MINE SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Mine Safety and Health Administration, $177,767,000, including purchase and bestowal of certificates and trophies in connection with mine rescue and first-aid work, and the purchase of not to exceed twenty passenger motor vehicles for replacement only; the Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private; the Mine Safety and Health Administration is authorized to promote health and safety education and training in the mining community through cooperative programs with States, industry, and safety associations; and any funds available to the Department may be used, with the approval of the Secretary, to provide for the costs of mine rescue and survival operations in the event of major disaster: *Provided*, That none of the funds appropriated under this paragraph shall be obligated or expended to carry out section 115 of the Federal Mine Safety and Health Act of 1977 or to carry out that portion of section 104(g)(1) of such Act relating to the enforcement of any training requirements, with respect to shell dredging, or with respect to any sand, gravel, surface stone, surface clay, colloidal phosphate, or surface limestone mine.

BUREAU OF LABOR STATISTICS

SALARIES AND EXPENSES

For necessary expenses for the Bureau of Labor Statistics, including advances or reimbursements to State, Federal, and local agencies and their employees for services rendered, $207,274,000, together with not to exceed $52,760,000, which may be expended from the Employment Security Administration account in the Unemployment Trust Fund.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

For necessary expenses for Departmental Management, including the hire of 5 sedans, and including $3,700,000 for the President's Committee on Employment of People With Disabilities, $132,788,000, together with not to exceed $285,000, which may be expended from the Employment Security Administration account in the Unemployment Trust Fund.

WORKING CAPITAL FUND

Funds received for services rendered to any entity or person for use of Departmental facilities, including associated utilities and security services, shall be credited to and merged with this fund.

ASSISTANT SECRETARY FOR VETERANS EMPLOYMENT AND TRAINING

Not to exceed $172,031,000 may be derived from the Employment Security Administration account in the Unemployment Trust Fund to carry out the provisions of 38 U.S.C. 2001-10 and 2021-26.

OFFICE OF INSPECTOR GENERAL

For salaries and expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978, as amended, $45,713,000, together with not to exceed $4,195,000, which may be expended from the Employment Security Administration account in the Unemployment Trust Fund.

GENERAL PROVISIONS

SEC. 101. Appropriations in this Act available for salaries and expenses shall be available for supplies, services, and rental of conference space within the District of Columbia, as the Secretary of Labor shall deem necessary for settlement of labor-management disputes.

SEC. 102. None of the funds appropriated under this Act shall be used to grant variances, interim orders or letters of clarification to employers which will allow exposure of workers to chemicals or other workplace hazards in excess of existing Occupational Safety and Health Administration standards for the purpose of conducting experiments on workers health or safety.

SEC. 103. Notwithstanding any other provision of this Act, no funds appropriated by this Act may be used to execute or carry out any contract with a non-governmental entity to administer or manage a Civilian Conservation Center of the Job Corps.

SEC. 104. None of the funds appropriated in this Act shall be used by the Job Corps program to pay the expenses of legal counsel or representation in any criminal case or proceeding for a Job Corps participant, unless certified to and approved by the Secretary of Labor that a public defender is not available.

This title may be cited as the "Department of Labor Appropriations Act, 1991".

TITLE II—DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH RESOURCES AND SERVICES ADMINISTRATION

PROGRAM OPERATIONS

For carrying out titles III, VII, VIII, XVI, and XXVI of the Public Health Service Act, section 427(a) of the Federal Coal Mine Health and Safety Act, title V of the Social Security Act, the Health Care Quality Improvement Act of 1986, as amended, and the Native Hawaiian Health Care Act of 1988, $1,627,375,000, of which $2,000,000, to remain available until expended, shall be available for renovating facilities related to the activities of the Gillis W. Long Hansen's Disease Center, 42 U.S.C. 247e, of which $488,000 shall remain available until expended for interest subsidies on loan guar-

antees made prior to fiscal year 1981 under part B of title VII of the Public Health Service Act and of which $4,129,000 shall be made available until expended to make grants under section 1610(b) of the Public Health Service Act for renovation or construction of nonacute care intermediate and long-term care facilities for AIDS patients: *Provided,* That notwithstanding section 838 of the Public Health Service Act, not to exceed $10,000,000 of funds returned to the Secretary pursuant to section 839(c) of the Public Health Service Act or pursuant to a loan agreement under section 740 or 835 of the Act may be used for activities under titles III, VII, and VIII of the Act: *Provided further,* That when the Department of Health and Human Services administers or operates an employee health program for any Federal department or agency, payment for the full estimated cost shall be made by way of reimbursement or in advances to this appropriation: *Provided further,* That user fees authorized by 31 U.S.C. 9701 may be credited to appropriations under this heading, notwithstanding 31 U.S.C. 3302: *Provided further,* That during fiscal year 1991, the Secretary of Health and Human Services may enter into commitments of not to exceed $260,000,000 for fiscal year 1991 to guarantee Health Education and Assistance Loans under subpart 1 of part C of title VII of the Public Health Service Act: *Provided further,* That none of the funds made available under this heading shall be used to carry out sections 638, 704 and 705 of Public Law 100-607.

MEDICAL FACILITIES GUARANTEE AND LOAN FUND

FEDERAL INTEREST SUBSIDIES FOR MEDICAL FACILITIES

For carrying out subsections (d) and (e) of section 1602 of the Public Health Service Act, $20,000,000, together with any amounts received by the Secretary in connection with loans and loan guarantees under title VI of the Public Health Service Act, to be available without fiscal year limitation for the payment of interest subsidies. During the fiscal year, no commitments for direct loans or loan guarantees shall be made.

VACCINE INJURY COMPENSATION

For payments from the Vaccine Injury Compensation Trust Fund, such sums as may be necessary for claims associated with vaccine-related injury or death with respect to vaccines administered after September 30, 1988, pursuant to subtitle 2 of title XXI of the Public Health Service Act as amended, to remain available until expended: *Provided,* That for necessary administrative expenses, not to exceed $1,500,000 shall be available from the Trust Fund to the Secretary of the Department of Health and Human Services.

For compensation of claims resolved by the United States Claims Court related to the administration of vaccines before October 1, 1988, $62,920,000, to remain available until expended.

CENTERS FOR DISEASE CONTROL

DISEASE CONTROL, RESEARCH, AND TRAINING

To carry out titles III, XVII, XIX, and section 1102 of the Public Health Service Act, sections 101, 102, 103, 201, 202, and 203 of the Federal Mine Safety and Health Act of 1977, and sections 20, 21, and 22 of the Occupational Safety and Health Act of 1970; including insurance of official motor vehicles in foreign countries; and hire, maintenance, and operation of aircraft, $997,701,000 of which $7,740,000 shall remain available until expended for equipment and construction and renovation of facilities: *Provided,* That training of private persons shall be made subject to reimbursement or advances to this appropriation for not in excess of the full cost of such training: *Provided further,* That funds appropriated under this heading shall be available for payment of the costs of medical care, related expenses, and burial expenses hereafter incurred by or on behalf of any person who had participated in the study of untreated syphilis initiated in Tuskegee, Alabama, in 1932, in such amounts and subject to such terms and conditions as prescribed by the Secretary of Health and Human Services and for payment, in such amounts and subject to such terms and conditions, of such costs and expenses hereafter incurred by or on behalf of such person's wife or offspring determined by the Secretary to have suffered injury or disease from syphilis contracted from such person: *Provided further,* That collections from user fees may be credited to this appropriation: *Provided further,* That amounts received by the National Center for Health Statistics from reimbursable and interagency agreements and the sale of data tapes may be credited to this appropriation and shall remain available until expended.

NATIONAL INSTITUTES OF HEALTH

NATIONAL CANCER INSTITUTE

For carrying out section 301 and title IV of the Public Health Service Act with respect to cancer, $1,749,392,000.

NATIONAL HEART, LUNG, AND BLOOD INSTITUTE

For carrying out sections 301 and 1105 and title IV of the Public Health Service Act with respect to cardiovascular, lung, and blood diseases, and blood and blood products, $1,135,589,000.

NATIONAL INSTITUTE OF DENTAL RESEARCH

For carrying out section 301 and title IV of the Public Health Service Act with respect to dental disease, $149,592,000.

NATIONAL INSTITUTE OF DIABETES AND DIGESTIVE AND KIDNEY DISEASES

For carrying out section 301 and title IV of the Public Health Service Act with respect to diabetes and digestive and kidney diseases, $613,686,000.

NATIONAL INSTITUTE OF NEUROLOGICAL DISORDERS AND STROKE

For carrying out section 301 and title IV of the Public Health Service Act with respect to neurological disorders and stroke, $545,225,000.

NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES

For carrying out section 301 and title IV of the Public Health Service Act with respect to allergy and infectious diseases, $944,965,000.

NATIONAL INSTITUTE OF GENERAL MEDICAL SCIENCES

For carrying out section 301 and title IV of the Public Health Service Act with respect to general medical sciences, $693,499,000.

NATIONAL INSTITUTE OF CHILD HEALTH AND HUMAN DEVELOPMENT

For carrying out section 301 and title IV of the Public Health Service Act with respect to child health and human development, $488,282,000.

NATIONAL EYE INSTITUTE

For carrying out section 301 and title IV of the Public Health Service Act with respect to eye diseases and visual disorders, $254,887,000.

NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES

For carrying out sections 301 and 311 and title IV of the Public Health Service Act with respect to environmental health sciences, $244,832,000.

NATIONAL INSTITUTE ON AGING

For carrying out section 301 and title IV of the Public Health Service Act with respect to aging, $278,311,000.

NATIONAL INSTITUTE OF ARTHRITIS AND MUSCULOSKELETAL AND SKIN DISEASES

For carrying out section 301 and title IV of the Public Health Service Act with respect to arthritis, and musculoskeletal and skin diseases, $191,397,000.

NATIONAL INSTITUTE ON DEAFNESS AND OTHER COMMUNICATION DISORDERS

For carrying out section 301 and title IV of the Public Health Service Act with respect to deafness and other communication disorders, $125,623,000.

NATIONAL CENTER FOR RESEARCH RESOURCES

For carrying out section 301 and title IV of the Public Health Service Act with respect to research resources and general research support grants, $353,469,000: *Provided,* That none of these funds shall be used to pay recipients of the general research support grants program any amount for indirect expenses in connection with such grants.

NATIONAL CENTER FOR NURSING RESEARCH

For carrying out section 301 and title IV of the Public Health Service Act with respect to nursing research, $37,289,000.

NATIONAL CENTER FOR HUMAN GENOME RESEARCH

For carrying out section 301 and title IV of the Public Health Service Act with respect to human genome research, $66,131,000.

JOHN E. FOGARTY INTERNATIONAL CENTER

For carrying out the activities of the John E. Fogarty International Center, $18,682,000.

NATIONAL LIBRARY OF MEDICINE

For carrying out section 301 and title IV of the Public Health Service Act with respect to health information communications, $80,725,000.

OFFICE OF THE DIRECTOR

For carrying out the responsibilities of the Office of the Director, National Institutes of Health, $106,175,000, including purchase of not to exceed five passenger motor vehicles for replacement only.

BUILDINGS AND FACILITIES

For construction of, and acquisition of equipment for, facilities of or used by the National Institutes of Health, $239,903,000, to remain available until expended.

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH

For carrying out the Public Health Service Act with respect to mental health, drug abuse, alcohol abuse, and alcoholism, section 3521 of Public Law 100-690, section 621 of Public Law 100-628, and the Protection and Advocacy for Mentally Ill Individuals Act of 1986, $2,648,748,000, of which $3,126,000 for renovation of government owned or leased intramural research facilities shall remain available until expended: *Provided,* That funds available under this heading for block grants under subpart 1, part B of title XIX of the Public Health

Service Act shall be expended by States in accordance with the same criteria and limitations as were applied to such grants for the fiscal year 1990.

FEDERAL SUBSIDY FOR SAINT ELIZABETHS HOSPITAL

To carry out the Saint Elizabeths Hospital and District of Columbia Mental Health Services Act, $12,000,000, which shall be available in fiscal year 1991 for payments to the District of Columbia as authorized by section 9(a) of the Act: *Provided,* That any amounts determined by the Secretary of Health and Human Services to be in excess of the amounts requested and estimated to be necessary to carry out sections 6 and 9(f)(2) of the Act shall be returned to the Treasury.

ASSISTANT SECRETARY FOR HEALTH

OFFICE OF THE ASSISTANT SECRETARY FOR HEALTH

For the expenses necessary for the Office of Assistant Secretary for Health and for carrying out titles III, XVII, and XXI of the Public Health Service Act, $61,270,000, and, in addition, amounts received by the Public Health Service from Freedom of Information Act fees, reimbursable and interagency agreements and the sale of data tapes shall be credited to this appropriation and shall remain available until expended.

RETIREMENT PAY AND MEDICAL BENEFITS FOR COMMISSIONED OFFICERS

For retirement pay and medical benefits of Public Health Service Commissioned Officers as authorized by law, and for payments under the Retired Serviceman's Family Protection Plan and Survivor Benefit Plan and for medical care of dependents and retired personnel under the Dependents' Medical Care Act (10 U.S.C. ch. 55), and for payments pursuant to section 229(b) of the Social Security Act (42 U.S.C. 429(b)), such amounts as may be required during the current fiscal year.

AGENCY FOR HEALTH CARE POLICY AND RESEARCH

HEALTH CARE POLICY AND RESEARCH

For carrying out titles III and IX of the Public Health Service Act, and Part A of title XI of the Social Security Act, $68,579,000 together with not to exceed $5,000,000 to be transferred from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds, as authorized by section 1142 of the Social Security Act and not to exceed $1,037,000 to be transferred from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds, as authorized by section 201(g) of the Social Security Act; and, in addition, amounts received from Freedom of Information Act fees, reimbursable and interagency agreements, and the sale of data tapes shall be credited to this appropriation and shall remain available until expended: *Provided,* That the amount made available pursuant to section 926(b) of the Public Health Service Act shall not exceed $13,776,000.

HEALTH CARE FINANCING ADMINISTRATION

GRANTS TO STATES FOR MEDICAID

For carrying out, except as otherwise provided, titles XI and XIX of the Social Security Act, $34,614,966,000, to remain available until expended.

For making, after May 31, 1991, payments to States under title XIX of the Social Security Act for the last quarter of fiscal year 1991 for unanticipated costs, incurred for the current fiscal year, such sums as may be necessary.

For making payments to States under title XIX of the Social Security Act for the first quarter of fiscal year 1992, $12,400,000,000, to remain available until expended.

Payment under title XIX may be made for any quarter with respect to a State plan or plan amendment in effect during such quarter, if submitted in or prior to such quarter and approved in that or any subsequent quarter.

PAYMENTS TO HEALTH CARE TRUST FUNDS

For payment to the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds, as provided under sections 217(g) and 1844 of the Social Security Act, sections 103(c) and 111(d) of the Social Security Amendments of 1965, and section 278(d) of Public Law 97-248, $37,056,000,000.

PROGRAM MANAGEMENT

For carrying out, except as otherwise provided, titles XI, XVIII, and XIX of the Social Security Act, title XIII of the Public Health Service Act, the Clinical Laboratory Improvement Amendments of 1988, and section 4005(e) of Public Law 100-203, as amended, $104,966,000, together with not to exceed $2,026,638,000 to be transferred to this appropriation as authorized by section 201(g) of the Social Security Act, from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds: *Provided,* That $136,500,000 of said trust funds shall be expended only to the extent necessary to meet unanticipated costs of agencies or organizations with which agreements have been made to participate in the administration of title XVIII and after maximum absorption of such costs within the remainder of the existing limitation has been achieved: *Provided further,* That all funds derived in accordance with 31 U.S.C. 9701 from organizations established under title XIII of the Public Health Service Act are to be credited to this appropriation: *Provided further,* That all funds collected in accordance with section 353 of the Public Health Service Act are to be credited to this appropriation to remain available until expended.

SOCIAL SECURITY ADMINISTRATION

PAYMENTS TO SOCIAL SECURITY TRUST FUNDS

For payment to the Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Funds, as provided under sections 201(m), 228(g), and 1131(b)(2) of the Social Security Act, $46,958,000.

SPECIAL BENEFITS FOR DISABLED COAL MINERS

For carrying out title IV of the Federal Mine Safety and Health Act of 1977, including the payment of travel expenses on an actual cost or commuted basis, to an individual, for travel incident to medical examinations, and when travel of more than 75 miles is required, to parties, their representatives, and all reasonably necessary witnesses for travel within the United States, Puerto Rico, and the Virgin Islands, to reconsideration interviews and to proceedings before administrative law judges, $626,081,000, to remain available until expended: *Provided,* That monthly benefit payments shall be paid consistent with section 215(g) of the Social Security Act.

For making, after July 31 of the current fiscal year, benefit payments to individuals under title IV of the Federal Mine Safety and Health Act of 1977, for costs incurred in the current fiscal year, such amounts as may be necessary.

For making benefit payments under title IV of the Federal Mine Safety and Health Act of 1977 for the first quarter of fiscal year 1992, $203,000,000, to remain available until expended.

SUPPLEMENTAL SECURITY INCOME PROGRAM

For carrying out the Supplemental Security Income Program, title XI of the Social Security Act, section 401 of Public Law 92-603, section 212 of Public Law 93-66, as amended, and section 405 of Public Law 95-216, including payment to the Social Security trust funds for administrative expenses incurred pursuant to section 201(g)(1) of the Social Security Act, $12,001,594,000, to remain available until expended: *Provided,* That any portion of the funds provided to a State in the current fiscal year and not obligated by the State during that year shall be returned to the Treasury: *Provided,* That all collections from repayments of overpayments shall be deposited in the general fund of the Treasury.

For making, after July 31 of the current fiscal year, benefit payments to individuals under title XVI of the Social Security Act, for unanticipated costs incurred for the current fiscal year, such sums as may be necessary.

For carrying out the Supplemental Security Income Program for the first quarter of fiscal year 1992, $3,550,000,000, to remain available until expended.

LIMITATION ON ADMINISTRATIVE EXPENSES

For necessary expenses, not more than $4,166,974,000 may be expended, as authorized by section 201(g)(1) of the Social Security Act, from any one or all of the trust funds referred to therein: *Provided,* That travel expense payments under section 1631(h) of such Act for travel to hearings may be made only when travel of more than seventy-five miles is required: *Provided further,* That $50,000,000 of the foregoing amount shall be apportioned for use only to the extent necessary to process workloads not anticipated in the budget estimates, for automation projects and their impact on the work force, and to meet mandatory increases in costs of agencies or organizations with which agreements have been made to participate in the administration of titles XVI and XVIII and section 221 of the Social Security Act, and after maximum absorption of such costs within the remainder of the existing limitation has been achieved: *Provided further,* That none of the funds appropriated by this Act may be used for the manufacture, printing, or procuring of social security cards, as provided in section 205(c)(2)(D) of the Social Security Act, where paper and other materials used in the manufacture of such cards are produced, manufactured, or assembled outside of the United States.

FAMILY SUPPORT ADMINISTRATION

FAMILY SUPPORT PAYMENTS TO STATES

For making payments to States or other non-Federal entities, except as otherwise provided, under titles I, IV-A and -D, X, XI, XIV, and XVI of the Social Security Act, and the Act of July 5, 1960 (24 U.S.C. ch. 9), $9,657,246,000, to remain available until expended.

For making, after May 31 of the current fiscal year, payments to States or other non-Federal entities under titles I, IV-A and -D, X, XI, XIV, and XVI of the Social Security Act, for the last three months of the current year for unanticipated costs, incurred for the current fiscal year, such sums as may be necessary.

For making payments to States or other non-Federal entities under titles I, IV-A and

-D, X, XI, XIV, and XVI of the Social Security Act and the Act of July 5, 1960 (24 U.S.C. ch. 9) for the first quarter of fiscal year 1992, $3,300,000,000 to remain available until expended.

PAYMENTS TO STATES FOR AFDC WORK PROGRAMS

For carrying out aid to families with dependent children work programs, as authorized by part F of title IV of the Social Security Act, $1,000,000,000.

PROGRAM ADMINISTRATION

For necessary administrative expenses to carry out titles I, IV, X, XI, XIV, and XVI of the Social Security Act, the Act of July 5, 1960 (24 U.S.C. ch. 9), title XXVI of the Omnibus Budget Reconciliation Act of 1981, the Community Services Block Grant Act, title IV of the Immigration and Nationality Act, section 501 of the Refugee Education Assistance Act of 1980, Public Law 100-77, and section 126 and titles IV and V of Public Law 100-485, $81,200,000, to be reduced by such sums as may be collected, which shall be credited to this account as offsetting collections, from fees authorized under section 453 of the Social Security Act: *Provided*, That funds appropriated in Public Law 101-166 for the Commission on Interstate Child Support shall remain available through September 30, 1991.

ASSISTANT SECRETARY FOR HUMAN DEVELOPMENT SERVICES

SOCIAL SERVICES BLOCK GRANT

For carrying out the Social Services Block Grant Act, $2,800,000,000.

HUMAN DEVELOPMENT SERVICES

For carrying out, except as otherwise provided, the Runaway and Homeless Youth Act, the Older Americans Act of 1965, the Child Abuse Prevention and Treatment Act, chapters 1 and 2 of subtitle B of title III of the Anti-Drug Abuse Act of 1988, the Family Violence Prevention and Services Act (title III of Public Law 98-457), the Native American Programs Act, title II of Public Law 95-266 (adoption opportunities), section 206 of the Temporary Child Care for Children with Disabilities and Crisis Nurseries Act of 1986, the Comprehensive Child Development Centers Act of 1988, the Abandoned Infants Assistance Act of 1988, section 10404 of Public Law 101-239 and part B of title IV and section 1110 of the Social Security Act, $1,423,217,000, of which $1,000,000 shall remain available until expended for the 1991 White House Conference on Aging.

PAYMENTS TO STATES FOR FOSTER CARE AND ADOPTION ASSISTANCE

For carrying out part E of title IV of the Social Security Act, $2,632,192,000, of which $544,000,000 shall be for payment of prior years' claims.

OFFICE OF THE SECRETARY

GENERAL DEPARTMENTAL MANAGEMENT

For necessary expenses, not otherwise provided, for general departmental management, including hire of six medium sedans, $82,250,000, of which $20,995,000 shall be available for expenses necessary for the Office of the General Counsel, together with $31,950,000, of which $26,881,000 shall be available for expenses necessary for the Office of the General Counsel, to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

OFFICE OF THE INSPECTOR GENERAL

For expenses necessary for the Office of the Inspector General in carrying out the provisions of the Inspector General Act of 1978, as amended, $53,500,000, together with not to exceed $43,723,000, to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

OFFICE FOR CIVIL RIGHTS

For expenses necessary for the Office for Civil Rights, $17,585,000, together with not to exceed $4,000,000, to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

POLICY RESEARCH

For carrying out, to the extent not otherwise provided, research studies under section 1110 of the Social Security Act, $9,167,000: *Provided*, That not less than $3,150,000 shall be obligated to continue research on poverty.

GENERAL PROVISIONS

SEC. 201. None of the funds made available by this Act for the National Institutes of Health, except for those appropriated to the "Office of the Director", may be used to provide forward funding or multiyear funding of research project grants except in those cases where the Director of the National Institutes of Health has determined that such funding is specifically required because of the scientific requirements of a particular research project grant.

SEC. 202. Appropriations in this or any other Act shall be available for expenses for active commissioned officers in the Public Health Service Reserve Corps and for not to exceed 2,400 commissioned officers in the Regular Corps; expenses incident to the dissemination of health information in foreign countries through exhibits and other appropriate means; advances of funds for compensation, travel, and subsistence expenses (or per diem in lieu thereof) for persons coming from abroad to participate in health or scientific activities of the Department pursuant to law; expenses of primary and secondary schooling of dependents in foreign countries, of Public Health Service commissioned officers stationed in foreign countries, at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents, between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; expenses for medical care for civilian and commissioned employees of the Public Health Service and their dependents, assigned abroad on a permanent basis in accordance with such regulations as the Secretary may provide; rental or lease of living quarters (for periods not exceeding five years), and provision of heat, fuel, and light and maintenance, improvement, and repair of such quarters, and advance payments therefor, for civilian officers, and employees of the Public Health Service who are United States citizens and who have a permanent station in a foreign country; purchase, erection, and maintenance of temporary or portable structures; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section 207(f) or section 207(g) of the Public Health Service Act, at rates established by the Assistant Secretary for Health, or the Secretary where such action is required by statute, not to exceed the per diem rate equivalent to the rate for GS-18.

SEC. 203. None of the funds contained in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term.

SEC. 204. Funds advanced to the National Institutes of Health Management Fund from appropriations in this Act shall be available for the expenses of sharing medical care facilities and resources pursuant to section 327A of the Public Health Service Act.

SEC. 205. Funds appropriated in this title shall be available for not to exceed $37,000 for official reception and representation expenses when specifically approved by the Secretary.

SEC. 206. Amounts received from employees of the Department in payment for room and board may be credited to the appropriation accounts which finance the activities of the Public Health Service.

SEC. 207. None of the funds made available by this Act shall be used to provide special retention pay (bonuses) under paragraph (4) of 37 U.S.C. 302(a) to any regular or reserve medical officer of the Public Health Service for any period during which the officer is assigned to the clinical, research, or staff associate program administered by the National Institutes of Health or the Alcohol, Drug Abuse, and Mental Health Administration.

SEC. 208. Funds provided in this Act may be used for one-year contracts which are to be performed in two fiscal years, so long as the total amount for such contracts is obligated in the year for which the funds are appropriated.

SEC. 209. The Secretary shall make available through assignment not more than 60 employees of the Public Health Service to assist in child survival activities and to work in AIDS programs through and with funds provided by the Agency for International Development, the United Nations International Children's Emergency Fund or the World Health Organization.

SEC. 210. For the purpose of insuring proper management of federally supported computer systems and data bases, funds appropriated by this Act are available for the purchase of dedicated telephone service between the private residences of employees assigned to computer centers funded under this Act, and the computer centers to which such employees are assigned.

SEC. 211. No funds appropriated under this Act shall be used by the National Institutes of Health, or any other Federal agency, or recipient of Federal funds on any project that entails the capture or procurement of chimpanzees obtained from the wild. For purposes of this section, the term "recipient of Federal funds" includes private citizens, corporations, or other research institutions located outside of the United States that are recipients of Federal funds.

SEC. 212. None of the funds appropriated by this title shall be used to pay for any research program or project or any program, project, or course which is of an experimental nature, or any other activity involving human participants, which is determined by the Secretary or a court of competent jurisdiction to present a danger to the physical, mental, or emotional well-being of a participant or subject of such program, project, or course, without the written, informed con-

sent of each participant or subject, or a participant's parents or legal guardian, if such participant or subject is under eighteen years of age. The Secretary shall adopt appropriate regulations respecting this section.

SEC. 213. None of the funds appropriated in this title for the National Institutes of Health and the Alcohol, Drug Abuse, and Mental Health Administration shall be used to pay the salary of an individual, through a grant or other extramural mechanism, at a rate in excess of $120,000 per year.

SEC. 214. Notwithstanding any other provision of this Act, AIDS education programs that receive assistance from the Centers for Disease Control and other education curricula dealing with sexual activity that receive assistance under this Act—

(1) shall not be designed to promote or encourage, directly, intravenous drug abuse or sexual activity, homosexual or heterosexual; and

(2) with regard to AIDS education programs and curricula—

(A) shall be designed to reduce exposure to and transmission of the etiologic agent for acquired immune deficiency syndrome by providing accurate information; and

(B) shall provide information on the health risks of promiscuous sexual activity and intravenous drug abuse.

This title may be cited as the "Department of Health and Human Services Appropriations Act, 1991".

TITLE III—DEPARTMENT OF EDUCATION

COMPENSATORY EDUCATION FOR THE DISADVANTAGED

For carrying out the activities authorized by chapter 1 of title I of the Elementary and Secondary Education Act of 1965, as amended, except subpart 2 of part D, and by section 418A of the Higher Education Act, $6,225,250,000, of which $6,195,750,000 shall become available on July 1, 1991 and shall remain available until September 30, 1992: *Provided*, That $5,121,000,000 shall be available for basic grants under section 1005, $569,000,000 shall be available for concentration grants under section 1006, $310,000,000 shall be available for migrant education activities under subpart 1 of part D, $34,000,000 shall be available for delinquent and neglected education activities under subpart 3 of part D, $60,600,000 shall be for State administration under section 1404, and $15,150,000 shall be for program improvement activities under section 1405.

From the amounts appropriated for part A of chapter 1, an amount not to exceed $100,000,000 may be obligated to carry out a new Merit Schools program only if such program is specifically authorized in law prior to December 31, 1990.

IMPACT AID

For carrying out programs of financial assistance to federally affected schools as authorized by Public Laws 81-815 and 81-874, as amended, $800,000,000, of which $600,000,000 shall be for payments under section 3(a), $140,000,000 shall be for payments under section 3(b), $14,000,000, to remain available until expended, shall be for disaster assistance payments under section 7, $17,000,000 shall be for Federal property payments under section 2, $2,000,000, to remain available until expended, shall be for payments under section 3(e) related to shifts in enrollment and $27,000,000, to remain available until expended, shall be for construction and renovation of school facilities including $10,000,000 for awards under section 10, $10,000,000 for awards under sections 14(a) and 14(b), and $7,000,000 for awards under sections 5 and 14(c): *Provided*, That, of the amounts appropriated for payments under sections 3(a) and 3(b), not to exceed $25,000,000 shall be available for payments under section 3(d)2(b).

SCHOOL IMPROVEMENT PROGRAMS

For carrying out the activities authorized by chapter 2 of title I and titles II, III, IV, V, and VI of the Elementary and Secondary Education Act of 1965, as amended; the Stewart B. McKinney Homeless Assistance Act; the Civil Rights Act of 1964; title V of the Higher Education Act, as amended; part B of title III and title IV of Public Law 100-297; and chapter 5 of subtitle A of title VI of Public Law 100-418, $1,474,745,000, of which $1,098,451,000 shall become available on July 1, 1991, and remain available until September 30, 1992: *Provided*, That of the amount appropriated, $1,000,000 shall be for an evaluation study of the chapter 2 block grant program, $3,000,000 shall be for research on dropout prevention, and $33,900,000 shall be for national programs under part B of chapter 2.

BILINGUAL AND IMMIGRANT EDUCATION

For carrying out, to the extent not otherwise provided, title VII and part D of title IV of the Elementary and Secondary Education Act, $205,000,000, of which $42,000,000 shall be for training activities under part C of title VII.

EDUCATION FOR THE HANDICAPPED

For carrying out the Education of the Handicapped Act, $2,747,730,000, of which $2,400,000,000 for section 611, $257,730,000 for section 619, and $90,000,000 for section 685 shall become available for obligation on July 1, 1991, and shall remain available until September 30, 1992.

REHABILITATION SERVICES AND HANDICAPPED RESEARCH

For carrying out, to the extent not otherwise provided, the Rehabilitation Act of 1973, Public Law 100-407, and the Helen Keller National Center Act, as amended, $1,851,911,000, of which $17,455,000 shall be for special demonstration programs under sections 311 (a), (b), and (c).

SPECIAL INSTITUTIONS FOR THE HANDICAPPED

AMERICAN PRINTING HOUSE FOR THE BLIND

For carrying out the Act of March 3, 1879, as amended (20 U.S.C. 101 et seq.), $6,076,000.

NATIONAL TECHNICAL INSTITUTE FOR THE DEAF

For the National Technical Institute for the Deaf under titles II and IV of the Education of the Deaf Act of 1986 (20 U.S.C. 4301 et seq.), $37,531,000, of which $336,000 shall be for the endowment program as authorized under section 408 and shall be available until expended.

GALLAUDET UNIVERSITY

For the Kendall Demonstration Elementary School, the Model Secondary School for the Deaf and the partial support of Gallaudet University under titles I and IV of the Education of the Deaf Act of 1986 (20 U.S.C. 4301 et seq.), $74,047,000, of which $1,000,000 shall be for the endowment program as authorized under section 407 and shall be available until expended, and $2,500,000 shall be for construction and shall be available until expended.

VOCATIONAL AND ADULT EDUCATION

For carrying out, to the extent not otherwise provided, the Adult Education Act, the Stewart B. McKinney Homeless Assistance Act, and the Omnibus Trade and Competitiveness Act of 1988, $245,000,000 which shall become available for obligation on July 1, 1991, and shall remain available until September 30, 1992, of which $3,000,000 shall be for national programs under section 383, and $5,000,000 shall be for literacy clearinghouse activities under section 384 of the Adult Education Act and $1,000,000 shall be for technology education demonstrations under title VI, subtitle B, chapter 2 of the Omnibus Trade and Competitiveness Act of 1988.

STUDENT FINANCIAL ASSISTANCE

For carrying out subparts 1, 2, and 3 of part A and parts C, D, and E of title IV of the Higher Education Act, as amended, $6,777,000,000 of which $113,000,000 shall only be available if such funds are necessary to pay a maximum grant of $2,300 during the 1991-1992 program year, which shall be the maximum Pell grant that a student may receive: *Provided*, That notwithstanding section 479A of the Higher Education Act of 1965 (20 U.S.C. 1001 et seq.), student financial aid administrators shall be authorized, on the basis of adequate documentation, to make necessary adjustments to the cost of attendance and the expected student or parent contribution (or both) and to use supplementary information about the financial status or personal circumstances of eligible applicants only for purposes of selecting recipients and determining the amount of awards under subpart 2 of part A, and parts B, C, and E of title IV of the Act: *Provided further*, That notwithstanding section 411F(1) of the Higher Education Act of 1965 as amended, the term "annual adjusted family income" shall, under special circumstances prescribed by the Secretary, mean the sum received in the first calendar year of the award year from the sources described in that section.

GUARANTEED STUDENT LOANS

(LIQUIDATION OF CONTRACT AUTHORITY)

For payment of obligations incurred under contract authority entered into pursuant to title IV, part B, of the Higher Education Act, as amended, $3,900,000,000.

HIGHER EDUCATION

For carrying out, to the extent not otherwise provided for, titles I, III, IV, V, VI, VII, VIII, IX, X, and XII of the Higher Education Act of 1965, as amended, the Mutual Educational and Cultural Exchange Act of 1961, and the Library Services and Construction Act Amendments of 1984, $763,616,000, of which up to $27,500,000 for endowment activities under section 332 of part C of title III, and $20,900,000 for interest subsidies under part D of title VII shall remain available until expended, and of which $3,000,000 shall be for carrying out section 304 of Public Law 98-480: *Provided*, That $8,627,000 provided herein for carrying out subpart 6 of part A of title IV shall be available notwithstanding sections 419G(b) and 419I(a) of the Higher Education Act of 1965 (20 U.S.C. 1070d-37(b) and 1070d-39(a)): *Provided further*, That $1,000,000 of the amount provided herein for subpart 4 of part A of title IV of the Higher Education Act shall be for an evaluation of Special Programs for the Disadvantaged to examine the effectiveness of current programs and to identify program improvements.

HOWARD UNIVERSITY

For partial support of Howard University (20 U.S.C. 121 et seq.), $200,036,000, of which $3,000,000, to remain available until expended, shall be for a matching endowment grant to be administered in accordance with the Howard University Endowment Act (Public Law 98-480), and $6,000,000, to remain available until expended, shall be for emergency construction needs.

HIGHER EDUCATION FACILITIES LOANS

The Secretary is hereby authorized to make such expenditures, within the limits of funds available under this heading and in accord with law, and to make such contracts and commitments without regard to fiscal year limitation, as provided by section 104 of the Government Corporation Control Act (31 U.S.C. 9104), as may be necessary in carrying out the program for the current fiscal year. For the fiscal year 1991, no new commitments for loans may be made from the fund established pursuant to title VII, section 733 of the Higher Education Act, as amended (20 U.S.C. 1132d-2).

COLLEGE HOUSING AND ACADEMIC FACILITIES LOANS

Pursuant to title VII, part F of the Higher Education Act, as amended, for necessary expenses of the college housing and academic facilities loans program, the Secretary shall make expenditures, contracts, and commitments without regard to fiscal year limitation: *Provided*, That during fiscal year 1991, gross commitments for the principal amount of direct loans shall be $30,000,000.

For payment of interest on funds borrowed from the Treasury pursuant to section 761(d) of the Higher Education Act, as amended, $8,449,000, to remain available until expended.

COLLEGE HOUSING LOANS

Pursuant to title VII, part F of the Higher Education Act, as amended, for necessary expenses of the college housing loans program, previously carried out under title IV of the Housing Act of 1950, the Secretary shall make expenditures and enter into contracts without regard to fiscal year limitation using loan repayments and other resources available to this account. Any unobligated balances becoming available from fixed fees paid into this account pursuant to 12 U.S.C. 1749d, relating to payment of costs for inspections and site visits, shall be available for the operating expenses of this account.

EDUCATION RESEARCH, STATISTICS, AND IMPROVEMENT

For necessary expenses to carry out section 405 and section 406 of the General Education Provisions Act, as amended, $133,860,000, of which $4,000,000 shall be for the rural education program conducted by the regional laboratories which shall be in addition to the amounts carried forward from fiscal year 1990 for this purpose.

LIBRARIES

For carrying out, to the extent not otherwise provided, titles I, II, III, IV, V, and VI of the Library Services and Construction Act (20 U.S.C. ch. 16), and title II of the Higher Education Act, $140,800,000 of which $18,900,000 shall be used to carry out the provisions of title II of the Library Services and Construction Act which shall remain available until expended.

DEPARTMENTAL MANAGEMENT

PROGRAM ADMINISTRATION

For carrying out, to the extent not otherwise provided, the Department of Education Organization Act, including rental of conference rooms in the District of Columbia and hire of three passenger motor vehicles, $331,000,000.

OFFICE FOR CIVIL RIGHTS

For expenses necessary for the Office for Civil Rights, as authorized by section 203 of the Department of Education Organization Act, $49,900,000.

OFFICE OF THE INSPECTOR GENERAL

For expenses necessary for the Office of the Inspector General, as authorized by section 212 of the Department of Education Organization Act, $25,800,000.

GENERAL PROVISIONS

SEC. 301. Funds appropriated in this Act to the American Printing House for the Blind, Howard University, the National Technical Institute for the Deaf, and Gallaudet University shall be subject to financial and program audit by the Secretary of Education and the Secretary may withhold all or any portion of these appropriations if he determines that an institution has not cooperated fully in the conduct of such audits.

SEC. 302. No part of the funds contained in this title may be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to force on account of race, creed or color the abolishment of any school so desegregated; or to force the transfer or assignment of any student attending any elementary or secondary school so desegregated to or from a particular school over the protest of his or her parents or parent.

SEC. 303. (a) No part of the funds contained in this title shall be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to require the abolishment of any school so desegregated; or to force on account of race, creed or color the transfer of students to or from a particular school so desegregated as a condition precedent to obtaining Federal funds otherwise available to any State, school district or school.

(b) No funds appropriated in this Act may be used for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to overcome racial imbalance in any school or school system, or for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to carry out a plan of racial desegregation of any school or school system.

SEC. 304. None of the funds contained in this Act shall be used to require, directly or indirectly, the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education, to the school offering such special education, in order to comply with title VI of the Civil Rights Act of 1964. For the purpose of this section an indirect requirement of transportation of students includes the transportation of students to carry out a plan involving the reorganization of the grade structure of schools, the pairing of schools, or the clustering of schools, or any combination of grade restructuring, pairing or clustering. The prohibition described in this section does not include the establishment of magnet schools.

SEC. 305. No funds appropriated under this Act may be used to prevent the implementation of programs of voluntary prayer and meditation in the public schools.

This title may be cited as the "Department of Education Appropriations Act, 1991".

TITLE IV—RELATED AGENCIES

ACTION

OPERATING EXPENSES

For expenses necessary for Action to carry out the provisions of the Domestic Volunteer Service Act of 1973, as amended, $191,659,000: *Provided*, That $30,500,000 shall be available for title I, section 102, and $2,245,000 shall be available for title I, part C.

CORPORATION FOR PUBLIC BROADCASTING

For payment to the Corporation for Public Broadcasting, as authorized by the Communications Act of 1934, an amount which shall be available within limitations specified by that Act, for the fiscal year 1993, $306,505,000, of which $46,940,000 shall be available for section 396(k)(10) of said Act: *Provided*, That no funds made available to the Corporation for Public Broadcasting by this Act shall be used to pay for receptions, parties, or similar forms of entertainment for Government officials or employees: *Provided further*, That none of the funds contained in this paragraph shall be available or used to aid or support any program or activity from which any person is excluded, or is denied benefits, or is discriminated against, on the basis of race, color, national origin, religion, or sex.

FEDERAL MEDIATION AND CONCILIATION SERVICE

SALARIES AND EXPENSES

For expenses necessary for the Federal Mediation and Conciliation Service to carry out the functions vested in it by the Labor-Management Relations Act, 1947 (29 U.S.C. 171-180, 182-183), including hire of passenger motor vehicles; and for expenses necessary for the Labor-Management Cooperation Act of 1978 (29 U.S.C. 175a); and for expenses necessary for the Service to carry out the functions vested in it by the Civil Service Reform Act, Public Law 95-454 (5 U.S.C. chapter 71), $27,705,000.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

SALARIES AND EXPENSES

For expenses necessary for the Federal Mine Safety and Health Review Commission (30 U.S.C. 801 et seq.), $4,292,000.

NATIONAL COMMISSION ON ACQUIRED IMMUNE DEFICIENCY SYNDROME

For expenses necessary for the National Commission on Acquired Immune Deficiency Syndrome as authorized by subtitle D of title II of Public Law 100-607, $3,000,000.

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

SALARIES AND EXPENSES

For necessary expenses for the National Commission on Libraries and Information Science, established by the Act of July 20, 1970 (Public Law 91-845), $750,000.

NATIONAL COMMISSION TO PREVENT INFANT MORTALITY

For necessary expenses of the National Commission to Prevent Infant Mortality, established by section 203 of the National

Commission to Prevent Infant Mortality Act of 1986, Public Law 99-660, $400,000, which shall remain available until expended.

NATIONAL COUNCIL ON DISABILITY

SALARIES AND EXPENSES

For expenses necessary for the National Council on Disability as authorized by title IV of the Rehabilitation Act of 1973, as amended, $1,200,000.

NATIONAL LABOR RELATIONS BOARD

SALARIES AND EXPENSES

For expenses necessary for the National Labor Relations Board to carry out the functions vested in it by the Labor-Management Relations Act, 1947, as amended (29 U.S.C. 141-167), and other laws, $151,103,000: *Provided*, That no part of this appropriation shall be available to organize or assist in organizing agricultural laborers or used in connection with investigations, hearings, directives, or orders concerning bargaining units composed of agricultural laborers as referred to in section 2(3) of the Act of July 5, 1935 (29 U.S.C. 152), and as amended by the Labor-Management Relations Act, 1947, as amended, and as defined in section 3(f) of the Act of June 25, 1938 (29 U.S.C. 203), and including in said definition employees engaged in the maintenance and operation of ditches, canals, reservoirs, and waterways when maintained or operated on a mutual, nonprofit basis and at least 95 per centum of the water stored or supplied thereby is used for farming purposes.

NATIONAL MEDIATION BOARD

SALARIES AND EXPENSES

For expenses necessary to carry out the provisions of the Railway Labor Act, as amended (45 U.S.C. 151-188), including emergency boards appointed by the President, $6,675,000.

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

SALARIES AND EXPENSES

For the expenses necessary for the Occupational Safety and Health Review Commission (29 U.S.C. 661), $6,401,000.

PHYSICIAN PAYMENT REVIEW COMMISSION

SALARIES AND EXPENSES

For expenses necessary to carry out section 1845(a) of the Social Security Act, $3,871,000, to be transferred to this appropriation from the Federal Supplementary Medical Insurance Trust Fund.

PROSPECTIVE PAYMENT ASSESSMENT COMMISSION

SALARIES AND EXPENSES

For expenses necessary to carry out section 1886(e) of the Social Security Act, $4,073,000, to be transferred to this appropriation from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds.

RAILROAD RETIREMENT BOARD

DUAL BENEFITS PAYMENTS ACCOUNT

For payment to the Dual Benefits Payments Account, authorized under section 15(d) of the Railroad Retirement Act of 1974, $328,000,000, which shall include amounts becoming available in fiscal year 1991 pursuant to section 224(c)(1)(B) of Public Law 98-76: *Provided*, That the total amount provided herein shall be credited to the account in 12 approximately equal amounts on the first day of each month in the fiscal year.

FEDERAL PAYMENTS TO THE RAILROAD RETIREMENT ACCOUNTS

For payment to the accounts established in the Treasury for the payment of benefits under the Railroad Retirement Act for interest earned on unnegotiated checks, $100,000, to remain available through September 30, 1992, which shall be the maximum amount available for payment pursuant to section 417 of Public Law 98-76.

LIMITATION ON ADMINISTRATION

For necessary expenses for the Railroad Retirement Board, $73,125,000 to be derived from the railroad retirement accounts, of which $2,457,000 shall be available for the lease-to-purchase costs and contract services related to the installation of a mainframe computer only upon the delegation of procurement authority from the General Services Administration to the Railroad Retirement Board: *Provided*, That $200,000 of the foregoing amount shall be available only to the extent necessary to process workloads not anticipated in the budget estimates and after maximum absorption of the costs of such workloads within the remainder of the existing limitation has been achieved: *Provided further*, That notwithstanding any other provision of law, no portion of this limitation shall be available for payments of standard level user charges pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(j); 45 U.S.C. 228a-r).

LIMITATION ON RAILROAD UNEMPLOYMENT INSURANCE ADMINISTRATION FUND

For further expenses necessary for the Railroad Retirement Board, for administration of the Railroad Unemployment Insurance Act, not less than $15,909,000 shall be apportioned for fiscal year 1991 from moneys credited to the railroad unemployment insurance administration fund of which $433,000 shall be available for the lease-to-purchase costs and contract services related to the installation of a mainframe computer only upon the delegation of procurement authority from the General Services Administration to the Railroad Retirement Board.

LIMITATION ON THE OFFICE OF INSPECTOR GENERAL

For expenses necessary for the Office of Inspector General for audit, investigatory and review activities, as authorized by the Inspector General Act of 1978, as amended, not more than $6,000,000, to be derived from the railroad retirement accounts and railroad unemployment insurance account.

UNITED STATES INSTITUTE OF PEACE

OPERATING EXPENSES

For necessary expenses of the United States Institute of Peace as authorized in the United States Institute of Peace Act, $8,000,000.

TITLE V—GENERAL PROVISIONS

SEC. 501. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 502. No part of any appropriation contained in this Act shall be expended by an executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.), pursuant to any obligation for services by contract, unless such executive agency has awarded and entered into such contract in full compliance with such Act and regulations promulgated thereunder.

SEC. 503. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18.

SEC. 504. Appropriations contained in this Act, available for salaries and expenses, shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. 505. Appropriations contained in this Act, available for salaries and expenses, shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities.

SEC. 506. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curricula, or to prevent the faculty, administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution.

SEC. 507. The Secretaries of Labor, Health and Human Services, and Education are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: *Provided*, That such transferred balances are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

SEC. 508. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 509. No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, radio, television, or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

No part of any appropriation contained in this Act shall be used to pay the salary or expenses of any grant or contract recipient, or agent acting for such recipient, related to any activity designed to influence legislation or appropriations pending before the Congress.

SEC. 510. The Secretaries of Labor and Education are each authorized to make available not to exceed $7,500 from funds available for salaries and expenses under titles I and III, respectively, for official reception and representation expenses; the Director of the Federal Mediation and Conciliation Service is authorized to make available for official reception and representation expenses not to exceed $2,500 from the funds available for "Salaries and expenses,

Federal Mediation and Conciliation Service"; and the Chairman of the National Mediation Board is authorized to make available for official reception and representation expenses not to exceed $2,500 from funds available for "Salaries and expenses, National Mediation Board."

SEC. 511. When issuing statements, press releases, requests for proposals, bid solicitations and other documents describing projects or programs funded in whole or in part with Federal money, all grantees receiving Federal funds, including but not limited to State and local governments, shall clearly state (1) the percentage of the total costs of the program or project which will be financed with Federal money, (2) the dollar amount of Federal funds for the project or program, and (3) percentage and dollar amount of the total costs of the project or program that will be financed by nongovernmental sources.

SEC. 512. Such sums as may be necessary for fiscal year 1991 pay raises for programs funded by this Act shall be absorbed within the levels appropriated in this Act.

SEC. 513. None of the funds appropriated under this Act shall be used to carry out any program of distributing sterile needles for the hypodermic injection of any illegal drug unless the President of the United States certifies that such programs are effective in stopping the spread of HIV and do not encourage the use of illegal drugs.

This Act may be cited as the "Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1991".

Mr. NATCHER (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

AMENDMENTS OFFERED BY MR. NATCHER

Mr. NATCHER. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. NATCHER: On page 21, line 24, strike $2,648,748,000 and insert "$2,825,891,000"; on page 39, line 19, strike $1,474,745,000 and insert "$1,529,045,000"; on page 39, line 19, strike $1,098,451,000 and insert "$1,148,164,000".

□ 1130

Mr. NATCHER. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. NATCHER. The amendment which I am offering today adds $231,443,000 to the bill for various drug abuse activities at the Departments of Education and Health and Human Services. This action is intended to restore funding for four activities which the committee bill initially recommended be funded at levels below the President's request. The committee recommendation was based on data indicating that States were having great difficulty absorbing increases in funding for their drug treatment activities. The committee has been told for example that as of June, 30 States had drawn down only 24 percent of their 1990 funds. Notwithstanding these concerns, many Members have expressed to me their belief that these amounts can be utilized in 1991 and that we should restore funding to the President's request. The specific changes are as follows:

Drug-free school programs will increase from $539,000,000 to $593,300,000, an increase of $54,300,000 over the current bill.

The substance abuse treatment block grant will increase from $1,192,851,000 to $1,292,775,000, an increase of $99,924,000 over the current bill.

Treatment improvement grants will increase from $50,000,000 to $85,569,000, an increase of $35,569,000 over the current bill.

Community prevention grants will increase from $60,000,000 to $101,650,000, an increase of $41,650,000.

Mr. Chairman, I ask for an "aye" vote on the amendment.

Mr. CONTE. Mr. Chairman, I move to strike the last word, and I rise in support of the amendments.

Mr. Chairman, I cosponsored the amendments with my friend, the gentleman from Kentucky [Mr. NATCHER]. We have discussed it at great length.

Mr. Chairman, I rise in response to the recent attack by Bill Bennett, our illustrious drug czar and general all-round purveyor of good will throughout these hallowed Halls. As you know Mr. Congeniality has asserted the committee slighted the war on drugs by not funding 4 of the 36 programs in this bill at the levels requested by the President and he is raising the issue that he is not getting everything he wanted.

Well, let me be the first to say "welcome to the club", because a lot of folks are not getting everything they wanted. And most of them got a lot less than Bill Bennett did in recent years. We have taken good care of Bill and I am not clowning around when I say he is wrong, absolutely wrong to criticize our support.

He slammed us for not supporting the very programs we have nurtured since infancy. Things like drug-free schools, which just celebrated its fifth birthday, thanks to the committee's willingness to more than double its funding. And ADAMHA block grants, not even 10 years old but already getting $1.2 billion, nearly triple the original funding and a total of $6.8 billion since its inception in 1982. And what about the 2-year-old twins—the treatment and prevention grant programs. Thanks to the leadership of BILL NATCHER and others on this committee they are both strong and healthy, and getting 25 and 20 percent increases next year. If Bill Bennett calls support like that flogging, what does he think about the Gramm-Rudman program eaters?

Mr. Chairman, in addition to nurturing those programs we are also caring for an extended family of substance abuse programs, including the granddaddy of them all—NIDA research, which has grown from $46 million to $266 million since 1980, a 580-percent increase in just 10 years. And grandma NIAAA research, now getting $143 million after starting out at just $22 million way back in 1980, a whopping 650-percent increase.

And the aunts and uncles—the NIAAA homeless and AIDS drug demos—who are getting $16 million and $75 million respectively. That is a big jump from the $9.2 and $22 million we initially provided. And all the other cousins—the treatment, training, outcome evaluation, and improvement programs. Not a single one of them has ever had their funding reduced. And neither have the prevention programs and community youth programs. Bill Bennett can raise hell all he wants but he can't complain about us not taking care of the drug programs in this bill. Because for the members of this committee this bill is our little baby.

The czar would have us believe that these programs are trouble free, and the more money they are fed the sooner we will get rid of the drug problem. I've got news for him, the programs cannot handle all the money we have thrown at them. Just 3 weeks ago the drug treatment block grant still had, listen to this, still had 76 percent of its 1990 money left to spend. And HHS still does not have an evaluation system in place, so what assurance do we have the money is being wisely spent? And what about the schools?

They have not even started spending the 52-percent increase we gave them last fall. Given these examples it seems we have been given a very bad rap by the czar. Maybe he could learn from the committee about demonstrating good judgment and exercising restraint.

And timing—my god, what about his timing? We have worked on this bill since last February. It has been brutal. Hundreds have testified. But never once did the czar communicate with the committee with me—not a letter, not a phone call—we got nothing but silence. Until yesterday, days after OMB and the departments had responded, the czar, like a bear waking from his winter sleep, arrived on the scene just as we are going on the floor. Releasing an inaccurate portrayal of the bill as enticing as the banter of the drug pushers he is so futilely combating.

So here we are, looking down the gun barrel of some czar induced

amendments trying to fix something that is not broken. They point to the reserve funds and say "we have plenty of money." They forget that money was promised to Head Start, child care, handicapped education—programs more desperate for funds than the czar ever will be.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. CONTE] has expired.

(By unanimous consent, Mr. CONTE was allowed to proceed for 2 additional minutes.)

Mr. CONTE. Mr. Chairman, if anyone wants to know why the committee decided to not increase funding for the czar's empire, I ask them to consider the following article. This is an excerpt from the February 3, 1990, article from the New York Times.

Mr. Chairman, in testimony before the Senate Judiciary Committee, Mr. Bennett rejected the argument espoused by leading Democrats and many outside experts that education was the major solution to the Nation's drug problem. He offered an unsparing portrait of young drug abusers as knowing users, not innocent victims.

POSITION IS CHALLENGED

"Should we have drug education programs or should we have tough policy?" asked Mr. Bennett, who was Secretary of Education in the administration of Ronald Reagan. "If I have the choice of only one, I will take policy every time because I know children. And you might say this is not a very romantic view of children, not a very rosy view of children. And I would say, 'You're right.' "

Senator EDWARD M. KENNEDY, Democrat of Massachusetts, one of several committee members who challenged Mr. Bennett's position, said:

I continue to be deeply concerned that the administration underestimates the importance of treatment and education. We know that education can inoculate children against drug abuse.

In response, Mr. Bennett asserted on February 3, 1990:

I do not agree with Senator Kennedy's statement that you can inoculate children against drug abuse by education. I think that statement is refuted every day of the week. If there were a seminar or course which could inoculate, we would have put it in long ago.

Acknowledging his very strong feelings on the subject of drug education, Mr. Bennett went on to say that the problem was not a failure to inform children about the drug problem.

He said:

Look, if ignorance is the problem, knowledge is the cure. I don't believe that for a large number of kids out there who use drugs, that ignorance is the problem.

Some drug experts argue that there has been too little scientific evaluation of drug education programs to learn their value, and they say the Bush administration has not provided enough money for such research.

SOUGHT A CUT IN FUNDS

Mr. Bennett sought a cut in drug education funds when he was Secretary of Education under Mr. Reagan, and he has sometimes been skeptical about the value of such programs. But his comments today were among his bluntest on the topic. Despite that, the drug plan proposed by President Bush last week called for increased spending on drug education programs.

At one point in his appearance before the committee, Mr. Bennett described drug education as "a helpful auxiliary," but he said a better deterrent would be "some palpable reason in front of them that something will happen if they take drugs." Man, did he change.

I just want to make it clear where this money is coming from. It's coming from the amounts reserved for unauthorized and new programs. It means there will not be as much available for Head Start, for child care, for vocational education, or for immunization. So if those programs get cut, you will know why it happened. Even though we are going to fund all the drug programs at the President's mark. I think it is important for the integrity and vision of this subcommittee in this matter.

□ 1140

Mr. Bennett sought a cut in drug education funds when he was Secretary of Education. He has sometimes been skeptical about the value of such programs, but his comments today were among the bluntest on the topic.

Despite that, the drug plan proposed by President Bush called for an increase in spending on drug education programs, and at one point in his appearance before the Congress in February, Mr. Bennett described drug education as "a helpful auxiliary," but he said, "a better deterrent would be some palpable reason in front of them that something will happen if they take drugs." Man, did he change.

Thank you, Mr. Chairman.

Mr. OBEY. Mr. Chairman, I move to strike the last word.

I certainly would like to say that I agree with virtually every word just uttered by the gentleman from Massachusetts. I know Bill Bennett. Bill Bennett, in fact, at one time in his life was as a teacher at the University of Wisconsin in my State.

All I would say is that if our distinguished drug czar is going to wind up hyperventilating in public every time he does not get a dollar that he wants, I suggest he go back to chain smoking so he can calm down. I would also remind Bill Bennett of the words that he uttered when he was Secretary of Education, when he said as follows:

Sooner or later people have to learn that you cannot solve every problem by throwing dollars at them.

Now, I think Bill Bennett ought to remember that. The fact is, I have gone around to drug treatment programs, drug education programs, all over my district. I found two things: No. 1, nobody knows that that is even Federal money. In fact, I had a number of people in my district who told me that they did not realize that there were any Federal drug programs in their area until I called them up and told them that I wanted to see what they were doing with Federal money. So I would suggest the first thing that Mr. Bennett ought to do is to help explain to the program managers around the country that there are hard-earned Federal tax dollars that are being used in those areas. The second thing we ought to understand is that when you take a look at the Block Grant Program that is being discussed here, the fact is, only 25 percent of previously approved money has been used to date. So, it seems to me, I will not object to the amendment offered by the distinguished chairman because I think the chairman has a right to call them as he sees them on his own bill.

But I frankly have some doubts about the accuracy of Mr. Bennett's understanding in this case because these programs are already getting more money than they can use. I think this Congress has an obligation to provide every dollar for drug education and drug treatment and other drug programs that can effectively be put to use. The fact is, a lot of these dollars have not been put to use yet. That is why I think there is nothing whatsoever wrong with the original judgment made by the committee, and I think it is important that those facts be clear this morning.

Mr. COUGHLIN. Mr. Chairman, I rise in support of the amendments.

Mr. Chairman, I want to congratulate the distinguished chairman and the distinguished ranking member for this amendment. In fact, I had intended to offer a similar amendment on behalf of the gentleman from New York [Mr. RANGEL] and myself, if it had not been offered. I am pleased about this.

Mr. Chairman, the American people consider drugs and crime as the No. 1 problem before our Nation. President Bush and Dr. Bennett have attacked the problem with a good national strategy, and we are making progress.

It is very seldom that I disagree with my distinguished ranking minority member, the gentleman from Massachusetts [Mr. CONTE]. However, Mr. Chairman, I can understand why Dr. Bennett was mad as hell. A vice chairman of the Select Committee on Narcotics Abuse and Control, I have heard

the President and Dr. Bennett savaged and pilloried by committee Democrats because we are not devoting adequate resources to the problem. They were not devoting adequate resources to the problem. But for this amendment, this Congress, controlled by Democrats, would not have been providing even the funds they asked for to fight the war on drugs. I have heard the distinguished Secretary of Health and Human Services, Dr. Sullivan, excoriated by committee Democrats because he was not providing sufficient resources for treatment. But for this amendment, this Congress, controlled by Democrats, would not be providing Dr. Sullivan even with the money that he asked for. I have heard the distinguished Secretary of Education, Dr. Cavazos condemned, condemned, for not providing sufficient resources for education by committee Democrats. But for this amendment, this Congress, controlled by Democrats, would not be providing the funds Dr. Cavazos requested for education.

Now, we cannot criticize the President's commitment, and we cannot criticize Dr. Bennett's commitment, and we cannot criticize Dr. Sullivan's commitment, and we cannot criticize Dr. Cavazos' commitment to the war on drugs, if we do not provide them with the resources they ask for.

I congratulate again the distinguished chairman and the distinguished ranking minority member for providing those resources.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, I have nothing personal against Mr. Bennett. He got his early education in my district. He graduated from Williams College. The chairman could tell Members all I did to help him when he was Secretary of Education.

The thing I take issue with, instead of going out and calling Members a bunch of clowns, that is pretty tough. Why not pick up the phone, call the ranking Republicans, as Mr. Cavazos did and as Dr. Sullivan did. They called me. I think I batted 1,000 percent with the chairman for both of them. Why did he not just call me and say, "SIL, what is going on here," Instead of going out there and saying what he did. I resent that. That is no way to be treated. He did not say that just Democrats are clowns. He said we are all a bunch of clowns up here.

Mr. COUGHLIN. Mr. Chairman, I appreciate the gentleman's comments, and will suggest to Dr. Bennett he should have called Members. I can appreciate the frustration that Dr. Bennett had because of the criticism that has been continually pounded on him by Democrats in this body for not providing sufficient resources. Here we were, not providing the resources that he and the President asked for.

Mr. EARLY. Mr. Chairman, I move to strike the last word. As a member of the subcommittee, I cherish the opportunity to serve on it. I do not think this is one of our more outstanding moments. The amendment offered by the gentleman from Kentucky [Mr. NATCHER] and the gentleman from Massachusetts [Mr. CONTE] was, I suspect, a reaction, a political reaction. The pride of serving on the subcommittee is that we spend all day marking up the bill, and we try to associate each particular project or program with the dollars we spend on it.

However, this amendment would take $231 million from reserves, for unauthorized projects, from which ones we do know, to put it into a political reaction.

Dr. Bennett speaks about drugs, the war on drugs. My friend, the gentleman from Pennsylvania [Mr. COUGHLIN] just spoke about the war on drugs. All we do as politicians, 435 Members, is throw money at the problem, not the specifics of the problem. Earlier, the gentleman from Michigan [Mr. PURSELL] spoke about all we are not doing with regard to infant mortality. The gentleman from Ohio [Mr. STOKES] is constantly talking about what we do not do on sickle cell anemia. The gentleman from Indiana [Mr. MYERS] spoke about what we are not funding at the Heart Institute, what we are not funding at the Cancer Institute. We can find $231 million for political reaction. As Mr. PURSELL also spoke about, we put too much money with AIDS because it is a political problem, it is a visible problem. The gentleman from Wisconsin [Mr. OBEY] spoke about the genome project, which he says we are overreacting to; I agree with him 100 percent. The gentleman from Maryland [Mr. HOYER] was the leader for fighting for pediatric AIDS money. That is where we should be spending the money, but we get a political problem and we throw money, we react. It is not one of the better moments for the subcommittee. I rise in opposition to the amendment. I am not going to push the issue, but it is not right.

Mr. SMITH of Iowa. Mr. Chairman, I move to strike the requisite number of words. I cannot help but smile at this debate. It was just a year ago last month that a supplemental appropriations bill was held up for a whole month because the administration vigorously opposed $682 million in additional funding to speed up the war on drugs. I secured the $682 million figure from the departments that said they needed that amount of money, every dollar of it for the war on drugs right away. I have never seen the administration more vigorously oppose an amendment. They even went to the extent of going to the Senate and making an agreement with them that they would fund some capital projects over there, if they would help to oppose the war on drugs provisions we had in the bill.

Now, here we are, a year later, and they say we should have more money for the war on drugs. I think we do need to fight the war on drugs. I have been for every dollar requested and more for that purpose. In the bill handled by the subcommittee I chair, we put in $100 million more than the administration requested this year. It makes me smile a little bit to hear the barbs going back and forth when only a year ago the administration opposed $682 million to speed up the war on drugs.

Mr. GILMAN. Mr. Chairman, I want to commend the distinguished chairman of the subcommittee, the gentleman from Kentucky, Mr. NATCHER, and the ranking minority member, the gentleman from Massachusetts [Mr. CONTE], for their good work in taking the drug problem off the back burner and keeping it up front in this time of such critical need.

I hope my colleagues will support fully the entire measure because it does contain these vital issues.

Mr. Chairman, I am pleased to rise in support of the amendment which would increase the appropriations for the Alcohol, Drug Abuse, and Mental Health Administration by $177 million, and would increase the appropriations for the school improvement program by $54 million. I would also like to commend the chairman of the Appropriation Subcommittee on Labor, HHS and Education, the gentleman from Kentucky [Mr. NATCHER], for offering this amendment, and the distinguished chairman of the Select Narcotics Committee, the gentleman from New York [Mr. RANGEL], and the ranking minority member, the gentleman from Pennsylvania [Mr. COUGHLIN], for their efforts to ensure that drug education, rehabilitation, and treatment receive the adequate funding levels, which they so desperately need.

Mr. Chairman, the Appropriations Committee reported a bill that was $200 million short of the President's request. I am pleased to note the committee chairman's willingness in raising the funding level and in giving antidrug efforts the attention it demands.

We cannot afford to put the American drug problem on the back burner. Our violent crime rates are up, our school dropout rates are up, and more babies are born each and every year addicted to drugs.

The President has been criticized for formulating a drug strategy that was "enforcement-heavy." In light of these accusations, now more than ever, Congress should be concerned about supporting this amendment and ensuring the proper funding level for antidrug programs.

Mr. Chairman, I strongly support this amendment, this appropriations measure would be woefully inadequate without this measure and I urge my colleagues to join in support.

Mr. BRENNAN. Mr. Chairman, the bill before the house today is the type of legislation the people of this Nation are talking about when they refer to a peace dividend. This bill is an education bill, a human service bill, and a bill for the working men and women of the United States. Mr. Chairman, our $3 trillion debt dictates that Congress start making tough choices about spending priorities. I feel strongly that the choice of the people of our communities would be to make this Labor, Health and Human Services, and Education bill a top spending priority.

I support this bill and I support the amendment offered by my colleague, Congressman BILL NATCHER, to fully fund drug abuse programs. Research indicates, and study after study demonstrates, that drug abuse treatment works. We must expand access to effective treatment programs. If one person seeking drug abuse treatment is turned away because of a lack of resources, then we are in no way equipped to win a so-called war against drugs.

Education and prevention efforts in our schools and communities also appear to be working. We can teach our children not to take drugs, we can help our youth find productive alternatives to drug use and abuse, and we can teach disadvantaged individuals and families that drugs are not the answer to poverty or low self-esteem.

The alcohol, drug abuse and mental health block grant is the primary way to fund drug abuse treatment programs, and I support fully funding ADAMHA. However, I am concerned about the urban bias that has been attached to the ADAMHA funding formula. I, therefore, will be introducing legislation to change that formula. Rural States have serious drug abuse problems. The rate of increase in drug abuse in rural areas such as my home State of Maine is creating burdens as significant as those being experienced in some urban areas.

The studies which resulted in the current ADAMHA funding formula cited age as the primary factor related to drug abuse, not urbanicity. The current ADAMHA funding formula hurts small rural States and is particularly harmful to large rural States. When drug addiction is spread out, as it is in rural areas, getting addicts and their families into treatment is even more difficult than when problems are concentrated. People living in rural areas should not be penalized or denied access to treatment services simply because they do not live in a big city.

Medicare payments have favored urban areas by paying rural physicians less than their urban counterparts for the same services. Transportation appropriations favor large urban States. Now, in a variety of ways, our Nation's war against drugs favors urban areas. As drug dealers and traffickers move out of urban areas and into suburbs and more rural communities, as they appear to be doing, I am concerned about the abilities of the seven States that receive level drug treatment funding to deal with the serious problems associated with drug abuse. I do not believe a drug addict in northern Maine should receive fewer services under a national drug treatment program than a drug addict in Los Angeles.

Large cities have serious drug problems and I support programs which are designed to target the particular crises some cities are experiencing. The Federal drug strategy identifies high intensity areas which are to receive additional funding for a variety of antidrug activities. There are other bills in Congress which target urban drug problems for receipt of additional law enforcement and antidrug abuse funding.

The ADAMHA Program is the primary program to serve all of the drug affected persons in the United States. It should serve people in rural towns and those in urban cities equally, not with a 40-percent bias toward urban areas.

I support the additional $177 million for ADAMHA offered today, and I commend my colleagues for the work that has gone into producing this education and human service bill. However, I urge my colleagues to join me in supporting legislation which will make the funding under this valuable program available to all those in need of drug abuse treatment, regardless of where in our Nation they live.

□ 1150

The CHAIRMAN. The question is on the amendments offered by the gentleman from Kentucky [Mr. NATCHER].

The amendments were agreed to.

Mr. AUCOIN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time today for two reasons. The first reason is to express my congratulations to the manager of this bill, the chairman of this subcommittee, the gentleman from Kentucky [Mr. NATCHER], and to the ranking Republican, the gentleman from Massachusetts [Mr. CONTE], for the outstanding human resources product they bring to the floor in the form of this HHS appropriation. I think every Member of this body should be indebted to the leadership of these two Members, particularly the gentleman from Kentucky [Mr. NATCHER], for crafting an excellent piece of legislation for the people of this country.

The second reason I take this time, Mr. Chairman, is that I thought I should say a few words to people everywhere who believe, as I do, that a poor woman who is raped or who is the victim of incest should have the right to an abortion.

Mr. Chairman, this bill permits Medicaid funds for abortions for poor women only if the life of the mother is at risk. Few Americans think that is fair. Few Americans think that goes far enough. But that is all the further the antiabortion crowd will permit this distinguished committee to go with this bill today. In effect, that crowd is willing to say to poor women across the country, poor women who may be raped or who may be the victims of incest, "Sorry, lady, you've got to produce the seed of the rapist. You've got to be the incubator."

I think that is absolutely punitive, absolutely outrageous, and clearly the American people agree.

I oppose that also, and I could raise a point of order on the language that says that only the life of the mother shall be the exception to the ban on abortion under Medicaid. I could do that, and I could succeed. That point of order would lie. It does violate the rules of the House to legislate on appropriations bills. But I am not going to do that, and I do not think any prochoice Member would do that, because the language concerning the life of the mother is important so far as it goes.

I say to my friends that I could also offer an amendment to do what the American people want to do. I could offer an amendment that extends a similar exemption and protection for victims of rape and victims of incest for poor women. Unfortunately, I cannot do that because the antiabortion crowd would raise a point of order on that language, because it, too, is language on appropriations. They are not as charitable as I am when it comes to the language on the life of the mother. So that will not be happening here today.

The rape-incest issue will not be fought out. It cannot be fought out under the rules of the House as this bill comes through. I think the American people should know that and understand exactly why this is happening. But let me be very clear about this. The Senate is going to add rape and incest language in its version of this bill. The issue is going to go to the conference, and every Member, when the House has a chance to dispose of the conference report, is going to have a chance to join this issue. Every Member of the House will vote on that issue when the House considers the conference report.

So I say today at this point, let everyone—friend, foe, and opponent of abortion alike—know that this is but the first inning. The last inning will be the conference report and the House consideration of the conference report, the final negotiated versions of

the House and Senate, the final version of this bill.

Those of us who are pro-choice, like the overwhelming majority of Americans, look forward to that coming showdown. It is long overdue, and our side is going to win. It is going to win, and we are going to be especially interested. I might say to my friends, in watching our Republican colleagues who deal with this issue, because they are in a real dilemma. Their party platform calls for a constitutional amendment that virtually bans abortion. But in recent elections, as Republican candidates have lost challenges and quests for gubernatorial seats and other offices, the White House Chief of Staff and others who are ranking in the National Republican Party seem to have adopted an informal new position, and as best I can summarize that new position, which is inconsistent with the party platform, that new position seems to be that abortion is OK if the life of a Republican candidate is at risk.

The CHAIRMAN. The time of the gentleman from Oregon [Mr. AUCOIN] has expired.

(By unanimous consent, Mr. AUCOIN was allowed to proceed for 1 additional minute.)

Mr. AUCOIN. So now, Mr. Chairman, in the face of overwhelming public opposition to the restrictive language of only the life of the mother being at risk, in the face of overwhelming support for compassion for victims of rape and incest, it is going to be interesting to see how the vote will occur when the rollcall is had in the final inning when we deal with the conference report. Will Republicans and, for that matter, Democrats be captives of the antiabortion extreme, as too many Members have been in the past? Or will my Republican friends and others respect individual freedom, the kind of freedom we have enshrined and seen fought for in Eastern Europe in the last 12 years?

Stay tuned, America. You are going to find out soon.

Mrs. BOXER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I thank the chairman of the subcommittee very much for his support, and first I would like to speak as chair of the Human Resources Task Force of the Budget Committee.

I want to say how pleased we are with the action of the committee as it relates to the health of our people, including the critical health research at NIH that the gentleman from Massachusetts [Mr. CONTE] spoke about, that the gentleman from Massachusetts [Mr. EARLY] worked so hard to get included and that the gentleman from Illinois [Mr. DURBIN] worked so hard to get included. To every member of the committee and the subcommittee who worked so hard to get this included, I want to say that I thank them very much.

This includes research for cancer, for heart disease, for Alzheimer's, for AIDS, and for sickle cell anemia. The gentleman from Ohio [Mr. STOKES] is right, we are not doing all we should, but this bill is doing all it can do, given the constraints we have. The enemies that we now face in our country are being addressed in this legislation: Heart attacks, strokes, AIDS, diseases of old age, and the tragic problems of our children.

What could be more of an enemy than pediatric AIDS, babies born to live in agony, crack and drug-addicted babies born into the world, in a sense shaking, needing doctors to heal them? What more could our role be in our society, or this Government's role, other than to ease that pain, and more than anything, to prevent that pain which this bill addresses?

This includes prevention, education, and treatment. The Budget Committee asked for $2.3 billion for AIDS, and it is my firm hope that the $1.7 billion appropriated will be augmented by part of the $2.9 billion reserve set aside by the committee for later use.

I would say to my colleague, the gentleman from Massachusetts [Mr. EARLY], that AIDS is not a political issue. AIDS is a health issue. It is killing our people, and we must respond. The Budget Committee responded, and this committee responded.

Mr. Chairman, I want to add my voice to that of the gentleman from Oregon [Mr. AUCOIN] in one area of disappointment that I feel very deeply about, and that comes in the area of rape and incest. The House last year clearly expressed its will on this issue, calling for Federal funding for abortion in three cases: Life of the mother, rape, and incest. This bill leaves out rape and incest, and that is very sad. Indigent women and girls who are victims of this horrifying crime need our help, and this bill is silent.

I was so privileged last year to offer the Boxer amendment, which was the first pro-choice amendment in this House in almost a decade, and it said that indigent women deserve to have the Federal Government at their side if they are the victims of the horrible crime of rape or incest.

Mr. Chairman, as the gentleman from Oregon [Mr. AUCOIN] said, we are not going to fight that fight today. Because of parliamentary reasons, we will have to wait. When the bill comes back from the Senate with the Boxer amendment included, we will have our day at that time, and I very much look forward to that day when we can finally change the very cold policy of this Government which denies desperately needed help to these desperate victims of crime.

□ 1200

Mr. Chairman, we will have that debate, and I, too, believe we will win that debate, and we can move forward.

Mr. YOUNG of Florida. Mr. Chairman, I move to strike the last word.

Mr. Chairman, there is a way to cure leukemia and some 60 other types of cancers and blood diseases. It is a procedure called bone marrow transplant. It is a procedure where a healthy donor, by donating bone marrow, can give the gift of life to a person who is dying of leukemia or one of these 60 other ailments.

Mr. Chairman, I heard one of my colleagues mention earlier that there were some funding increases in this bill, and that is true, and one of the increases in this bill is to fund the Bone Marrow Donor Program to do additional research, to provide for the registry of names of donors who are willing to be donors and to actually recruit and type donors to become part of the national registry. That increase, I think, is essential because, Mr. Chairman, there are 9,000 Americans today who are going to die of one of these diseases if they cannot get a bone marrow transplant.

Mr. Chairman, it sounds like it might be easy to bring together the donor and the patient, but it is not easy. In fact, it is extremely difficult.

To give my colleagues an idea of how difficult it is, the first bone marrow transplant was done more than 20 years ago by Dr. Robert Good, who was the pioneer in the field of bone marrow transplantation. Through that 20-year period some people had their lives saved because they were able to find a compatible donor, and in those cases the donor was most always a brother or sister, but oftentimes even the brothers and sisters do not have the critical match that is necessary to match the marrow type of the patient.

There are a lot of heroes in this life saving effort. Dr. Good, especially, is a hero because he pioneered the procedure. I want to mention some of the other heroes today.

The gentleman from Kentucky [Mr. NATCHER], the chairman of this subcommittee, and the gentleman from Massachusetts [Mr. CONTE], the ranking member of this subcommittee, and all of my colleagues who serve on this subcommittee are heroes because they have enthusiastically supported every request that I have made to fund the National Marrow Donor Program to save lives.

Mr. Chairman, the gentleman from Pennsylvania [Mr. MURTHA] and the ranking member, the gentleman from Pennsylvania [Mr. MCDADE] of the Defense Appropriations Subcommittee where we actually began the National Marrow Donor Program are heroes. And all of my other colleagues on that subcommittee, again, who enthusiasti-

cally supported every request that I made for funding to establish this national marrow donor registry are heroes.

Dr. Jerry Barbosa, who is an oncologist in All Children's Hospital in St. Petersburg, FL, who impressed upon me the need for some way to bring together matching unrelated donors and the patients who need a marrow transplant to live, is a hero.

Mr. Chairman, I would like to say that the heroes also are the many thousands of people who work in the various community blood banks all over our Nation who do the blood tests for the typing of the marrow to be put into the national registry.

Admiral Elmo Zumwalt, who is the chairman of the board of the National Marrow Donor Program, and Dr. Robert Graves, one of the most involved and active members in this program, and all of the members of this board and the people who work in the National Marrow Donor Program are heroes.

And Mr. Chairman, the thousands of Americans who have already become part of the marrow donor registry are heroes.

Bone marrow transplantation is not experimental. It is not something that we hope we are going to find a way to do something good, but bone marrow transplantation works, and, when received in a timely fashion, is successful, and cures.

I have had the opportunity to meet so many people who were on their death bed dying of leukemia or another disease of this type, and have had a marrow transplant and are now living, actively pursuing their daily lives. I can tell my colleagues that the emotion which is felt when meeting these people makes worthwhile whatever we have to do to make these donors available to the patients.

Now, Mr. Chairman, there are 9,000 Americans in our country today who need a marrow donor, who need a transplant, but we do not have donors for most of them at this point. The National Marrow Donor Program, is less than 3 years old but maturing aggressively. At this time last year we had only 40,000 names in the registry. Today we have 150,000 names of willing donors typed and listed in our registry. We need to get at least 250,000 names. We need to increase this registry. We need to make sure that people like Allison Atlas, who my colleagues have heard so much about in the media, and Mark Smith, and Jolene Fagan and Amanda Early from the west coast of Florida, and Grant Harley of St. Petersburg, FL, these and the 9,000 others like them who need a donor but have no matched siblings, get a chance for life by finding the donors they need to save their lives.

The legislation that we have before us today has an increase in the funding for this marrow donor program. It provides funding for additional research, and it provides money for recruiting and for typing of the bone marrow of the potential donor as well as funds to administer the program.

One of the problems that families of the patients have had is that they have had to go out and raise the money to do the recruiting and pay for the typing to try to find a donor to save the life of their loved one. Now the Federal Government is meeting its responsibility. Money is being made available. We appropriated $6 million in the supplemental appropriations bill 2 months ago. This bill today contains some $16 million, and, when the defense appropriation bill is prepared, I have an idea that we will provide additional funding there because one of the recruiting programs is being done through the military forces.

Just 2 days ago I was able to announce that two large American companies General Mills and the Searle Corp., have agreed to recruit and help defer the cost of typing of their some 35,000 employees. The point is that people all over the country want to be involved, and this bill makes it possible for those people to be involved.

Mr. Chairman, I am proud to announce that some 40 Members, some 40 of our colleagues, have already had their own blood tested to determine the type of their bone marrow and we are listed in the national registry.

Mr. SAXTON. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from New Jersey [Mr. SAXTON] who is one of the active Members in his own district in this recruiting program.

Mr. SAXTON. Mr. Chairman, I would just like to take this opportunity to commend the gentleman from Florida [Mr. YOUNG] for the very active and essential role that he has played in establishing this program and in getting it funded.

I would like to say, Mr. Chairman, to the other Members that there is a very good way that we can all be involved together in this, and I got, I guess, a little bit excited about this program. In fact, I guess I have to say I got quite excited about this program and found some people in my district who need the procedure and who need a bone marrow transplant, and along with some friends back home we have established a program that we are going to carry out in the month of August, during the break, that we will call Operation Save a Life. We are going to go out and seek out, not only individuals who are willing and interested in becoming part of the Bone Marrow Donor Program, but we are also going to seek private funding as well to go along with the funding that we are providing through this bill to have the typing done, which costs about $75 for each person who is typed.

□ 1210

We are hoping during the month of August through Outreach and Save-A-Life in New Jersey to type an additional 1,000 to add to the 150,000 that have already been typed. This is such an essential program and such an opportunity for us to not only provide public funding, but to develop private funding as well and to provide those individuals who are out there in our society today asking us and looking to us as leaders and saying to us, "Help save a life, help save my life."

These people are so thankful when we are able to proceed to build up the bone marrow transplant in terms of the numbers of people who are there so that it makes it possible for these folks who are waiting for the opportunity for a transplant to find a match.

So again I commend the gentleman for his leadership in this matter.

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman for his comments.

I would like to say that we launched a pilot recruiting project in the District that I have the privilege of representing in Florida. At this point we have either typed or are in the process of typing some 5,000 additional donors for the program.

Mr. CONTE. Mr. Chairman, will the gentlman yield?

Mr. YOUNG of Florida. I am happy to yield to my friend and colleague, the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Chairman, I want to take this opportunity to congratulate the gentleman from Florida [Mr. YOUNG]. We helped him get extra money in the supplemental and in this bill, and with the money, we will get to his goal of giving every patient their best shot at finding a match.

Mr. Chairman, I join my friend in strong support of the National Bone Marrow Program. They ought to name it the BILL YOUNG National Bone Marrow Program.

Mr. YOUNG of Florida. Mr. Chairman, I appreciate the gentleman's comments. He has been such a strong supporter of this program, along with the other colleagues I have mentioned.

Mr. Chairman, I would like to close my comments by saying that this Member has the experience of waking in the night on many occasions thinking of better ways to do this job and more effective ways to get people involved in the donor program.

In part, my determination stems from an experience in my district prior to the establishment of the National Marrow Donor Program, where a young lady we spent considerable time

with had a form of leukemia but could not find a donor. I remember leaving All Children's Hospital in St. Petersburg after she passed away. She was 11 years old, and I have talked to many of you about her. But I remember leaving that hospital at a very emotional time and my wife turning to me with tears in her eyes and punching me in the chest and saying, "BILL, do something about this."

Mr. Chairman, I guess it is sort of a crusade for me. All of our colleagues have received dozens and dozens of letters from me about the program, and I want to thank all of our colleagues, Mr. Chairman, for the tremendous support they have given us.

This is a way for Congress to save lives, to give hope to many who today have no hope without a marrow transplant. A major part of the funding for this program is in this bill that we are considering today. When our colleagues are deciding whether or not to support the bill, and when deciding whether or not to support some of the major cutting amendments, and this is unusual for me because I am usually supporting most of the cuts, but remember when the cutting amendments are considered we could be cutting this lifesaving program, let's support the bill as the committee presents it.

I thank the committee and I thank my colleagues for their attention.

Mr. GILMAN. Mr. Chairman, I rise to add my support for funding a National Bone Marrow Donor Program, and I would like to express my deepest respect and thanks to the gentleman from Florida [Mr. YOUNG] for addressing this critical issue.

An estimated 16,000 children and adults are diagnosed each year with leukemia and aplastic anemia. For these individuals, their only hope is to seek a bone marrow transplant. Unfortunately, almost 70 percent, nearly 11,200, cannot find a suitable match within their families, necessitating reliance upon the good will of the people who have added their names to the list of potential marrow donors.

However, there is a small 1-in-20,000 chance of finding a matching donor not related to the individual. With a potential donor list of less than 100,000 individuals, the chances for finding a match are less than optimal. However, with a National Bone Marrow Donor Program, the numbers of potential donors and possible matches would increase significantly.

The hopes and prayers of thousands, both young and old, rest upon locating a suitable bone marrow donor. I am pleased, therefore, that the National Bone Marrow Program has provided a chance for these individuals. Accordingly, I urge my colleagues to support this worthy program.

AMENDMENT OFFERED BY MR. BROWN OF COLORADO

Mr. BROWN of Colorado. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of Colorado: Page 39, line 17, strike "and title IV" and all that follows through "$1,529,045,000" and insert the following: "of Public Law 100-297; and chapter 5 of subtitle A of title VI of Public Law 100-418, $1,522,645,000".

Page 42, line 4, strike "$6,777,000,000" and insert "$6,783,400,000".

Mr. BROWN of Colorado. Mr. Chairman, I appreciate the opportunity to offer this amendment.

This provides this body a choice. It gives the Members of this body an opportunity to decide where the highest priorities are.

On the one hand is the money that is now contained in title IV, which is $6.4 million. That money under this amendment would be transferred to the Work Study Program, which incidentally under this bill has been cut. This would restore that cut and provide additional funding.

Mr. Chairman, I believe the money here, this $6.4 million is far better used to go to students who are in proven need and who want to work to help pay their way through school, rather than to what I believe is a scandalous use of this money under title IV.

Now, what is the use this goes to? This goes to the Kamehameha schools and largely, not all entirely, but largely to the Bishop Foundation.

I think each Member has to ask themselves, does the Bishop Foundation and the schools need the money? Well, here are some facts that I hope the body will consider in deciding whether the Bishop Foundation needs the money.

First of all, the Bishop estate is the largest of six private landowners that own almost one-quarter of the entire islands of Hawaii. The estate itself owns 8 percent of the land in Hawaii. That is worth almost $2 billion.

Let me reiterate that. The primary beneficiary under title IV is a program sponsored by the Bishop Foundation that is worth almost $2 billion. The trustees of that foundation that we are going to bestow this magnificence on, this help on, received last year $648,000 each just to act as trustees.

Let me repeat that, $648,000 a year to the trustees who are part-time trustees. If they want to fund this program, they can cut their trustees. They do not need the Federal taxpayer to bail them out of their program. I do not think there is need here.

Incidentally, those same trustees received approximately $1 million a year each the year before.

I do not think there is a case for need here.

The Kamehameha schools have the largest endowment of any precollege facility in the country.

Let me repeat that. The beneficiaries of this money have the biggest endowment of any precollege facility in the entire Nation. That is who you are going to give this money to. I think the money is far better spent in a work study program that goes to the kids who are willing to work their way through college and who have proven need in this area.

Well, I think that covers the need. I do not see how anyone can look at this program and come away with a statement that the money is needed.

Second, Mr. Chairman, I think we ought to ask, is this an effective program? The Kamehameha schools enroll only 6.4 percent of the eligible native Hawaiian students. That is 6.4 percent of the eligible students, to say that this money is here to help the Hawaiian students, I believe flies in the face of the facts. The fact is, this school is not doing the job for Hawaiian students. They have not admitted in the proper numbers and they do not have the record of performance.

There is one other thing I hope we will take into consideration, Mr. Chairman. What about the alternatives? Are there ways to help these Hawaiian students if we do away with this program? Well, I believe there are. Let me be specific. There is the Carl Perkins Vocational Education Act, the Library Services Instruction Act, the Drug-Free Schools and Community Act, the National Institute on Disabilities and Rehabilitation Research, the Hearing Loss Assessment; in addition to all these grants, there is chapter 1, chapter 2, and education for the handicapped.

Mr. Chairman, there are great alternatives for native Hawaiians. Millions of dollars are available to them. We should not be sending this money, primarily, not entirely, but to the Bishop Foundation. They do not need it, but I guarantee you the young men and women who want to go to college and are willing to work for it deserve it. I believe the money is far better spent in a program that looks at need and rewards incentive and hard work.

Mr. Chairman, I ask that the body adopt this amendment, that we transfer this money to the students who truly need it.

Mrs. SAIKI. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I must rise in opposition to this amendment introduced by my very dear friend, the gentleman from Colorado [Mr. BROWN].

This amendment would effectively delete the funding for education programs for native Hawaiians. These programs have been authorized by the Congress within the Hawkins-Stafford amendment passed in 1988, and are vitally important to the development of a quality educational program for native Hawaiians. With these programs, we will be able in Hawaii to focus on much-needed special education projects, gifted and talented programs, and curriculum development, specifically for native Hawaiians.

It is true that the Kamehameha schools can handle only 6.4 percent of the native Hawaiian children. The rest of the native Hawaiian children are scattered throughout our public school system and through our University of Hawaii system. These programs that I spoke of earlier are implemented through the university, the community colleges, and the public school system.

□ 1220

They happened to be coordinated by Kamehameha schools.

The Brown amendment would effectively add only 1 percent to the budget of the college work-study program, yet it would totally wipe out the programs for native Hawaiian education. These programs are most worthwhile, Mr. Chairman, and I urge my colleagues to oppose the Brown amendment.

Mr. FALEOMAVAEGA. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise today to support the proposed appropriations for certain native Hawaiian programs in fiscal year 1991. Mr. Chairman, I oppose the gentleman from Colorado's amendment to delete the proposed appropriations for the native Hawaiians under provisions of H.R. 5257.

Mr. Chairman, the Appropriations Committee bill for the Department of Health and Human Services, H.R. 5257, funds several programs for needy native Hawaiians. Along these programs are grants which will provide parent-infant programs, preschool programs, research and development, and followup assessment. Another program provides graduate and undergraduate fellowships for native Hawaiian students. A third program identifies gifted and talented Hawaiian students, elementary and secondary students with the support system needed for them to reach their potential. Programs of this nature are particularly important for groups of our population, such as native Hawaiians, and other groups who Congress has identified as in need of special assistance because of certain cultural and economic factors which place them at a tremendous disadvantage, both collectively and individually.

In support of this need, I can offer the following facts concerning the critical needs of the native Hawaiian community:

Since 1983, 70 percent of 4-year-old Hawaiians failed the standard hearing tests.

Female Hawaiian teenagers have the highest pregnancy rate of any group in Hawaii.

At Waianae High School alone on the island of Oahu, of 240 native Hawaiian students, only 40 graduated.

The life expectancy of native Hawaiians is 5 years lower than any other population group in Hawaii.

When compared by age-adjusted deaths per 100,000, to all U.S. races, native Hawaiians have: 34 percent higher overall death rate; 44 percent higher rate of heart disease; 39 percent greater incidence of cancer; 31 percent greater incidence of cerebrovascular disease; and 222 percent greater incidence of diabetes mellitus.

Mr. Chairman, I have lived almost half of my life in the State of Hawaii and am very close to the Hawaiian community. I am familiar with the native Hawaiian people and their needs. Mr. Chairman, I want to express my strong support for this funding. The money will go to the needy in the State of Hawaii, and I can assure my colleagues in the House that the proposed appropriation will definitely be put to good use for the needs of the native Hawaiian community.

Mr. Chairman, in brief response to the gentleman's statements concerning the Kamehameha schools and the Bishop estate, I just want my colleagues to know that the Kamehameha School, through the Bishop Estate Endowment Trust, provides educational opportunities for a very limited number of native Hawaiian students mainly because of the limited facilities available, and that it is a private institution, although specifically intended to assist young native Hawaiians. Despite such a noble effort on the part of this educational institution and the Bishop estate, still a majority of young native Hawaiians are in critical need for basic educational needs.

Mr. Chairman, I might also note that it is my understanding the Bishop estate does contribute to these educational programs, and that these funds do supplement such programs, without which the programs would not function properly. The bottom line is that the funds do go directly to the educational needs of young native Hawaiians, and I appreciate the fact that the administrators of the Bishop estate and Kamehameha School are there to carry out these programs.

Mr. Chairman, I would be remiss if I did not express my sincere appreciation and thanks to the distinguished chairman of this Appropriations Subcommittee, Mr. NATCHER of Kentucky, and the distinguished ranking minority member of the Appropriations Committee, Mr. CONTE of Massachusetts, for their outstanding leadership and support of this program.

Mr. Chairman, I also thank the gentlewoman from Hawaii [Mrs. SAIKI] for her support of this program.

Mr. GOODLING. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I apologize for taking this time at this particular time, but I certainly would be remiss if I did not thank the chairman of the subcommittee, the ranking member, and all of the members of the subcommittee for, after all, without them, those of us who serve on this authorizing committee for much of the legislation that is in here would have no purpose for being here. We could authorize and authorize, but if, on the other hand, we did not have somebody to appropriate for what we authorized, we would be in real trouble. I particularly want to express my appreciation for the continued support of education. That support will be reflected in this bill to the tune of 13-percent increase over last year.

Since I view chapter 1 of the Elementary and Secondary Education Act of 1965 as the backbone of the Federal effort to help all disadvantged students in school, I was particularly gratified for the increase that this subcommitte has given for us and the full committee.

When I appeared before the Labor, HHS and Education Subcommittee in late April, I once again requested a substantial increase in the funding of another chapter 1 component, the Even Start Program. In that program we finally discovered that the only way we can do anything about illiteracy is to attack it as an intergenerational problem, which it is, and I am pleased to see that they gave a substantial increase. It is back up to $60 million, with the increase, which would allow 1809 new State projects along with the 127 that are now in effect in many of our districts.

I share the committee's serious concern regarding some of our major postsecondary education programs, and the Education Committee, under our distinguished chairman, the gentleman from California [Mr. HAWKINS], is addressing that issue. We again will be addressing that issue with the reauthorization next year.

I found it appropriate that the bill's recommendation for the graduate assistance in areas of national need program increases its funding level by 61 percent over the current fiscal year. This will permit the number of fellowships made available under this program to jump from 1,234 to 1,340 during 1991.

In the course of setting forth the Committee on Education and Labor's minority views and estimates on the fiscal year 1991 budget, my colleagues and I discussed the fact that while we said many, many years ago that we would fund 40 percent of all the mandates we sent out for special education, we really ended up last year supporting about 7 percent. We sent all the mandates but only 7 percent of the money. I am pleased to see that this committee has heard what we are saying and has offered to raise that 7 percent at least up to 10.2 percent this next year. That will free up money to the local districts to do the kind of things that they want to do.

Mr. NATCHER. Mr. Chairman, will the gentleman yield?

Mr. GOODLING. I am happy to yield to the gentleman from Kentucky [Mr. NATCHER], the distinguished chairman, my very important ally and friend.

Mr. NATCHER. Mr. Chairman, I would like to say to the gentleman that we on this subcommittee appreciate his help with this bill all down through the years. The interest of the gentleman is not only with Even Start, it is with all of education. It is with all of the programs that come before his committee and the committee of my friend, the gentleman from California [Mr. HAWKINS], the chairman of the committee.

Mr. Chairman, I want both of the gentleman to know that we really appreciate their help not only today but all down through the years.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. GOODLING. I am happy to yield to the gentleman from California [Mr. HAWKINS], my distinguished chairman.

Mr. HAWKINS. Mr. Chairman, I am pleased to join with the ranking minority member of the Committee on Education and Labor and to support everything that he has said with respect to the Committee on Appropriations and the appropriation bill before us today. Not only has this committee done an excellent job, I think, of helping us to build a competitive economy, but if I could presume to speak for the children of America, and obviously I cannot, I would say that this bill and the committee under the leadership of our esteemed colleague, the gentleman from Kentucky [Mr. NATCHER], and the ranking minority member, the gentleman from Massachusetts [Mr. CONTE], have done an outstanding job of preserving and helping in every way possible the children of America.

I think that if we have a future as a nation, we can say that it lies in our children. We certainly owe a debt of gratitude and our sincere thanks to this committee for what they have done in recognizing the welfare of children, and I want to thank the ranking minority member for taking this time.

We have been involved today in a serious bill before the committee and have had the same feeling expressed by all of the members of the Committee on Education and Labor.

I want the gentleman from Kentucky [Mr. NATCHER] and the gentleman from Massachusetts [Mr. CONTE] to know our deep respect for them and what they are doing in this particular proposal.

Mr. GOODLING. Mr. Chairman, in closing, speaking for the children of America, we say a great big thank you to the committee for their efforts on behalf of education and training programs.

Mr. SAXTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, after thoroughly reviewing the appropriation bill before us today, I would just like to take this opportunity to commend and thank the leaders of this subcommittee for carrying out what I consider to be a very effective job.

□ 1230

I think in spite of the fact that this is one of the largest spending bills we will consider, it covers a wide range of programs that I daresay directly affect the quality of life of many of our constituents.

Mr. Chairman, I cringe when I see the $174 billion price tag, but I also find some solace in the fact that a valid attempt has been made to adequately fund many important programs, programs like the one addressed by the amendment here, programs like the one addressed by the gentleman from Florida [Mr. YOUNG], and other programs as well.

One important program which has not been discussed today so far as I know that is included in the bill is a program involving a disease known today as Lyme disease. It has become a serious health problem in many States, including New Jersey.

Mr. Chairman, many of those in the southern part of our State are all too familiar with the causes and dehabilitating effects of Lyme disease that goes untreated. Thousands of cases of Lyme disease have been diagnosed this year alone. This statistic becomes more alarming when experts tell us that the actual incidence of Lyme disease that go undiagnosed are 10 to 15 times greater than the number that are diagnosed.

Lyme disease is caused by a bacteria transmitted by the bite of a tiny tick known as a deer tick. If untreated, the disease carries with it severe arthritic and neurologic complications, and sometimes even death; $3 million is dedicated to the study of repellents and other protective measures for this disease. As one who has personally heard of and viewed the alarming problems that Lyme disease has caused, I commend the committee for its efforts in appropriating the money for this project.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. SAXTON. I am pleased to yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, I would like to thank my good friend, the gentleman from New Jersey [Mr. SAXON], for his support of our bill and for what it does for Lyme disease. This disease started in Lyme, CT, right over the line from where I live in Massachusetts, and it spread like wildfire throughout the east coast and the Midwest and most of the United States today.

Mr. Chairman, more people enjoy the outdoors today and become exposed to Lyme disease, and to the tick, and it becomes even more essential that we find ways to test new repellents and ointments and find ways to reduce the tick population.

I am proud to say our committee has been well ahead of the curve in funding Lyme disease research and control. A lot more needs to be done. What we have is a solid start toward its elimination.

Mr. Chairman, I might say in the meantime, and it may sound very light, I am out there fishing or hunting every chance I get. I advise all sportsmen and outdoors people, bird watchers or anybody going out into the woods, to bring their stockings up over their pants and close their sleeves and wear some kind of gloves, because these ticks are so small and so very difficult to see. When you get home, if you have been out in the woods, inspect all of your body to make sure you do not have one of these ticks.

Berkeley Bedell, who served in this House, was an avid fisherman like myself. He contacted Lyme disease fishing in the rivers out here in Virginia. After many years now, Berkeley Bedell is feeling well and has felt that he is cured from Lyme disease.

Mr. Chairman, I want to commend the gentleman from New Jersey [Mr. SAXON]. We have been working very hard on this. It is something we have got to give our very best.

Mr. SAXON. Mr. Chairman, reclaiming my time, I thank the ranking member for those remarks. Part of this is the disease itself. The other part of the problem is that there are so many people who are deathly afraid of contracting Lyme disease, so it has actually altered the way of life of many people who live in rural areas.

Again I support the bill and make reference to this line item in the bill.

PARLIAMENTARY INQUIRY

Mr. BROWN of Colorado. Mr. Chairman, I would like to make a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BROWN of Colorado. Mr. Chairman, is the business at hand before the committee the completion of deliberations on the Brown amendment?

The CHAIRMAN. The gentleman is correct. Any Member may insist on regular order when a Member is addressing another subject.

Mr. NATCHER. Mr. Chairman, at this time I would like to join with the gentlewoman from Hawaii and the gentleman from American Samoa with regard to this amendment. This matter was carefully considered by our

subcommittee. I think this amendment should be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado [Mr. BROWN]

The amendment was rejected.

Ms. OAKAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, first of all I would like to engage in a colloquy with the distinguished chairman, the gentleman from Kentucky [Mr. NATCHER].

Mr. Chairman, I am very pleased with the provisions of the bill regarding funding for the National Cancer Institute. I note that the bill includes $150.8 million for the 1990 appropriations. I am very pleased with the language in this section of the bill which reads that the committee expects the Cancer Prevention and Control Program and all aspects of breast and cervical cancer research to be given the highest priority.

I went before the gentleman's committee and found an open mind and an open ear from the gentleman from Kentucky [Mr. NATCHER] and the distinguished minority leader, the gentleman from Massachusetts [Mr. CONTE]. I feel that the Committee on Appropriations has gone a long way in meeting this request.

Mr. Chairman, breast cancer will take the lives of 43,000 American women this year. Cervical cancer will take the lives of 6,000 women. Our Nation's second leading killer of women is breast cancer. Yet currently the NCI does not have the resources to explore all avenues for a cure.

I would like to ask the gentleman from Kentucky [Mr. NATCHER], is it his experience that the National Institutes of Health generally adheres to the report language and gives it its highest priority?

Mr. NATCHER. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentleman from Kentucky.

Mr. NATCHER. Mr. Chairman, I would like to state to the gentlewoman from Ohio [Ms. OAKAR] that that has been the experience of the subcommittee and the Committee on Appropriations. We expect that they will follow the language that we set forth in the report.

Mr. Chairman, I would further like to say to the gentlewoman that if they do not follow it, they will have to tell us why when they present next year's budget. When the gentleman from Massachusetts [Mr. CONTE] and I became members of this committee a number of years ago, we had $73 million in the National Institutes of Health. $73 million. We are now up to $8,317 million. Mr. Chairman, that is the way it should be. When you take care of the health of your people and educate your children, you live in the strongest country in the world.

Mr. Chairman, I would further like to say to the gentlewoman from Ohio [Ms. OAKAR], the gentleman from Massachusetts [Mr. CONTE] and I appreciate the letter that the gentlewomen signed, together with the other gentlewoman in the House, concerning the new legislation that is going through at this time, which would add additional authorization and funding for breast cancer and cervical cancer screening. As the gentlewoman knows, in our bill we receive $2,900,000,000 for new programs. This new program certainly is right up at the top once it gets authorized.

Mr. CONTE. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I am delighted to yield to the gentleman from Massachusetts [Mr. CONTE], and want to thank the minority leader as well, not only for this part of the bill, but for the part that relates to cancer screening programs, mammography, and other programs.

Mr. CONTE. Mr. Chairman, I wish to thank my distinguished colleague the gentlewoman from Ohio [Ms. OAKAR], for her fine work on issues concerning breast and cervical cancer. The subcommittee was deeply impressed with her testimony this spring.

As the gentlewoman knows, our committee also doubled the amount for breast and cervical cancer control, $10 million at CDC. When the new authorizing bill, H.R. 4790, is enacted, we will do all that we can to provide additional funding.

Mr. Chairman, I want to stress that prevention of these two deadly diseases is the top priority for the health of women in this country. I am glad we were able to help on this vital mission.

Ms. OAKAR. Mr. Chairman, reclaiming my time, one of the reasons that I have tried to push for more research in various areas, certainly breast cancer, is that I do not think people realize that 143,000 American women will be diagnosed with breast cancer this year; 43,000 of them will die of breast cancer.

□ 1240

One out of nine women will be diagnosed as having this disease. It is in a crisis proportion. Twenty-four percent more women get breast cancer today than in 1976, and yet the reason this targeting in this report language for the extra revenues is so important, today only $18 million goes for direct research for breast cancer. And we do things the right way; we have $2.3 billion for AIDS research, which I support, but the fact is more women get breast cancer, in a critical way.

The CHAIRMAN. The time of the gentlewoman from Ohio [Ms. OAKAR] has expired.

(By unanimous consent, Ms. OAKAR was allowed to proceed for 2 additional minutes.)

Ms. OAKAR. I just wanted to make the point that during the Vietnam war, when we had 50,000 brave American lose their lives during that war, in combat; during that same period we had 330,000 women lose their lives to breast cancer. Yet, until this time, to be honest, we have not seen it targeted as a disease we could find a cure for.

We had a hearing at which the distinguished gentleman from Indiana [Mr. MYERS], a distinguished member of the Committee on Appropriations, was testifying and was part of the panel before our Subcommittee on Aging Health. We were told by one of the premier research doctors that in 5 years, if we could target this disease, we would find a cure for this disease and relieve the pain not only of the women but their families also.

So I certainly want to compliment the subcomitttee for putting that language in.

I also wanted to make another observation. That is that the distinguished chairman of our Committee on Aging, the gentleman from California [Mr. ROYBAL], also a member of the Committee on Appropriations, was very helpful in putting this funding in for elder-abuse provisions, because we have always had it in our authorizing committee as related to the Older Americans Act and we never had money for it.

I was so pleased that the committee was able to see fit to put some money in for what is another increasingly terrible phenomenon.

So I want to say to my colleagues how pleased I am with these increases in research on programs that, frankly, in the past have been somewhat neglected.

Mr. MYERS of Indiana. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentleman from Indiana [Mr. MYERS].

Mr. MYERS of Indiana. I thank the gentlewoman for yielding.

Mr. Chairman, I spoke earlier during general debate on this issue. I have been since criticized for the fact that I made light——

The CHAIRMAN. The time of the gentlewoman from Ohio [Ms. OAKAR] has again expired.

(On request of Mr. MYERS of Indiana and by unanimous consent, Ms. OAKAR was allowed to proceed for 2 additional minutes.)

Ms. OAKAR. I continue to yield to the gentleman from Indiana.

Mr. MYERS of Indiana. As I was saying, I was criticized for the fact that I made light, that I mentioned that they were spending more money on AIDS research than we are on these others which are killing more people. Heart and cancer are killing

many more people in this country than AIDS.

Now, I am not critical of the $1.7 billion that this committee put in the bill. However, the incidence of breast cancer which we are identifying here is increasing very rapidly also.

Just in 1980, 1 out of 11 women would be diagnosed as having breast cancer. Now it is one out of nine in just 10 years. And it is a rapid increase. So something may be done, something can be done.

So I certainly join the lady. We have worked together on this. Something can be done if it is given proper attention.

I earlier urged the committee that during this year we would be urging them to take a look and possibly fund programs that will come on, because a year can make a tremendous difference in the lives that we can save.

So I thank the gentlewoman for yielding and for her remarks here today. Something can and must be done about this very growing and very dreaded disease.

Ms. OAKAR. Mr. Chairman, I thank the gentleman and thank him also for his work on this matter.

So let us prevent the disease. This bill is a very important first step by having mammography covered for low-income women.

I would like to see it covered in every policy in this country, including Medicare.

Also, I am very pleased that you have specifically asked NCI to use the extra money to find a cure for breast cancer and cervical cancer. I hope they conform to your wishes. I know you will monitor them very carefully.

Mrs. VUCANOVICH. Mr. Chairman, I would like to thank the distinguished chairman of the Health Subcommittee, Mr. NATCHER, and the distinguished ranking member, Mr. CONTE, for their efforts, and the efforts of my colleagues on the subcommittee to increase funding for breast cancer research and prevention.

As you know, I have made the fight against death from breast cancer my legislative priority. My primary goal has been to work at the Federal level to make screening mammography available and affordable to women around the country. Doubling the funding to $10 million for breast and cervical cancer prevention programs at the Centers for Disease Control will certainly show our commitment to reducing the tragic number of these deaths.

My interest in helping to drive down the tragic number of deaths from breast cancer stems from my own personal experience. In February 1983, I followed the recommendation of the Office of the Capitol Physician, and went for my first screening mammogram. Although I always had been very conscientious about regular physical checkups, and although I was 61 years old, no one had ever mentioned anything about mammograms to me before. Unfortunately, that first mammogram detected a tumor, and prompt surgery saved my life. Early detection of my breast cancer allowed me to continue living an active and satisfying life, and caused me to dedicate myself to reducing breast cancer mortality.

A number of my colleagues and I have declared war on breast cancer, and this time it is not a fight to the death, but a fight until there are no more deaths. As I see it, the war must be waged on two major fronts: Making sure that every woman who needs one has access to affordable mammograms, and assisting those on the forefront of science who are searching for clues to the causes of breast cancer and its cure.

I commend the committee for appropriating more than $1.7 million for the National Cancer Institute, which is an increase of almost $151 million more than the fiscal year 1990 appropriation. More than that, Mr. Chairman, I commend the committee for adding the language to the committee report asking that breast cancer be given a high priority for the increased funding.

I believe that these actions will allow us to win a significant battle in the war against breast cancer deaths. Too many families have suffered and will suffer unless we remain vigilant and we succeed. I commend this committee for their dedication in this vital matter.

Mr. KILDEE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong support of H.R. 5257, Labor-HHS-Education appropriations for fiscal year 1991.

I would like to commend the gentleman from Kentucky, Mr. NATCHER, and the gentleman from Masschusetts, [Mr. CONTE] and the members of their subcommittee for drafting an excellent bill which addresses the pressing needs of our Nation's most precious assets, our children.

The children of this Nation have every reason to be grateful to the gentleman from Kentucky, [Mr. NATCHER] this year and every year that he has served in this capacity. Chairman NATCHER's bill provides a $3 billion increase for education, the largest single increase ever appropriated for education.

Among the crucial education programs which received major increases over the fiscal year 1990 levels are $1 billion increase for compensatory education; $857 million increase for handicapped education; $692 million increase for student financial assistance, including $609 million increase for Pell grants for needy students.

A $100 million increase for the TRIO Program for needy students who are the first in their family to attend college. I have a number of those people in my district who are grateful to Mr. NATCHER for this.

This bill, in addition, reserves significant increases for current programs awaiting reauthorization, such as Head Start, vocational education, and for new programs such as the child care bill which is now in conference.

This bill was carefully and wisely drafted. Mr. NATCHER has brought his experience and his wisdom in setting the priorities in this bill, and I commend him for it.

Mr. Chairman, I urge passage.

Mr. NATCHER. Mr. Chairman, will the gentleman yield?

Mr. KILDEE. I am happy to yield to the chairman of the subcommittee, the gentleman from Kentucky [Mr. NATCHER].

Mr. NATCHER. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I would like to say to the gentleman and to the House that we appreciate the gentleman from Michigan's [Mr. KILDEE] help not only today with our bill but every year that the gentleman has been a Member of Congress. We appreciate it.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chariman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 43, line 12, strike "$763,616,000" and insert in lieu thereof "$763,551,000".

Mr. WALKER. Mr. Chairman, in a nation concerned about dealing with the problems of international competitiveness, what that nation needs is more lawyers.

In a nation concerned about economic viability, what that nation needs is more lawyers.

In a nation concerned about educational superiority, what that nation needs is more lawyers.

In a nation concerned about technological advances, what that nation needs is more lawyers.

In a nation concerned about engineering excellence, what that nation needs is more lawyers.

Now, what I am proposing here is that if you believe that, you probably are not for my amendment. If you do not believe that, what you probably should do is take a look at my amendment because we got an item in the bill called "law school clinical experience," and we are going to spend $5 million on it, despite the fact that the administration requested nothing for it in its budget.

□ 1250

That $5 million is a $65,000 increase over the 1990 amount. Now, I am a little embarrassed by the modesty of my own amendment in this case, but all I am doing is proposing that we eliminate the $65,000 of increase.

Now, since the committee's report claims that we are going to have 64 grants under this program, my amendment would have the effect of limiting by $1,000 each of the grants in this particular program. We are still going to get more lawyers under my amend-

ment. But at least we would hold this program that was not requested to the 1990 level, and we would save a modest $65,000 in one program under the budget.

It seems to me that maybe the House has the will to reduce this one program by $65,000, thereby maintaining a freeze level for the upcoming year. I ask the House's consideration of this amendment.

Mr. SMITH of Iowa. Mr. Chairman, I rise in opposition to the amendment. I think the gentleman must not understand the program. If he did, I do not believe he would have made the amendment.

It is always easy to pick on lawyers. They are fair game always. This Law School Clinical Program is a program to help poor people get access to justice that otherwise would not have it. We have a national legal services program but it cannot begin to serve all the poor people in this country that need access to justice. That is what this is all about.

Law schools now have, just in the last few years, started setting up clinical programs where they have students, under the supervision of two or three expert lawyers serve poor people. A large portion of these poor people are elderly people who have need for and a right to, for example, Social Security, but they cannot negotiate the legal system to secure what they are entitled to. That is what this is all about. Our justice system is based on the rule of law. If a person were in Vietnam and had a problem, a guy comes out in a white suit and sits there and makes a decision on the spot. No appeal, no nothing. That is the end of it. Now, that is fast justice, but that is not our justice system.

We base justice upon laws. People in this country must negotiate the legal system. People who have money can do that. However, we have a lot of people now who have rights that are not being protected because they cannot pay for the legal services. It is an access to justice that is involved here.

In the medical profession we have had interns for many, many years. We have never had interns in law schools until recently but are now beginning to do so. The biggest law schools did not even have clinical programs, but now we are encouraging them to set up a clinical program. They have to put up a lot of their own money also and this program is to encourage them to set up these programs. Law schools are catching on. The Bar Association is pushing them to do this. They had 29 law schools a couple years ago engaging in these clinical programs. Now there are about 64. They had a meeting last year. I think another 30 or 40 came to find out how to run a clinical program. They have to go through their bar associations and others to get money to set up the program and secure permission from the Supreme Court so students can help under supervision but they need some encouragement. That is what this program is about.

The $65,000 which happens to be the amount that was knocked out on Gramm-Rudman, this is all it is. It is replenishing the same amount they had last year before Gramm-Rudman knocked out $65,000. But what they will actually get is less per school than they had last year because more schools are qualifying. I think we really should match non-Federal funding, as long as they are providing legal access to justice that people would be eligible for under legal services if there was enough legal services available, which there is not. These clinical programs provide a needed service. We are getting the biggest bargain in the Government when we put up a little money and encourage them to put up non-Federal money to go with it.

So this is a good program, and I think it should be clear in the RECORD that we are not helping lawyers here. As a matter of fact, lawyers are contributing money to the law schools, giving law schools money to go with the little amount of money that is in this program. This is one of the best programs we have. If Members believe in access to justice and our legal system, Members surely should be for the full amount for this program.

Mr. NATCHER. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Kentucky [Mr. NATCHER].

Mr. NATCHER. Mr. Chairman, I would like to advise the Members of the House that this is a matter that has come before our subcommittee each year during the hearings. We have carefully considered the matter. We have heard a number of witnesses each time. I join with the gentleman from Iowa [Mr. SMITH] that this amendment should be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALKER].

The amendment was rejected.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER. On page 45, line 22, strike "$133,860,000" and insert in lieu thereof "$133,850,000".

Mr. WALKER. Mr. Chairman, what we have just discovered is that the House cannot go along with even the modest Gramm-Rudman cut that we took last year.

Mr. NATCHER. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Kentucky.

Mr. NATCHER. Mr. Chairman, I would like to inquire of the gentleman if it is his intention to reduce this amount $10 million?

Mr. WALKER. Yes, that is right.

Mr. NATCHER. If the gentleman will carefully consider his amendment, I say to the gentleman from Pennsylvania [Mr. WALKER] that he is reducing it only by $10,000.

Mr. WALKER. Mr. Chairman, in looking at this amendment, I find we had a staff error in drafting, and I would ask unanimous consent to correct the amendment. It should read "$123,860,000."

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania [Mr. WALKER]?

There is no objection.

The CHAIRMAN. The amendment is modified.

The text of the amendment, as modified, is as follows:

On page 45, line 22, strike "$133,860,000" and insert in lieu thereof "123,860,000".

Mr. WALKER. Mr. Chairman, the House has just said that last year we got a few minor savings in the Gramm-Rudman. In that particular program, a $5 million program, we got $65,000 in savings. The House has just said with this decision that it cannot save that $65,000 again this year. We have to go ahead and save the money.

I am not certain that we can tell the American people with a straight face that there is any intention here at all to find savings in these programs, and this idea that there is somehow the political will and courage to deal with the budget deficit is becoming a national joke as we go through these appropriations.

In this particular case, we are talking about $10 million savings. We are talking about real money in this amendment. I hope that Members will understand what it is we are doing. This is money which is in the bill for the education summit followup. This is money badly wanted by the administration. Those who have come to the floor and suggested that somehow this President is driving these budget deficits forward, as the past administration did, may want to consider this because this is an amendment which strikes out the money, $10 million that they would like to have for a supplemental followup. Now, I do not have any doubt that they would use the money for some worthwhile purpose, but they are telling this Member of Congress that we ought to be a part of raising taxes in order to meet educational and other priorities.

In this particular case I am not certain of the priority for education, because it seems to me that if the description in the committee report is correct, this sound to me like $10 million in phone calls, because what it is for is to find out whether or not the things going on or that they said would go on at the summit are, in fact,

being followed through on. That can be made by a series of phone calls across the country, and my doubt is that it will cost 10 million bucks to do it.

Now, the committee has already cut this program from $20 million to $10 million. It seems to me that we should cut out the other $10 million and save the Department of Education. If we think it is important enough to follow up on, the summit, then do it within the resources that we have. We have plenty of resources to find out across the country what happened as the result of the summit. Why we have to spend this $10 million at a time when we do not have the money is beyond my imagination.

So I would certainly hope that the House could, in this particular instance, say to this administration that there are some needs for you, also, to do the job of cutting in things that are important but not absolutely essential. We are down to absolute essentials if we are going to deal with this budget deficit, and here something is not an absolute essential. Ten million bucks in phone calls to follow up on the summit is not an absolute essential. I would hope that the House in this particular instance would decide to save some real money, save $10 million. We will not harm education as being practiced in any school district in the country one iota with this cut.

□ 1310

This will simply assure that the Department of Education in some way will follow up on its summit of last year in a way that is different than the way they now plan to do it.

Mr. Chairman, I ask the Members to support a cut that has no consequences on education as really practiced but which has some real consequences in helping us lower budget deficits.

Mr. NATCHER. Mr. Chairman, I rise in opposition to the amendment offered by my friend, the gentleman from Pennsylvania [Mr. WALKER].

Mr. Chairman, in the State of Virginia a summit was held in the field of education. At that time the Secretary of Education and the different representatives of the States were present.

This is followup on the summit to ascertain what can be done to implement the suggestions and the recommendations made at the summit.

We have a Secretary of Education who I believe is one of the best qualified men in this country to serve in that capacity. This is a matter that is of great concern to the Secretary of Education. He has talked to me about it. In testifying before our committee, he has stressed the importance of this amount of money, and as I pointed out to my friend, the gentleman from Pennsylvania—and he is my friend—I did not want to object. The difference between $10,000 and $10 million is a large amount with me, Mr. Chairman. Personally, it is a large amount. I did not want to object to the gentleman's construction as far as the amendment is concerned, but I would say to my friend, the gentleman from Pennsylvania, that here today we have a man who is qualified to be Secretary of the Department of Education.

This is a small amount of money that serves a useful purpose, and I hope this amendment is defeated.

Mr. CONTE. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, the gentleman from Pennsylvania [Mr. WALKER] has raised a question over the $10 million for the education summit followup. I find his comments to be misdirected, because the committee really reviewed this activity in depth. I had the Secretary come to my office and speak to me about this and tell how badly he wanted it.

And this is one of the few items the President really wants. He is for a lot of things in this bill, but this is one item that he really wants because it will do so much. It creates a ripple effect in the States. This activity brings the Governors together with the President and other educational leaders to set goals and plan reform activities. Obviously the summit follow-up is a key component of the nationwide effort to reform our schools.

The $10 million for the one-time activity is badly needed, and I would be disappointed if this activity is cut. I know the Secretary, who is a good Secretary and a good man, would be disappointed if the summit followup is cut.

Mr. Chairman, I put language in the report directing the department to expand the summit followup to include all of the policy makers in the States, the school board members, the State board members, and the State legislators. They are the folks who are really reforming our schools. The $10 million is a good investment.

Mr. Chairman, I hope this amendment is defeated.

Mr. EARLY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as I said earlier, I am proud to be a member of this subcommittee, and I do not like to oppose the subcommittee on occasion, but I want to thank the gentleman from Pennsylvania [Mr. WALKER] for a little variation in what he is doing.

I have not voted for an across-the-board cut since I have been in the Congress. I just do not think it is fair to treat everyone the same, whether they are efficient or inefficient or whether they are good or bad. The gentleman from Pennsylvania [Mr. WALKER] has offered an approach where he has identified four programs. This particular concern involving $10 million was discussed at length in subcommittee.

As far as the subcommittee was concerned, the majority would vote not to cut it. I am not going to push it, but if it came to a vote, I would vote to cut it.

Later on the gentleman has an amendment for $480,000 reduction in another agency which was discussed at length in subcommittee. I think the whole agency should be abolished. I would support him on that particular amendment, too.

I appreciate the last time we had consideration of the whole House, we included this and then did not have a rollcall vote. It is not that it was not meritorious, because it was. The gentleman probably will lose this amendment, but I just want the Members to know for the record that if it is put to a vote, I will vote for the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALKER], as modified.

The amendment, as modified, was rejected.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 53, line 4, strike "$3,871,000" and insert in lieu thereof "$3,806,000".

Mr. WALKER. Mr. Chairman, I guess we can try again. We could not get $65,000 before, we could not get $10 million there.

There is another little item in the bill called the Physician Payment Review Commission. This is something, as I understand it, that was set up to take a look at how physicians get paid under the Medicare system. If my constituents are any gauge of what has been happening, they are not real happy with the way that system is working and then with the way this Commission is performing.

The physicians are unhappy. They think that the entire program is aimed at driving them out of business. The patients are unhappy because they think the whole system is being destroyed by physician payments. The hospitals are unhappy because they think the system does not adequately protect their interests. Everyone in the system, as far as I can see, thinks that the process makes no sense.

So what do we do in this particular bill? We reward them. We give them $65,000 more this year than they got last year.

My amendment again is a very modest little amendment. It is just a little thing that says:

Let's not give them the $65,000. Let's force them to live with the over $3.8 million they got last year. Let us force this horrendous

problem upon them that they might have to live with last year's appropriation at the Physician Payment Review Commission.

So I would ask the House in this particular case to help us cut spending by this one little amount, by $65,000 for this Review Commission. I think most of America would tell us at the present time that it has failed in its job. Let us not reward them. Let us hold them to last year's spending.

Mr. OBEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I think we ought to remember the movie, "The Wizard of Oz." If you recall that very famous movie, there was a scene where some of the little people were singing a little song which sort of described the tenor of the community. The words went like this:

We represent the Lollipop Guild, the Lollipop Guild, the Lollipop Guild, and in the name of the Lollipop Guild, we wish to welcome you to Munchkin Land.

To me, we are at the point today when we are dealing with "Munchkin" amendments.

Does anyone seriously believe that we are going to make a dent in Federal spending and the Federal deficit by reducing $65,000 from this item when we have the B-2 bomber that is going to cost us $600 million or $700 million apiece—that is not thousands, but millions—when we have star wars, and when we have the administration suggesting that with everything that has happened in the world, we ought to increase our military foreign aid around the world?

□ 1310

Mr. Chairman, this amendment, I think, is here simply for its symbolic purpose. The problem is that we have been engaging in symbolic acts for the last 10 years, and that is why we have not made very much progress in dealing with the deficit.

Now the Physician Payment Review Commission happens to be a very important program. We shell out billions and billions of dollars on the basis of how doctors are reimbursed for various medical services which are paid for by the taxpayers and by consumers of health services in this country. We have great disagreement about what system ought to be used to pay those physicians.

What we are simply doing here is to find a very tiny program in the budget which tries to lay out the most equitable way possible to reimburse doctors.

Mr. Chairman, I come from a rural area. We think we are getting euchred in the way physicians are being reimbursed in our area because of the urban differential which pays urban physicians far more than it pays rural physicians for the same services. There are people from big city areas who feel quite differently. These people are doing the hard job of trying to work through the very difficult problem of how to reimburse physicians under Government programs.

Mr. Chairman, I happen to be sitting here during my spare time, as we are here on the floor today, sitting here reading a description of a new national health care bill which is being offered by one of our Members. One of the issues that we have to face in the entire issue of universal health coverage is how doctors are going to be paid. That is a multibillion-dollar problem. We are going to have universal health insurance by the end of this century, and it would be kind of nice if we were not penny wise and pound foolish as we move to programs like that.

Mr. Chairman, I would suggest it is immaterial whether this amendment passes or not. I do not believe this amendment really accomplishes a serious legislative purpose. I really think it is a Munchkin amendment in a town besieged by Munchkin mentality, and so I guess that is normal; but I hope my colleagues do not mind if I chuckle at it as we pretend to take it as a serious legislative effort.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALKER].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 115, noes 293, not voting 24, as follows:

[Roll No. 247]

□ 1334

The Clerk announced the following pairs:

On this vote:

Mr. Craig for, with Mr. Anthony against.

Mr. Dornan of California for, with Mr. Gray against.

Mr. STALLINGS changed his vote from "aye" to "no."

Messrs. GUNDERSON, ROBERTS, and STENHOLM changed their vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. BARTLETT. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to speak on H.R. 5257, the fiscal year 1991 Labor, HHS, Education appropriations bill and particularly want to thank the chairman and ranking Republican.

H.R. 5257 is a large appropriation bill totaling $170.44 billion to fund the Department of Labor, Education and Health and Human Services. I hold no special expertise for all of these programs and believe Members should cast their vote based on the totality of the bill. I do, however, have some expertise in disability programs and rise to strongly support funding decisions made by the Appropriations Committee in the disability areas. Many of these programs are under the authorizing jurisdiction of the Subcommittee of Select Education of which I serve. Specifically, there are three programs which I strongly rise to support today and I want to outline the positive effects the action taken by the Appropriations Committee will have on children with disabilities.

First, H.R. 5257 increases the Education of the Handicapped Act State Grant Program to $2.4 billion, a significant and much-needed increase. This program ensures that a free and appropriate education is provided to 4.4 million disabled children and has been the cornerstone for educating children with disabilities in our neighborhood schools. It has meant academic and social success to millions of disabled children and has allowed them to lead more independent lives. The Education of the Handicapped Act has been an extremely successful and cost-effective program.

The increase represents a $784.9 million increase over the President's request and a $857.4 million increase over the fiscal year 1990 appropriation. This will increase the Federal contribution of educating children with disabilities from $352 per child in the 1990-91 school year to $512 per child in the 1991-92 school year. In terms of percentages, this increase brings the Federal share of the average per pupil expenditure from the current 8-percent Federal share to 11.5 percent. Public Law 94-142, the authorizing language for the EHA State Grant Program, requires that the Federal share be 40 percent of the national average per pupil expenditure. While this increase does not meet the 40-percent mandate, it moves us closer to meeting that goal.

Second, I commend the Appropriations Committee from consolidating funding for the chapter 1 State operated Handicapped Program, commonly known as 89-313, with funding for Public Law 94-142, the Education of the Handicapped Act. The 89-313 program is the predecessor to Public Law 94-142. In 1965 when the 89-313 program was created, most students with severe disabilities were educated in segregated facilities with little or no opportunity to interact with their nondisabled peers. With the enactment of Public Law 94-142 which requires a free and appropriate eduction for all disabled children, segregation has been greatly reduced. However, several States continue to segregate disabled children under the 89-313 program. I am pleased that the Appropriations Committee took the advice from the May 1989 GAO report to consolidate these two programs. It will go a long way toward ensuring that disabled children are educated with their nondisabled peers in a wide variety of settings.

Finally, I am extremely supportive of the Appropriations Committee's decision to effectively eliminate the VISTA service year floor. I tried unsuccessfully to strike this service year floor through the VISTA reauthorization last year. Public Law 101-204, the VISTA authorizing legislation, created a funding mechanism for part A, the regular VISTA Program through service years. The legislation requires that these service years, in effect, must be funded first before other programs within VISTA receive their appropriation.

Public Law 101-204 had required the ACTION Agency to meet the authorized service year floor, even if the appropriation is not sufficient to fund such a level. If the appropriate levels for part A are insufficient to meet the service year requirement mandated by the law, the ACTION Agency Director must rob from other programs in order to fund part A and if there are not enough funds available, ACTION will be violating the law solely because the Congress did not appropriate funds to meet the service year mandate.

H.R. 5257 does not appropriate enough money to meet the authorized 3,000 volunteer service year floor for fiscal year 1991, however, the Appropriations Committee report clearly states that their 1991 level of 2,900 volunteer service years is the ceiling. The committee report states that "funds should not be reprogrammed from within VISTA or other title I programs in order to increase the service years above this level."

This is a good policy decision. Each of these programs should be judged on their individual merits and funded according to those merits and within budgetary constraints. By taking this step, H.R. 5257 accomplishes that goal.

Again, I thank the chairman and ranking Republican for making these tough decisions and setting priorities for funding education programs.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I am happy to yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, I thank the gentleman from Texas for yielding, and I want to take this opportunity to thank the gentleman from Texas for his kind words to our committee and also to congratulate him.

He has appeared before our committee year after year, and the committee has appreciated his many ideas. I want to commend him for his leadership not only in coming before our committee with these ideas but for all the fine work he does on the Committee on Education and Labor.

□ 1340

Mr. BARTLETT. Mr. Chairman, the gentleman from Kentucky [Mr. NATCHER] and the gentleman from Massachusetts [Mr. CONTE] made the tough decisions. They were long overdue. They were difficult to make, but they did the right thing.

Mr. NATCHER. Will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from Kentucky.

Mr. NATCHER. Mr. Chairman, I want to thank the gentleman from Texas [Mr. BARTLETT] for his statement in regard to our subcommittee. We appreciate it.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 55, line 19, strike "$8,000,000" and insert in lieu thereof "$7,550,000".

Mr. WALKER. Mr. Chairman, the gentleman from Wisconsin in discussing the last amendment raised the whole specter of the Wizard of Oz and the whole issue of Munchkins and so on. I would say to the gentleman that there is another scene from that play and movie that I also remember, and

that is when they arrive in Fantasy Land and Dorothy turns to Toto and says, "Toto, this sure ain't Kansas."

Well, that is really I think a look at what is going on here. One gets outside the beltway in Washington and people are going to have a hard time understanding why in the face of $100 billion deficits, we cannot even find ways to freeze last year's levels when it is a matter of saving a few thousand dollars.

The American people have a hard time focusing on millions and billions of dollars, because it is totally outside their frame of reference. They understand $65,000. They understand that $65,000 is real money in their family's lives, and that if we cannot even save that kind of money in the face of massive deficits, we have got big problems.

Well, I think we have got big problems here, because we simply do not have the will to deal with some of these programs and try to keep the spending down. So I am offering another attempt for the House, another try at getting the House to understand the nature of the dilemma we face.

In this particular case I am offering a cut of $450,000. That keeps the Institute of Peace at last year's funding level.

Now, we have got peace breaking out all over the world. It is something which is happening. The Institute for Peace was put together with all the best intentions by the people who formulated it, and it was largely aimed at doing something about the confrontations that we were having in the course of the cold war. At least that is how it was debated here in the House. I am sure there are other ideas for it today.

The fact is with peace breaking out around the world, one part of the peace dividend we might be able to realize would be to freeze the Institute of Peace at last year's funding levels. Just freeze it. We are not going to cut it back, we are not asking them to eliminate programs. We are simply saying that for $450,000 less than what is in the bill, we can keep you at last year's funding level and maintain you spending $7.5 million a year.

Mr. Chairman, I would also point out the cut I am asking for still keeps us above where the administration's request was. The administration requested $730,000 less than what is in the bill. So I am simply cutting back to last year's freeze level. I am not going as low as the administration's request.

It seems to me we could do at least that much. The American people are looking at us to show some small sign that we recognize the crisis that we are in. Yesterday we could not vote for a $20 savings. Today we cannot vote for a $65,000 savings in a couple of instances. We cannot seem to do anything.

Maybe, maybe this is the place. Maybe the de minimis kind of thing that the House can do is at $450,000 on this particular program.

Mr. EARLY. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I would be very happy to yield to the gentleman from Massachusetts.

Mr. EARLY. Mr. Chairman, I thank the gentleman for yielding. I do not want to get extensively into this particular subject either, but I want to bring up a point, that this specific account was discussed at great length, with strong support to strike the whole $8 million, which I supported and several other members supported. The majority of the subcommittee did not support that. Therefore, it is in at $8 million.

Mr. Chairman, I really think this $450,000 is not so much money, but it is indicative of staying at last year's level. I think there will be several Members that will speak in opposition to it, but if you cannot cut this account, if any agency made a bad presentation before the subcommittee, it is this agency. They should not get a dime, never mind $8 million less $450,000.

Mr. Chairman, I hope the amendment is adopted.

Mr. WALKER. Mr. Chairman, reclaiming my time, I thank the gentleman from Massachusetts [Mr. EARLY] for his point. If I understood the gentleman correctly, there was strong support within the committee itself for eliminating all the money?

Mr. EARLY. If the gentleman will yield further, I said in the subcommittee. It did not have a majority, but it was very close.

Mr. WALKER. Reclaiming my time, in the subcommittee there was a strong view that we ought to eliminate all the money for the agency, but it lost reasonably narrowly.

Mr. Chairman, I would simply say that all I am attempting to do here is cut it back to last year's level. There is certainly no issue involved here of eliminating the agency. You would simply be freezing it at last year's account level. Hopefully the House could do at least that much, if the subcommittee itself thought that there was some cause for maybe even eliminating the whole thing.

Mr. PORTER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, to start with, obviously there wasn't support in the subcommittee for striking the whole appropriation, because not only did we not strike the whole appropriation, we increased the appropriation to $8 million. So obvioulsy the characterization of both of the gentlemen is not correct.

Mr. Chairman, I suggest that the gentleman from Pennsylvania [Mr. WALKER] sat down and scrolled through the report and picked out a few agencies that he personally did not like and is now using the time of the House to impose upon the Members his view of what the priorities ought to be. I suggest also that I do not think the gentleman has any idea of what the mission or role of this agency is.

Mr. Chairman, I would suggest to the gentleman from Pennsylvania that if there were money put forward to provide for police to learn how to better control riots and to prevent undue bloodshed, the gentleman would be a supporter of such a provision and he would consider it money well spent. Perhaps on second thought, he would not, but I do.

Mr. Chairman, I would say that diplomats consider the work of the Peace Institute to be the most important work being done today on conflict resolution, and therefore the avoidance of bloodshed around the world. The United States ought to be a leader in this regard, and I think the Peace Institute provides us that kind of leadership.

The only conflict in this world that is no longer a conflict, which thank God never became a hot conflict, is between the Soviet Union and the United States. But Mr. Chairman, there are other conflicts all over the world, in Afghanistan, Northern Ireland, Cyprus, in South Africa, and the Middle East, to name a few. We have a chance to prevent bloodshed and to resolve those conflicts amicably and I believe we have an obligation to attempt to do so.

Mr. Chairman, what does the Peace Institute do? If I can spend a few moments of the Chamber's time, I would like to talk about some of the things that they do that I think are important.

Next week the second round of a conference with Soviet historians will convene between the United States and the Soviet Union. It is jointly sponsored by the Soviet Foreign Ministry and the Peace Institute. Leading historians are reexamining the way they have understood the origins of the cold war. Foreign Minister Shevardnadze is encouraging Soviet historians to rethink the way they have understood the start of the cold war, and as a result, the Soviet archives are being pried open for the first time in history.

The first round has made clear the intense interest of Gorbachev and Shevardnadze in rewriting Soviet history correctly and truthfully. The payoff for this effort will be that it will allow the Soviet leader, Mr. Gorbachev, to justify with the people of the Soviet Union his acknowledgement of NATO as a player in European politics. It will allow the Soviets to rework

their foreign policy, centering it more toward Europe.

Mr. Chairman, this is not meaningless history. This is a project that will pave the way perhaps toward lasting peace in Europe.

In Eastern Europe the Institute has just published a report of a study group which they ran last winter. It has drawn scholars and government people together, and their objective has been to look into the key regions to anticipate conflicts and to develop methods of diplomacy to head off those conflicts. This is being conducted in cooperation with the State Department and with the State Department's strong support. It has put the Institute in a lead role in building bridges between academics on the one hand and policymakers on the other. The European study has developed a data base of ethnic, religious, and regional conflicts in Eastern Europe which have been repressed for a generation under communism, but are not boiling up throughout that area.

□ 1350

In Romania, between ethnic Hungarians in Transylvania, and the Romanians, in Yugoslavia, in Kosovo (Kosova) between the Serbs and the Albanians; in Bulgaria between Bulgarians and their other Turkish minority; and in Poland where there is evidence of increasing anti-Semitism directed at their tiny remaining Jewish minority.

The first report identified the problem. Next winter a conference of Eastern European government leaders will focus on practical methods for dealing with these kinds of ethnic conflicts and create mechanisms that will mediate the strife, hopefully without bloodshed.

The program, strongly encouraged by the Helsinki Commission's American delegation, of which I am proud to serve as a member, is working with other governments to find approaches to resolve these ethnic conflicts.

In the Middle East, Mr. Chairman, an incredibly important volume of work is under way, all of it relevant to the current stalemate. The Peace Institute is working quietly to bring together groups of Palestinians and Israelis, to discuss issues and to cross psychological barriers.

Spinning off the lessons learned from these sessions to policymakers, I think is a very, very important effort indeed.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(By unanimous consent, Mr. PORTER was allowed to proceed for 2 additional minutes.)

Mr. PORTER. Mr. Chairman, the world is not at peace. While we have, hopefully, resolved much of our conflict with the Soviet Union, in Afghanistan, Northern Ireland, Cyprus, South Africa, and other places all around the world, the potential for bloodshed is very, very great. Between Iraq and Israel, between Israel and Syria, the potential for conflict and bloodshed is indeed very, very serious.

Where the tensions are highest around this world, the Peace Institute is working to alleviate them, to bring parties together to find ways to resolve these conflicts peaceably.

I do not think the gentleman from Pennsylvania, in offering this amendment, understands the importance of this agency.

I have to say that the amount that is in question, which is $450,000, is almost all an inflation increase. The real increase amount is about 1.8 percent, a very, very small encouragement to a very, very important effort.

I would close by saying that we have at the helm of the Peace Institute a man picked by President Reagan and reaffirmed by President Bush, Sam Lewis, formerly our Ambassador to Israel, a man of great goodwill, good judgment, outstanding ability and intelligence, working so hard to make the Institute a success. It would be a slap at the work of Sam Lewis and the kind of idealism and practical diplomacy that he represents, if we were to adopt this amendment.

The CHAIRMAN. The time of the gentleman from Illinois [Mr. PORTER] has again expired.

(On request of Mr. GLICKMAN and by unanimous consent, Mr. PORTER was allowed to proceed for 2 additional minutes.)

Mr. PORTER. I yield to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. I thank the gentleman for yielding.

Mr. Chairman, I thank the gentleman for his comments. I thank the chairman of the subcommittee for putting this amount in there.

Mr. Chairman, I have a vested interest in this. I was the prime House sponsor of this bill. Senator NUNN, Congressman ASPIN, there were a lot of authors of this concept. It was put into the 1985 defense authorization bill, then the largest defense bill in the history of America, as a complement to defense policy, that we in America ought to have an institute promoting conflict resolution, and peace studies around the world. Only Costa Rica and Sweden had a peace institute. America had its military academies.

The discussion was we ought to have an institute where we could learn about conflict resolution and where we could teach people at military academies, in the business community, and academics about what has happened.

The first president who was appointed and the current president is Sam Lewis. Sam Lewis was the United States Ambassador to Israel under both Presidents Reagan and Carter. He was picked for this job because he put together an incredible masterpiece of conflict resolution, a peace between Israel, the Camp David peace accord.

Both President Reagan and President Carter felt this man could perhaps help the world achieve peace and conflict resolution in Eastern Europe, in the Middle East, in the Third World, in South America, and the Far East as well.

So what this institute does, it is the only place in the United States that provides that kind of background, to bring the world together.

Now, my colleague from Pennsylvania, a very distinguished Member, said something interesting. He said now that peace is breaking out, why need a peace institute anymore?

I would say to my friend—basically that is how I interpreted his remarks—what I say to my friend is this: We need this kind of institute more than ever. The fact of the matter is this institute is engaged most seriously in cooperative projects with the Soviet Union on issues of arms control, economic development between the nations more than any other institute or our Government. It is needed now more than ever.

The CHAIRMAN. The time of the gentleman from Illinois [Mr. PORTER] has again expired.

(On request of Mr. GLICKMAN and by unanimous consent, Mr. PORTER was allowed to proceed for 2 additional minutes.)

Mr. PORTER. I continue to yield to the gentleman from Kansas.

Mr. GLICKMAN. I thank the gentleman for continuing to yield.

Mr. Chairman, no one agency is going to absolutely bring nirvana to this world and create peace.

I am a supporter of the Defense Department and defense spending. But we have one institute which is providing an intellectual basis for conflict resolution in this world, ways to resolve conflicts without resorting to arms.

United States-Soviet relationships, the Middle Eastern situation, Latin America, Third World; brainpower from all over the world is coming to this country to talk about conflict resolution. The United States of America will be known not only as the greatest economic and the greatest military power in the world but, because of the Peace Institute, we will also be known as the greatest peacemaking power in this world.

I urge you oppose the amendment and support the committee's bill.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Wisconsin [Mr. OBEY].

Mr. OBEY. I thank the gentleman for yielding.

Mr. Chairman, let me simply say very frankly that I did not support the increase in the Peace Institute budget when it was offered by the gentleman from Illinois. But I want to say this: The gentleman from Pennsylvania mentioned the "Wizard of Oz." There are some lines further on in the Munchkin song in the "Wizard of Oz" which go like this:

The house began to pitch, it landed on the wicked witch in the middle of the ditch, which was not a healthy situation for a wicked witch who began to twitch and was reduced to just a stitch of what was once the wicked witch.

Now, in my view, the wicked witch in this situation is war. Some people think the witch is dead. The fact is that while we may be happy that we have seen the collapse of the Soviet Union's alliance, nonetheless since 1945—a new report out yesterday tells us—that since 1945 the world has seen some 100 wars in which somewhere between 20 and 30 million people have died worldwide.

Now, I suppose in Munchkin Land it would not be considered odd to continue to insist on an expensive military budget while we in fact wind up making cuts in an organization that is pursuing peace.

The CHAIRMAN. The time of the gentleman from Illinois [Mr. PORTER] has again expired.

(On request of Mr. OBEY and by unanimous consent, Mr. PORTER was allowed to proceed for 2 additional minutes.)

Mr. PORTER. Mr. Chairman, I continue to yield to the gentleman from Wisconsin.

Mr. OBEY. I thank the gentleman.

I frankly do not know whether the Institute of Peace will accomplish anything. But I would suggest that this tiny amount of money being spent to bring people together, to discuss ways of institutionalizing mechanisms that can help people talk to each other and avoid taking up guns, is not a bad investment for any American taxpayer, for any American person concerned about seeing to it that the last American boy or girl has died in a foreign war.

So while I am skeptical about the ability of this or any other institution to avoid war, I do not think it is a bad investment in comparison to some of the turkey investments I have seen made by this Government with great regularity.

Therefore, I would support the thrust of the gentleman's comments.

Mr. HOYER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will not take the full 5 minutes.

Mr. Chairman, I rise in opposition to the amendment and adopt what was said by the gentleman from Illinois and by the gentleman from Kansas and one of the most able people on this floor with respect to foreign affairs, and the necessity to spend money abroad to preclude not only economic deprivation, to enhance the U.S. interest, but also to try to set aside man's resort to war. Historically, it has never been the case that mankind has resorted to force of arms to resolve conflict. Only recently in our lifetimes has resort to war become an unacceptable alternative because of the fact, of course, we can destroy all of mankind and the ability in fact for humanity to survive on this planet.0

□ 1400

It would seem ironic indeed to spend billions of dollars on the taking of lives, billions of dollars to resort in the final analysis to force to resolve conflict, and to at the same time try to save $450,000 on an effort to resolve conflict through discussions, through talk, through other than force of arms.

This may be another one of those symbolic votes to which the gentleman from Wisconsin has referred before. It it is such, it is important for Members to reject this amendment with the symbolic statement that as we watch the revolutions of 1989, with the sole exception of Romania, for the most part being peaceful revolutions, a dramatic difference from historic revolutions, that we say now more than ever it is important for Members to move ahead in studying just how mankind can resolve its differences through peaceful means.

Sam Lewis has been referred to on this floor by the gentleman from Kansas. Frankly, the Institute of Peace had some trouble getting its legs on the ground, perhaps still does as the gentleman also observes. But Sam Lewis was respected by both parties, both administration, a professional individual sent to one of the most volatile parts of the world, the Middle East. Because he was perceived to be an expert at the resolution of conflict, he has now been given that responsibility as the head of this Institute for Peace.

I would ask Members of the House to reject for both substantive and symbolic reasons this amendment.

Mr. EARLY. Mr. Speaker, I rise in support of the amendment. I have listened to the debate here get so dramatic. I listened to the debate, when they came in and made the presentation for the Peace Institute. I will be the first to acknowledge that the predecessor to Mr. Lewis was the one that was extremely poor. The only thing he talked about the Peace Institute doing was having high school students writing essays, peace essays, and that was the only thing they did.

I have listened to testimony of the Peace Institute. The only thing I can personally say they will do, that they will achieve, and that they will do it, is that they will spend the entire $8 million. I listen to all the things that the Peace Institute is going to do. If we are opposed to across-the-board cuts, then we have to suggest that they make specific cuts.

The gentleman from Pennsylvania [Mr. WALKER] has identified four specific areas. My problem with the amendment is that it does not eliminate it. We cannot eliminate anything in the U.S. Congress. Once it is here, it is here for eternity. Now this amendment again, the $450,000 is not what is important. I do not think the gentleman from Pennsylvania [Mr. WALKER] is suggesting that it is the $450,000 reduction. What is important is that these people not rationalize, they do not justify anything, never mind $8 million.

The amendment should be adopted.

Mr. KYL. Mr. Chairman, will the gentleman yield,

Mr. EARLY. I yield to the gentleman from Arizona.

Mr. KYL. Mr. Chairman, I am scheduling some townhall meetings for August in my district going to Payson, AZ, Shonto, and Pinetop Lakeside, and when I explain to my constituents we are spending over $8 million for something called the Institutes of Peace, and one of my constituents stands and says, "You cannot even save $450,000 on that in a time of tight budget crunch?" I find it awfully hard about how I will look them in the eye and say, "No, we cannot even save the constituents $450,000 on that."

Mr. EARLY. It is not $450,000. We should save the $8 million.

Mr. KYL. The amendment is to save $450,000, and I cannot justify trying to preserve that amount of spending.

Mr. SMITH of Florida. Mr. Chairman, will the gentleman yield?

Mr. EARLY. I yield to the gentleman from Florida [Mr. SMITH].

Mr. SMITH of Florida. Mr. Chairman, the only problem with the argument that the gentleman sets up in this matter with reference to cuts, is that it seems as though the cuts are always in places where the fat is the least. The fat is the most in the military. The problems are the most in the military. The waste is the most in the military.

Mr. EARLY. That is true, but why do we accept waste or abuse anywhere?

Mr. SMITH of Florida. If the gentleman will continue to yield, we are not necessarily agreeing there is waste or abuse in Peace Institutes, but out of $300 billion, the other side has been unable to find a single program that they can agree on should be cut. With $300 billion, we could solve so many of our problems, or start on the road with solving problems in those areas. There is a total refusal and abandon-

ment, in my estimation, of the obligation of Congress.

Mr. EARLY. Mr. Chairman, we use that argument all the time. I do not think about the $450,000. It is $8 million. If we have not got a problem that cannot be justified, I heard the discussion of the Peace Institute, what they did. I heard the gentleman from Illinois. I did not hear any of that at the committee hearings. They correct high school essays.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. EARLY. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I think it becomes absolutely ridiculous to have people come to the floor and suggest that the reason why they cannot support cuts anywhere else is because they will support all the cuts in the military.

I personally am willing to support all kinds of cuts in the military. I voted for cuts in the military. My problem is that I do not see any Member who is willing to vote for cuts in the other two-thirds of the budget. They have to have a little bit of balance here in order to do the job of getting the budget deficits down, and what we hear from the gentleman is that they are willing to vote to wipe out the military budget, but that is the only place they are willing to cut. I do not think that that will do it. It is a sham. I think it is absolutely necessary we look for some cuts elsewhere.

I thank the gentleman for his support and hope the Members will support it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALKER].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 194, noes 220, not voting 18, as follows:

[Roll No. 248]

Flake	Martinez	Watkins

□ 1426

The Clerk announced the following pairs:

On the vote:

Mr. Craig for, with Mr. Anthony against.

Mr. Stump for, with Mr. Flake against.

Mr. SAVAGE changed his vote from "aye" to "no."

Mr. HENRY and Mr. OLIN changed their vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. MORRISON OF CONNECTICUT

Mr. MORRISON of Connecticut. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MORRISON of Connecticut: Page 59, after line 20, insert the following new section:

SEC. 514. None of the funds appropriated or made available by this Act shall be used to issue regulations to carry out the amendments made by section 3 of the Immigration Nursing Relief Act of 1989 insofar as such regulations permit the Secretary of Labor (1) to refuse to accept for filing a completed attestation filed under section 212(m) of the Immigration and Nationality Act, or (2) to review in any way such an attestation with respect to which a complaint has not been filed under such section.

Mr. MORRISON of Connecticut (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. MORRISON of Connecticut. Mr. Chairman, this amendment is directed at the manner in which the Department of Labor is seeking to implement the changes in procedures that this House passed in the Integration

Nursing Relief Act of 1989. This legislation was passed to deal with a crisis in terms of the availability of nurses in some of our urban areas in this country, and, in passing this legislation, the Congress took care to streamline the process by which foreign born would be permitted to work on a temporary basis in the United States. The purpose of the legislation was to see to it that the resources of the Department of Labor would be focused on those challenged petitions rather than on the many routine petitions that would be filed. In seeking to implement this legislation, unfortunately the Department of Labor has acted in complete disregard of the expressed intent of the Congress and has implemented regulations more onerous than the existing certification procedure which we seek to streamline.

Mr. Chairman, what this amendment would do is to bar the Department of Labor from implementing regulations in this fashion, but rather to require the Department of Labor to conform its regulations to congressional intent, and that is to use its resources only in those instances where there is a challenge to the validity of what is being presented on behalf of these temporary employees.

□ 1430

It is truly important that the Congress express itself in this area, because there is pending before the Judiciary Committee a broadening of this streamlined policy to apply not just to nurses, but to employees admitted to the United States in general.

It is unfortunate that the Department of Labor with its already limited resources has chosen to continue a burdensome bureaucratic process that it has used in the past, rather than to grasp what the Congress is trying to do, a streamlined procedure so that the resources of the department are used where there is really a contest, rather than where everyone agrees that it is appropriate for foreign workers to be brought into the country.

I know that the gentleman from Kentucky, the chairman of the subcommittee, has some comments on this amendment.

Mr. NATCHER. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the distinguished gentleman from Kentucky.

Mr. NATCHER. Mr. Chairman, the gentleman from Connecticut has been nice enough to talk with me about this. The gentleman serves as chairman of his subcommittee and he is well versed as far as the subject matter is concerned.

I would hope that the gentleman at this time or at the proper time would withdraw the amendment and give us a chance to work with him on it. I will assure the gentleman we will do everything we can to help him.

Mr. MORRISON of Connecticut. Well, Mr. Chairman, I thank the gentleman for his statement.

Let me say that I will accede to his suggestion, which I know he makes in the interest of expediting this legislation.

I would invite meeting with the gentleman in order to see to it that these scarce resources that are being appropriated in this bill are used in accordance with congressional intent, rather than use it in a way which spends more money to do less on behalf of the public. With that, I look forward to our work together in reforming what is going on here.

Mr. NATCHER. Mr. Chairman, I thank the gentleman.

Mr. MORRISON of Connecticut. Mr. Chairman, I ask unanimous consent to withdraw the amendment at this time.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

The CHAIRMAN. The amendment is withdrawn.

AMENDMENT OFFERED BY MR. FRENZEL

Mr. FRENZEL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FRENZEL: Page 59, insert after line 20 the following new section:

SEC. 514. Notwithstanding any other provision of this Act, each amount appropriated or otherwise made available by this Act that is not required to be appropriated or otherwise made available by a provision of law is reduced by 15.2 percent.

Mr. FRENZEL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. FRENZEL. Mr. Chairman, I am about to provide the House another splendid opportunity to show some of its well-known courage.

In the last couple days we have repeatedly been exhorted to be courageous, and yet we have, in the rejection of amendments, collectively decided that there is as yet no definition of our courage. Our courage was not worth a few hundred million dollars yesterday. It was not worth $19 yesterday. Today we have proved that it is not worth $65,000, and a few other amounts as well.

Since we have not discovered what congressional courage is worth, in this amendment I am going to test the extreme, outer limits. This amendment would reduce the discretionary spending in this bill by $6.7 billion.

Members will recall that on each appropriation bill I have introduced amendments which have sought to reduce the bill back to the 1990 level of discretionary spending. Some of them have been large cuts. Some of them have been small cuts. This one is in the former category. It is 15.2-percent.

Obviously, 15.2 percent, or $6.7 billion, is more than the discretionary spending has been increased in this bill. However, the chairman of the subcommittee never brings out unauthorized programs. With the money reserved under the 302(b) allocation for authorized programs that will eventually be added to this bill, the bill will eventually be 15.2 percent over fiscal year 1990. It is my judgment that 15.2 percent must be removed from the bill now, even though the discretionary spending in it has increased only 11.3 percent.

Now, inflation in the coming year is expected to be something under 5 percent. This bill, by the time we are done with it, will increase the spending for discretionary amounts by nearly three times that amount. These egregious spending increases are being proposed at a time when the United States is supposed to be in difficulty, when we will have difficulty passing a debt ceiling increase, and when we moan and groan about the deficits that we are passing down to our children and grandchildren. Despite the deficit, this House believes that taking care of personal needs is so important that we must raise the level of discretionary spending in this bill by three times the rate inflation.

The bill before us, Mr. Chairman, spends about $167 billion, counting both mandatory and discretionary items. Once you add in the unauthorized funds which will be spent later, you will be very close to $176 billion.

Out of that amount, my 15.2 percent reduction in the discretionary amounts will remove about $6.7 billion. Out of the full expense of the bill's spending of $176 billion, it will be a decrease of something a little bit more than 3 percent.

Is this going to hurt some of the programs? If you believe that the only way that programs can be operated effectively is at the funding level which the subcommittee has put in its bill, then you will think this is an excruciating amendment. This is not 50 cents a function, as we were looking at yesterday. This is going to make substantial reductions in programs that many of you just love.

On the other hand, I doubt that all of you want to pass on to your children and grandchildren the kind of debts that this sort of appropriation will produce.

I must say as we sit here more than $3 trillion in hock, racking up $300 bil-

lion in increased debts in the coming fiscal year, it is hard to see a need so great that we must increase spending for it by more than three times the expected rate of inflation.

Mr. Chairman, we have had many tests on the willingness of Congress to decide when enough is enough. This Congress apparently has no limit to what is enough, but I propose to try to find a limit again today.

This is an amendment that is tough, and strong. It has nothing to do with the lollipop guild or Munchkin land. With this amendment we are talking about the great and powerful Oz.

Mr. Chairman, I urge adoption of the amendment.

Mr. NATCHER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, if this amendment is adopted it will reduce the overall amount in the bill by $6,704,246,000. For 11 long weeks, every day with the exception of Saturdays and Sundays, with very few exceptions, we listened to hundreds of witnesses appear to testify on the budgets for the Departments of Labor, Health and Human Services, and Education. We carefully considered all of the testimony.

Under our section 302(b) allocation, we were allowed and allotted certain amounts. At the markup of the bill and in the presentation of the bill before the full committee, we stayed under our 302 allocation.

Now, Mr. Chairman, think about an amendment like this; 15.2 percent of the entire bill.

If this amendment is adopted, it will cut education funding in this bill, by $3,088,000,000.

□ 1440

Mr. Chairman, I was here back in the 1960's when we used to try day after day to pass an education bill to help educate the children in our country, and we failed time after time. We are now up to the point where we have $26 billion in this bill for education.

During the last 9 years, we have appropriated $199 billion for education, and at the same time $2.312 trillion for defense. Think about it.

I do not know of a single Member in this House who believes we should not educate our children.

If this amendment were adopted, it would cut the cancer research provisions in the bill by $265 million, the National Cancer Institute in this country. Today we have 500,000 people a year dying of cancer—$265 million.

If this amendment were adopted, as far as the elderly program is concerned, we would have a substantial reduction.

Mr. Chairman, we have in this country people that are in need of food, something to eat during the daytime. They go into the centers, with a lot of pride, Mr. Chairman, and I have seen them. They walk in, they need help. Take a look at what this amendment does as far as the elderly are concerned.

Older workers' employment, drug abuse, Medicare contractors all cut. Social Security Administration, a $633 million reduction. In this bill, we have a recommendation for 1,500 additional employees to see that these claims are processed. Here, we would have a huge reduction.

As far as impact aid is concerned, a reduction of $121 million, and we had appearing before our subcommittee 45 Members of this House saying to us, "Please, take care of category B, put the money back in."

As far as the Job Corps is concerned, if the amendment offered by the gentleman from Minnesota is adopted, there would be a $136,912,000 reduction. We had a witness who appeared before our committee not too long ago, Mr. Chairman, who said, "Why, at West Point it costs $17,500 a year, but in the Job Corps it is even higher." We said, "That may be true, but in the Job Corps we are saving boys and girls. We are helping them. We are helping to educate them, give them training and prepare them so they can go out and take care of themselves." It might be a lot, but we are taking care of poor boys and girls in this country in that program.

As far as summer youth employment is concerned, $106 million, Mr. Chairman. Mental health research, a $76 million reduction.

The one that impresses me the most from the standpoint of the harshness of such an amendment is the $3 billion reduction in education.

Mr. Chairman, I respectfully call upon the House to turn this amendment down.

Mr. CONTE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition to the gentleman's amendment.

Mr. Chairman, I respect my good friend from Minnesota. He has served this House with distinction and with pride, and I am sorry to see him leave Congress to go back home.

I understand what he is trying to do, but this bill holds special promise for our citizens. It helps those who suffer from disease, who struggle to make a living, who seek a brighter future through education.

If my friend's amendment is adopted, it would absolutely gut the heart of this bill. It would go far beyond what he intends to do.

His amendment assumes all discretionary items in the bill at 15.2-percent increase, but many items in this bill have increased far less. Quite a few do not have any increases at all, and taking a broad meat-ax approach to this bill would leave many of these programs stranded well below last year's level. It would be devastating.

Let me reel off what would happen. First of all, we just had a big tussle over drug funding. This amendment would be counterproductive to restoration of drug funding. It would drive us back in the direction that we came from. Biomedical research, cut by $1.25 billion. That means fewer grants, fewer grants for cancer research, slashed by over $260 million, and AIDS, over $250 million; maternal and child health care loses $90 million. Think of all those needy families, those children, who would not get food or medical care. Programs for the elderly slashed by over $120 million. Meals for low-income seniors reduced by $70 million, leaving thousands without a hot meal and some company. Education for the handicapped hacked by over $450 million.

The ADA is going to be signed into law by President Bush soon. Do we want to go back on our promise on helping the disabled now?

Mr. Chairman, I can go on and on with a litany of woe that this amendment would do. The chairman, the gentleman from Kentucky [Mr. NATCHER], and I have worked for many years on this bill. We are proud of our record. We do not earmark a dime in this bill. We have kept the faith with the people, with the good, solid programs that help our fellow citizens, and I hope that we will keep the integrity of this bill intact.

This Committee on Appropriations has been coming under severe criticism in the past couple of days. There is one way in which the House is out of whack in terms of fiscal reality. When people say that Congress spends too much, they think automatically of the Committee on Appropriations, and that is the fault. It is a knee-jerk reaction, and it is wrong.

Since 1981, nondefense discretionary spending has been shrinking in real terms. It has gone from $157 billion in 1982 to approximately $200 billion in 1990, $35 billion below the level necessary just to stay abreast of inflation.

Entitlements, on the other hand, largely in control of the committee of the proponent of this amendment, Ways and Means, are spiraling up, spending much faster than the rate of inflation. Entitlements have grown from just over $300 billion in 1981, to nearly $600 billion in 1990, $151 billion above the level necessary to keep up with inflation.

Similarly, when a document like the mid-session review comes out showing the deficit rising from $100 billion to $168 billion, the automatic reaction is to try to blame the additional spending on the Committee on Appropriations. Nothing, nothing could be further from the truth: $34 billion of the growth of the deficit is due to less revenue coming in than expected.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. CONTE] has expired.

(By unanimous consent, Mr. CONTE was allowed to proceed for 5 additional minutes.)

□ 1450

Mr. CONTE. Mr. Chairman, $39 billion is due to economic and technical reestimates, including $10 billion from interest rate effects: Higher expenditures for food stamps, Social Security, unemployment compensation, Medicaid, Medicare, FDIC Bank Insurance Fund; and so on.

Do you know how much of that $60 billion increase in deficits since January is attributed to the actions of the Committee on Appropriations in enacting a supplemental? $600 million. Sooner or later Members of this House are going to have to come to grips with reality and with the continuing cause of an out of control—out of control—deficit. It is uncontrolled entitlement spending, which is largely the responsibility of the proponent of this amendment.

Mr. Chairman, let me point out one other problem. Even when this House tells its authorizing committee to make savings in the reconciliation process, they do not do it. Last year's reconciliation bill was supposed to obtain $14 billion in savings, so much from the Committee on Ways and Means, so much from the Committee on Energy and Commerce, so much from the Committee on Merchant Marine and Fisheries, and so on.

Do you know how much in real recurring savings of the Congressional Budget Office estimates were actually achieved? $4 billion. $4 billion. Plus $4 billion out of the Committee on Appropriations through sequester, because other committees did not do their job.

Yet Members trot out here on the floor and keep slamming and slamming and slamming the Committee on Appropriations saying it is spending out of control.

Think about it. The biggest complaint we had from the administration on this bill here today was that we did not spend enough money. Sooner or later someone is going to wake up around here. You are kicking the wrong dog.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. CONTE] has expired.

(At the request of Mr. TRAXLER and by unanimous consent, Mr. CONTE was allowed to proceed for 2 additional minutes.)

Mr. TRAXLER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Michigan.

Mr. TRAXLER. Mr. Chairman, may I commend the gentleman from Massachusetts [Mr. CONTE] for what I consider one of the most accurate and finest statements that have been said this year on any appropriation bill by any Member of this House.

Mr. Chairman, I want to say that again. The gentleman from Massachusetts [Mr. CONTE] is to be commended for his truthfulness, his accuracy, and his insight into the appropriations process in the spending or misspending that has taken place in these 10 years.

I would only add two comments to what the gentleman has said. First, in the last 10 years defense has doubled from about $150 billion to slightly over $300 billion. A very significant impact on our deficit.

Second, I would point out that this body and the preceding President slashed taxes, increased defense, and cut the domestic spending, but to no avail in terms of a deficit because the taxes were down, defense was up, and even the dramatic cuts that the gentleman alludes to in the discretionary areas were not adequate enough to forestall the massive revenue shortfalls created by the two major problems that created the deficit, the major tax cut of the 1980's and, second, the massive defense buildup.

Mr. Chairman, I commend the gentleman from Massachusetts [Mr. CONTE] for his accuracy and his truthfulness.

Mr. CONTE. Mr. Chairman, reclaiming my time, I remember in 1981, we had a rescission bill from President Reagan. I think that rescission bill was around $13 to $14 billion. I have sat on that committee for 32 years. We never went along with rescission. That committee never went along with rescission. But we did. In 1981, the Committee on Appropriations rescinded $13 to $14 billion. Unfortunately, they sent up here a supplemental for $13 to $14 billion, and we put it all in defense. That would have been a great thing to say.

I am not one of these defense bashers, but I remember that incident. Now we have got to go over to the summit, and we are late.

Mr. Chairman, let me say that it is going to take a lot of guts and a lot of courage to walk out of that summit with a package. You are not going to do it with just discretionary funds. We will go along and we will make some cuts there. You are going to have to do it with entitlements, because if you do not do it with entitlements, you are going to destroy this Government. Entitlements are getting bigger and bigger and bigger every year. They consume more than half of the budget right now, and nobody wants to do anything about it.

I tell people who want you to sign a petition, no taxes, no cuts in entitlements, and everything else, don't put yourself in cement.

Mr. MICHEL. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I regret that because of our being tied up so much these days with summitry, I have not been over here on the floor supporting my friend, the gentleman from Minnesota [Mr. FRENZEL] in his efforts to cut spending from some of the appropriation bills. I would be quick to observe that while he serves on the Committee on Ways and Means, which has jurisdiction over many of the entitlement programs, if one looks at the voting record on that committee one will notice significant differences on the difference between the two sides as to whether to enact, cut, or restructure those entitlements. So I do no want to have the character of the author of this amendment demeaned in any fashion because of the outstanding service he has given across the board universally, uniformly, on this issue.

Mr. Chairman, as some of the older Members in terms of service will recall, I was for many years the ranking member of the subcommittee which brings this bill before us today. As those Members will further recall, more often than not I found myself speaking in opposition to my own subcommittee's recommendations, because I was in the minority, and I was not afraid to speak out that way, because that is what this debate is all supposed to be about on the floor of this House.

In today's climate, some might consider that an act of courage, or an act of foolhardiness. Back then it was neither.

Everyone knew where BOB MICHEL was coming from. They knew that he was opposed to excessive spending out of principle; that he had a right to oppose such spending and worked to reduce it. There were no recriminations, no threats, no warnings that because he sought to carry out his principles, he might lose projects in his district.

No, we agreed to disagree on the basis of comity. It thus pains me today to hear threats, not particularly concerning this bill, but in several of the previous ones we had several days ago, being bandied about that Members are endangering programs or projects of interest to them if they seek to challenge spending levels in the various appropriation bills, or that Members somehow feel intimidated if they do anything other than tow the line of the committee's recommendations.

Mr. Chairman, intimidation demeans this institution and undermines the democratic process. No Member should be fearful of carrying out his basic beliefs and principles.

With that said, Mr. Chairman, let me put on my old appropriator's hat and highlight what I believe are the excessive spending levels of this bill.

Total spending in the bill, as Members know, is $167.7 billion. It exceeds last year's level by $17 billion.

Now, if we could perchance in the summit freeze at last year's level across the board, you are talking about $17 billion right here. To be sure, about $12 billion of that increase represents mandatory spending, and thus shows the need, as members of the committee have said over the years, to do something about entitlements. The gentleman from Massachusetts [Mr. CONTE] made the case very well.

As a matter of fact, if we could reach the $12 billion savings in entitlements at the summit, I am sure we could get an overall deal within hours. But we are a long way away from that, even just considering the items in this bill alone. Probably the only place we are is half of that amount at the summit.

I agree that the Committee on Appropriations cannot itself get control of the entitlement process, but it can surely do something about discretionary spending. Unfortunately, in this bill, as in many of the others that have come before us thus far, we have not done all that we could do.

Discretionary expenditures in this bill exceed last year's level by $5.6 billion. That is an increase of 15 percent.

We all decry the big increases happening out there in the health care industry, as distinguished from what the increases are in the other segments of the economy. But we follow right along.

The bill exceeds the President's budget by $3.2 billion.

Mr. Chairman, how can we on the one hand have an ongoing summit with the task of coming up with a program to balance the budget, while on the other hand continue on our merry way with unrestrained spending of this magnitude? No wonder the public holds Congress in low esteem.

Obviously, much of the huge spending increase in the bill goes for meritorious causes. There is, for instance, a $1 billion increase for NIH. That is 14 percent.

Mr. Chairman, when I first served on this Committee on Appropriations way back when, NIH was funded at $200 million. With this increase this year it is up over $8 billion. It is hard to always have to argue against it.

The gentleman makes points about "Oh, you are voting against this, you are voting against that, you are voting against this." If you keep that up you will never make any progress.

Another $1 billion of additional moneys woud go to the education title I program, an increase of over 19 percent; $700 million of additional spending is earmarked for education for the handicapped, a 36-percent increase. That is significant. We passed an ADA bill catering to that area.

Vocational education gets a 26-percent increase. Student aid goes up by 11 percent.

Mr. Chairman, what I am saying here is that with inflation at 4 percent, yes, some of these probably ought to be increased. But I am talking about the exorbitant increases.

The CHAIRMAN. The time of the gentleman from Illinois [Mr. MICHEL] has expired.

(By unanimous consent, Mr. MICHEL was allowed to proceed for 2 additional minutes.)

Mr. MICHEL. Mr. Chairman, education research gets a whopping 40-percent increase. Back in the health field, the Centers for Disease Control get 13 percent.

Mr. Chairman, I am not denying that there are some legitimate needs out there.

□ 1500

But the rate of increases in a time, supposedly, when we are supposed to be restrained, causes me to raise the questions. These are just the double-digit increases that I have talked about. Most of the other programs in the bill would still receive single-digit increases, in excess of inflation or the current service level, and despite the merits of many of these programs there is no way we can provide increases of this magnitude and still move toward a balanced budget.

And if we get a summit agreement—and I emphasize "if"—all of these programs are going to have to be scaled back significantly. I think it is a serious mistake to give people false hopes of major program increases only to have them dashed in the end. Frankly, if we do not get agreement, I will tell you, brother, old sequester will do it and it will do it in spades, believe me.

Our most commonsense approach, as we have been saying for weeks, is to start at a low level and then raise spending if the funds are available, rather than do just the opposite as we have been doing.

Obviously, I would urge Members to support the distinguished gentleman from Minnesota in his effort to impose some spending restraint on this bill. I urge support for his amendment.

Mr. DURBIN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the appropriations process in the U.S. Congress is an interesting exercise in spending billions of dollars. Most of these billions of dollars are spent on projects that many of us will never see, parks we will never visit, space programs we will never see, even space-based telescopes which cannot see; water projects that will never touch our lives, programs and projects that affect so very few Americans.

But this bill and the programs included in this bill touch each and every one of us.

I wish the gentleman from Minnesota, a person whom I respect, and a gentleman of great conviction, could have been with me to visit the chapter 1 program in my district, to sit in the classroom with students who had fallen behind to the point where they were about to be held back and, because of the program which Mr. NATCHER and Mr. CONTE have funded in this bill, those kids got the extra help to resume their classroom education, to start over and to look forward with a bright future.

And I wish the gentleman could come with me to town meetings and meet so many working families with worried looks on their faces, asking me, "Congressman, how in the world can I get my son and daughter into college and pay for it on my income today?" Well, part of the hope, part of the promise contained in this bill, are the Pell grants that are available to help some of these students get the chance for college education.

Let me speak for a moment to the National Institutes of Health because it means so very much to everyone within the sound of my voice.

The gentleman before me, my friend and colleague from Illinois, referred to the early days when only $200 million was spent on the health research at NIH. Those days have certainly changed.

Let me tell you what has changed over the last decade: Medical researchers across America submit their ideas and proposals to the NIH, proposals for care and treatment and cure of cancer, health disease, Alzheimer's, the things that worry each and every one of our families.

Do you know, as taxpayers, that of all those that are submitted for approval, only one out of four will get funding from the National Institutes of Health to try to find that cure, that treatment, that hope.

Why only one out of four? Because we have not put the money into the National Institutes of Health; we put the money into the Pentagon for military research for 10 years. We put billions of dollars into B-2's, into tanks that will not run, into guns that will not shoot straight, and we think that that makes for a better America.

Well, some of us have a different vision about security and hope in the future. This bill speaks to that vision.

This bill adds $1 billion to the National Institutes of Health. They will double those health research grants, they will expand the opportunities to find these cures and treatments; they will give hope to so many people.

Sadly, this amendment by the gentleman from Minnesota takes every one of those dollars away and puts us back in the dark days of ignorance when it comes to health research.

This is not a fiscally conservative bill; this is a meat ax that cuts at the heart and soul of America.

This amendment condemns thousands of children to ignorance, it denies a college education to thousands of young men and women and, even worse, this amendment closes the door of hope, hope for so many American families who worry over illness and disease.

President Bush promised us a kinder and gentler America. I would ask the gentlemen on the Republican side of the aisle to cast their votes against this amendment and for reality of a kinder and gentler America.

Mr. DORNAN of California. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I want to take exception to some of those things that my friend, the gentleman from Illinois [Mr. DURBIN], just said. It is the kind of ancient rhetoric I did not think we would much hear in this Chamber after the collapse of communism in Eastern Europe. The Berlin Wall started to come down November 9, and I thought that given that event, which our military had such a large role in promoting, we would have given up beating up the military and those of us who supported a strong defense.

Mr. DURBIN is a good Congressman; he fought a good crusade to clean up the air on airplanes, and I will probably live 10 years longer because of it because I am a Californian who spends a lot of time on airplanes. But on this issue he is way out in left field, and I emphasize the left.

Mr. Chairman, I hope that 10 years is spent in this House setting the record straight on who won the cold war against communism. It wasn't the liberals, leftists, peaceniks, freeze freaks, or others of that ilk. It was mostly conservatives who had the courage to face the challenge of the Soviet Union head on.

And yet we still hear this bullstuff from my liberal colleagues about guns that don't shoot straight and planes that don't fly.

I do not know of any guns that do not shoot straight. Our guns shoot darned straight, straight enough to liberate Panama, to liberate Grenada, straight enough to hold back the Bear, the Communist monster that Gorbachev said killed more people than Hitler.

Why did communism kill more people than Hitler? They had more time. We shut down the Third Reich starting 50 years ago this year, in 12 years. Communism is still killing people in Angola; Communists are still rioting in the streets of Nicaragua, trying to tear up President Chamorro's government; Communists are still killing people in Afghanistan; Communists are still killing people on every continent on this planet.

Why attack the B-2 in this context? The B-2 is one of those technological marvels that never does serve on the line in the Strategic Air Command. It is one of those systems like strategic defense and the B-1 bomber and those missiles that we have in silos that finally taught the head Russian, Gorbachev, that they are not going to win the cold war, that this Nation does have the grit and the guts and the wherewithal with a total volunteer force, now 11-percent female, to stay the course and win the cold war.

And now we hear courageous Russians and courageous people from the other 134 ethnic groups in this strange country comprised of 15 so-called republics that are not republics at all; we hear them telling about the mass graves of hundreds of thousands of people. These are not graves exposed like the horrible graveyards left over from Hitler's six major extermination camps in Poland, but graves of hundreds of thousands of innocent men, women, and children murdered, with apartment buildings built over them.

Now, this cold war was fought by Congressmen on both sides of the aisle in this House who did not demagog defense issues, who were proud of our young men and women in uniform, whether they were drafted or not, whether they won half a victory in Korea so that there could be an Olympics in Seoul in 1988 and Hyundai cars sold all over this country, and who tried to keep half of Vietnam free. Someday those who are for a strong defense, peace through strength without apology, will see a free Vietnam and a free Angola and a free South Africa, and we will see a free Soviet Union before this century sees its close. If you want to see programs that don't work, take a look at the domestic portion of the budget that is loaded to the gills with special interest programs, corporate welfare programs, and socialistic programs that don't do what they are intended to do. This bill is chock full of them. But lay off defense.

Ms. PELOSI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this amendment and in strong support of the Labor-HHS appropriation bill for fiscal year 1991.

□ 1510

Mr. Chairman, I congratulate the gentleman from Kentucky [Mr. NATCHER] and the gentleman from Massachusetts [Mr. CONTE], who is the ranking member, and the members of the committee for their courage in bringing this very important legislation to the floor. In doing so, and by the statements of the chairman, the gentleman from Kentucky [Mr. NATCHER], and the gentleman from Massachusetts [Mr. CONTE], they have sent forth a very clear message that we intend to have an appropriation bill here that recognizes that the strength of our country is measured in the health, education, and well-being of our people. That is our strength, and that is why we are a model to the world.

I want to commend the committee, particularly for adding the nearly $700 million for the expansion of basic biomedical research projects at the National Institutes of Health. This research will make a major difference in the future health of our Nation. Some of my colleagues have spoken about the $1.7 billion for AIDS research. I would like to remind my colleagues that AIDS research at the NIH is not earmarked. The exact amount of AIDS-related biomedical research will be determined by the peer review system in place at the National Institutes of Health and the Alcohol, Drug Abuse and Mental Health Administration.

Really about a half of the $1.7 billion will go to research at NIH. Some of the remaining money is spent on AIDS and primarily used by CDC, which monitors the progress of the epidemic. This epidemic differs from other diseases in that it expands with each new infection, and its priority has to be assessed in the context of this being the major epidemic of the century.

I particularly want to address the concern expressed earlier by my colleague, the gentlewoman from Ohio [Ms. OAKAR], when she spoke of the need for a higher priority for research on breast cancer and compared the number of people who are suffering from breast cancer to the number of people suffering from AIDS. I certainly agree that a higher priority should be placed on the breast cancer. I would like to make the point, however, that basic AIDS, I repeat, basic AIDS research at the National Cancer Institute, like other basic research, is leading to major breakthroughs that have the potential to lead to a complete cure for breast and cervical cancer. This basic medical research is not only for AIDS but for other diseases, and will benefit all Americans in the long run.

As far as AIDS funding is concerned, I am particularly pleased that the committee has decided to fund mental health service demonstration programs and continue the very successful National Institute of Drug Abuse outreach program for preventing HIV infection among IV drug users, and expands on the highly successful cooperative treatment between the Centers for Disease Control and heavily impacted cities for prevention services.

Again, I commend the chairman and the ranking member and the members of the committee. I would like to make

special commendation to the gentleman from Illinois [Mr. DURBIN] for his work on the Committee on the Budget for the additional funds for NIH biomedical research and all the members of the committee for their continuing leadership on health issues. I urge my colleagues to support the bill, and again thank the members of the Committee on Appropriations for their courage in bringing this very important legislation to the floor.

Mr. NATCHER. Mr. Chairman, the debate on this bill I think has been excellent. We started at 10:22 this morning. I understand we have one other amendment. The gentleman from Minnesota [Mr. PENNY] will offer a 2-percent reduction amendment, and there might be another amendment or two. However, Mr. Chairman, at this time now, in all fairness to the Members of the House, I ask unanimous consent that all debate on the bill and amendments thereto cease no later than 4:30 p.m.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The CHAIRMAN. There is no objection to the request, and any amendments thereto shall be concluded by 4:30 p.m.

The question is on the amendment offered by the gentleman from Minnesota [Mr. FRENZEL].

The question was taken; the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. FRENZEL. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 85, noes 333, not voting 14, as follows:

[Roll No. 249]

AYES—85

NOT VOTING—14

Baker	Hawkins	Nelson
Craig	Leath (TX)	Solomon
Dannemeyer	Luken, Thomas	Stump
Dymally	McDade	Watkins
Edwards (CA)	Miller (WA)	

□ 1534

The Clerk announced the following pairs:

On this vote:

Mr. Stump for, with Mr. Hawkins against.

Mr. Dannemeyer for, with Mr. Dymally against.

Messrs. SHAW, STARK, and CLINGER changed their vote from "aye" to "no."

Messrs. KASICH, MOORHEAD, and STEARNS changed their vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. PURSELL. Mr. Chairman, Congress approved an annual appropriation bill in mid-July which includes health research funding—and the process by which those research dollars are apportioned has drawn criticism.

At the heart of the debate is the level of funding provided AIDS research, currently $1.6 billion per year. The appropriation bill approved by the House calls for $1.7 billion during fiscal 1991, more than triple the fiscal 1987 level of $502 million.

In May, some 1,000 AIDS activists protested outside the National Institutes of Health [NIH] in Bethesda, MD—the umbrella agency through which most of the research dollars are channeled. The NIH demonstrators, like those outside the recent economic summit in Houston, claim Government has been inattentive to AIDS. They believe more can and should be done.

There is no question the pain caused by AIDS is enormous. As a member of the House subcommittee charged with writing the annual health care appropriation, I recognize the devastation brought on by AIDS. I also recognize the need for ongoing research.

Each year my subcommittee receives testimony from AIDS researchers, doctors treating AIDS patients, AIDS patients themselves, and the family members of AIDS patients. There is little doubt the victims deserve our attention, compassion, and a portion of our health care research dollars.

But AIDS victims are not alone in their pain. We also hear from witnesses testifying about cancer, heart disease, Alzheimer's disease, stroke, lung disease, and the list goes on.

With limited research dollars available, policymakers such as myself must focus on priorities—priorities built on a comprehensive point of view rather than political pressure. We must balance the health needs of an entire population.

Unfortunately, many fail to recognize the comprehensive approach needed for health research—viewing AIDS as the preeminent health crisis, rather than as one of the many health problems which claim lives each year.

Commenting after the NIH protest, columnist Charles Krauthammer wrote in a June edition of Time magazine:

AIDS is now riding the crest of public support, won in the rough and tumble of politics. All perfectly legitimate, and a tribute to the passion and commitment of AIDS activists. But that passion turns to mere stridency when they take to the streets to protest that * * * society has been ungenerous and stinting in its response to the tragedy of AIDS. In fact, American society is giving overwhelming and indeed disproportionate attention and resources to the fight.

Concerned about the disproportion, I raised this point a year ago during debate over fiscal 1990 health research funding.

Speaking at that time, I pointed out that while the total number of AIDS-related deaths since 1981—now about 80,000—is devastating, cardiovascular diseases claim as many lives every 4 weeks. Yet, AIDS research funding exceeds the amount spent each year on heart disease—about $1 billion.

I also pointed out that Federal AIDS research funding now equals the amount spent annually on cancer research, despite the fact cancer claims some 500,000 lives a year, while AIDS claims less than 10,000.

From a different perspective, the leading cause of death in my own State of Michigan, like many other States, continues to be heart disease. In fact, Michigan has the Nation's highest chronic disease death rate—deaths caused by illnesses such as heart disease, stroke, diabetes, lung cancer, breast cancer, cervical cancer, colorectal cancer, or cirrhosis.

The more than 500 deaths per 100,000 population in Michigan caused by these chronic diseases compares with 5 deaths per 100,000 population for AIDS. Yet, funding for AIDS in Michigan from the Center for Disease Control [CDC] is second only to immunization funding. The CDC—which is a part of the health appropriation—reports its AIDS funding in Michigan exceeds chronic disease prevention by more than 40 to 1.

Since pointing out this growing disproportion a year ago, I have heard from many members of the national health research community. Most have expressed concern about the funding trend.

Researchers in all settings are feeling the effects of the shift—as funds and personnel increasingly are moving to AIDS-related projects, leaving vulnerable the other critical health research areas. Their voices, coming from NIH, hospitals, and universities are asking to be heard.

Last month, Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases—the lead AIDS institute—went on record concerning the AIDS funding trend.

Dr. Fauci said:

There is a disproportionate amount within the framework of what we're spending on biomedical research given to AIDS when you compare cancer and heart disease.

When the full record is reviewed, I believe the need to remove politics from the health research allocation process becomes apparent. As I said at the onset, policymakers must balance the health needs of an entire population.

The momentum of AIDS has pushed other health needs to the periphery. It's time we took a step back to regain our perspective and refocus our health research efforts based on priorities rather than politics.

Mr. OXLEY. Mr. Chairman, I rise to commend the gentleman from Kentucky [Mr. NATCHER] and the gentleman from Massachusetts [Mr. CONTE] for agreeing to restore the funding levels which President Bush asked for in the drug education, treatment, and prevention programs funded by this legislation.

Those of us who serve on the Select Committee on Narcotics Abuse and Control have heard a great deal of criticism regarding President Bush's drug prevention and education strategy. It has been suggested that the President's plan places too much emphasis on law enforcement and interdiction and not enough on drug treatment and prevention methods. The truth of the matter is that President Bush has requested record funding levels for drug treatment and education programs.

Unfortunately, the appropriations bill brought before the full House today would have cut over $230 million out of the President's treatment and prevention efforts. These programs are critical to the war on drugs. Without effective education, treatment, and prevention programs, an important aspect of our National Drug Control Strategy would be lost.

As approved by the Appropriations Committee, H.R. 5257 would have reduced the President's request for alcohol and drug abuse block grants by $100 million. In addition, drug treatment improvement programs, which serve adolescents, prisoners, and pregnant women, would have lost $35.5 million under this legislation, and the basic Federal program of direct aid to local communities, known as Community Partnership grants, would have received a budget slash of $41.6 million from the President's request. Finally, the Drug-Free Schools and Communities Program, one of the most beneficial drug education programs in the Nation, would have received a $54.3 million reduction from the administration budget request under the terms in H.R. 5257.

Mr. Chairman, the American people believe that the drug war is a national priority. Funding for this effort must be a priority for this Congress, so I am pleased that the President's budget request will be fully met.

AMENDMENT OFFERED BY MR. PENNY

Mr. PENNY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PENNY: Page 59, insert after line 20 the following new section:

SEC. 514. Notwithstanding any other provision of this Act, each amount appropriated or otherwise made available by this Act that is not required to be appropriated or otherwise made available by a provision of law is reduced by 2 percent, except that such reduction shall not apply to amounts appropriated or otherwise made available under title III for "COMPENSATORY EDUCATION FOR THE DISADVANTAGED", "EDUCATION FOR THE HANDICAPPED", "GALLAUDET UNIVERSITY", "STUDENT FINANCIAL ASSISTANCE", "HIGHER EDUCATION", "HOWARD UNIVERSITY", and "LIBRARIES".

(Mr. PENNY asked and was given permission to revise and extend his remarks.)

Mr. PENNY. Mr. Chairman, this amendment to the Labor-HHS appropriations bill calls for a 2-percent across-the-board reduction. The amendment would exempt only the following programs: Chapter 1—education programs, handicapped education, student financial aid, higher education funding, library assistance programs, and aid to two universities, Howard and Gallaudet, here in the District of Columbia.

In total, Mr. Chairman, this bill appropriates $170 billion. That represents a $17.3 billion increase over last year's spending levels. All in all, that constitutes a 12-percent increase in spending. These levels are $4.2 billion more than the budget request of the administration.

Mr. Chairman, if this amendment is agreed to, it is important to note that most programs in the bill will still receive a significant increase over current year levels. All in all, the Department of Labor is authorized for a 14-percent increase. After my amendment, they will still receive a 12-percent increase in their total budget. In this bill, the total budget for the Department of Health and Human Services is increased by 9 percent.

□ 1540

Even after my amendment of a 2-percent cut, there will be significant growth in funding for that Department.

Education programs in total increase 13 percent, but as I have indicated earlier, most of the critical educational programs have been exempted from the 2-percent cut called for in my amendment.

Let me highlight just a few other specifics within each of these Departments. Within the Department of Labor, employment and training program administrative funding would rise 8.4 percent in the bill. After my amendment, the increase would still be 6.4 percent.

Community service programs for employment of older Americans would increase 9 percent as called for in the bill, and would still rise by 7 percent after the effect of my amendment.

State unemployment services in the bill receive a 16.4-percent increase. They would still receive over 14 percent after my amendment.

Under the Department of Health and Human Services, the Centers for Disease Control are increased 13½ per-

cent in this bill. After my amendment, they will still increase 11½ percent.

The National Institutes of Health, a high-priority program certainly, they receive a 14.3-percent increase in this bill. They will still receive a significant 12.3-percent increase after my amendment is taken into account.

Just a couple more examples, Mr. Chairman. In related agencies, the Action Program for Operating Expenses is authorized a 9.1-percent increase in this bill. They will still receive a 7.1-percent increase after my amendment is adopted.

The National Labor Relations Board receives a 7.8-percent increase in this bill. After my amendment is adopted, they will still receive a 5.8-percent increase.

These increases, even after an amendment to cut, reflect the fact that this is not an amendment that cuts nearly as much as we all know we must in order to balance this Federal budget. But it is a start.

Mr. Chairman, furthermore, because the following programs are presently unauthorized, my amendment would not have an effect on funding for Head Start, vocational education, the Low-Income Energy Program, community service block grants, and certain health programs. Those are set aside. The money has been set aside for those programs. They are not affected by my amendment because they are not funded in this bill.

All in all, I have to admit that this 2-percent cut represents a very small cut out of a bill which is receiving a sizable increase, but it still represents a $540 million reduction in spending. Clearly this is $540 million we can afford to cut. This is not a hard hit. It is a soft touch, and I urge adoption of the amendment.

Mr. KASICH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the first thing I want to do is to pay tribute to the gentleman from Minnesota [Mr. PENNY], because the gentleman from Minnesota has been on the floor, he has been vigilant in his effort on all these appropriations bills to try to fashion a responsible and reasonable and I guess what you would have to define as a politically acceptable cut in all these programs to try to restore some fiscal sanity.

Now, 2 days ago we had a balanced budget amendment on the floor. Now, not all Democrats, but a great number of Democrats said, "We don't need to have this amendment because this is chicanery and trickery and what we really need to do is have the guts and the courage to stand up."

Yesterday the Republicans in the House passed a no-tax resolution, and they say we ought not to have any tax increase.

Now, yesterday we passed an agriculture bill that represents an 11½-percent increase in spending over last year's level, and there were less than 90 votes against an 11½-percent increase in spending.

Now, as a result of that, I have got to say to both sides, the Democrats who opposed the balanced budget amendment, shame on you because you did not stand for fiscal sanity and for tough choices, and shame on the Republicans who passed the no-new-taxes resolution and they vote for an 11½-percent increase in agriculture spending.

Now we have the gentleman from Minnesota [Mr. FRENZEL] offering an amendment that puts a freeze on discretionary spending for next year, and we have 83 people in the House who vote for a freeze in spending on discretionary programs that exempted all the entitlement programs, and we got 83 votes for it.

Now, for the people who are watching this proceeding today at home and here on the floor, this all has to be put into context of the fact that we are now in a budget summit where we are trying to say to the American people that we might have a little tax increase, and we are going to accompany it with spending cuts. That is like somebody who has been an alcoholic, who has been on a binge for the last month, saying, "Well, I have had all the drinking I care to do. Just pile all your booze in my house and I promise you I won't drink anymore."

Well, I would not bet the farm on the prospects of not drinking anymore, and I certainly would not bet much on the idea that Congress is going to be responsible when it comes to cuts.

We rejected the amendment of the gentleman from Minnesota, and Republicans were just as guilty as Democrats when it came to fiscal sanity.

Now the gentleman from Minnesota [Mr. PENNY] offers a 2-percent cut. I mean, come on, we can do 2 percent in discretionary programs. The gentleman has exempted half the bill under his proposal. Can we not just do one thing here that gives some people who are observing this Congress a little bit of a reason to be hopeful that maybe some day we are going to put the country ahead of our own parochial interests?

It is just a 2-percent cut, a 2-percent solution. Why not go ahead and adopt this amendment? Maybe we can leave here feeling a little better about ourselves, knowing we really failed the first time around, but maybe we did a little bit better.

Again, I want to compliment the gentleman from Minnesota. I do this because I am pleading with the House to try to live up to what our responsibilities are here.

I want to make one final comment. The New York Times wrote a story the other day after the Houston summit. The story said that Helmut Kohl had emerged from George Bush's shadow and was casting a shadow of his own because of the economic power of Germany. Do you know what that means? That means that perhaps in my lifetime America could be reduced to a second-class power because we spent ourselves into bankruptcy.

For those who see those early warnings and want to do something about it, let us support the amendment of the gentleman from Minnesota [Mr. PENNY]. Let us make just a modest savings so that we can all go home this weekend and think we are getting on the right track.

Mr. CONTE. Mr. Chairman, will the gentleman yield to me?

Mr. KASICH. I yield to the gentleman from Massachusetts [Mr. CONTE], our great baseball coach.

Mr. CONTE. Mr. Chairman, I just want to make one observation. The gentleman alluded to it. He mentioned that 83 or so voted for the last amendment, which excluded entitlements.

There lies the problem. If you look at the budget since 1981, you will find that it has gone from $150 billion in discretionary funds to a little under $200 billion in 1990. That is $35 billion below inflation in discretionary funding.

Now, entitlements have grown from over $300 billion in 1981, to more than $600 billion in 1990, $151 billion above inflation. There lies the problem.

Mr. KASICH. Mr. Chairman, I appreciate what the gentleman has pointed out.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(At the request of Mr. DOWNEY, and by unanimous consent, Mr. KASICH was allowed to proceed for 3 additional minutes.)

Mr. KASICH. Mr. Chairman, I would like to say to a guy I love, the gentleman from Massachusetts [Mr. CONTE], a fantastic person, that in one of the budgets I am trying to put together, I have got Medicare reform.

□ 1550

What does that now mean? What I think we ought to do is we ought to have some reasonable tort reform in this country. We ought to be able to lower the liability risks that people in the medical community have in an effort to lower malpractice rates to prevent the continued practicing of defensive medicine which some have told me accounts for a quarter of the cost. I mean, that is a basic effort that we ought to make that can help us to save some of our problems without taking it out of the hides of Medicare recipients and will allow providers to have relief, too, while we are making some reductions. That, I think, makes sense.

The gentleman from Massachusetts points out something that needs to be addressed. All I am trying to say though is I think this is a reasonable approach to the problem, and I hope we will go ahead and support it.

Mr. NATCHER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, if this amendment is adopted, in the Job Corps we will have an $18 million reduction. As far as summer youth employment is concerned, in the city of Chicago, New York, Los Angeles, San Francisco; summer youth employment, we would have, Mr. Chairman, a $13 million reduction. If this amendment, Mr. Chairman, were adopted, in the older workers' employment program, we would have an $8 million reduction. Dislocated workers' assistance program would have a $10 million reduction. AIDS, one of the major problems not only in this country, but around the world, think about it, 2 percent, but on AIDS there would be a $34 million reduction, $34 million. National Institutes of Health would be a $166 million reduction. As far as the Cancer Institute is concerned, there would be a $34 million reduction.

Mr. Chairman, as I said a few moments ago, 500,000 people a year are dying of cancer, and you want to cut it $34 million. Research on heart, lung, and blood diseases, $22 million. The Aging Institute, $5 million; and the homeless program, if you adopt this amendment, it reduces it by $2 million.

Mr. Chairman, mental health research, there would be a $10 million reduction. Medicare contractors, there would be a $31 million reduction.

In the Social Security Administration, which is in this bill, we have worked diligently now for a period of 3 years to bring the number of employees up so the claims could be processed. In this bill we have a 1,500-employee increase for Social Security. If this amendment is adopted, that 1,500 would drop out and, in addition, another 1,000 would be eliminated bringing it down 2,500. That is what your 2 percent would do.

Mr. Chairman, as far as the programs for the aging are concerned, $16 million. As I said on the other amendment, here in this country in the centers are these people at noon, men and women with pride, men and women that are hungry. They need help. They go into these centers to get something to eat at noon. You take this amendment, Mr. Chairman, as far as the program for the aging is concerned, and you would cut it $16 million.

Mr. PENNY, you are one of the able young Members of this House. Down deep in your heart you do not want to cut that program by $16 million. You do not want to do it, not for these people that need help, that have pride and carry themselves erect. They go in to get something to eat. Knowing you like I do, Mr. PENNY, you are one of the good Members of this House. You do not want to cut that program $16 million.

Mr. Chairman, let us turn this amendment down.

Mr. WEISS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition to the amendment and in support of the bill.

This bill is truly the stuff of America. This is a bill where we put some real meaning into the President's phrase about a kinder and gentler America.

I, for one, am pleased that the committee increased funding for several important programs. When we give money to programs such as chapter 1 Student Aid, Foster Care, Adult Literacy, Job Corps, and Summer Youth Employment we are not wasting money. We are investing it in America.

But in one particular area, the dollars invested are not keeping pace with the problem we want to solve. I am speaking of the money appropriated for AIDS.

I remind my colleagues that this disease is still of epidemic proportions in the United States. The reported number of cases of people with AIDS has risen to 140,000; 85,420 people have died of AIDS. In 1989, 22,000 people, just 1 year, 22,000 people died of AIDS. That is above the number for 1988, when almost 19,000 people died of AIDS. The epidemic is raging.

Transmission of HIV continues unabated, and there is no cure in sight.

What is even more distressing, increasing numbers of people infected with AIDS are in need of care, but AIDS prevention programs, community health care, and many other AIDS programs were funded in this bill only at the level of the President's request, and this amendment seeks to cut money for that program to an even greater extent.

Mrs. BOXER. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I am happy to yield to the gentlewoman from California.

Mrs. BOXER. Mr. Chairman, I just want to support what the gentleman says. I am very hopeful that the reserve fund that the committee has set aside of $2.9 billion will be used to meet the dollar amounts that the Committee on the Budget, $2.3 billion, that we set aside, and we just want to conclude by saying to the gentleman that I want to thank him for his remarks.

Mr. Chairman, I also want to thank the chairman, the gentleman from Kentucky [Mr. NATCHER], for his remarks. When someone gets up and says: "Cut 2 percent across the board with a few exceptions," we do not really know what it means, but when the gentleman from Kentucky [Mr. NATCHER] explains what it means and when the gentleman explains what it means to the people of this country, it comes alive, and I join the gentleman in his comments on the AIDS issue.

Mr. WEISS. Mr. Chairman, I thank my colleague for her comments, and I, too, want to join in expressing appreciation to the gentleman from Kentucky [Mr. NATCHER] for the work that he has done.

Mr. Chairman, as regards AIDS, this bill does not provide sufficient resources to start with to fight what, indeed, is a forest fire of an epidemic.

Overall, this appropriation bill might be renamed the Aid-to-America bill. It helps support the elderly, the disadvantaged, the handicapped, children, the sick. Quite simply, it helps the most vulnerable citizens of our society.

More than supporters of flag burning legislation, supporters of this bill are the true patriots of this country. More than issuing political salvos about helping Americans, this bill actually does something.

Again, I want to commend the distinguished chairman, the gentleman from Kentucky [Mr. NATCHER].

Let me say one final thing about entitlements. There seems to be acceptance of the fact that entitlements have grown too high. Where do you want to cut? Do you want to cut Medicaid? Do you want to cut Medicare? Do you want to cut Social Security which is already taking in more money than it is paying out? Do you want to cut aid for students? It seems to me many of the programs that have gone up, entitlement programs, have gone up because during the course of the Reagan-Bush administration poverty levels have increased, and as poverty goes up, the entitlements go up.

Let us do something about curing poverty and maybe we will start cutting back on the entitlements automatically.

□ 1600

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as always, the gentleman from Kentucky [Mr. NATCHER] is very effective in what he has to say about the bill he brings to the floor. The gentleman is greatly admired in this body, and we know he speaks with sincerity on the cuts that he was talking about. But I think that it is important for us to let the American people know that we do understand that we deal in a never-never world when we talk about cuts of that type.

The gentleman, of course, was talking about cuts from the bill that is before us. He was not talking about cuts from the present programs. In fact, each of the present programs that he talked about will be increased

under this bill, even if we pass the Penny amendment. Every one of those programs that he talked about will go up in cost, not down, and will go up in its ability to serve the people, not down. It is a case of how much you want the programs to rise.

Mr. Chairman, when I talk about a never-never world, this is like someone out in the country who is making $20,000 a year and has a wish list that says he would like to go to $30,000 a year, but their employer only gives them $25,000, only gives them a $5,000 raise, and for them to come back and say, "You have cut me $5,000."

That is the kind of debate we are having here. They in fact got a $5,000 raise, and they consider it a $5,000 cut.

Mr. Chairman, that is how we deal in this Congress. That is the never-never world in which we operate. The cut of the gentleman from Minnesota [Mr. PENNY] allows in this bill a total of a 13-percent increase in the programs across the board. Not to support the Penny amendment is to suggest that we think we can go on forever spending at rates well beyond the ability of the economy to sustain it.

Mr. Chairman, I would hope that we could support at least a 2-percent cut.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota [Mr. PENNY].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. PENNY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 160, noes 253, not voting 19, as follows:

[Roll No. 250]

□ 1621

The Clerk announced the following pairs:

On this vote:

Mr. Craig for, with Mr. Dymally against.

Mr. Stump for, with Mr. Owens of New York, against.

Messrs. HAWKINS, TORRES, and ROSTENKOWSKI changed their vote from "aye" to "no."

Mr. LAUGHLIN changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. MILLER OF CALIFORNIA

Mr. MILLER of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MILLER of California:

On page 12, line 8, strike $132,788,000 and insert $130,788,000.

On page 31, line 12, strike $82,250,000 and insert $79,416,000.

On page 46, line 14, strike $331,000,000 and insert $329,000,000.

The CHAIRMAN. The Chair notes that we have 8 minutes remaining, and the time will have to be equally divided between the proponents and the opponents of the amendment.

The gentleman from California [Mr. MILLER] will be recognized for 4 minutes, and the chairman of the committee, the gentleman from Kentucky [Mr. NATCHER], will be recognized for 4 minutes.

Mr. CONTE. Mr. Chairman, I ask unanimous consent to increase the time to 15 minutes, giving 5 minutes each to the gentleman from Illinois [Mr. RUSSO] and the gentleman from California [Mr. MILLER], and 5 minutes to the gentleman from Kentucky [Mr. NATCHER]. In other words, we would be increasing the total to 15 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. KOSTMAYER. Mr. Chairman, I object to the request of the gentleman from Massachusetts.

The CHAIRMAN. Objection is heard.

The gentleman from California [Mr. MILLER] will be recognized for 4 minutes, and the gentleman from Kentucky [Mr. NATCHER] will be recognized for 4 minutes.

Mr. MILLER of California. Mr. Chairman, there has been a great deal of debate over the last several days as we brought appropriation bills to the floor about the level of cuts, and whether or not these appropriation bills are exorbitant, overbudget, overinflation, and various standards have been used.

In fact, I believe that the Committee on Appropriations has done a very responsible job in meeting the needs and the desires of not only this Congress but the people of the United States. This is an amendment to reduce each of the Secretaries' offices within this appropriation bill, by $2 million. These Secretaries have each come in, in some cases ask for 16-percent increases, for 20-percent increases, and in some cases for an increase even above that. The Committee on Appropriations has taken them back for 8 percent. We had a minority Member on the floor here a few minutes earlier suggesting it was outrageous that some of the programs for the poor, the handicapped, discretionary spending, was above the rate of inflation. This would take the Secretaries' offices to essentially freeze their administrative expenses at what they were last year.

I think it is fair. It does require that we cut back the programs that serve the people in need of this country. It simply reduces the rate of growth within the Secretaries' office.

Mr. Chairman, I yield to the gentleman from Illinois [Mr. RUSSO].

Mr. RUSSO. Mr. Chairman, there are two types of spending. One is for people in need, and the other is for the bureaucracy. What we are trying to do here is cut the bureaucracy. They can live on last year's level.

For example, the Secretary of HHS' budget last year was $79 million. This year they want to increase it to $82,252,000. This is the administrative side. They can live with a $2,834,000 cut. In the Department of Labor, they can live with the same number. The Department of Education got a $57 million increase, a lot of it needed, but they can afford to take a $2 million cut in the administrative costs.

This does not affect people programs at all. This affects the administrators, the bureaucrats, the bureaucracy, the redtape in this Government. Therefore, we should all join together, Democrats and Republicans alike, walk hand in hand, cutting these administrative costs.

Mr. MILLER of California. Mr. Chairman, I would hope the Members would support this effort to make these reductions.

Mr. NATCHER. Mr. Chairman, I yield 3 minutes to my distinguished friend, the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Chairman, I oppose the Russo-Miller amendment. These gratuitous potshots are getting out of control. After 6 months of work, lots of testimony by the Members of the House, agency officials, and outside witnesses and hundreds of folks working countless hours to develop a good bill, this exercise now has been reduced to hit squad amendments attacking the programs that run these three agencies in the Government.

You have to be kidding, cutting the budget for the Secretary of Education, Secretary of Labor, and the Secretary of Health? What is the use of having good programs like chapter 1, Handicapped Education, Biomedical Research; and job training if there are not enough good people to administer these programs? I think we have reached the point where enough is enough. Let's quit playing games here, and get on to the business at hand; providing for the education, health, and safe employment of all Americans.

This is America's bill, as I said earlier today. Let's send it to America without any further distractions. I resent, I resent the antagonism directed to three great friends of mine, the Secretary of Labor, Mrs. Dole; the Secretary of Health, one of the finest men I have known for many years before he came to Washington, Dr. Lewis Sullivan; and Lauro Cavazos, the Secretary of Education, one of the best education leaders the United States has ever had. All are solid, committed ex-public servants, doing very difficult jobs. So what happens to them, just to get on the rollcall as being against all other cut amendments these fine people get attacked. Sure the Members get on the rollcall and can say, "I voted for a cut." But did they cut? They cut three of the finest people in Government. As any Member who knows and has worked with Dr. Sullivan, he is an outstanding medical man, an outstanding man doing a great job here at HHS. I know because I got the President's Medal from his medical college down at Georgia. Elizabeth Dole and Lauro Cavazos are wonderful persons. We are lucky to have them working for us. I think it's abominable that, just for "cover," these amendments were introduced. It is A cover against the wrong thing and against the wrong people. I resent it. Let the Members have their rollcall. I will get murdered on this thing but that is all right. At least I know I've acted responsibly.

Mr. RUSSO. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. RUSSO. Mr. Chairman, I just want to point out that we are not attacking the Secretaries, but when we look at their budget of $331 million, cutting them to $329 million, I do not see any crocodile tears for $329 million.

□ 1630

Mr. CONTE. Mr. Chairman, I say to the gentleman, yes, you are hitting against three good people, they are their programs so that is what you are doing.

The CHAIRMAN. The time of the gentleman from California [Mr. MILLER] has expired.

The gentleman from Kentucky [Mr. NATCHER] has 1 minute remaining.

Mr. NATCHER. Mr. Chairman, I yield myself my remaining time.

Mr. Chairman, for a period of 35 years I have served on this committee. I have been chairman of this subcommittee for a period of 11 years.

This bill contains a lot of money. It is money that means more to people of this country than any other bill that is presented. All down through the years, I say to the Chairman of the Committee of the Whole, you and all the other Members of this House have helped us. That is the reason we have been successful.

I am against this amendment. This amendment should be turned down. Not a single amendment has been adopted today other than the committee amendment, as far as money reductions or additions are concerned.

This is a good bill, Mr. Chairman. The gentleman from California [Mr. MILLER] is a friend of mine; the gentleman from Illinois [Mr. RUSSO] is a friend of mine also. Mr. Chairman, I say to these gentleman, let us not do that to this bill. Let us not do that to these three Departments. As my friend, the gentleman from Massachusetts [Mr. CONTE], has said, Dr. Sullivan is trying to make a good Secretary, Mrs. Dole is doing the same, and Dr. Cavazos is an outstanding man.

Mr. Chairman, this amendment should be defeated.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from California [Mr. MILLER].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. RUSSO. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken; by electronic device, and there were—ayes 204, noes 212, not voting 16, as follows:

□ 1648

Messrs. GALLO, MFUME, SAXTON, MARKEY, and DYMALLY changed their vote from "aye" to "no."

Messrs. VOLKMER, HEFNER, CLARKE, TAYLOR, NIELSON of Utah, and LAUGHLIN changed their vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1650

Mr. NATCHER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, before making the motion that the Committee do now rise, I want the Chair to know that I and all the rest of the members of the committee appreciate the excellent manner in which the Chair has presided over this bill.

Mr. Chairman, I want the Chair to know that we appreciate it. The gentleman is one of the best Members of this House and we appreciate the way the gentleman has handled this bill. He is especially skilled when he presides over the House and we want him to know we appreciate his effort.

The CHAIRMAN. The gentleman is very generous, and the Chair thanks the gentleman.

Mr. NATCHER. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to, and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. VENTO) having assumed the chair, Mr. SHARP, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5257) making appropriations for the Department of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1991, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection .

The SPEAKER pro tempore. Is a separate vote demanded on any amendment? If not, the Chair will put them engross.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

RECORDED VOTE

Mr. CONTE. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 359, noes 58, not voting 15, as follows:

□ 1710

The Clerk announced the following pairs:

On this vote:

Mr. Nelson of Florida for, with Mr. Craig against.

Mr. Owens of New York for, with Mr. Dannemeyer against.

Mr. Waxman for, with Mr. Stump against.

Mr. Thomas of California for, with Mr. Denny Smith against.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. NATCHER. Mr. Speaker, I ask unanimous consent to insert in the RECORD at this point a detailed table showing the amounts provided for in H.R. 5257, the bill just passed, with appropriate comparisons.

The SPEAKER pro tempore (Mr. VENTO). Is there objection to the request of the gentleman from Kentucky?

There was no objection.

H.R. 5257—FISCAL YEAR 1991 APPROPRIATIONS FOR THE DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION, AND RELATED AGENCIES

40/ Excludes $80,250,000 in legislative savings proposed for later transmittal.

41/ Excludes $58,300,000 in legislative savings proposed for later transmittal.

PERSONAL EXPLANATION

Mr. NELSON of Florida. Mr. Speaker, had I been present I would have voted "nay" on rollcall No. 247, No. 248, No. 249, No. 250, and No. 251.

PERSONAL EXPLANATION

Mr. McDADE. Mr. Speaker, I was unavoidably absent due to a family illness, I did not vote on rollcall votes 247 to 252. Had I been present, I would have voted for final passage of H.R. 5257, the Labor, Health, Human Services, Education appropriations for 1991.

PERSONAL EXPLANATION

Mr. MILLER of Washington. Mr. Speaker, I was unable to be on the House floor when the House voted on H.R. 5257, the Labor-Health and Human Services-Education appropriation for fiscal year 1991. Had I been Here, I would have voted:

"Yea," on the Natcher en bloc amendment;

"Nay," on the Brown amendment;

"Nay," on the Walker amendment;

"Nay," on the second Walker amendment;

"Nay," on the third Walker amendment (rollcall No. 247);

"Nay," on the fourth Walker amendment (rollcall No. 248);

"Nay," on the Frenzel amendment (rollcall No. 249);

"Yea," on the Penny amendment (rollcall No. 250);

"Yea," on the Miller of California amendment (rollcall No. 251); and

"Yea," on final passage for the fiscal year 1991 Labor-Health and Human Services-Education appropriation, H.R. 5257 (rollcall No. 252).

PROVIDING FOR CONSIDERATION OF H.R. 5170, AVIATION SAFETY AND CAPACITY EXPANSION ACT OF 1990

Mr. FROST. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 428 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 428

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5170) to amend the Airport and Airway Improvement Act of 1982 to authorize appropriations for fiscal years 1991 and 1992, to improve aviation safety and capacity, to reduce the surplus in the Airport and Airway Trust Fund, to authorize the Secretary of Transportation to grant authority for the imposition of airport passenger facility charges, and for other purposes, and the first reading of the bill shall be dispensed with. All points of order against consideration of the bill for failure to comply with the provisions of clause 2(l)(6) of rule XI are hereby waived. After general debate, which shall be confined to the bill and which shall not exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider an amendment in the nature of a substitute recommended by the Committee on Public Works and Transportation now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be considered by titles instead of sections and each title shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of clause 5(a) of rule XXI are hereby waived. It shall be in order to consider the amendment printed in the report of the Committee on Rules accompanying this resolution, if offered by Representative Roe of New Jersey, or his designee. Said amendment shall be debatable for not to exceed thirty minutes, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science, Space, and Technology, and all points of order against said amendment for failure to comply with the provisions of clause 7 of rule XVI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Texas [Mr. FROST] is recognized for 1 hour.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 428 is an open rule providing for the consideration of H.R. 5170, the Aviation Safety and Capacity Expansion Act of 1990. The rule waives clause 2(l)(6) of Rule XI, the 3-day layover requirement, against the consideration of the bill and provides 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation.

The rule also provides that when the bill is considered for amendment under the 5-minute rule, that it shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Public Works and Transportation, which is printed in the bill, as original text for the purpose of amendment. House Resolution 428 also provides that the substitute shall be considered by titles instead of by sections and that each title shall be considered as having been read. To remedy a technical rule violation in the substitute, the Committee on Rules has included in the rule a waiver of all points of order against the substitute for failure to comply with the provisions of clause 5(a) of rule XXI which prohibits the inclusion of appropriations in an authorization bill.

House Resolution 428 provides for the consideration, if offered, of an amendment by Mr. ROE of New Jersey, or his designee. All points of order against the Roe amendment for failure to comply with clause 7, rule XVI, the germaneness rule, are waived in the rule and the rule provides that the Roe amendment shall be debatable for 30 minutes with the time equally divided and controlled by the chairman and ranking minority member of the Committee on Science, Space, and Technology. The text of the Roe amendment is printed in the report accompanying House Resolution 428.

Finally, Mr. Speaker, the rule provides that at the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted and that any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

Mr. Speaker, H.R. 5170 seeks to address the crowded conditions of the Nation's airways by allowing increased spending of new revenues from the unspent balances in the airport and airways trust fund. The bill authorizes a total of $13.2 billion in trust fund spending over the next 2 fiscal years. Of this amount, the bill authorizes $1.8 billion for the Airport Improvement Program in fiscal year 1991 and $1.9 billion in fiscal year 1992; and $2.5 billion in fiscal year 1991 and $3 billion in fiscal year 1992 for modernizing the air traffic control system. The bill also authorizes airports to charge a new passenger facility charge. The funds raised from the new PFC must be used for purposes which are certified as enhancing the air transportation system or promoting competition.

Mr. Speaker, House Resolution 428 is an open rule which will allow the offering of any germane amendment to the substitute and to the Roe amendment. Because the reported bill does contain an agreement to increase spending from the trust fund, the Committee on Rules did not, however, make in order an amendment which would remove the trust fund from the unified budget. The committee believes this rule is a fair rule and will present the House with the opportunity to fully debate the concerns we all share about the current state of our airways and airports. For that reason,

I urge my colleagues to adopt this resolution.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the able gentleman from Texas [Mr. FROST] has explained the provisions of the rule in a very expert manner, and I shall not repeat that.

I would like to commend the chairman and ranking Republican member of the Committee on Public Works and Transportation, the gentleman from California [Mr. ANDERSON] and the gentleman from Arkansas [Mr. HAMMERSCHMIDT] for their leadership in producing this legislation. The number of airline passengers has increased from 276 million in 1978 to 480 million in 1989, and we need to expand the facilities in order to accommodate the increasing passenger load.

There is a large surplus in the airport and airway trust fund, and under the provisions of this bill new revenues coming into the fund can be fully spent and the surplus gradually drawn down to meet the needs of the traveling public.

During the Rules Committee meeting on this legislation the gentleman from California [Mr. MINETA] and the gentleman from Ohio [Mr. MCEWEN] sought a waiver of points of order to allow them to offer an amendment to take the airport and airway trust fund off budget, so that the accumulated funds could be used for the improvement of airports. This is the purpose for which the funds were collected in the first place. I think the House should have had an opportunity to consider this issue, but the votes were not there.

Even so, this legislation contains many provisions which will improve our air transportation system. The administration has sent a statement of policy in support of the bill.

□ 1720

The rule before us now is an open rule which will allow the House to make any necessary improvements in the bill. Therefore, I support this rule so that the House can get down to business and complete action on the Aviation Safety and Capacity Expansion Act.

Mr. Speaker, I would like to call attention to one important provision in the bill, which is the auxiliary flight service station program. It provides as follows:

> The Secretary of Transportation shall develop and implement a system of manned auxiliary flight service stations. The auxiliary flight service stations shall supplement the services of the planned consolidation to 61 automated flight service stations under the flight service station modernization program. Auxiliary flight service stations shall be located in areas of unique weather or operational conditions which are critical to the safety of flight.

Mr. Speaker, that is a very important provision and the flight service station in my district fits into the category described.

Mr. Speaker, I urge adoption of the rule and the bill when it is debated.

Mr. Speaker, I yield 5 minutes to the gentleman from Ohio [Mr. MCEWEN].

Mr. MCEWEN. I thank the gentleman for yielding.

Mr. Speaker, let me say that I rise a little bit disappointed in this bill here today because my colleague from California and I appeared before the Committee on Rules to request an amendment to protect the aviation trust fund would be ruled in order during consideration of this legislation. As you know, this request was denied, and we cannot offer the amendment here today. I know many of you are disappointed here—and I share that disappointment—that you will not have the opportunity to vote on this amendment.

However, I am hopeful that sometime in the near future the House will be permitted to work its will and take the proposed amendment under consideration.

The amendment to which I referred was an effort to take the aviation trust fund out of the unified budget. I believe this currently is unfair when it suffers under the limitations placed by the Committee on the Budget and the Committee on Appropriations to deny the use of those funds that have already been committed for the purpose of improving our airports and airways. This is the right thing to do. It is what we need to do in order to ensure a safe and effective air travel system for the future. And we need to take this action as soon as possible.

Be assured that at every opportunity, the very next chance that I will have to make this amendment, that I will do it again. I will be here making the same speeches and asking for your support once again.

In the meantime, I wanted to take this opportunity to thank all of the Members of Congress, the national associations, industry representatives and individuals who care about the fate of air travel for their support and their commitment to this issue. Your efforts were terrific, and I am grateful for all you have done.

In particular, I would like to say a special thanks to those groups that made the countless phone calls and letters to congressional offices, such as the National Conference of State Legislatures, the Associated General Contractors, the Associated Builders and Contractors, the American Road and Transportation Builders Association, Aircraft Owners and Pilots Association, the National Stone Association, the American Association of State Highway and Transportation Officials, the Association of Consulting Engineers, the American Trucking Association, and all the others who were so invaluable in our trust fund education effort, but which are simply too numerous to name.

Let me also, if I may, Mr. Speaker, submit copies of a few of the many letters of support which have been mailed in recent days in support of our amendment, which as I said would take the trust fund out of the unified budget, which they were added into in 1969 in an effort to camouflage the total amount of money flowing into the Federal budget as opposed to that which is flowing out, a very disastrous mistake for all of these dedicated trust funds.

Mr. Speaker, as you know, when a person purchases an airline ticket, 8 percent of the cost of that ticket goes into the airway and airport trust fund.

When a person buys gasoline, 9 cents goes into the surface transportation trust fund. Ostensibly, these funds are to be used to build airports, to keep our airways safe, to build highways to keep our highways safe. However, in recent years, the Congress has refused to use those moneys that have been available.

There is now over $14 billion in the airway trust fund. This bill, while it will attempt to spend it down somewhat, will not really begin to touch that reserve that is available.

Mr. Speaker, I believe this is a travesty, this is a mistake, a denial of the trust for which we established the trust funds.

I believe the time has come for us to do what we know is right and that is to release these funds because they are sorely needed.

One need not be a rocket scientist to understand the condition of our highways and our bridges; 40 percent of our bridges which are unsafe and in need of repair. We could go on and discuss the fact that the number of the traveling public for airways, air passenger travel has more than doubled in the last 12 years. Yet we have not built a single new airport in that time, while this money is sitting there accumulating, gathering moss, sitting there unused for the purpose for which the taxpayers paid it.

I believe we should, at the first opportunity, allow those funds to be released. My amendment would have done that. I was joined by my distinguished colleague, the gentleman from California, the former chairman of the Subcommittee on Aviation, Mr. MINETA. As I said, we were denied that opportunity.

So I thank my colleagues for their expressions of support. I do believe we have the numbers that at the time that the bill is permitted to come to the floor it will pass.

Now, in discussion of the bill, H.R. 5170, I think it is appropriate to congratulate the chairman of the Sub-

committee on Aviation and the ranking member from Pennsylvania. Much will be said during general debate on that. I will take the floor again to express the great work that has been done.

In that regard, this bill is appropriate, but I do rise to express my disappointment that the people of this House were not permitted this excellent opportunity to release the trust funds to keep our airways safe.

There may come a time very shortly in which we will see, because of antiquated FAA equipment, because of air traffic controllers using outdated equipment which has long since been surpassed by improvements in technology, because they were denied access to the funds already there, that we will have an air tragedy. And when we do that, I think we will regret this moment.

I submit the following letters for the RECORD:

AIRCRAFT OWNERS AND PILOTS ASSOCIATION,
Frederick, MD, July 11, 1990.

Hon. BOB MCEWEN,
U.S. House of Representatives,
Washington, DC.

DEAR REPRESENTATIVE MCEWEN: The Aircraft Owners and Pilots Association represents 300,000 general aviation pilots who pay substantial fuel taxes into the Aviation Trust Fund. Our members pay these taxes with the understanding that they will be used for the capital improvement of this country's airport and airway system—not to offset the federal budget deficit. We urge you to keep faith with users by supporting the Mineta/McEwen off budget amendment to H.R. 5170, the Aviation Safety and Capacity Expansion Act of 1990.

Congress created the Aviation Trust Fund in 1970 as a dedicated fund intended to pay for the capital development needs of the aviation system. Since that time, however, the Aviation Trust Fund has been held hostage to the nation's rising deficit. In fact, an assistant secretary of DOT recently admitted to Congress that spending down the trust fund was impossible because "we could not ensure that we will meet our deficit reduction targets." Seven billion dollars now sits unobligated in the Aviation Trust Fund, and the total balance exceeds $14 billion. Yet the Administration proposes to increase aviation fuel taxes by another 25% with no hope of spending down the unobligated balance. AOPA finds that action unconscionable!

The Mineta/McEwen amendment will help restore faith with the taxpayers. Taking the Aviation Trust Fund off budget will allow the fund to be spent for its intended purpose, the improvement of this nation's aviation infrastructure. The need clearly exists. It's time to apply a little "truth in budgeting" and free the Aviation Trust Fund.

Thank you for considering our views.

Sincerely,

JOHN L. BAKER,
President.

NATIONAL CONFERENCE OF STATE LEGISLATURES,
Washington, DC, July 3, 1990.

Hon. BOB MCEWEN,
U.S. House of Representatives,
Washington, DC.

DEAR REPRESENTATIVE MCEWEN: On behalf of the National Conference of State Legislatures (NCSL), I strongly urge you to support efforts to remove the Airport and Airway Trust Fund from the unified federal budget. NCSL is joined in this endeavor by those organizations cosigning the attached Joint Statement.

NCSL has consistently supported taking trust funds off-budget as a means of safeguarding dedicated user fees. When the House considers H.R. 5170, legislation reauthorizing the aviation programs, Congressmen McEwen and Mineta hope to offer an off-budget amendment. While the legislation goes a long way toward reducing the $7.6 billion surplus, the fact remains that authorization levels have not been a good indicator of actual spending levels.

As a part of the unified federal budget, trust fund authorizations are annually subjected to reductions in appropriations, GRH requirements, as well as any deficit reduction agreements. Trust funds are based on a "user fee" concept. Aviation users, who are asked to pay these additional taxes for specific services and facilities, have a right to expect these taxes to be used to improve the safety and efficiency of the system.

The deficiencies in the nation's aviation system can be addressed to a large extent by removing the arbitrary spending restraints inherent in the budgetary treatment of the Airport and Airway Trust Fund. While NCSL supports provisions in H.R. 5170 to provide for increased revenue through the imposition of passenger facility charges, this is qualified restoration of state and local revenue raising authority and in no way substitutes for adequate trust fund expenditures.

Again, I urge you to restore integrity to the Congressional budget process by removing this trust fund from artificial spending limitations. House action on the McEwen-Mineta amendment will be a critical barometer of likely budgetary treatment of other trust funds.

Sincerely,

LEE DANIELS,
President.

JOINT STATEMENT ON TRUST FUND ACCOUNTING REFORM

Action must be taken to remove trust fund balances from the annual calculation of the federal budget deficit.

Serious consideration is now being given to removal of the Social Security Trust Fund from the Gramm-Rudman-Hollings process in order to more accurately account for the size of the deficit. Equal consideration must also be given to the Highway Trust Fund, the Airport and Airway Trust Fund, and the Unemployment Trust Fund. Like the Social Security fund, these funds are financed by dedicated revenue sources and have been used to mask the deficit.

Trust fund accounting reform would ensure that appropriation decisions rest on merit and are not biased toward accumulating trust fund reserves to meet budget targets. Trust fund programs must be treated equitably in the appropriations process.

The nation's transportation and aviation infrastructure is deteriorating. Federal appropriations and obligation ceilings have been restricted at a time when our highways, mass transit systems, and airports and air traffic control system are overwhelmed by traffic. The taxes have already been raised for the specific purpose of addressing transportation needs, but these funds are being withheld.

In the same way, the employment security system has been underfunded even though taxes have already been raised and large trust fund surpluses have accumulated. Employment security offices are being closed, staff are being laid off, and services are being reduced because unemployment trust fund monies are being used to offset other federal spending.

The time for trust fund accounting reform has come. True reform will take all major trust funds out of deficit calculations and reveal the size of the federal deficit. Appropriations for unemployment, highways, airports and the air traffic control system will be placed on a rational basis. Public trust and confidence will be restored when the deficit problem is addressed forthrightly.

The undersigned organizations urge immediate action to remove highway, airport, and unemployment trust funds from the deficit calculation process.

ASSOCIATED BUILDERS AND CONTRACTORS, INC.,
Washington, DC, July 6, 1990.

Hon. BOB MCEWEN,
U.S. House of Representatives,
Washington, DC.

DEAR BOB: On Wednesday, July 11, 1990, the full House of Representatives will consider H.R. 5170, reauthorization of the Airport and Airway Improvement Act. Congressmen Mineta and McEwen intend to offer an amendment to remove the Airport and Airway Trust Fund from calculations under the Unified Federal Budget. The Associated Builders and Contractors urge you to support their effort to preserve aviation user fees as the dedicated revenue source for airport safety and expansion.

Since 1970, aviation user fees and the Airport and Airway Trust Fund they support have been used to fund air transportation safety and capacity improvements. Subject to the annual appropriations process and arbitrary expenditure ceilings, the trust fund has accrued a $7 billion surplus. While remaining on budget, there is an incentive to withhold the user fees so the accumulated trust fund balance can be used to mask the size of the federal deficit.

It is important to note that while the amendment would take the trust fund off-budget, it does not remove the funds from under the appropriations process. In addition, the amendment includes a deficit control mechanism to ensure the solvency of the trust fund and the future viability of the program.

With the tremendous aviation capacity problems facing the nation, we cannot afford to withhold funds from urgent air-

line safety and capacity improvements simply to mask the size of the federal deficit.

On behalf of ABC's 18,000 corporate members, I thank you for your consideration and urge you to support the Mineta/McEwen amendment.

Sincerely,

CHARLES E. HAWKINS III, CAE,
Vice President, Government Affairs.

AIRPORT TRUST FUND VOTE

(Scheduled for Wednesday, July 11, 1990)

On Wednesday, July 11, 1990 the U.S. House of Representatives will take up H.R. *4986* to amend the Airport and Airway Improvement Act of 1982 to authorize appropriations for fiscal years 1991 and 1992. At that time Congressmen Norman Mineta (D-CA) and Bob McEwen (R-OH) plan to offer an amendment to the bill which would remove the Airport Trust Fund from the unified budget.

The last time this amendment was offered it only lost by five votes 197 to 202. Every vote counts, there it is imperative that you and your associates call your congressman today in support of the Mineta-McEwen amendment to H.R. *4986*.

The telephone number of the U.S. Capitol is 1-202-224-3121, just ask for your Congressman's office and ask him or her to vote "yes" for the Mineta-McEwen Airport Trust Fund Amendment to H.R. *4986*!!! Remember every vote counts and one (1) vote could make the difference this time.

THE ASSOCIATED GENERAL
CONTRACTORS OF AMERICA,
Washington, DC, July 5, 1990.

DEAR REPRESENTATIVE: The Associated General Contractors of America represents more than 32,500 firms, including 8,000 of America's leading general contracting companies, which are responsible for the employment of more than 3,500,000 individuals. These member contractors perform more than 80 percent of America's contract construction of highways, airports, commercial buildings, and individual and municipal-utility facilities.

During House consideration of H.R. 5170—the Aviation Safety and Capacity Expansion Act of 1990, it is expected that Representative Mineta and Representative McEwen will offer an amendment to take the Airport and Airway Trust Fund out of the Federal Unified Budget. The AGC strongly supports their amendment.

Over the past several years, user fees paid into the Trust Fund have increased the uncommitted balance to nearly $7.6 billion. At the same time, air travel has grown dramatically, causing congestion, delay and safety problems. These uncommitted funds are desperately needed for airport and airway system improvements to enhance safety. Since the funds cannot be used for other than aviation purposes, we need to restore trust with the aviation user and free up the $7.6 billion balance for its intended purpose; we must stop trying to balance the Federal budget on the backs of the users of our aviation system.

The AGC respectfully urges your favorable consideration of the Mineta-McEwen amendment.

Sincerely,

SUSAN J. LOOMIS,
Executive Director,
Congressional Relations.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 5 minutes to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Speaker, I support this bill, but I oppose the rule.

I want to explain to my colleagues why I do that. I came to the Committee on Rules and asked for the opportunity to offer an amendment to repeal what is called the Wright amendment, named after our former Speaker, Jim Wright, an amendment that basically gave a sweetheart deal to a couple of airports in Texas, Love Field in Dallas-Fort Worth. The net effect of it is to raise air fares everywhere in the country except in the areas that can be served from Dallas Love Field, which is the four-State area.

I will explain the amendment a little further. It is the most incredibly obtuse and unfair statutory language I have ever seen in my life. And when I explain it, people cannot believe we could have allowed a statute like this to be in effect. But we have, for about 11 years.

Anyway, the Committee on Rules determined that my amendment was not germane to this bill, and I respect their judgment. I disagree with them. I worked with my friend and colleague, the gentleman from Texas [Mr. FROST], and others on it. I intend to oppose the rule.

During the debate on the 5-minute rule, I intend to and hope to get into a colloquy with my friend, the gentleman from Minnesota [Mr. OBERSTAR], the chairman of the subcommittee. Perhaps we can work out at least some understandings about this.

Let me tell you what this crazy law does. In 1979, our former Speaker, Jim Wright, and others worked a deal by which Dallas Love Field, the prime airport that serves downtown Dallas, could no longer serve in interstate commerce except within the State of Texas and the four States around Texas. The theory was that we did not want to hurt the new airport called Dallas-Fort Worth Airport, with several billion dollars of new construction.

So what we did in that law, and I admit I was here when it passed, did not know what it meant, and I am not sure very many of our colleagues knew what it meant.

We said this little airport in downtown Dallas that was the main airport for all of Dallas, you could fly out of that airport but only to points within the State of Texas, the States of Louisiana, Arkansas, Oklahoma, and New Mexico. It is the only airport in the country by which you are restricted from flying to, based on point of origin. There are airports that you are restricted to by mileage, but they fly wherever our great Founding Fathers of this country drew the State lines to. But in this case, you can only fly within the State of Texas and the four contiguous States, patently unfair.

A little airline called Southwest Airlines, out of Dallas, springs up, it is the only genuine low-cost carrier left in the United States. Guess where they hub out of, Dallas Love Field. So everywhere they fly, they offer fares substantially lower than their competitors.

□ 1730

However, they can only fly under the statute from Love Field into the State of Texas and the four contiguous States. I live in Wichita, KS, 51 miles north of the Oklahoma line. If our airport was across that line, my fares would be 80 percent less, not only in the State of Texas, but many places around the State.

Memphis, TN, the home of our distinguished ranking member from the Committee on Rules, the Memphis Airport is on the east side of the Mississippi River. If that airport were 7 miles to the west in the State of Arkansas, fares there would be about 75 to 80 percent lower, but because of this crazy amendment restricting interstate commerce, we are forced to pay much higher air fares. Every town in America outside the four-State area, the cities of Kansas City, Omaha, Denver, St. Louis, Birmingham, Atlanta, even New York City, even Chicago, even in Los Angeles, are paying higher fares because of the restrictions at Love Field.

Now, this has been an issue obviously that Members can see troubles me very much. It has hurt my town a lot. People drive to Oklahoma City and Tulsa just to fly out from there because they can get substantially lower air fares driving 100 miles, because then they can fly Southwest Airlines into Love Field, and out of Love Field they can get much cheaper fares. This is an inherent restraint on interstate commerce. It is the only airport in America that has this kind of sweetheart deal. I do not know who is the sweetheart in this deal, but it is not my town. We are paying 3 times the air fares because of this amendment.

Do Members know who else is paying higher air fares? The people who live in Dallas and Fort Worth, they are paying higher air fares. This probably is complicated because of deregulation. In deregulation we have the hub and spoke system. In the hub and spoke system, airlines dominate airports. In the case of Dallas-Fort Worth, American Airlines, one of the greatest carriers in America, dominates the airport and have made it more difficult for others to get rid of this amendment or to make changes in it.

I bring this to Members today because the Love Field gets Federal funds to the airport trust fund, and I thought, gee, this would be a germane bill to offer my amendment to. After

all, these airports get all the Federal tax dollars, and it is not fair. They are not allowing my citizens, the citizens of Omaha and Kansas City, Birmingham, Denver, Chicago, St. Louis, just name it, any town outside of the four-State area, to fly at lower rates. I was not successful in terms of the Committee on Rules. I respect the judgment of the Committee on Rules. I disagree with it. I will vote against the rule.

I hope this can be changed. It is a travesty in America that we have something this anticompetitive on the books and have not done anything to change it.

Mr. MINETA. Mr. Speaker, I rise in opposition to the rule for H.R. 5170, the Aviation Safety and Capacity Expansion Act.

I am very disappointed that this rule will not allow for the consideration of an amendment to remove the airport and airways trust fund from inclusion in the totals of the President's and congressional budget calculations.

The Congress created the airport and airways trust fund in 1970 as a dedicated fund intended to finance the capital improvement needs of the Nation's aviation system.

During the last several years, there has been vigorous debate about taking the aviation trust fund off budget. The intensity of this debate continues today.

In fact, it is even more timely as the administration proposes additional aviation related tax increases.

For the debate on this important and controversial aviation legislation to be complete, we must have the opportunity to consider an off-budget amendment. Taking the aviation trust fund off-budget is one of the most important in aviation policy today.

Additionally, I am concerned about the waiver granted for the 3-Day rule.

The committee report on this legislation was filed yesterday, and I do not believe that the Members of the House have had adequate time to review some of the more complex provisions of this bill.

Some of the more controversial proposals include the establishment of a major, new tax called a passenger facility charge and the removal of a penalty clause designed to maintain the integrity of the aviation trust fund.

Mr. Speaker, I urge my colleagues to vote against the rule.

Mr. SMITH of New Jersey. Mr. Chairman, as a cosponsor of Mr. RINALDO'S legislation, I rise in strong support of the amendment being offered today by my friend and colleague from New Jersey. For several years now, Mr. RINALDO, myself, and other Members of the New Jersey delegation, have worked relentlessly to correct the errors which were made when the FAA instituted the expanded east coast plan in 1987.

Since its inception, the EECP has disrupted the peace and quiet of communities throughout New Jersey. Constituents of mine located in Marlboro, Colts Neck, Manalapan, Freehold and many other communities throughout Monmouth and Middlesex Counties, some living up to 60 miles from the nearest major airport, now have hundreds of planes flying over their homes at low altitudes. Although the goal was to reduce air traffic delays on the east coast, the most noticeable result has been that once quiet neighborhoods are now bombarded with airplane noise all day and half the night. Despite some small attempts to modify the plan, the Federal Aviation Administration has been unable and unwilling to make any real changes to the EECP in order to reduce airplane noise for the vast majority of New Jersey residents.

Mr. Chairman, study after study has confirmed that the FAA erred when the route changes associated with the EECP were implemented without regard to the environmental effects of increased aircraft noise. For example, a 1988 General Accounting Office study on the impact of the implementation of the expanded east coast plan concluded that the FAA should have "* * * anticipated that its plan would have had enough of an effect that an environmental assessment would be warranted." In fact, they formally recommended that the FAA immediately prepare an environmental assessment, the first step in issuing an environmental impact statement.

Mr. Chairman, the amendment before us today will require the FAA to conduct a full environmental investigation of the aircraft noise problems and issue an environmental impact statement on the effects of changes in aircraft flight patterns caused by the implementation of the EECP. The amendment also calls on the FAA to conduct an air safety investigation of the flight pattern changes. Both studies must be completed within 6 months and reported to Congress, along with recommendations for modifications to the EECP.

Mr. Chairman, this amendment simply requires the FAA to do what it should have done in the first place. Had the FAA conducted an environmental study before making the route changes, they could have prevented many of the problems facing New Jersey residents today. I urge all of my colleagues to support this amendment.

Mr. QUILLEN. Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

Mr. FROST. Mr. Speaker, I have no further requests for time, I yield back the balance of my time, and I move the question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CONNECTICUT COASTAL PROTECTION ACT OF 1990

Mr. STUDDS. Mr. Speaker, I ask unanimous consent to call up from the speaker's table the bill (H.R. 3468) to amend the act entitled "An Act to extend the Wetlands Loan Act", to provide for the expansion of the Stewart B. McKinney National Wildlife Refuge, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. VENTO). Is there objection to the request of the gentleman from Massachusetts?

Mr. RIDGE. Mr. Speaker, reserving the right to object, I do so to yield to the gentleman from Massachusetts [Mr. STUDDS] for an explanation of the bill.

Mr. STUDDS. Mr. Speaker, H.R. 3468 is a bill to expand the McKinney National Wildlife Refuge in Connecticut. The bill was introduced last year by Mr. MORRISON along with the entire Connecticut delegation.

As amended by the Committee on Merchant Marine and Fisheries, H.R. 3468 would authorize the acquisition of 1,000 acres of lands to be added to the McKinney National Wildlife Refuge. The refuge protects important migratory bird habitat in the coastal marshes of Connecticut and on nearby islands in Long Island Sound. The Fish and Wildlife Service has recommended that the additional lands—which are under substantial and increasing development pressure—be added to the refuge. These lands include salt marshes, barrier beaches, freshwater wetlands, and several coastal islands used extensively by shorebirds, songbirds, and waterfowl.

H.R. 3468 was reported by our committee with strong bipartisan support; it was endorsed by the administration; and I urge Members to support it.

Mr. Speaker, I know the House is pressed for time, and because I know of the enormous importance of this to the Connecticut delegation and the principal author, I ask that the gentleman yield to the gentleman from Connecticut [Mr. MORRISON].

Mr. RIDGE. Mr. Speaker, I yield to the gentleman from Connecticut [Mr. MORRISON].

Mr. MORRISON of Connecticut. Mr. Speaker, I will speak briefly, this is the Connecticut Coastal Protection Act of 1990. The provisions of this bill expand the authorized limits of the Stewart B. McKinney National Wildlife Refuge. It does so in order to protect additional endangered properties on the coast of Long Island Sound. It makes a permanent authorization that will allow for appropriated funds to be used for the protection of additional coastal areas in the McKinney Wildlife.

In particular, it makes provisions for the protection of Great Meadows in Stratford, CT, which is the largest piece of unditched high salt marsh left in Connecticut and is significant as a nesting ground and stopover on migration routes.

This is legislation which will provide for important expansions in the wildlife refuge system in Connecticut. I thank the chairman of the subcommittee, the gentleman from Massachusetts [Mr. STUDDS] for his help in bringing this bill to the floor.

Mr. SHAYS. Mr. Speaker, today I rise in support of H.R. 3468, the Connecticut Coastal Protection Act, which would facilitate expansion of the Stewart B. McKinney National Wildlife Refuge.

As you may know, Congressman McKinney, a tireless conservationist, led the Connecticut congressional delegation in sponsoring legislation to establish the 150-acre Connecticut

Coastal Wildlife Refuge. The 1984 law culminated a 20-year effort to preserve the area.

Just days after his death in 1987, the Connecticut delegation paid tribute to Congressman McKinney by sponsoring legislation that redesignated the refuge to bear his name. At the dedication ceremony, his widow, Lucie McKinney, said: "This is a day of celebration. As Stewart said, we have something that will always be here."

Indeed, the McKinney Refuge is now preserved in perpetuity as the only national wildlife refuge in Connecticut. We are grateful for the House's support in this effort over the years. And now I am asking my colleagues to consider preserving additional land off the Connecticut coast for inclusion in the McKinney refuge.

I support the legislation before the House today, the Connecticut Coastal protection Act, which will allow the Federal Government to enter into negotiations for the expansion of the McKinney Wildlife Refuge to include: 650 acres of land known as the Great Salt Marsh Meadow in Stratford; 150 acres in the Menunketesuck River Marsh and on the Menunketesuck Island in Westbrook; and 150 acres on Grassy and Shea Islands off the coast of Norwalk.

These additions to the refuge, which would include a tidal salt marsh and barrier beach, provide important habitats to a variety of migratory birds. In addition, the Great Salt Marsh Meadow is an important nursery area for both shellfish and finfish. Many rare species listed with the State and Federal Governments also inhabit these areas.

Although protection of these lands and wildlife is the primary purpose of this legislation, I want to ensure the areas will still be accessible to the public for appropriate wildlife-oriented recreational and educational activities.

Concern has particularly been raised about the use of Shea and Grassy islands, which are owned by the city of Norwalk. It is my hope the Fish and Wildlife Service can enter into a cooperative agreement with the city which will be mutually acceptable to both parties.

I think it is possible to allow both for preservation and protection of wildlife as well as public access to the islands for recreational use. It is, however, ultimately up to the city of Norwalk to decide whether these islands should become part of the Stewart McKinney National Wildlife Refuge.

I am gravely concerned about the destruction of marshes and wetlands throughout our Nation. We in Congress must be committed to saving our Nation's dwindling supply of these precious areas, which are tremendously fertile, vibrantly productive ecological systems. The protection and preservation of our natural resources, especially our wetlands, marshes and wildlife refuges, must be made a top national priority.

I urge my colleagues to act favorably on this important environmental legislation.

Mr. RIDGE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The clerk read the bill as follows:

H.R. 3468

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Connecticut Coastal Protection Act of 1989".

SEC. 2 EXPANSION OF REFUGE.

The Act entitled "An Act to extend the Wetlands Loan Act" (Public Law 98-548; 98 Stat. 2774) is amended—

(1) in section 205 by striking "$2,500,000" and inserting in lieu thereof "such sums as may be necessary";

(2) by redesignating section 205 (as amended by paragraph (1)) as section 208; and

(3) inserting after section 204 the following:

"EXPANSION

"SEC. 205. The Secretary may acquire for addition to the refuge—

"(1) approximately 650 acres of land and water known as the Great Meadows Marsh, in Stratford, Connecticut;

"(2) approximately 150 acres of land and water at the Menunketesuck River marsh and Menunketesuck Island, in Westbrook, Connecticut; and

"(3) approximately 150 acres of land and water in the vicinity of Norwalk Harbor, Connecticut; as such lands and waters are depicted on the map entitled 'Stewart B. McKinney NWR Expansion', dated September 1989 and on file with the United States Fish and Wildlife Service.

"TRANSFER

"SEC. 206. After the date of the enactment of the Connecticut Coastal Protection Act of 1989, the Secretary shall manage the Salt Meadow National Wildlife Refuge as an element of the Stewart B. McKinney National Wildlife Refuge.

"FUTURE EXPANSION

"SEC. 207. (a) Subject to the availability of appropriations, the Secretary may acquire such additional lands for the refuge as the secretary considers appropriate, and may adjust the boundaries of the refuge accordingly. Any such acquisition shall be carried out in accordance withs all applicable laws and without regard to section 203 of this Act.

"(b) All lands acquired within the vicinity of Long Island Sound in the State of Connecticut after the date of the enactment of the Connecticut Coastal Protection Act of 1989 for addition to the National Wildlife Refuge System shall be managed as part of the Stewart B. McKinney National Wildlife Refuge.".

COMMITTEE AMENDMENTS

The Clerk will report the committee amendments.

The Clerk read as follows:

Committee amendments: On page 2, line 3, delete "1989" and insert in lieu thereof "1990".

On page 2, line 16, delete "650 acres" and insert in lieu thereof "690 acres".

On page 2, line 19, delete "150 acres" and insert in lieu thereof "230 acres".

On page 2, line 22, delete "150 acres" and insert in lieu thereof "80 acres".

Mr. STUDDS (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the committee amendments.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. STUDDS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and include therein extraneous material, on H.R. 3468, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

CONNECTICUT COASTAL PROTECTION ACT

(Mr. GEJDENSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEJDENSON. Mr. Speaker, I rise today to join my colleague Mr. MORRISON of Connecticut in strong support for H.R. 3468, the Connecticut Coastal Protection Act. This legislation extends the "Stewart B. McKinney National Refuge" allowing the Fish and Wildlife Service to acquire coastal lands and islands for inclusion into the McKinney refuge.

First, Mr. Speaker, I would like to commend Mr. MORRISON for his hard work on this important bill and would like to commend the chairman of the Merchant Marine and Fisheries Committee, Mr. JONES and Mr. STUDDS, chairman of the Subcommittee on Fisheries, Wildlife Conservation and the Environment, for bringing this bill to the floor and working so closely with the State of Connecticut, the Connecticut Nature Conservancy and the coastal towns that have such a strong interest and stake in the passage of this legislation.

Mr. Speaker, in 1987, the Congress of the United States decided to rename the Connecticut Coastal National Wildlife Refuge to commemorate the work and vision of our former colleague and friend, Stewart B. McKinney, to protect some of the most critical wildlife habitats on Connecticut's shoreline. The legislation we are considering today will take that one important step further.

For the past several decades, coastal Connecticut along the Long Island Sound has faced a great deal of devel-

opment pressure. Of the initial 23,000 acres of tidal wetlands in Connecticut, 30 percent have disappeared, leaving only 16,000 acres according to the U.S. Fish and Wildlife Service. In 1984, the Connecticut Coastal Wildlife Refuge, which was renamed the McKinney Wildlife Refuge in 1987, was established to: protect and enhance the populations of shore birds including herons, egrets, and terns; to encourage the natural diversity of fish and wildlife species that are indigenous to our coasts and which use the Connecticut coast as a migratory stopover point; to provide for the conservation and management of all fish and wildlife within the refuge; and to provide opportunities for scientific research and environmental education and fish and wildlife-oriented recreation.

And though it has been relatively successful, passage of this legislation provides us with an opportunity to take important steps toward protecting the habitat of many important and potentially endangered migratory birds and species of fish and wildlife. According to the Northeast Coastal areas study prepared by the Fish and Wildlife Service, the three coastal properties proposed for inclusion by this bill are integral additions to the refuge and are listed as high priority areas for further protection. In addition, these sites are listed as critical coastal habitats of the North Atlantic flyway and are listed as critical coastal habitats by the Connecticut Department of Environmental Protection.

Mr. Speaker, in addition to allowing the Secretary of the Interior to acquire the Great Meadows marsh in Stratford, and acreage in the vicinity of the Norwalk Harbor, this legislation allows for the acquisition of the Menunketesuck River marsh and Menunketesuck Island in Westbrook, CT which is adjacent to the Salt Meadow Marsh National Wildlife Refuge, also in Westbrook. This 150 acre parcel is one of the most important migratory waterfowl and bird sites along the coast. The Menunketesuck Island contains one of the two largest nesting colonies of least terns in the region, a species that has suffered greatly from human disturbances and development and the tidal salt marsh area provides migration habitat for waterfowl, wading birds and songbirds and offers crucial wintering habitat for a variety of waterfowl.

Finally, Mr. Speaker, this bill will allow the Secretary of Interior to manage the Salt Meadow National Wildlife Refuge [NWR] located in Westbrook, CT as an element of the Stewart B. McKinney Wildlife Refuge. This will enable the Fish and Wildlife Service to manage all of the wildlife refuge resources in Connecticut together as a single unit, allowing the most efficient use of their staff and other resources and it allows the Salt Meadow marsh to receive the attention that it deserves since the 187-acre parcel was donated and established as a refuge in 1971.

Since the Salt Meadow National Wildlife Refuge was created, it has been neglected. It has been managed as a satellite refuge within the Ninigret National Wildlife Refuge complex from Rhode Island. It has operated without clearly defined objectives and with limited capability to conduct wildlife, or public use management activities. In addition, the resources that need upkeep have been neglected since minimal maintenance is conducted by Fish and Wildlife staff or by volunteers. By managing the Salt Meadow NWR as an element of the McKinney Refuge, this resource can be protected in a way that is consistent with the protection of the McKinney refuge and the Salt Meadow marsh can finally get the attention that it deserves.

Mr. Speaker, this legislation has broad support. It is cosponsored by the entire Connecticut Delegation of both political parties, it is supported by the State of Connecticut, it is supported by the affected coastal towns, the Audubon Society and Les Corey of the Nature Conservancy of Connecticut called H.R. 3468 "the most important piece of pending conservation legislation that would protect the most threatened and irreplaceable biological components remaining in the southwestern section of the Long Island Sound."

Again, Mr. Speaker, I am pleased to support this measure that will allow us in Connecticut to protect some of the coastal resources that are in danger and that are so important to many species of birds and other wildlife. I urge my colleague to join me in support and I again, commend Mr. MORRISON, Mr. STUDDS, and Mr. JONES for their hard work in bringing this important legislation to the floor.

AVIATION SAFETY AND CAPACITY EXPANSION ACT OF 1990

The SPEAKER pro tempore. Pursuant to House Resolution 428 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for consideration of the bill, H.R. 5170.

The Chair designates the gentleman from Texas [Mr. LEATH] as Chairman of the Committee of the Whole, and requests the gentleman from Virginia [Mr. PICKETT] to assume the chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5170) to amend the Airport and Airway Improvement Act of 1982 to authorize appropriations for fiscal years 1991 and 1992, to improve aviation safety and capacity, to reduce the surplus in the airport and airway trust fund, to authorize the Secretary of Transportation to grant authority for the imposition of airport passenger facility charges, and for other purposes, with Mr. PICKETT [Chairman pro tempore] in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. Pursuant to the rule, the bill is considered as having been read the first time.

Under the rule, the gentleman from California [Mr. ANDERSON] will be recognized for 30 minutes, and the gentleman from Arkansas [Mr. HAMMERSCHMIDT] will be recognized for 30 minutes.

The Chair recognizes the gentleman from California [Mr. ANDERSON].

Mr. ANDERSON. Mr. Chairman, I yield myself such time as I may consume. Mr. Chairman, before I discuss this important bill which is before us, let me first explain our intent on consideration tonight.

Following general debate, we will then consider amendments which we believe will not require a rollcall vote.

We will proceed as far as we can go with no votes. When we get to that point, we will ask the Committee to rise. We will complete consideration as soon as we can be rescheduled.

There will be no rollcall votes tonight.

Mr. Chairman, the bill we are considering today, the Aviation Safety and Capacity Expansion Act of 1990, establishes a comprehensive program to permit us to develop our aviation system to meet the needs of the 1990's.

There is an urgent need for this legislation, and Subcommittee Chairman JIM OBERSTAR is to be commended for his yeoman efforts in its development. The increases in passenger traffic which have resulted from the low fares permitted by airline deregulation have stretched the airport and airway systems beyond their capacity. In 1987, there were 21 airports at which air carrier flights were delayed by a total of more than 20,000 hours. Unless action is taken, the number of severely congested airports will increase to 39 by 1997. The congestion and delays which have resulted from inadequate aviation capacity are costing the travelling public billions of dollars in added costs and lost productive time.

To complete the extensive capital development required to improve our aviation system, we will have to undertake a massive combined effort on the Federal, State, and local levels. The bill before us today creates the framework under which the necessary development can be accomplished.

First, the bill provides for an extensive commitment to develop our aviation system through the airport and airway trust fund. It establishes a pro-

gram under which the new revenues coming into the trust fund from taxes on aviation users will be fully spent. In addition, the bill will permit us to draw down on the surplus which has accumulated in the trust fund as the unfortunate result of efforts to balance the general budget by having the trust fund spend less than users have contributed.

Under the reported bill, there will be trust fund spending of $13.2 billion in the next 2 years. The bill authorizes $5.5 billion for modernization of the air traffic control system. This represents a 59-percent increase over current levels of spending. The bill further authorizes $3.7 billion for airport development, a 29-percent increase over current levels. If aviation programs continued to be funded at these and anticipated levels through 1995, the surplus in the trust fund will be reduced from $7.6 billion to $1.1 billion in fiscal 1995. Of great importance, this 5-year funding program can be carried out without any increase in Federal taxes.

I am pleased to note that the Budget and Appropriations Committees are in agreement with the program levels we have established. Last week the House passed appropriations legislation which for the first time in recent years funds the Federal program for airport development at the level established in the authorizing legislation, $1.8 billion. This action has been taken in response to our committee's effort to modify provisions in the trust fund, particularly the so-called penalty clauses, to meet concerns which have been raised by the Appropriations Committee. We are extremely hopeful that the authorizing and appropriations processes will continue to go forward together and develop a program which will permit the trust fund to realize its full potential.

The reported bill also recognizes that the capital development of our airports requires an extensive effort by State and local governments and airport authorities. Indeed in the past, 66 percent of the capital needed to develop our airports has been raised at the local level.

To facilitate the ability of local authorities to raise the necessary capital, the bill authorizes a new local source of funding, a passenger facility charge. These charges have been prohibited by Federal law since 1973. In the bill we have carefully limited the authorization to collect PFC's to ensure that the problems which led to a ban in 1973 will not be repeated and also to ensure that there will be consistency and coordination between airport development undertaken under the Federal airport improvement program, and development undertaken through passenger facility charges.

The bill limits PFC's to $3 and to two charges on a one-way trip. Each PFC must be specifically approved by the Department of Transportation. To grant approval, the Department must find that a PFC is needed to support projects eligible for PFC's. Eligibility is limited to projects which meet Federal standards for the Airport Improvement Program or the Noise Abatement Program. Also eligible are the development of terminal gates to facilitate new competition. Before allowing a PFC, the Secretary must affirmatively find that the specific projects approved will enhance the national aviation system or promote airline competition.

Including gates as an eligible item will permit PFC's to be used to build facilities which are necessary for new competition, particularly at hub airports where a single carrier controls most of the gates. In addition, we have structured our PFC legislation so that the imposition of PFC's by the larger airports will result in increased Federal assistance for smaller airports. Under the bill, large airports imposing PFC's will give up half their AIP formula funds. Most of this money will go into a new fund for grants for general aviation and smaller commercial service airports. We estimate that as a result of this adjustment small commercial service airports will get as much as $114 million in extra funding and general aviation airports will get as much as $57 million in additional funding.

In sum, the legislation now before us will permit us to develop the aviation system which the American public needs and deserves. I urge my colleagues to join me in enthusiastically supporting this legislation.

□ 1740

Mr. Chairman, I reserve the balance of my time.

Mr. HAMMERSCHMIDT. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I rise in strong support of this bill. I would like to express my appreciation to Chairman ANDERSON, to the subcommittee chairman, Mr. OBERSTAR, and to the ranking member, Mr. CLINGER, for the excellent work they have all done on this bill.

There is much in this bill that is worthy of support. For example: The bill authorizes increased funding for badly needed improvements in our Nation's airport and air traffic control infrastructure; it directs the FAA to develop a system of auxiliary flight service stations to complement the automated stations that the FAA is now putting into place; and it revises the FAA's procurement rules to give that agency more flexibility in its procurement processes.

I support these provisions. In addition, there are two other provisions in the bill that are of particular interest to me.

The first is, the new passenger facility charge, commonly referred to as a PFC.

Adoption of this new PFC would give us a chance to finally do something significant to address the problems caused by airport congestion and delays.

By approving this PFC legislation, we will enable large airports to raise significant amounts of money to finance aiport expansion and improvements. At the same time, we will be freeing up money for small airports so that these airports can improve their facilities as well.

I know that many of my colleagues are concerned that this PFC will raise the cost of airline travel. I share that concern. However, one advantage of the PFC is that the money will actually go to airport improvements; unlike the current system where much of our aviation tax revenues gets stuck in the trust fund.

Money raised by the PFC will not be going into that fund. Rather, it will go directly to the airports themselves to be used as the airports see fit, subject to approval by DOT.

Airport and DOT control of PFC spending is crucial to the success of this program. Too often we hear about airlines trying to block expansion projects at their fortress hubs because they do not want to provide room for new competition there. With a PFC, airports could move ahead with necessary expansion projects without having to rely on the support of the major airline there.

As a result, while PFC's may temporarily raise round-trip fares by as much as $12 in the short run, they should lead to increased capacity, increased competition, and thus lower fares in the long run. Therefore, I view PFC's as being in the long-term interests of our national air transportation system.

For those who say we should spend down the trust fund first before enacting a PFC, I would point out that this reauthorization bill would do that. Unfortunately, to a large extent, it would do this by spending more on FAA operations. However, it also increases spending on airport improvements and air traffic control facilities and equipment by more than 20 percent.

So it seems that we are on track toward our goal of spending down the trust fund. And if we get off that track, this bill contains a trigger mechanism which terminates the authority to levy a PFC.

In this regard, I am very disappointed that we will not have an opportunity to consider the McEwen-Mineta amendment to take the airport and airway trust fund off-budget. This amendment would have ensured that the trust fund surplus was spent down. Given all the talk in this Congress

about infrastructure, I am very surprised that the House leadership and Rules Committee did not see fit to make this amendment in order. There is also another reason why I favor this legislation. That is because it includes a provision of essential air service [EAS]. This provision is very important to people in small communities and rural areas.

The EAS Program was enacted as part of the Airline Deregulation Act of 1978. It was designed to ensure that small communities did not lose their air service as a result of the new freedom for airlines to change their route structure under deregulation.

While the EAS Program was successful in ensuring that some air service remained at small communities, the service in many cases was poor. As a result, many passengers abandoned their local airport and chose to drive instead.

In order to improve air service at small communities, we added a provision to the 1987 aviation reauthorization bill that was designed to upgrade the EAS Program. However, this provision was never adequately funded. Instead, the program has been cut to such an extent that 26 communities recently lost all their air service.

In order to prevent the continued erosion of the program and to ensure full funding for the remaining communities, this bill includes a provision that would make EAS a contract authority program and pay the EAS subsidies out of the aviation trust fund. A provision is also included that would prevent any more communities from being eliminated from the program.

I am pleased to report that the administration has agreed to fund the EAS Program at the levels authorized in this bill.

Therefore, Mr. Chairman, for all these reasons, I support H.R. 5170 and urge my colleagues to do the same.

□ 1750

Mr. ANDERSON. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania [Mr. BORSKI].

Mr. BORSKI. Mr. Chairman, I rise to give my strong support to H.R. 5170, which authorizes appropriations for aviation programs for the 1991 and 1992 fiscal years

H.R. 5170 authorizes $18.3 billion for fiscal 1991 and 1992 to enlarge existing airport capacities improve the safety and security of passengers, modernize the air traffic control system and for noise abatement.

One landmark feature of this bill, thanks to the tireless work of our distinguished subcommittee chairman Mr. OBERSTAR, is authorizing the expenditure of the aviation trust fund surpluses.

These surpluses are supposed to fund our air transportation system, and now, thanks to the work of Chairman OBERSTAR, that is exactly what they will do.

It is expected that under this bill, the surplus will drop from $7.6 billion at the end of fiscal year 1990, to $1.2 billion in fiscal year 1995.

Since 1978, air travel passengers have jumped from 266 million to 480 million.

The Federal Aviation Administration estimates that close to 775 million Americans will be carried across this country, through our skies by the year 2000.

The tremendous increase in passengers and in air freight activities has stretched our airports and airway systems beyond their capacities.

Congestion at major American airports is causing substantial delays, increased travel costs and serious safety concerns. What is at stake here, however, is not a matter of convenience, but a matter of economic development and survival.

In decades past, cities and nations relied on good roads and railroads to grow and to move people and services swiftly and efficiently across their nation.

Now airports and our air transportation system play an increasingly vital role in our transportation system.

Unless we continue to expand our air transportation system dramatically, our economy cannot continue to grow, allowing us to compete internationally as a great economic power.

That is true for Philadelphia for Pennsylvania and for America.

That is why I support this bill and that is why it is such a crucial step forward in ensuring that America has the air system it needs to sustain and energize our economy.

A vital feature of this legislation is the authorization of passenger facility charges.

This bill allows airports to impose direct charges on airline passengers who use their facilities, to fund improvements in the safety, swiftness and security of our air transportation system.

To use the Philadelphia Airport as an example, passenger facility charges will provide the airport with an estimated increase of $20 million per year.

Those funds will support a bond program which will provide an estimated $200 million toward the Philadelphia International Airport's massive, $1 billion capital program.

That program will build terminals, facilities and roads toward the goal of expanding the airport's capacity by 50 percent.

Remember that air passengers have increased over 50 percent in the last 10 years, and are projected to increase another 50 percent over the next decade.

The funds raised by the PFC's will allow Philadelphia and other airports across this Nation to meet the air transportation demands of our citizens and our economy.

Expanding the Delaware Valley's Regional Air Transportation System makes it more able to join with other rapidly expanding air hubs from across America to lead our economy forward by transporting our goods and citizens across this Nation as swiftly, safely, and economically as possible.

Our job as representatives is to lead the Nation into its economic future.

This bill gives America's airports the funds they need to meet America's future economic and travel needs.

Mr. Chairman, I strongly support this legislation and urge my colleagues to do the same.

Mr. HAMMERSCHMIDT. Mr. Chairman, I yield 7 minutes to the distinguished gentleman from Pennsylvania [Mr. CLINGER] the ranking member of the Subcommittee on Aviation.

Mr. Chairman, I ask unanimous consent that the gentleman from Pennsylvania [Mr. CLINGER] be allowed to control the balance of the time on the general debate and under the 5-minute rule this evening on the minority side.

The CHAIRMAN pro tempore (Mr. PICKETT). Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. CLINGER. Mr. Chairman, I rise in strong support of H.R. 5170.

Mr. Chairman, last week I spent about 1 hour and 40 minutes sitting on the runway in Pittsburgh, PA, waiting to take off. The week before that, or 2 weeks before that, I spent a comparable amount of time sitting on a runway in Buffalo, NY, waiting to take off. Both times I was late for appointments and meetings that I had, and I would suspect, Mr. Chairman, that my experience is not unique. In fact, I know it is not unique.

Mr. Chairman, my guess is that just about every Member of this House is in the same boat, or in this case I might say in the same airplane. We have all had tremendous delays. This has resulted in missed meetings, lost opportunities, et cetera, and we are not alone because in fact this problem is endemic throughout our society.

As my colleagues have heard mentioned earlier before, the number of delays, the amount of delays, have risen since 1987. In 1987, there were 21 airports that had 20,000 hours of delays. That number is going to rise to 39 airports.

Mr. Chairman, this is a serious problem, and it is getting worse. I think that what we offer to our colleagues today is a meanse to seriously address this problem. It is a bill that is going to significantly begin to address the capacity problems we face.

The delays are plaguing. One of the chief culprits clearly is the limited capacity of suitable runway terminals

and gates. All too often, as I have just indicated and as, I know, all of my colleagues can agree, aircraft are either held on the ground or in the air, not because of any failings or inadequacy of the air traffic control system to manage the aircraft in the air, but due to the lack of adequate runway capacity or terminal capacity to accommodate the ever-increasing number of commercial aircraft, and we have heard talk about the exponential growth that we have seen in commercial air travel over the last 10 years. That is going to continue into the next decade.

The airport improvement program is the FAA's principal airport construction program. It is responsible for building the new runways, the terminals, the taxiways, the aprons and other brick and mortar projects fundamental to our Nation's infrastructure.

Mr. Chairman, this legislation takes extraordinary strides, in my view, to help alleviate the congestion caused by the inadequate ground facilities by providing, and this is a very key thing and to which the chairman, the gentleman from Minnesota [Mr. OBERSTAR], deserves enormous credit in getting agreement to have an authorization which was followed by appropriation of $1.8 billion for 1990 and $1.9 billion for fiscal year 1991, 1992 respectively.

Just as important, this legislation removes the prohibition which has existed since 1974 against the levying of passenger facility charges by airport authorities giving airports an important new source of revenue. This is controversial, and I say to my colleagues, "You're going to hear a lot of discussion about that by colleagues both pro and con." There were, I would certainly agree, real abuses of the passenger facility charge which was imposed in years past.

I think that what we have done in this bill is hit those abuses head on. We have addressed them very directly, and I think we can assure colleagues that the abuses will no longer exist once a passenger facility charges goes into place.

Some have categorized this to a new Federal tax. It is not a new Federal tax, and that should be understood right up front.

□ 1800

The passenger facility charge, if assessed, and they are assessed on an individual case-by-case basis, will be local user fees imposed by local airport authorities. Revenues will be collected by local airports and stay at the local level. This is a targeted rifleshot approach to the serious capacity problems we have. They will not flow to U.S. Treasury, nor will they be subject to the usual congressional budget process, but they will be subject to Federal approval, so that we do maintain control, so that the abuses we have had in the past will not be repeated.

Protections have been included in this legislation to prevent local government from using the PFC revenue for purposes other than for airport construction. That is where the crying need is.

The Transportation Secretary has ultimate control over the approval of the PFC. He approves the proposed project before the airport can assess the PFC, and once the project is completed the PFC is terminated. It is not an open-ended thing, as you may hear down the road. This is a very specific authorization with a time certain. Once the project is done, the PFC authorization ends.

The Secretary, before he can approve a passenger facility charge, must find that the specific project that is applied for will enhance either the safety, the capacity, the security of the airport, or it will enhance airport competition.

It eliminates, I will tell you, the so-called majority-in-interest clauses by which one airline with a commanding position at a given airport can basically veto any development at that airport or ensure that any development at that airport only goes to the benefit of the majority-in-interest airline there.

From my point of view, and I suspect for many of my colleagues who represent rural districts and smaller regional airports, we will reap tremendous benefits from this legislation, because the large airports, and many of them will, who opt to assess the PFC will forego up to one-half of their annual entitlement from the AIP fund. Those entitlements, that which they forego, will be turned back and will be redistributed to general aviation and nonhub airports as an additional source of funds supplementing their regular entitlements. This is going to be a boon for the smaller regional airports.

There is one final point, Mr. Chairman. I want to underscore that the user fee concept inherent in the PFC is a user fee concept, not a tax. For many years we in Congress challenged local governments to assume a larger responsibility in building and maintaining their infrastructure. This PFC is the only source of funds local governments can reasonably turn to; so I would urge support of this legislation.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. CLINGER. Mr. Chairman, I yield myself 1 additional minute.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, I appreciate the gentleman yielding to me.

I have asked for this time only to take this moment publicly on the record to acknowledge the splendid work of the gentleman in the well, the gentleman from Pennsylvania, in crafting this legislation.

Together we have worked since last October to bring the aviation community together, the Department of Transportation, the Office of Management and Budget, the Appropriations Committee, our colleagues on the committee on a bipartisan basis, to work out something that is in the overall good and best interests of aviation. We have had disagreements with each other and with others along the way. We had more agreements than disagreements. We worked them out. We never had anything on which there was a personal disagreement. We worked out something that is really going to be in the best long-term interests of aviation.

The gentleman from Pennsylvania has spent enormous amounts of time on this, and I want his constituents to know that, in crafting something that is of lasting, durable benefit for the whole country. The gentleman has been a real statesman and I appreciate his partnership.

Mr. CLINGER. Mr. Chairman, I thank the gentleman very much. I can only say that we have had great leadership and it has been a marvelous working partnership that I have enjoyed enormously.

Mr. ANDERSON. Mr. Chairman, I yield 1½ minutes to the gentleman from Oregon [Mr. DEFAZIO].

Mr. DEFAZIO. Mr. Chairman, I rise to engage the chairman of the Aviation Subcommittee in a colloquy.

As the chairman knows, we have discussed in great detail the planned consolidation of the North Bend Flight Service Station into the McMinnville Automated Flight Service Station. The chairman has included language in this bill directing the Secretary of Transportation to implement a system of manned auxiliary flight service stations in areas of unique weather or operational conditions. The North Bend Flight Service Station on the south Oregon coast operates in an area where the weather can change very rapidly and frequently includes thick fog.

Is this the type of situation that deserves consideration for auxiliary status?

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. DEFAZIO. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. In the testimony in the course of our hearings on the flight service station portion of the program, we found that there were

unique areas of the country where special weather conditions obtained and where there ought to be a continuation of existing flight service station service.

The situation the gentleman has described is one of those types of circumstances, the very type of atmospheric and geographic conditions intended to be protected by the language in our bill.

Mr. DEFAZIO. Mr. Chairman, if the committee chairman would answer one other question. The North Bend Station is proposed to be closed or consolidated before the new system is put in place. Would the committee chairman find that North Bend and other stations of these unique characteristics should be considered regardless of whether or not they have already been consolidated?

Mr. OBERSTAR. Mr. Chairman, if the gentleman will yield further, I believe the North Bend Station is one of those that should be a candidate for retention, and I will join the gentleman in making an appeal to the FAA to keep it open.

The FAA will have the ultimate authority on a case-by-case basis to make these determinations, but the gentleman's situation is unique and deserves consideration to be retained.

Mr. DEFAZIO. Mr. Chairman, I thank the gentleman.

Mr. CLINGER. Mr. Chairman, I yield 1 minute to the gentleman from Ohio [Mr. MCEWEN], who has been a very diligent and constructive member of the subcommittee.

Mr. MCEWEN. Mr. Chairman, I thank the gentleman for yielding me this time, and wish to join in the expressions of support, not only for this legislation, but particularly for the drafters.

This is a compilation of many interests, many people who have a concern about the future of aviation for our country. I did not wish to let the debate pass any further without acknowledging the work of the chairman and his cooperation. I had the opportunity this morning to open the National U.S. Air and Trade Show in Dayton, OH, and in conversation with the Administrator of the FAA, I discussed the work on this particular legislation both by the ranking member, the gentleman from Pennsylvania [Mr. CLINGER] and the chairman of our subcommittee, the gentleman from Minnesota [Mr. OBERSTAR].

I share the admiration that the gentleman has and those throughout the aviation industry have for the work that they have done to bring this bill to the floor and to consider the needs of all segments of the traveling public, and I wish them success.

Mr. ANDERSON. Mr. Chairman, I yield 3 minutes to the gentleman from California [Mr. MINETA].

Mr. MINETA. Mr. Chairman, I regret that I must rise in opposition to H.R. 5170, the Aviation Safety and Capacity Expansion Act of 1990.

The Aviation Safety and Capacity Expansion Act is without doubt the cornerstone of Federal aviation policy and will affect issues which promise to be some of the most important transportation issues of the decade.

I commend the Public Works and Transportation Committee leadership on both sides of the aisle and the Chair and the ranking minority member of the Aviation Subcommittee for their efforts on this behalf.

I applaud the aviation spending levels authorized in the committee bill. It is vitally important that we begin to spend trust fund moneys if we are to adequately provide for much needed modernization of our air traffic control system and airport development.

However, I am very concerned about several provisions in this legislation.

I have serious reservations about the removal of the trust fund penalty clause. The penalty clause served as an incentive to encourage the full funding of capital development projects from moneys in the trust fund. No penalty clause means no real guarantees.

Additionally, I am disappointed that I was not able to offer an amendment to take the airport and airways trust fund off-budget.

The Congress created the airport and airways trust fund in 1970 as a dedicated fund intended to finance the capital improvement needs of the nation's aviation system.

The American people are being led to believe that they are paying for airport improvements, but the truth is that the administration is putting that money, currently $7 billion in unobligated funds, in its back pocket.

When the American people pay taxes, they don't expect that money to sit for years in OMB's equivalent of a Swiss bank account—an account that no one can touch but OMB.

Mr. Chairman, we must put the trust back into the aviation trust fund.

Finally, H.R. 5170 contains a provision which will allow airport operators to impose their own taxes, or passenger facility charges, on passengers passing through their airports. I cannot condone the imposition of an entirely new tax while the trust fund balance remains unspent.

A nationwide Federal ticket tax is already being imposed on these same passengers. Mr. Chairman, passengers should not be subject to double taxation.

Mr. Chairman, the United States needs and deserves an aviation system that can bring us safely and smoothly into the 21st century. I believe that we must spend the trust fund moneys to achieve this goal before we, once again, reach into the pockets of our Nation's passengers.

□ 1810

Mr. CLINGER. Mr. Chairman, I yield 4 minutes to the gentlewoman from New Jersey [Mrs. ROUKEMA].

Mrs. ROUKEMA. Mr. Chairman, I thank the distinguished gentleman for his time. Mr. Chairman, I rise for the purpose of entering into a colloquy with the distinguished chairman of the Aviation Subcommittee, Mr. OBERSTAR.

Mr. Chairman, I first want to acknowledge the work of my colleague, Mr. MILLER of Washington, who unfortunately could not be here with me to join in this colloquy. I commend his efforts. The issue I speak of today is the persistent and growing problem of excessive noise created by aircraft near our airports and over our neighborhoods. Toward solving this problem, Mr. MILLER and I have introduced the Aviation Noise Abatement Policy Act of 1990.

As you know from our many discussions over the past number of months, air noise over northern New Jersey is a pervasive problem. When the FAA implemented its expanded east coast plan in 1987, it had two purposes: to reduce delay and inconvenience to passengers, and to ensure the safety of all air travelers. Unfortunately, the expanded east coast plan increased the number of air routes and traffic over the most densely populated section of the most densely populated State in the country. In my opinion, this has raised significant safety questions.

As you know, I have attempted to work with the FAA directly, but have encountered indifference and stonewalling.

I understand my distinguished colleague from New Jersey, Mr. RINALDO, may offer an amendment today seeking an FAA environmental impact statement on New Jersey air routes. I support Mr. RINALDO's effort—in fact, such a provision is included in my bill—but we must do more. Mr. Chairman, the track record of the FAA on the air noise issue leaves me more than skeptical. The FAA should have conducted a full environmental assessment before forcing the expanded east coast plan on the residents and businesses of northern New Jersey.

This is not solely a problem for northern New Jersey, or the tristate area or even the east coast. My purpose in rising today is to seek your commitment to hold comprehensive hearings on the air noise issue and the safety questions the expanded east coast plan has raised. I would urge that the committee seriously consider holding field hearings on this issue as well.

Mr. OBERSTAR. Mr. Chairman, will the gentlewoman yield?

Mrs. ROUKEMA. I am happy to yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, I appreciate the genuine, deep concern that the gentlewoman has expressed and raised. She has been a vigorous advocate for action on behalf of her constituents.

Recently I received a letter on this noise issue initiated by the gentleman from New Jersey [Mr. RINALDO], signed by the gentlewoman, and the entire New Jersey congressional delegation, advocating and asking for hearings that the gentlewoman has just referred to. We will be holding hearings in September.

The gentleman from Pennsylvania [Mr. CLINGER] and I have agreed, and the date is still being worked out, but it is just a matter of timing, but we will have it in September, a major hearing.

Noise is not just a local problem, as the gentlewoman has acknowledged. It is a national issue. It needs to be addressed. This will be the first step in attempting to formulate, if we can, a national policy on noise.

In the interim, there is a unique New Jersey problem which we expect to deal with in the Rinaldo amendment, and the gentlewoman's support on this issue has been most encouraging for members of the committee.

I assure the gentlewoman those hearings will be held, and the voice of the New Jerseyites will be heard.

We appreciate the interest of the gentlewoman and her support.

Mrs. ROUKEMA. Mr. Chairman, I thank the gentleman specifically for the September date.

Mr. ANDERSON. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. NOWAK].

Mr. NOWAK. Mr. Chairman, I rise in strong support of the Aviation Safety and Capacity Expansion Act of 1990.

First, however, I would like to commend the leadership of our Committee on Public Works and Transportation in crafting this important legislation.

In particular, I would like to thank our chairman, Mr. ANDERSON, and the ranking minority member, Mr. HAMMERSCHMIDT, along with the chairman of the Subcommittee on Aviation, Mr. OBERSTAR, and the ranking member on that subcommittee, Mr. CLINGER.

Infrastructure has become a household word in America. The legislation before us today seeks to address the needs of a critical part of our Nation's infrastructure—out civil airports and airway system.

Massive increases in domestic airline passenger traffic have placed tremendous pressure on the capacity of our airports and airway systems. This legislation seeks to expand our efforts to meet the airport infrastructure improvements needed to guarantee safe and expeditious travel, which is so important, to our economic well being.

An important step this bill would take is to provide additional resources for these vitally needed improvements by insuring that user fees deposited in the airport and airway trust fund would be spent in a timely fashion.

For example, it is estimated that by the end of this fiscal year the trust fund will have accumulated a surplus of $7.6 billion. Changes made by this legislation would result in reducing the trust fund's surplus to $1.1 billion in fiscal year 1995.

Another new feature of this bill is an amendment I offered in committee, aimed at encouraging greater civilian use of former and current domestic military airfields.

This provision would direct the Secretary of Transportation to designate eight such underutilized airports, to participate in a new Federal aid grant program, aimed at upgrading their use for commercial or joint civil-military purposes.

I will be offering a clarifying amendment tomorrow to make it clear that the former or current military airports eligible for designation for these special improvement grants would include airports seeking conversion for either commercial service or designation as reliever airports.

Given passenger growth projections, budget restraints, costs of new airports and public opposition to new airport construction, this concept of recycling military bases would be a step toward addressing airport capacity needs, in congested metropolitan areas.

Mr. Chairman, I strongly support passage of the bill.

Mr. ANDERSON. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois [Mr. LIPINSKI].

Mr. LIPINSKI. Mr. Chairman, the Public Works and Transportation Committee has worked hard to craft this important piece of transportation legislation, this important policy statement. The chairmen and ranking members of the committee and the Subcommittee on Aviation have worked together toward a groundbreaking aviation program which will result in unprecedented improvements to the national aviation system, to American aviation competitiveness, and to great service improvements for the flying public. I especially would like to thank Chairman OBERSTAR's vigilant work on this issue of funding aviation safety and capacity needs.

It is important to point out that H.R. 5170 is not merely a reauthorization bill, indicating that national aviation policy will remain on the same track of the past 4 years or 8 years. Rather H.R. 5170 includes several major measures which will improve the airspace system. The bill includes increased spending levels, most importantly $1.8 and $1.9 billion in the next 2 years for the Airport Improvement Program. The greatest initiative of this committee for many years—spending down the trust fund surplus—is finally addressed in this bill. Due to Chairman OBERSTAR's vigilant leadership, an agreement has been reached with Transportation Secretary Sam Skinner, the Public Works and Transportation Committee, the Appropriations Committee, and the administration to spend down the trust fund by 1995. H.R. 5170 also includes the vital step forward of allowing passenger facility charges in order to fund projects for capacity and safety improvements.

The lifting of the Federal prohibition on PFC's is due to the realization that the needs of the national aviation system are reaching crisis proportion and demand a response now. The need for an additional revenue source, above and beyond available Airport Improvement Program [AIP] funds, mandates a new funding mechanism, or airport delays and congestion will continue unabated. The PFC was careful examined by the committee, and this final version reflects the close scrutiny and changes made to the measure. The PFC provisions guarantee responsible use of those funds, and guarantees that full utilization of the aviation trust fund will not subside in the wake of PFC's. The PFC is the answer to the long-time question of how can the Government act to create a more efficient aviation system, with decreased delays, increased competition, and greater efficiency. In short, everybody wins.

H.R. 5071 looks toward the future of commercial aviation in this country and prepares the system with the ability to address existing needs as well as future growth. It also achieves the all-important spend down of the aviation trust fund. The bill is the result of cooperation between the Democratic and Republican committee leadership, the administration, Members from big cities and rural Members, authorizers, and appropriators. I commend the Public Works leadership for this important step toward a better aviation system and urge the support of every Member in the House.

□ 1820

Mr. ANDERSON. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. Bosco].

Mr. BOSCO. Mr. Chairman, I am very proud of the Committee on Public Works and Transportation and the quality of the bill that that committee presents today before the House. I think in almost every respect it is an excellent measure, one that will greatly improve our Nation's airports and airways.

I am here, however, to raise a storm warning of sorts, because buried deep within this bill is the "T" word. Not

only the "T" word, but the "NT" word, the new tax word.

Mr. Chairman, I am sorry that I will not be able to offer my amendment tonight. My amendment would remove new taxes from this bill. I will be offering it at some point in the future when discussion on this bill resumes. However, I want to make it clear to every Member listening that this bill contains a major new tax, a $1 billion new tax that will be paid by every man, woman, and child each time he or she steps foot onto an airplane.

There is a lot of discussion here over what a new tax is. I was pleased to see the Republican caucus yesterday vote overwhelmingly that they will not accept any new taxes. Well, I intend in the very near future to give them the chance to make that pledge a little more concrete, because when my amendment comes up it will be the first chance that every Member has to look at a brandnew $1 billion tax square in the face and vote against it.

It has been so long around here since we have imposed big new taxes that we have developed sort of an amnesia. When a tax comes up and faces us, we act like we do not recognize it. We say, "Oh, you must be a user fee," or, "You must be a charge."

I am going to introduce Members face to face with a brandnew big tax when my amendment is able to be taken up, hopefully this week or the beginning of next week.

Mr. ANDERSON. Mr. Chairman, I yield 2 minutes to the gentleman from North Carolina [Mr. VALENTINE].

Mr. VALENTINE. Mr. Chairman, I want to commend the leadership of the Public Works and Transportation Committee and, particularly, Chairmen ANDERSON and OBERSTAR and Congressmen HAMMERSCHMIDT and CLINGER for the many hours that they and their staffs spent in preparing and drafting this legislation that we are considering today.

The Aviation Safety and Capacity Expansion Act is an important and necessary piece of legislation that provides for authorization of vital Federal Aviation Administration programs. With the explosive growth in the number of passengers using our national airway system as a result of deregulation of the airline industry has come the need to ensure that aviation safety and capacity needs are met. H.R. 5170 takes a giant step toward meeting those needs.

Included in this legislation is language that will permit large- and medium-hub airports to impose passenger facility charges for the purpose of raising additional funds for airport improvements. I support the ability of these airports to raise these much needed additional funds. At the same time, I share the concern of my colleagues who point to the $7.6 billion that currently sits unused in the aviation trust fund.

The Aviation Safety and Capacity Expansion Act will increase spending from the aviation trust fund. The additional money will go for such purposes as grants to local airport operators for capacity, safety, and security needs, and modernization of the FAA's air traffic control system. The aviation trust fund should be spent for airport capacity and safety improvements. Under the terms of this legislation, that objective will be achieved.

I am also pleased that this legislation will extend the State Block Grant Demonstration Program for an additional year. The State of North Carolina is one of three States that was selected to participate in this demonstration program. Because of problems that the FAA encountered in initiating the program, however, serious delays in project programming occurred in all three States. A 1-year extention will give the participating States an opportunity to demonstrate their capabilities more thoroughly.

I urge my colleagues to support the Aviation Safety and Capacity Expansion Act.

Mr. CLINGER. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, I want to respond very briefly to the gentleman from California [Mr. Bosco], who is absolutely right when he points out the American people are very much opposed to new taxes being imposed on them. I think it is also true we have learned that the American people are supportive of user fees which are directed to the purpose for which they are collected, in this event the proposed airport passenger facility charge. That is a user fee that will be directed specifically at the airport they use, and they will benefit from having the capacity increase so they will not be delayed. I continue to make that distinction between a general tax increase, which this clearly is not, and a local user fee which is going to be a direct benefit to the airport from the people who will be paying that airport passenger facility charge.

Mr. ANDERSON. Mr. Chairman, I yield 6½ minutes to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Chairman, last year I introduced legislation to repeal a section of law, commonly known as the Wright amendment, which prohibits commercial air carriers from providing service between Dallas Love Field and points located outside of Texas or its surrounding States.

The statute was originally passed in 1980 to protect then relatively new Dallas/Fort Worth International Airport [DFW], and ensure that commercial air carriers moved from the older Love Field to the new primary airport serving the metropolitan Dallas/Fort Worth area. However, DFW is now the second busiest airport in the world. Its gates are full and its runways are jammed with planes waiting to take off. DFW no longer needs protection from Love Field's competition. Now the Wright amendment is nothing more than an egregious, anticompetitive, unconstitutional section of the law that must be eliminated.

A recent study by KPMG Peat Marwick concluded that additional airport capacity is needed in the area, and even the proposed $3.5 billion expansion at DFW will not solve the problem. The capacity issue could be greatly improved if the now-underutilized Love Field in downtown Dallas were given the opportunity to provide commercial service to points outside Texas and its contiguous States.

The Wright amendment is unreasonable. By allowing travel to Love Field only from points in Texas, as well as points in Louisiana, Oklahoma, Arkansas, and New Mexico, it arbitrarily permits direct service from cities such as Albuquerque to Dallas Love Field—595 miles—but does not allow such service from Wichita—330 miles—to Love Field. The amendment does not even permit connecting, or through, service.

Airfares are inflated because the one carrier which serves Love Field happens to be the low-cost carrier in the market. Because that carrier cannot quote fares from Love Field to cities outside of the five-State area there is no competition for the full-price carriers, and they charge outrageous fares to Dallas. Under current law, a passenger traveling from Kansas City to Love Field would be required to purchase two round-trip tickets—one to a connecting city, such as Tulsa, and a second round-trip ticket from Tulsa to Dallas. Not even luggage can be checked all the way through to Love Field. The Wright amendment requires the Kansas City passenger to claim his luggage in Tulsa, and then check it back in for his flight to Love Field.

Another example of the restrictions the Wright amendment places on travelers involves a plane that flies a two-stop route from New Orleans to Dallas Love Field to Albuquerque to Phoenix. A passenger traveling to Phoenix who boards the plane in New Orleans may travel on one ticket and does not need to claim his bags and reboard at any stop along the route. However, a Phoenix-bound passenger boarding that same plane at Love Field must deplane in Albuquerque, claim his bags, purchase another ticket to Phoenix, and board a different plane. In other words, passengers on the same plane are treated differently based on their original boarding city.

Under this restrictive, anticompetitive law, it is not possible for American consumers to have access to the advantages of deregulation and fully competitive airfares. Therefore, it was my intention to repeal this wornout law by offering an amendment to H.R. 5170, legislation which addresses aviation enhancement and capacity issues. Afterall, the Wright amendment is a key component in determining routes and fares in the Midwest, Southeast, and Southwest parts of the United States. My amendment would repeal the Wright amendment by amending the International Air Transportation Competition Act of 1980. That Act amends the FAA Authorization Act of 1958. Therefore, it appeared to me that my amendment was both relevant and ger-

mane. However, I was advised that my amendment would not be considered germane to H.R. 5170.

I also attempted to gain a waiver from the Rules Committee, but that request was declined. Therefore, I will not be offering this amendment today unless H.R. 5170 is amended in such a way as my amendment became germane. But let me notify my colleagues that until my last day as a Member of Congress, I will pursue a remedy to this inequity to allow open airfare and service competition in all markets.

I believe this issue which has sparked such emotional debate, deserves a hearing by the Public Works Committee to fully explore all the intricacies of the law. My colleagues that oppose me have raised concerns about the effects of repeal, such as airport noise. While these concerns are valid, they are also solvable. I proposed compromise positions to address their concerns but these were summarily dismissed without discussion. I can only say if those on the other side of this issue are so convinced that their approach is correct, why then are they unwilling to allow the chairman of the Aviation Subcommittee to hold a hearing on this matter? Rather than throw idle criticism at each other's point of view, let's take a comprehensive look at the problem through the appropriate hearing process and work to develop a solution suitable to all parties.

Repealing the Wright amendment will open up competition, reduce airfares to competitive levels, and substantially increase business between markets. That, after all, is what Congress intended to accomplish by passing the Airline Deregulation Act of 1978. It's time to eliminate this special interest section of law, so that the people of this Nation have competitive access to interstate travel as protected by the Constitution. It's time to repeal the Wright amendment.

Mr. Chairman, some of my colleagues heard me down here getting a little emotional about an issue called the Wright amendment, having to do with restricted air travel and higher airfares out of the Dallas market into my own area of Wichita, but also many other areas around this country.

Mr. Chairman, I would like to indicate my great concern about the statute known as the Wright amendment, named after former Speaker Wright, which in my judgment is an inherent restraint on trade and acts as an anticompetitive device during this period of deregulation. My statement will talk about how much more people pay in airfares if they are within the four-State area permitted for flights in the Wright amendment than if they are outside that four-State area, how this is hurting consumers all over the country, particularly the Dallas-Ft. Worth area, paying much more for their airfares as a result of that amendment.

Mr. Chairman, I am aware that I probably will not be able to offer an amendment to this bill because it is probably not going to be germane.

Mr. Chairman, my distinguished friend and the chairman of the Aviation Subcommittee and I have talked about this issue in the past, what I can do to get rid of this anticompetitive thing to bring airfares down, because if I cannot get rid of it legislatively, then the only alternative is massive litigation. I believe we will be successful if a lawsuit is filed in Federal court to break this crazy statute.

Mr. Chairman, I want to know what the gentleman from Minnesota [Mr. OBERSTAR] can give me in terms of assurances to try to remedy my problem, both legislatively as well as the holding of hearings and further review of this situation, in order that I can go home and tell the people in Kansas and all over this country that there is hope for them, there is a light at the end of the tunnel, as a result of these very high airfares that are particularly hurting to us because we are not in the area protected under the Wright amendment.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, the gentleman from Kansas [Mr. GLICKMAN] has been a vigorous advocate for his community, which, indeed, as he has pointed out many times, has been stifled in its efforts at economic growth and development because of lack of competition and high airfares, driving, as the gentleman has said, businessmen and people seeking air travel for pleasure to other locations than his home community. Mr. Chairman, I have been very deeply concerned about that.

First of all, Southwest Airlines is a big competitor. We are not talking about a "mom and pop" operation. This is not a little shoestring air carrier, the Ferguson Airline and Storm Door Co. It is a billion dollar air carrier. It operates to 148 U.S. destinations and 40 points overseas. They are in the big leagues. They are a real "go get 'em" airline.

Mr. Chairman, I have talked to the Dallas-Fort Worth Airport, which is only 9 miles away from Love Field. There will be some real serious congestion problems and air safety problems if you have big operations at Love Field, so close to DFW. The Dallas-Fort Worth Airport Authority has given me its commitment, which I make here on the public record, to immediately make available 7 gates for Southwest Airlines at DFW, and within 12 weeks to provide 15 modular gates to serve Southwest Airlines on an interim basis until within 15 to 18 months they would build permanently 15 gates additional to the 7, a total of 22 gates, for Southwest Airlines to operate at DFW to serve anywhere in America, not limited to the 4 States. Of course, they would have to give up their Love Field four States to serve there.

□ 1830

Mr. GLICKMAN. They would not have to cease their operations at Love Field in order to do this?

Mr. OBERSTAR. No.

Mr. GLICKMAN. They would not, that is clear. Let me ask this: Southwest Airlines, I have talked to them about the situation, and they are not at this stage terribly interested in operating out of DFW and, of course, that upsets me. But at the same time, I am trying to figure out what I can do to deal with the situation so they at least have the opportunity to operate at DFW

What the gentleman is saying is you have the absolute commitment from DFW Airport that they will be able to do that and they will not be restricted from their gates.

Mr. OBERSTAR. They will build these gates next week if Southwest simply makes the application, the request. It will be handled within the week, seven gates available. That is the deal, 22 gates. I do not think any other air carrier in the country would get a deal like this, that quick action as we are proposing here.

You know, if Southwest wants to hide behind the protectionist environment of Love Field and not complete in the big league, then it is their problem. They should not be able to hide behind the protectionist environment of sweet little Love Field and pretend that they are just a little struggling shoestring operation. They are being competitors. They ought to jump on that opportunity to serve out of DFW, go into Wichita and get in the mix with the big boys.

Mr. GLICKMAN. I would say that that is a useful commitment. And if this exercise has done more than to get that commitment, that is great. But I would make the following point: The Love Field thing still remains a problem because it is the only airport in America where you are restricted from going someplace based upon what State you live in as the point of origin.

So the problem for me is if Southwest decides not to do this for whatever reason—and I can sit and blame them all the way to China although they cannot fly there from Love Field or any place else, for that matter—I may have no other option except to either try to move legislation collaterally or else encourage people to go into the courts to challenge the basic statute.

That is one of the reasons why I thought the gentleman would give me some assurance on hearings.

Mr. OBERSTAR. I would invite the gentleman to bring any of his business community and any representative of the carrier to Washington. We will arrange a forum, an appropriate forum under the auspices of the Subcommit-

tee on Aviation in which to discuss this issue and have a thorough airing of it and to explore options.

Mr. GLICKMAN. I thank the gentleman.

I am not totally satisfied, but I am at least satisfied that he is trying to help me, and I appreciate his courtesy.

Mr. CLINGER. Mr. Chairman, I yield 2 minutes to the gentleman from Texas [Mr. BRYANT].

Mr. BRYANT. I thank the gentleman for yielding.

Mr. Chairman, I only rise because I do not want the record to be bare in response to the characterization of this issue during the debate on the rule and during the discussion just a moment ago with the gentleman from Minnesota [Mr. OBERSTAR], which was rendered by the gentleman from Kansas [Mr. GLICKMAN], with regard to Love Field.

Let me make something very, very clear: There is no sweetheart deal in my city with regard to airports. I regret that Mr. GLICKMAN has utilized his very well-earned reputation for credibility and good judgment in this House to make an impassioned plea for his own city with phrases that I think are quite misleading.

The fact of the matter is that Love Field today has a restricted access rule for one simple reason. About 22 years ago the cities of Dallas and Fort Worth decided to build a regional airport and agreed that they would not operate airports within their own city limits but instead would join to build a regional airport, which they did, and it has now become the second largest airport in the United States.

The fact of the matter is that one interstate airline continues to operate out of Love Field and the agreement is that it will operate on a restricted basis, serving only 4 contiguous States. It is a reasonable effort by two cities to go together to build a big regional airport, the Dallas-Fort Worth Airport, and not operate full-blown international airports within their city limits.

That agreement was the agreement that gave birth to our regional airport. It is a reasonable agreement, and no one, I think, can fairly characterize it as any kind of a sweetheart deal, a phrase which suggests that someone somewhere is profiting from it. No one is profiting from it. If Mr. Glickman's city wants to have more air service out of Wichita, KS, God bless them, I will join Mr. OBERSTAR in trying to help Mr. GLICKMAN get that service.

But the fact of the matter is that lack of service to Wichita has nothing to do with Love Field. We have the right in Dallas to protect an agreement made in good faith with the city of Fort Worth and also to worry about the noise impact in the middle of the inner city. That is all that we have done.

I would simply conclude by saying that, as Mr. OBERSTAR just stated, the Dallas-Fort Worth Airport, which is only 14 miles away, is ready to receive Southwest Airlines. If they want to fly to Wichita, KS, they can do so. I hope that they will. But the problem is not Love Field.

Mr. CLINGER. Mr. Chairman, I yield such time as he may consume to the gentleman from Minnesota [Mr. STANGELAND].

Mr. STANGELAND. Mr. Chairman, I rise in strong support of H.R. 5170, the Aviation Safety and Capacity Expansion Act of 1990. While I continue to have some concerns about passenger facility charges [PFC's], I believe H.R. 5170 as a whole has important provisions on trust fund reauthorization, rural airports and passengers, and essential air service [EAS].

H.R. 5170 combines several aviation bills and initiatives. Proposals on passenger facility charges or [PFC's] and essential air service [EAS] are particularly important components. I want to thank Chairman GLENN ANDERSON, ranking minority of the full Committee, JOHN PAUL HAMMERSCHMIDT, subcommittee Chairman JIM OBERSTAR, ranking minority member BILL CLINGER, and others. With their leadership and cooperaiton, committee colleagues and I included provisions to help significantly in addressing concerns about unfair PFC's, adverse impacts on rural passengers and airports, and inadequate funding for the EAS Program.

Mr. Chairman, I continue to have some reservations about PFC proposals. The concept may be hard to defend in light of the existing $7.6 billion surplus in the trust fund, the perception of being another new tax, and the potential impact on rural passengers and small airports. Many of my colleagues, particularly members on the Agriculture Committee, shared my concerns and were prepared to actively oppose the bill if it did not contain adequate safeguards.

In recent weeks, however, the subcommittee leadership, Congressman HAMMERSCHMIDT, and the administration worked very hard to address my concerns. The result of our negotiations is a compromise bill [H.R. 5170] which, among other things, establishes a new small airport fund based on foregone AIP entitlement money from PFC airports and strengthens the EAS Program by establishing a new account within the trust fund and with contract authority.

Without these protections, I would not have supported a PFC provision. These modifications emphasize the critical needs facing small airports, rural passengers, and the EAS program generally. And I would remind my colleagues we should not pass any PFC proposal without these guarantees.

Mr. Chairman, let me also thank the committee for including my amendment to guarantee that small airports not be forced to forego AIP money in return for additional funds made available under this act. The provision expresses the sense of the Congress that the Secretary should not reduce any funding for small airports because of expected funding as a result of the PFC proposal and the new small airport trust fund.

I also appreciate the committee's willingness to include in the committee report language regarding the EAS program and the funding of newly eligible points. The committee included $38.6 million in the bill for the new EAS account with the specific understanding this would allow Fergus Falls, MN or other newly eligible points to participate in the program.

Fergus Falls has had to wait far too long to become eligible for the EAS program and to receive the necessary funding. The community has worked diligently to obtain limited funding and support under section 419(d)(2)(B) of the 1987 act. Today's bill signals an important and critical step forward in making the Federal Government's commitment a reality.

Mr. Chairman, H.R. 5170 is also critically important to the entire Nation. This 2-year, $17.7 billion bill funds development of the Nation's airports and air traffic control system, as well as operations of the Federal Aviation Administration. It will help keep our aviation industry on track by meeting current and future safety, capacity, and infrastructure needs.

For these and other reasons, I urge my colleagues to support the bill.

Mr. CLINGER. Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota [Mr. OBERSTAR], the chairman of the subcommittee.

Mr. OBERSTAR. I thank the gentleman for yielding this time.

Mr. Chairman and colleagues, we bring to the House floor a monumental bill that will serve the interests of aviation, the interests of economic growth in America for a $620 billion sector of the national economy well into the next century.

This legislation is pro-capacity, it is pro-safety, it is pro-small airports, it is pro-rural development, it is pro-consumer.

It is monumental legislation that this House ought to adopt, and we ought to defeat the amendment that would take the heart of this bill out, the pro-consumer part of this bill which allows, through the medium of the passenger facility charge, airports to reintroduce competition into this era of deregulation.

I will have more to say on that during the discussion of the so-called Bosco amendment.

For now, I want to say that we have crafted on a bipartisan basis with the participation of the entire aviation community, with the support of the Department of Transportation, the Office of Management and Budget, a piece of legislation of which all of us in this Chamber can be proud.

Mr. Chairman, I urge support of the legislation.

Mr. CLINGER. Mr. Chairman, I yield myself 1 minute in closing.

Mr. Chairman, I do this just to reiterate what Chairman OBERSTAR has said. That is, this bill does have the strong support of the administration and Secretary Skinner, who was a partner in developing this legislation.

But also I want to commend the gentleman from California, Chairman ANDERSON, and the gentleman from Arkansas, the ranking member, Mr. HAMMERSCHMIDT, for the work and cooperation they have given in fashioning this bill, but especially to the gentleman from Minnesota [Mr. OBERSTAR] who has really been the driving force behind bringing very disparate parties together with many differing agendas to the table and sticking with it through the long hours necessary to reach the kind of compromise and the kind of negotiated settlement that we have reached.

The result, I think you will find, is absolutely marvelous in terms of what it is going to mean for aviation in the next century. I think the gentleman from Minnesota deserves enormous credit for getting us to this point.

Mr. GEPHARDT. Mr. Chairman, I rise today to support the legislation of the Public Works and Transportation Committee and to commend the members of both the full committee and specifically the efforts of the Subcommittee on Aviation for the legislation we have before us today. Chairman OBERSTAR and Chairman ANDERSON have done a fine job of crafting legislation which will set the stage for expansion of America's aviation system into the 1990's.

The Aviation Safety and Expansion Act of 1990 is a critical component in our National Air Transportation System. It provides much needed resources to relieve capacity problems at our Nation's airports and to upgrade our air safety system. According to a recent industry study, the price tag for improving airport capacity to keep pace with demand is over $50 billion over the next 5 years. The authorization of spending in this legislation can only provide some of the additional resources needed to keep pace with growing air travel demands. As always, local authorities will have to finance the lion's share of their capacity expansion and safety upgrades.

Efforts by local planners to meet the demands of mushrooming air traffic have been undermined. Major expansion projects have been made impossible because of limited ability to tap into capital financing sources. This has caused major delay problems.

Today 21 airports, including my hometown airport, Lambert Field in St. Louis, experience an average of 55 hours of aircraft delay every single day of the year. Without major capital improvements in the next few years, the Federal Aviation Administration expects chronic delay problems in over 40 percent of the Nation's commercial airports. This would affect 8 out of 10 people who fly in and out of U.S. airports.

Expansion projects which are now underway at major facilities are literally in a holding pattern pending the outcome of this legislation. St. Louis Lambert Field currently has a proposal pending before FAA to add 4 new runways and 60 new gates. Without these improvements, the airport will choke on a capacity problem that is expected to almost double in volume within 20 years. This would seriously undermine the viability of the airport. And there are situations like this at airports across the country.

Mr. Chairman, an important component of this legislation will free up an additional funding source to help local authorities finance capital improvements. Chairman OBERSTAR has designed a measured and responsible mechanism for allowing local airport authorities the opportunity to levy fees which would remain at the local level to finance specific projects approved by the Department of Transportation.

Passenger facillity charges [PFC's] will supplement grant money received by airports from the Airport Improvement Program. The legislation will phase out grant money as a condition for accepting PFC money, so that smaller airports which may not be able to levy PFC's, will have more grant money available to them.

As we all know, the Federal financing system for transportation infrastructure has been criticized in the last few years because of unspent reserves in the trust funds. I have been one of those critics. Spending down the reserves in the trust fund is crucial. Nevertheless, I am enthusiastic about this new financing system because the design of the provision suspends PFC authority if certain levels of capital improvements are not adequately funded through the trust fund.

Everyone in this Chamber understands what it is like to deal with a congested airport, waiting for clearance to land, and fearing technical problems which endanger the safety of the passengers. Travelers in the air transportation system need to know that the facilities in which they entrust passage are able to accommodate them in a timely and safe manner. I support the legislation and ask my colleagues to join me by voting for it.

Mr. ROSTENKOWSKI. Mr. Chairman, I rise in support of H.R. 5170, which authorizes airports to impose passenger facility charges on airline passengers using those airports. This legislation creates a substantial new source of funding for the major capital needs of our Nation's airports, which are faced with enormous costs of needed capacity expansion and safety improvements.

In this time of large Federal budget deficits, it makes very good sense to permit our airports to pay more of their own way when they want to. This bill will mean reduced demand upon our limited Federal resources. It will permit airports to leverage their receipts from these passenger facility charges to borrow in a cost-effective manner to meet their capital needs. That means that fewer airports will need to wait for Federal airport improvement grants.

I am also pleased that H.R. 5170 makes a significant change to the use of tax revenues deposited in the airport and airway trust fund by eliminating the so-called "penalty clause." The penalty clause has made the availability of trust fund revenues for operation and maintenance costs contingent upon the use of certain trust fund revenues for capital improvements and equipment. This limitation has placed an unfair burden upon the general taxpaying public, while trust fund tax revenues have been allowed to accumulate. Mr. Speaker, this was an important issue that was debated during last year's budget reconciliation bill, and I am glad that the position taken by the Committee on Ways and Means last year has prevailed.

I urge my colleagues to support this important legislation.

Mr. CRAIG. Mr. Chairman, I rise today during consideration of H.R. 5170, amending the Airport and Airway Improvement Act of 1982, because I am concerned that some airports—especially small airports—will continue to go wanting for discretionary funds, despite the fact that several billion unspent dollars are sitting in the aviation trust fund. This is certainly the case for the Idaho Falls Municipal Airport in my own State of Idaho. For the record, I would like to detail the situation at that airport.

On June 28, 1990, I was prepared to offer an amendment to H.R. 5170, concerning the Idaho Falls Municipal Airport, in the Committee on Public Works and Transportation. However, after consulting with staff and various members of the committee, and considering the committee's tradition of not earmarking discretionary funds to a specific airport, I did not offer my amendment. Neither did I feel it was appropriate to pursue report language before all possible administrative routes had been explored and exhausted.

Nevertheless, I remain concerned that the Idaho Falls Airport is facing some critical safety-related problems which need to be resolved. I have appreciated the indulgence of the chairman, Mr. HAMMERSCHMIDT and Mr. CLINGER in listening to my concerns and thank them for their encouragement in looking for administrative solutions to address these dire needs.

The first safety problem is that the Idaho Falls Airport's Crash, Fire, and Rescue Station is not in compliance with FAA's response time requirements, as set forth in the new interpretation of the 3-minute response time requirement. FAA has indicated that only a portion of the relocated station which is necessary for aircraft rescue and firefighting would be eligible for 90 percent Federal participation. FAA has refused to consider the backup fire truck and ambulance as necessary and eligible for entitlement funds. I disagree with the FAA on this issue and believe the entire crash, fire and rescue station should be funded out of the entitlement program.

Second, the clear zone of the main runway, runway 2–20, and the associated taxiway also fail to comply with requirements. The main runway is the only one used by major carriers. The clear zone is bisected by a railroad, Interstate Highway 15 and a blast fence required by the proximity of the highway. The instrument approach light system is nonstandard. There are currently waivers from standard FAA safety criteria. The parallel taxiway is nonstandard in its separation from the main runway. Aircraft on the taxiway are a safety hazard to aircraft attempting to land, and capacity is reduced. The FAA has restricted the airport so that no planes can land or take off while an airplane is on the taxiway. FAA has refused to fund a taxiway lighting system due to the nonstandard separation. In poor weather, aircraft such as American's MD–80's and Delta's B–737's must taxi using only reflectors for guidance. The FAA has also refused to

provide discretionary funds to extend the main runway in order to bring the clear zone into safety compliance or to separate the taxiway to avoid the existing safety hazard.

The total cost of both safety projects is estimated at $5 million. Idaho Falls' AIP entitlements over the next 2 years are estimated at $1.4 million, with the total airport share at $500,000. This means that about $3.1 million in discretionary funding is needed to resolve the problems over the next 2 years. Unfortunately, Idaho Falls has received no discretionary money in the past and, considering the current trend of moneys going to much larger airports, is highly unlikely to receive any in the future.

Mr. Chairman, the whole airport, the second largest in my State and rapidly growing, is not in compliance. In addition, inclement weather conditions in nearby Salt Lake City and Jackson Hole cause traffic to be rerouted to the Idaho Falls, compounding the safety problems.

I am happy to say that last week I met with the Idaho Falls Director of Aviation, James Thorsen, and Leonard Griggs, FAA Assistant Administrator for Airports, to discuss the safety needs at the Idaho Falls Municipal Airport. As a result of that meeting and the amendment I had originally planned to offer, the FAA has agreed to work with the airport. They will be putting together a new master plan and performing the necessary environmental assessment work during the coming months. They will work to bring the present crash, fire, and rescue station into compliance or build a new one. In addition, they will possibly break ground on the runway extension, taxiway, and associated lights and navigational aids as early as next spring, depending on the availability of discretionary money. This certainly is an improvement from only a few weeks ago. I am confident that the FAA is now fully aware of the safety problems associated with the growth in Idaho Falls and has received some guidance with which to respond to those concerns.

Mr. Chairman, I would like to recognize my fellow Public Works and Transportation Committee members for their hard work on H.R. 5170 and thank them for their continued attention to the Idaho Falls Municipal Airport and other smaller facilities around the Nation.

Mr. BALLENGER. Mr. Chairman, I rise today in support of H.R. 5170, the Aviation Safety and Capacity Expansion Act of 1990.

This legislation is the product of months of hearings and thoughtful consideration. H.R. 5170 authorizes $17.7 billion for development of the Nation's airports, modernizations of the Air Traffic Control System, and operations of the Federal Aviation Administration [FAA].

This measure contains one of the Bush administration's highest transportation priorities the repeal of the prohibition that prevents airports from raising revenues by levying a passenger facility charge [PFC].

The legislation also provides a 1-year extension for the State Block Grant Pilot Program in which participating States administer a grant of Federal AIP funds to general aviation airports. North Carolina is one of the three States selected to participate in this program.

North Carolina is fortunate to have an exceptional aviation director in the North Carolina Department of Transportation who has worked well with the FAA in spearheading this new effort. I am confident the 1-year extension will make a difference in what can be accomplished under the program.

Finally, the Auxiliary Flight Service Station Program language found in H.R. 5170 is a giant step forward in air safety. I commend Mr. OBERSTAR and Mr. CLINGER for including this provison in the bill.

Many areas of the country have unique weather conditions which require local expertise to properly interpret and convey information to pilots. In the mountainous terrain of western North Carolina, the weather conditions can change in a matter of minutes. Having personnel who are knowledgeable of these local conditions will make the critical difference for all who fly in these areas.

At this point, I would like to insert into the RECORD a letter in support of H.R. 5170 from the Aircraft Owners and Pilots Association [AOPA]. AOPA should be commended for its diligent efforts on behalf of the Auxiliary Flight Service Station Program.

I urge my colleagues to support H.R. 5170:

AIRCRAFT OWNERS & PILOTS, ASSOCIATION,
Frederick, MD, July 11, 1990.

Hon. T. CASS BALLENGER,
U.S. House of Representatives, Washington, DC.

DEAR REPRESENTATIVE BALLENGER: As the House of Representatives prepares to consider H.R. 5170, the Aviation Safety and Capacity Expansion Act of 1990, we are writing to you to request your support for the Auxiliary Flight Service Station program mandated under Section 113 of the legislation.

This important provision was included by Chairman Oberstar and Mr. Clinger, and it has the full support of AOPA and our 300,000 members nationwide. The program would ensure that some of the nation's remaining flight service stations, located in areas of unique weather or operating conditions, would be kept open to supplement the services of the FAA's 61 automated flight service stations.

During his tenure as FAA Administrator, Admiral Donald Engen expressed support for the concept several times in Congressional testimony. We view the program as merely a codification of the concept originally advanced by Admiral Engen when he was Administrator of the FAA.

Admiral Engen testified before the Senate Appropriations Subcommittee on Transportation in January of 1985. He told the Subcommittee, "I am looking at the United States across the board, to look at specific places which have specific weather phenomena, or perhaps operating conditions which indicate a need that local knowledge be expressed. . . . I am looking at keeping some of these flight service stations as adjuncts to the automated flight service stations . . . I would hope that in 1990, for instance, that I will have 52 flight service stations in addition to my 61 automated flight service stations still remaining."

During hearings in April of 1985 before the House Appropriations Subcommittee on Transportation, Admiral Engen stated, "I do believe that there are some existing flight service stations out there that serve a singular purpose. These flight service stations are in the areas such as mountains, valleys, seacoasts, odd places that have very strange meteorological conditions. And I am looking critically at those."

The track record for FAA's flight service modernization program is scandalous. FAA has evidenced bad faith on this issue for years, playing an ongoing shell game with Congress and the users. The Auxiliary Flight Service Station program mandated under Section 113 of the pending reauthorization would be a decisive step to help ensure safety by maintaining a network of flight service stations in areas of unique weather.

Thank you for considering our views.

Sincerely,

JOHN L. BAKER,
President.

Mr. LIGHTFOOT. Mr. Chairman, I rise in support of H.R. 5170, legislation to amend the Airport and Airway Improvement Act of 1982.

I commend the chairman and ranking member of the House Public Works and Transportation Subcommittee on Aviation, Mr. OBERSTAR and Mr. CLINGER for their diligence and hard work to ensure generous authorization levels were included in this bill. I also appreciate the inclusion of the Auxiliary Flight Service Station Program language as part of H.R. 5170. As a pilot and flight instructor, I know my flying constituents stand to gain a great deal of enhanced flying safety from that program.

Mr. Chairman, the Auxiliary Flight Service Station Program is not about saving all of the remaining 143 flight service stations that are awaiting consolidation. However, as we have heard in past testimony to the House Committee on Public Works and Transportation from previous Federal aviation administrators, there are locations in the country—seacoasts and mountain areas for example—where we need on hand more than a piece of automated equipment or an hourly weather observation—we need expertise.

That expertise is provided by the trained professionals who are familiar with the weather in the location they are working.

The Auxiliary Flight Service Station Program language requires the Secretary of the Department of Transportation to report to Congress within 6 months with the plan and schedule for implementation. I look forward to that report and the speedy implementation of the Auxiliary Flight Service Station Program.

I urge my colleagues to support H.R. 5170 and commend the leadership of the committee for a job well done.

Mr. CLINGER. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore (Mr. PICKETT). All time has expired.

Pursuant to the rule, the committee amendment in the nature of a substitute now printed in the reported bill shall be considered by titles as an original bill for the purpose of amendment, and each title is considered as read.

It is in order to consider the amendment printed in House Report 101-582 by and if offered by the gentleman from New Jersey [Mr. ROE], or his designee. Said amendment is debatable for 30 minutes, equally divided and controlled by the gentleman from New Jersey [Mr. ROE], and the gentleman from Pennsylvania [Mr. WALKER].

The Clerk will designate section 1.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be printed in the RECORD and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The text of the committee amendment in the nature of a substitute is as follows:

H.R. 5170

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Aviation Safety and Capacity Expansion Act of 1990".

(b) TABLE OF CONTENTS.—

Sec. 1. Short title; table of contents.

TITLE I—AVIATION SAFETY AND CAPACITY EXPANSION

Sec. 101. Declaration of policy.
Sec. 102. Airport improvement program.
Sec. 103. Airway improvement program.
Sec. 104. FAA operations.
Sec. 105. Operation and maintenance of aviation system.
Sec. 106. Weather service.
Sec. 107. Military airport program.
Sec. 108. Passenger facility charges.
Sec. 109. Reduction in airport improvement program apportionments for large and medium hub airports imposing passenger facility charges.
Sec. 110. Use of PFC reduced apportionment funds.
Sec. 111. Small community air service program.
Sec. 112. State block grant pilot program.
Sec. 113. Auxiliary flight service station program.
Sec. 114. Airport and airway improvements for the Virgin Islands.
Sec. 115. Severability.

TITLE II—FEDERAL AVIATION ADMINISTRATION PROCUREMENT REFORM

Sec. 201. Procurement authority.

TITLE I—AVIATION SAFETY AND CAPACITY EXPANSION

SEC. 101. DECLARATION OF POLICY.

Section 502(a) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2201(a)) is amended—

(1) in paragraph (5) by inserting ", including as they may be applied between category and class of aircraft" after "discriminatory practices"; and

(2) in paragraph (13) by inserting "and should not unjustly discriminate between categories and classes of aircraft" after "attempted".

SEC. 102. AIRPORT IMPROVEMENT PROGRAM.

Section 505 of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2204) is amended—

(1) in subsection (a) by striking "'13,816,700,000" and inserting '$13,916,700,000"; and

(2) in subsection (b) by striking "September 30, 1987" and inserting "September 30, 1992".

SEC. 103. AIRWAY IMPROVEMENT PROGRAM.

(a) RENAMING OF AIRWAY PLAN.—Section 504(b)(1) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2203(b)(1)) is amended by inserting after the second sentence the following new sentence: "For fiscal year 1991 and thereafter, the revised plan shall be known as the 'Airway Capital Investment Plan'.".

(b) AIRWAY FACILITIES AND EQUIPMENT.—The first sentence of section 506(a)(1) of such Act (49 U.S.C. App. 2205(a)(1)) is amended by striking "September 30, 1981," and all that follows through the period and inserting the following: "September 30, 1990, aggregate amounts not to exceed $2,500,000,000 for fiscal year 1991 and $5,500,000,000 for the fiscal years ending before October 1, 1992.".

SEC. 104. FAA OPERATIONS.

Section 106 of title 49, United States Code, is amended by adding at the end the following new subsection:

"(k) AUTHORIZATION OF APPROPRIATIONS FOR OPERATIONS.—There is authorized to be appropriated for operations of the Administration $4,088,000,000 for fiscal year 1991 and $4,412,600,000 for fiscal year 1992.".

SEC. 105. OPERATION AND MAINTENANCE OF AVIATION SYSTEM.

(a) ELIMINATION OF PENALTY.—Section 506(c)(3)(B)(i) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2205(c)(3)(B)(i)) is amended—

(1) by inserting "and" after "1989"; and

(2) by striking "$3,770,000,000" and all that follows through "1992,".

(b) FUNDING.—Section 506(c) of such Act (49 U.S.C. App. 2205(c)) is amended by adding at the end the following new paragraph:

"(4) FISCAL YEARS 1991–1992.—The amount appropriated from the Trust Fund for the purposes of clauses (A) and (B) of paragraph (1) of this subsection for each of fiscal years 1991 and 1992 may not exceed—

"(A) 75 percent of the amount of funds made available under section 505, subsections (a) and (b) of this section, and section 106(k) of title 49, United States Code, for such fiscal year; less

"(B) the amount of funds made available under section 505 and subsections (a) and (b) of this section for such fiscal year.".

SEC. 106. WEATHER SERVICE.

The second sentence of section 506(d) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2205(d)) is amended—

(1) by striking "and" the first place it appears and inserting a comma; and

(2) by inserting before the period the following: ", $34,521,000 for fiscal year 1991, and $35,389,000 for fiscal year 1992".

SEC. 107. MILITARY AIRPORT PROGRAM.

(a) DECLARATION OF POLICY.—Section 502(a) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2201(a)) is further amended—

(1) by striking "and" at the end of paragraph (12);

(2) by striking the period at the end of paragraph (13) and inserting "; and"; and

(3) by adding at the end the following:

"(14) special emphasis should be placed on the conversion of appropriate former military air bases to civil use and on the identification and improvement of additional joint-use facilities.".

(b) SET-ASIDE.—Section 508(d) of such Act (49 U.S.C. App. 2204(d)) is amended by striking paragraph (5) and inserting the following:

"(5) MILITARY AIRPORT SET-ASIDE.—Not less than 1.5 percent of the funds made available under section 505 in each of fiscal years 1991 and 1992 shall be distributed during such fiscal year to sponsors of current or former military airports designated by the Secretary under subsection (f) for the purpose of developing current and former military airports to improve the capacity of the national air transportation system.

"(6) REALLOCATION.—If the Secretary determines that he will not be able to distribute the amount of funds required to be distributed under paragraph (1), (2), (3), (4), or (5) of this subsection for any fiscal year because the number of qualified applications submitted in compliance with this title is insufficient to meet such amount, the portion of such amount the Secretary determines will not be distributed shall be available for obligation during such fiscal year for other airports and for other purposes authorized by section 505 of this title.".

(c) DESIGNATION OF FORMER MILITARY AIRPORTS.—Section 508 of such Act is further amended by adding at the end the following new subsection:

"(f) DESIGNATION OF CURRENT OR FORMER MILITARY AIRPORTS.—

"(1) DESIGNATION.—The Secretary shall designate not more than 8 current or former military airports for participation in the grant program established under subsection (d)(5) and this subsection. At least 2 such airports shall be designated within 6 months after the date of the enactment of this subsection and the remaining airports shall be designated for participation no later than September 30, 1992.

"(2) SURVEY.—The Secretary shall conduct a survey of current and former military airports to identify which ones have the greatest potential to improve the capacity of the national air transportation system. The survey shall also identify the capital development needs of such airports in order to make them part of the national air transportation system and shall identify which capital development needs are eligible for grants under section 505. The survey shall be completed by September 30, 1991.

"(3) LIMITATION.—In selecting airports for participation in the program established under subsection (d)(5) and this subsection and in conducting the survey under paragraph (2), the Secretary shall consider only those current or former military airports whose conversion in whole or in part to civilian commercial use as part of the national air transportation system would enhance airport and air traffic control system capacity in major metropolitan areas and reduce current and projected flight delays.

"(4) PERIOD OF ELIGIBILITY.—An airport designated by the Secretary under this subsection shall remain eligible to participate in the program under subsection (d)(5) and this subsection for the 5 fiscal years following such designation. An airport that does not attain a level of enplaned passengers during such 5 fiscal year period which qualifies it as a small hub airport as defined as of January 1, 1990, may be redesignated by the Secretary for participation in the program for such additional fiscal years as may be determined by the Secretary.

"(5) ADDITIONAL FUNDING.—Notwithstanding the provisions of section 513(b), not to exceed $5,000,000 per airport of the sums to be distributed at the discretion of the Secretary under section 507(c) for any fiscal year may be used by the sponsor of a current or former military airport designated by the Secretary under this subsection for construction, improvement, or repair of terminal building facilities, including terminal gates used by aircraft for enplaning and deplaning revenue passengers. Under no circumstances shall any gates constructed, improved, or repaired with Federal funding under this paragraph be subject to long-term

leases for periods exceeding 10 years or majority in interest clauses.".

SEC. 108. PASSENGER FACILITY CHARGES.

Section 1113 of the Federal Aviation Act of 1958 (49 U.S.C. App. 1513) is amended—

(1) in subsection (a) by inserting "except as provided in subsection (e) and" before "except that"; and

(2) by adding at the end the following new subsection:

"(e) AUTHORITY FOR IMPOSITION OF PASSENGER FACILITY CHARGES.—

"(1) IN GENERAL.—Subject to the provisions of this subsection, the Secretary may grant a public agency which controls a commercial service airport authority to impose a fee of $1.00, $2.00, or $3.00 for each paying passenger of an air carrier enplaned at such airport to finance eligible airport-related projects to be carried out in connection with such airport or any other airport which such agency controls. For purposes of this subsection, financing an eligible airport-related project includes making payments for debt service on bonds and other indebtedness incurred to carry out such project.

"(2) USE OF REVENUES AND RELATIONSHIP BETWEEN FEES AND REVENUES.—The Secretary may grant a public agency which controls a commercial service airport authority to impose a fee under this subsection to finance specific projects only if the Secretary finds, on the basis of an application submitted for such authority—

"(A) that the amount and duration of the proposed fee will result in revenues (including interest and other returns on such revenues) which do not exceed amounts necessary to finance the specific projects; and

"(B) that each of the specific projects is an eligible airport-related project which will—

"(i) preserve or enhance capacity, safety, or security of the national air transportation system,

"(ii) reduce noise resulting from an airport which is part of such system, or

"(iii) furnish opportunities for enhanced competition between or among air carriers.

"(3) LIMITATION REGARDING PASSENGERS OF AIR CARRIERS RECEIVING ESSENTIAL AIR SERVICE COMPENSATION.—If a passenger of an air carrier is being provided air service to an eligible point under section 419 for which compensation is being paid under such section, a public agency which controls any other airport may not impose a fee pursuant to this subsection for enplanement of such passenger with respect to such air service.

"(4) LIMITATION REGARDING OBLIGATIONS.—No fee may be imposed pursuant to this subsection for a project which is not approved by the Secretary under this subsection on or before September 30, 1992—

"(A) if, during fiscal years 1991 and 1992, the amount available for obligation, in the aggregate, under section 505 of Airport and Airway Improvement Act of 1982 is less than $3,700,000,000; or

"(B)(i) if, during fiscal year 1991, the amount available for obligation, in the aggregate, under section 419 is less than $26,600,000; or

"(ii) if, during fiscal year 1992, the amount available for obligation, in the aggregate, under section 419 is less than $38,600,000.

"(5) TWO ENPLANEMENTS PER TRIP LIMITATION.—Enplaned passengers on whom a fee may be imposed by a public agency pursuant to this subsection include passengers of air carriers originating or connecting at the commercial service airport which the agency controls. A fee may not be collected pursuant to this subsection from a passenger with respect to any enplanement of such passenger, on a one-way trip and on a trip in each direction of a round trip, after the second enplanement for which a fee has been collected pursuant to this subsection from such passenger.

"(6) TREATMENT OF REVENUES.—Revenues derived from collection of a fee by a public agency pursuant to this subsection shall not be treated as airport revenues for the purposes of any contract between such agency and an air carrier.

"(7) EXCLUSIVITY OF AUTHORITY.—No State or political subdivision or agency thereof which is not a public agency controlling a commercial service airport shall prohibit, limit, or regulate the imposition of fees by the public agency pursuant to this subsection, collection of such fees, or use of revenues derived therefrom. No contract between an air carrier and a public agency which controls a commercial service airport entered into before, on, or after the date of the enactment of this subsection shall affect the authority of the public agency to impose fees pursuant to this subsection and to use the revenues derived from such fees in accordance with this subsection.

"(8) NONEXCLUSIVITY OF CONTRACTUAL AGREEMENTS.—No project carried out through the use of a fee collected pursuant to this subsection may be subject to an exclusive long-term lease or use agreement of an air carrier, as defined by the Secretary by regulation. Any lease or use agreement of an air carrier with respect to a facility constructed or expanded through the use of such fee may not contain or be subject to any term or condition which restricts the public agency which controls the airport from funding, developing, or assigning new capacity at the airport.

"(9) COLLECTION AND HANDLING OF FEES BY AIR CARRIERS.—The regulations issued by the Secretary to carry out this subsection shall—

"(A) require air carriers and their agents to collect fees imposed by public agencies pursuant to this subsection;

"(B) establish procedures regarding handling and remittance of the amounts so collected;

"(C) ensure that such amounts are promptly paid to the public agency for which they are collected less a uniform amount determined by the Secretary as reflecting average necessary and reasonable expenses (net of interest accruing to the air carrier and agent after collection and prior to remittance) incurred in the collection and handling of such fees; and

"(D) require that the amount of fees collected pursuant to this subsection with respect to any air transportation be noted on the ticket for such air transportation.

"(10) APPLICATION PROCESS.—

"(A) SUBMISSION.—A public agency which controls a commercial service airport and is interested in imposing a fee pursuant to this subsection shall submit to the Secretary an application for authority to impose such fee.

"(B) CONTENT.—An application submitted under this paragraph shall contain such information and be in such form as the Secretary may require by regulation.

"(C) OPPORTUNITY FOR CONSULTATION.—Before submission of an application under this paragraph, the public agency must provide reasonable notice to, and an opportunity for consultation with, air carriers operating at the airport.

"(D) NOTICE AND OPPORTUNITY FOR COMMENT.—After receiving an application under this paragraph, the Secretary shall provide notice and an opportunity for comment by air carriers and other interested persons concerning such application.

"(E) APPROVAL.—A fee may only be imposed pursuant to this subsection if the Secretary approves an application granting authority for the imposition of such fee. Not later than 120 days after the date of receipt of such an application, the Secretary shall make a final decision regarding approval of such application.

"(11) RECORDKEEPING AND AUDITS.—

"(A) WITH RESPECT TO COLLECTION OF FEES.—The Secretary shall issue regulations requiring such recordkeeping and auditing of accounts maintained by an air carrier and any agency thereof which is collecting a fee imposed pursuant to this subsection and by the public agency which is imposing such fee as may be necessary to ensure compliance with this subsection.

"(B) WITH RESPECT TO USE OF REVENUES.—The Secretary shall periodically audit and review the use by a public agency which controls an airport of revenues derived from a fee imposed pursuant to this subsection. Upon such review and after a public hearing, the Secretary may terminate the authority of such agency to impose such fee, in whole or in part, to the extent the Secretary determines that revenues derived therefrom are not being used in accordance with this subsection.

"(C) SET-OFF.—If the Secretary determines that a fee imposed pursuant to this subsection is excessive or that the revenues derived from such fee are not being used in accordance with this subsection, the Secretary may set off such amounts as may be necessary to ensure compliance with this subsection against amounts otherwise payable to the public agency under the Airport and Airway Improvement Act of 1982.

"(12) TERMS AND CONDITIONS.—Authority granted to impose a fee pursuant to this subsection shall be subject to such terms and conditions as the Secretary may establish to carry out the objectives of this subsection.

"(13) ISSUANCE OF REGULATIONS.—Not later than 180 days after the date of the enactment of this subsection, the Secretary shall issue such regulations as may be necessary to carry out this subsection. Such regulations may prescribe the time and form by which a fee imposed pursuant to this subsection shall take effect.

"(14) DEFINITIONS.—For purposes of this subsection, the following definitions apply:

"(A) AIR CARRIER.—The term 'air carrier' includes a foreign air carrier.

"(B) AIRPORT, COMMERCIAL SERVICE AIRPORT, AND PUBLIC AGENCY.—The terms 'airport', 'commercial service airport', and 'public agency' have the meaning such terms have under section 503 of the Airport and Airway Improvement Act of 1982.

"(C) ELIGIBLE AIRPORT-RELATED PROJECT.—The term 'eligible airport-related project' means—

"(i) a project for airport development under the Airport and Airway Improvement Act of 1982;

"(ii) a project for airport planning under such Act;

"(iii) a project for terminal development described in section 513(b) of such Act;

"(iv) a project for airport noise capability planning under section 103(b) of the Aviation Safety and Noise Abatement Act of 1979;

"(v) a project to carry out noise compatibility measures which are eligible for assistance under section 104 of the Aviation Safety and Noise Abatement Act of 1979 without regard to whether or not a program

has been approved for such measures under such section; and

"(vi) a project for construction of gates and related areas at which passengers are enplaned or deplaned.

"(D) SECRETARY.—The term 'Secretary' means the Secretary of Transportation.".

SEC. 109. REDUCTION IN AIRPORT IMPROVEMENT PROGRAM APPORTIONMENTS FOR LARGE AND MEDIUM HUB AIRPORTS IMPOSING PASSENGER FACILITY CHARGES.

Section 507(b) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2206(b)) is amended by adding at the end the following new paragraph:

"(7) REDUCTION IN APPORTIONMENTS TO CERTAIN LARGE AND MEDIUM HUBS.—

"(A) GENERAL RULE.—The amount which, but for this paragraph, would be apportioned under this section for a fiscal year to a sponsor of an airport that annually has 0.25 percent or more of the total annual enplanements in the United States and for which a fee is imposed in such fiscal year pursuant to section 1113(e) of the Federal Aviation Act of 1958 shall be reduced by an amount equal to 50 percent of the projected revenues derived from such fee in such fiscal year.

"(B) LIMITATION.—The maximum reduction in an apportionment to a sponsor of an airport as a result of this paragraph in a fiscal year shall be 50 percent of the amount which, but for this paragraph, would be apportioned to such airport under this section.".

SEC. 110. USE OF PFC REDUCED APPORTIONMENT FUNDS.

(a) ADDITION OF FUNDS TO EXISTING DISCRETIONARY FUND.—Section 507(c)(1) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2206(c)(1)) is amended by inserting after the first sentence the following new sentence: "Twenty-five percent of the amounts which are not apportioned under this section as a result of subsection (b)(7) shall be added to such discretionary fund.".

(b) SMALL AIRPORT FUND.—Section 507 of such Act is amended by redesignating subsections (d) and (e), and any references thereto, as subsections (e) and (f), respectively, and by inserting after subsection (c) the following new subsection:

"(d) SMALL AIRPORT FUND.—

"(1) ESTABLISHMENT.—Seventy-five percent of the amounts which are not apportioned under this section as a result of subsection (b)(7) shall constitute a small airport fund to be distributed at the discretion of the Secretary.

"(2) SET-ASIDE FOR GENERAL AVIATION AIRPORTS.—One-third of the amounts in the small airport fund established by this subsection and distributed by the Secretary under this subsection in a fiscal year shall be used for making grants to sponsors of public-use airports (other than commercial service airports) for any purpose for which funds are made available under section 505.

"(3) SET-ASIDE FOR NONHUB AIRPORTS.—Two-thirds of the amounts in the small airport fund established by this subsection and distributed by the Secretary under this subsection in a fiscal year shall be used for making grants to sponsors of commercial service airports each of which annually has less than 0.05 percent of the total annual enplanements in the United States for any purpose for which funds are made available under section 505.".

(c) PROHIBITION ON REDUCED FUNDING.—It is the sense of Congress that the Secretary should not reduce funding under the discretionary fund established under section 507(c) of the Airport and Airway Improvement Act of 1982 for small commercial service and general aviation airports as a result of additional funds made available to such airports under this section, including amendments made by this section.

SEC. 111. SMALL COMMUNITY AIR SERVICE PROGRAM.

(a) DEFINITION OF ELIGIBLE POINT.—Section 419(a) of the Federal Aviation Act of 1958 (49 U.S.C. App. 1389(a)) is amended to read as follows:

"(a) ELIGIBLE POINT DEFINED.—

"(1) GENERAL RULE.—For purposes of this section, the term 'eligible point' means any point in the United States—

"(A) which was defined as an eligible point under this section as in effect before October 1, 1988;

"(B) which received scheduled air transportation at any time after January 1, 1990; and

"(C) which is not listed in the Department of Transportation Orders 89-9-37 and 89-12-52 as being a point no longer eligible for compensation under this section.

"(2) LIMITATION ON USE OF PER PASSENGER SUBSIDY.—The Secretary may not determine that a point described in paragraph (1) is not an eligible point on the basis of the per passenger subsidy at the point or on any other basis not specifically set forth in this section.".

(b) FUNDING.—

(1) IN GENERAL.—Section 419 of such Act is amended by redesignating subsection (l), and any reference thereto, as subsection (m) and by inserting after subsection (k) the following new subsection:

"(l) FUNDING.—

"(1) CONTRACT AUTHORITY.—The Secretary is authorized to enter into agreements and to incur obligations from the Airport and Airway Trut Fund for the payment of compensation under this section. Approval by the Secretary of such an agreement shall be deemed a contractual obligation of the United States for payment of the Federal share of such compensation.

"(2) AMOUNTS AVAILABLE.—There shall be available to the Secretary from the Airport and Airway Trust Fund to incur obligations under this section $38,600,000 per fiscal year for each of fiscal years 1992, 1993, 1994, 1995, 1996, 1997, and 1998. Such amounts shall remain available until expended.".

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall take effect October 1, 1991.

(c) CONFORMING AMENDMENTS.—Section 333 of Public Law 100-457 and section 325(a) of Public Law 101-164 are repealed.

SEC. 112. STATE BLOCK GRANT PILOT PROGRAM.

Section 534 of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2227) is amended—

(1) in subsection (a) by striking "1991" and inserting "1992"; and

(2) in subsection (d) by striking "not later than 90 days before its scheduled termination" and inserting "not later than January 31, 1992".

SEC. 113. AUXILIARY FLIGHT SERVICE STATION PROGRAM.

(a) GENERAL RULE.—The Secretary of Transportation shall develop and implement a system of manned auxiliary flight service stations. The auxiliary flight service stations shall supplement the services of the planned consolidation to 61 automated flight service stations under the flight service station modernization program. Auxiliary flight service stations shall be located in areas of unique weather or operational conditions which are critical to the safety of flight.

(b) REPORT TO CONGRESS.—Not later than 180 days after the date of the enactment of this Act, the Secretary of Transportation shall report to Congress with the plan and schedule for implementation of this section.

SEC. 114. AIRPORT AND AIRWAY IMPROVEMENTS FOR THE VIRGIN ISLANDS.

(a) AIR SPACE STUDY.—The Administrator of the Federal Aviation Administration shall conduct an air space study of the Caribbean and Miami air traffic control regions for the purpose of determining methods of improving air safety and report to Congress the results of such study.

(b) OPERATIONS OF AIRPORT TOWERS FOR ST. THOMAS AND ST. CROIX.—The Administrator may not enter into contracts with private persons for operation of the airport control towers for St. Thomas and St. Croix, Virgin Islands, before the 30th day following the date on which a report is submitted to Congress under subsection (a).

(c) REPLACEMENT OF RADAR FACILITIES FOR ST. THOMAS.—The Administrator shall take such action as may be necessary to ensure that the radar facilities for the airport on St. Thomas, Virgin Islands, which were destroyed by Hurricane Hugo are replaced and operational by the 120th day following the date of the enactment of this Act.

SEC. 115. SEVERABILITY.

If any provision of this Act (including an amendment made by this Act), or the application thereof to any person or circumstance, is held invalid, the remainder of this Act and the application of such provision to other persons of circumstances shall not be affected thereby.

TITLE II—FEDERAL AVIATION ADMINISTRATION PROCUREMENT REFORM

SEC. 201. PROCUREMENT AUTHORITY.

(a) IN GENERAL.—Section 303 of the Federal Aviation Act of 1958 (49 U.S.C. App. 1344) is amended to read as follows:

"SEC. 303. PROCUREMENT AUTHORITY.

"(A) ACQUISITION AND DISPOSAL OF PROPERTY.—Subject to subsection (b), the Administrator, on behalf of the United States, is authorized, where appropriate—

"(1) within the limits of available appropriations made by the Congress therefor, to acquire by purchase, condemnation, lease for a term not to exceed 20 years, or otherwise, personal property or services and real property or interests therein, including, in the case of air navigation facilities (including airports) owned by the United States and operated under the direction of the Administrator, easements through or other interests in airspace immediately adjacent thereto and needed in connection therewith;

"(2) for adequate compensation, by sale, lease, or otherwise, to dispose of any real or personal property or interest therein; except that, other than for airport and airway property and technical equipment used for the special purposes of the Federal Aviation Administration, such disposition shall be made in accordance with the Federal Property and Administrative Services Act of 1949; and

"(3) to construct, improve, or renovate laboratories and other test facilities and to purchase or otherwise acquire real property required therefor.

"(b) SPECIAL RULES FOR CERTAIN ACQUISITIONS.—

"(1) ACQUISITIONS BY CONDEMNATION.—Any acquisition by condemnation under subsection (a) may be made in accordance with

the provision of the Act of August 1, 1888 (40 U.S.C. 257; 25 Stat. 357), the Act of February 26, 1931 (40 U.S.C. 258a-258e-1; 46 Stat. 1421), or any other applicable Act; except that, in the case of condemnations of easements through or other interests in airspace, in fixing condemnation awards, consideration may be given to the reasonable probably future use of the underlying land.

"(2) ACQUISITIONS OF PUBLIC BUILDINGS.—The Administrator may, under subsection (a) construct or acquire by purchase, condemnation, or lease a public building, or interest in a public building (as defined in section 13 of the Public Buildings Act of 1959 (40 U.S.C. 612)) only under a delegation of authority from the Administrator of General Services.

"(c) PROCUREMENT PROCEDURES.—In procuring personal property or services and real property and interests therein under subsection (a), the Administrator may use procedures other than competitive procedures in circumstances which are set forth in section 303(c) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(c)).

"(d) SOLE SOURCE APPROVAL BY ADMINISTRATOR.—For procurements by the Federal Aviation Administration, the Administrator shall be the senior procurement executive referred to in paragraph (3) of section 16 of Office of Federal Procurement Policy Act (41 U.S.C. 414) for the purposes of approving the justification for the use of noncompetitive procedures required under section 303(f)(1)(B)(iii) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(f)(1)(B)(iii)).

"(e) MULTIYEAR SERVICE CONTRACTS.—

"(1) IN GENERAL.—Notwithstanding section 1341(a)(1)(B) of title 31, United States Code, the Administrator may enter into contracts for periods of not more than 5 years for the following types of services (and items of supply related to such services) for which funds would otherwise be available for obligation only within the fiscal year for which appropriated—

"(A) operation, maintenance, and support of facilities and installations;

"(B) operation, maintenance, or modification of aircraft, vehicles, and other highly complex equipment;

"(C) specialized training necessitating high quality instructor skills (for example, pilot and aircrew members; foreign language training); and

"(D) base services (for example, ground maintenance, in-plane refueling; bus transportation; refuse collection and disposal).

"(2) FINDINGS.—The Administrator may enter into a contract described in paragraph (1) only if the Administrator finds that—

"(A) there will be a continuing requirement for the services consonant with current plans for the proposed contract period;

"(B) the furnishing of such services will require a substantial initial investment in plant or equipment, or the incurrence of substantial contingent liabilities for the assembly, training, or transportation of a specialized workforce; and

"(C) the use of such a contract will promote the best interests of the United States by encouraging effective competition and promoting economies in operation.

"(3) GUIDANCE PRINCIPLES.—In entering into contracts described in paragraph (1), the Administrator shall be guided by the following principles:

"(A) The portion of the cost of any plant or equipment amortized as a cost of contract performance should not exceed the ratio between the period of contract performance and the anticipated useful commercial life of such plant or equipment. Useful commercial life, for this purpose, means the commercial utility of the facilities rather than the physical life thereof, the due consideration given to such factors as location of facilities, specialized nature thereof, and obsolescence.

"(B) Consideration shall be given to the desirability of obtaining an option to renew the contract for a reasonable period not to exceed 3 years, at prices not to include charges for plant, equipment, and other nonrecurring costs, already amortized.

"(C) Consideration shall be given to the desirability of reserving in the Federal Aviation Administration the right, upon payment of the unamortized portion of the cost of the plant or equipment, to take title thereto under appropriate circumstances.

"(4) TERMINATION.—In the event funds are not made available for the continuation of a contract described in paragraph (1) into a subsequent fiscal year, the contract shall be canceled or terminated, and the costs of cancellation or termination may be paid from—

"(A) appropriations originally available for the performance of the contract concerned;

"(B) appropriations currently available for procurement of the type of services concerned, and not otherwise obligated; or

"(C) funds appropriated for those payments.

"(f) MULTIYEAR PROPERTY ACQUISITION CONTRACTS.—

"(1) IN GENERAL.—Notwithstanding section 1341(a)(1)(B) of title 31, United States Code, to the extent that funds are otherwise available for obligation, the Administrator may make multiyear contracts (other than contracts described in paragraph (6)) for the purchase of property, whenever the Administrator finds—

"(A) that the use of such a contract will promote the safety or efficiency of the National Airspace System and will result in reduced total costs under the contract;

"(B) that the minimum need for the property to be purchased is expected to remain substantially unchanged during the contemplated contract period in terms of production rate, procurement rate, and total quantities;

"(C) that there is a reasonable expectation that throughout the contemplated contract period the Administrator will request funding for the contract at the level required to avoid contract cancellation;

"(D) that there is a stable design for the property to be acquired and that the technical risks associated with such property are not excessive; and

"(E) that the estimates of both the cost of the contract and the anticipated cost avoidance through the use of a multiyear contract are realistic.

"(2) REGULATIONS.—

"(A) GENERAL RULE.—The Administrator shall issue regulations for acquisition of property under this subsection to promote the use of multiyear contracting as authorized by paragraph (1) in a manner that will allow the most efficient use of multiyear contracting.

"(B) CANCELLATION PROVISIONS.—The regulations issued under this paragraph may provide for cancellation provisions in multiyear contracts described in paragraph (1) to the extent that such provisions are necessary and in the best interests of the United States. Such cancellation provisions may include consideration of both recurring and nonrecurring costs of the contractor associated with the production of the items to be delivered under the contract.

"(C) BROADENING INDUSTRIAL BASE.—In order to broaden the aviation industrial base, the regulations issued under this paragraph shall provide that, to the extent practicable—

"(i) multiyear contracting under paragraph (1) shall be used in such a manner as to seek, retain, and promote the use under such contracts of companies that are subcontractors, vendors, or suppliers; and

"(ii) upon accrual of any payment or other benefit under such a multiyear contract to any subcontract, vendor, or supplier company participating in such contractor, such payment or benefit shall be delivered to such company in the most expeditious manner practicable.

"(D) PROTECTION OF FEDERAL INTERESTS.—The regulations issued under this paragraph shall also provide that, to the extent practicable, the administration of this subsection, and of the regulations issued under this subsection, shall not be carried out in a manner to preclude or curtail the existing ability of the Federal Aviation Administration to—

"(i) provide for competition in the production of items to be delivered under such a contract; or

"(ii) provide for termination of a prime contract the performance of which is deficient with respect to cost, quality, or schedule.

"(3) SPECIAL RULE FOR CONTRACTS WITH HIGH CANCELLATION CEILING.—Before any contract described in paragraph (1) that contains a clause setting forth a cancellation ceiling in excess of $100,000,000 may be awarded, the Administrator shall give written notification of the proposed contract and of the proposed cancellation ceiling for that contract to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Public Works and Transportation of the House of Representatives, and such contract may not then be awarded until the end of a period of 30 days beginning on the date of such notification.

"(4) ADVANCE PROCUREMENT.—Contracts made under this subsection may be used for the advance procurement of components, parts, and materials necessary to the manufacture of equipment to be used in the National Airspace System, and contracts may be made under this subsection for such advance procurement, if feasible and practicable, in order to achieve economic-lot purchases and more efficient production rates.

"(5) TERMINATION.—In the event funds are not made available for the continuation of a contract made under this subsection into a subsequent fiscal year, the contract shall be canceled or terminated, and the costs of cancellation or termination may be paid from—

"(A) appropriations originally available for the performance of the contract concerned;

"(B) appropriations currently available for procurement of the type of property concerned, and not otherwise obligated; or

"(C) funds appropriated for those payments.

"(6) LIMITATION ON APPLICABILITY.—This subsection does not apply to contracts for the construction, alteration, or major repair or improvements to real property or contracts for the purchase of property to which section 111 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 759) applies.

"(7) MULTIYEAR CONTRACT DEFINED.—For the purposes of this subsection, a multiyear con-

tract is a contract for the purchase of property or services for more than 1, but not more than 5, fiscal years. Such a contract may provide that performance under the contract during the second and subsequent years of the contract is contingent upon the appropriation of funds and (if it does so provide) may provide for a cancellation payment to be made to the contractor if such appropriations are not made.

"(8) PRICE OPTIONS.—The Administrator may incorporate into a proposed multiyear contract negotiated priced options for varying the quantities of end items to be procured over the period of the contract.".

(b) CONFORMING AMENDMENT.—The portion of the table of contents contained in the first section of such Act relating to section 303 is amended to read as follows:

Sec. 303. Procurement authority.
"(a) Acquisition and disposal of property.
"(b) Special rules for acquisitions.
"(c) Procurement procedures.
"(d) Sole source approval by Administrator.
"(e) Multiyear service contracts.
"(f) Multiyear property acquisition contracts.".

□ 1840

The CHAIRMAN pro tempore (Mr. PICKETT). Are there amendments?

AMENDMENT OFFERED BY MR. NOWAK

Mr. NOWAK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. NOWAK: In the matter proposed to be added by section 107(c) of the bill to section 508 of the Airport and Airway Improvement Act of 1982 as subsection (f)(3), strike "use" and insert "or relieve airport".

In the matter proposed to be added by section 107(c) of the bill to section 508 of the Airport and Airway Improvement Act of 1982 as subsection (f)(4), after "1990," insert "or reliever airport".

Mr. NOWAK. Mr. Chairman, during markup before the Public Works Committee, I sponsored an amendment concerning joint use and reuse of military airports. That provision requires that not less than 1.5 percent of annual AIP funding allocations in fiscal year 1991 and 1992 be designated for the purposes of developing current and former military airports into civil airports in order to improve the capacity of the national air transportation system. Under the legislation, the Secretary is directed to designate eight current or former militatry airports for participation in this program.

Since the adoption of my amendment, there has been concern expressed that as the language is written, that only those military airports to be converted to civilian commercial use could be considered for funding. Potential reliever airports could not be considered.

To clarify definitions, a reliever airport is a viable alternative airport for business jets, turboprops, and other light aircraft in metropolitan areas. A specific reliever airport is always associated with a specific major commercial airport. In fact, for planning and development purposes, the FAA considers the reliever an extension of the larger airport.

Today I am offering language that will clarify that potential reliever airports should be considered when the Secretary designates his list of eight airports. Potential reliever airports should be eligible under this new grant program for the following reasons:

First, relievers effectively add capacity to commercial service airports by drawing away general aviation traffic.

Second, adding a reliever airport may be the most cost-effective way—or the only way—of adding capacity to a commercial service airport.

Third, reliever airports of today often become the commercial airports of tomorrow. Thus, it is imperative that we not lose any potential relievers from the lists of closing military airfields. These airfields cannot wait for funding. There must be timely and adequate funding or they may become shopping centers or other nonaviation facilities.

Potential reliever airports would only be eligible for funding under this program if the Secretary determined their capacity potential outweighed the potential of directly converting a military airfield to a commercial use airport.

I urge my colleagues to support this amendment.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. NOWAK. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. Mr. Chairman, I want to commend the gentleman for this amendment. I think he has recognized a use that can and should be made of the military airport that otherwise might be totally decommissioned and not used for a very useful purpose. When we have the capacity problems that we have in this country, it would be a crime not to make this dual use of these already existing facilities. We have examined the amendment and think this is an excellent amendment and support it.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. NOWAK. I yield to the gentleman from California [Mr. ANDERSON].

Mr. ANDERSON. Mr. Chairman, I too support the amendment. This represents a minor, but constructive, adjustment to the new program established by the bill for civil development of former or current military airports. The amendment will give the Administrator discretion to select military airfields that could serve as reliever airports, in addition to those that would serve as commercial service airports. Reliever airports are very critical to enhancing the Nation's airport capacity, and including this concept in this new program will certainly benefit airport capacity. I urge support of the amendment.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. NOWAK. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, the gentleman has done a great service in bringing to the committee this amendment which was adopted in committee consideration, and the further refinement to clarify and make sure at least one or more of the eight military airports could be designated as a reliever airport is a necessary refinement, clarifies what the committee intended to do in supporting the gentleman's amendment.

I am happy to support this amendment.

Mr. NOWAK. Mr. Chairman, I ask passage of the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from New York [Mr. NOWAK].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ROE

Mr. ROE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROE: At the end of the bill, insert the following new title:

TITLE —FEDERAL AVIATION ADMINISTRATION RESEARCH, ENGINEERING, AND DEVELOPMENT AUTHORIZATION ACT OF 1990

SECTION . SHORT TITLE.

This act may be cited as the "Federal Aviation Administration Research, Engineering, and Development Authorization Act of 1990".

SEC. . AVIATION RESEARCH AUTHORIZATION OF APPROPRIATIONS.

Paragraph (2) of section 506(b) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2205(b)(2)) is amended by striking subparagraph (A) and all that follows through the period at the end of such paragraph and inserting the following:

"(A) for fiscal year 1991—

"(i) $131,800,000 solely for air traffic control projects and activities;

"(ii) $19,100,000 solely for air traffic control advanced computer projects and activities;

"(iii) $3,400,000 solely for navigation projects and activities;

"(iv) $9,700,000 solely for aviation weather projects and activities;

"(v) $16,500,000 solely for aviation medicine projects and activities;

"(vi) $70,100,000 solely for aircraft safety projects and activities; and

"(vii) $4,400,000 solely for environmental projects and activities; and

"(B) for fiscal year 1992—

"(i) $137,800,000 solely for air traffic control projects and activities;

"(ii) $19,100,000 solely for air traffic control advanced computer projects and activities;

"(iii) $3,400,000 solely for navigation projects and activities;

"(iv) $9,700,000 solely for aviation weather projects and activities;

"(v) $16,500,000 solely for aviation medicine projects and activities;

"(vi) $76,100,000 solely for aircraft safety projects and activities; and

"(vii) $5,400,000 solely for environmental projects and activities.

Not less than 3 percent of the funds made available under this paragraph for a fiscal year shall be available to the Administrator for making grants under section 312(g) of the Federal Aviation Act of 1958.".

SEC. . WEATHER SERVICES.

Section 506(d) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2205(d)) is amended by striking the second sentence and inserting the following: "Expenditures for the purposes of carrying out this subsection shall be limited to $34,521,000 for fiscal year 1991 and $35,389,000 for fiscal year 1992.".

SEC. . AVIATION RESEARCH GRANT AND CONSORTIUM PROGRAM.

(a) IN GENERAL.—Section 312 of the Federal Aviation Act of 1958 (49 U.S.C. App. 1353) is amended by adding at the end thereof the following new subsection:

"(g) RESEARCH GRANT AND CONSORTIUM PROGRAM.—

"(1) GENERAL AUTHORITY.—The Administrator may make grants to colleges, universities, and nonprofit research organizations (A) to conduct aviation research, and (B) to establish a research consortium, consisting of regional centers of excellence for continuing research into areas deemed by the administrator to be required for the long-term growth of civil aviation.

"(2) APPLICATIONS.—A university, college, or nonprofit organization interested in receiving a grant under this subsection may submit to the Administrator an application for such grant. Such application shall be in such form and contain such information as the Administrator may require.

"(3) SELECTION.—The Administrator shall establish a solicitation, review, and evaluation process that ensures (A) the funding under this subsection of proposals having adequate merit and relevancy to the mission of the Federal Aviation Administration, (B) an equitable geographical distribution of grant funds under this subsection, and (C) the inclusion of historically black colleges and universities and other minority institutions for funding consideration under this subsection.

"(4) RECORDS.—Each person awarded a grant under this subsection shall maintain such records as the Administrator may require as being necessary to facilitate an effective audit and evaluation of the use of grant funds.

"(5) REPORTS.—The Administrator shall make an annual report to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate on the research grant program conducted under this subsection.".

"(b) CONFORMING AMENDMENT.—That portion of the table of contents contained in the first section of such Act which appears under the heading:

"Sec. 312. Development planning."

is amended by adding at the end the following:

"(g) Research grant and consortium program.".

SEC. . STUDY BY THE GENERAL ACCOUNTING OFFICE OF MULTIYEAR CONTRACTING AUTHORITY.

The Comptroller General of the United States shall conduct a study of the advisability of granting to the Administrator of the Federal Aviation Administration specific statutory authority—

(1) to lease real property or interests therein for terms not to exceed 20 years, including, in the case of air navigation facilities and airports (as such terms are defined in section 101 (8) and (9) of the Federal Aviation Act of 1958) owned by the United States and operated under the direction of the Administrator, easements through or other interests in airspace immediately adjacent thereto and in connection therewith;

(2) to procure personal property or services and real property and interests therein with procedures other than competitive procedures under section 303(c) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(c));

(3) to serve as the senior procurement executive under section 16 of the Office of Federal Procurement Policy Act (41 U.S.C. 414) for the purpose of approving the justification for the use of noncompetitive procedures required under section 303(f)(1)(B)(iii) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(f)(1)(B)(iii));

(4) to let multiyear contracts for services, including the operation, maintenance, and support of facilities and installations; the operation, maintenance, and modification of aircraft, vehicles, and other highly complex equipment; specialized training necessitating high quality instructor skills; and base services; and

(5) to let multiyear contracts for the purchase of property.

The study also shall examine the implementation of section 2306 (g) and (h) of title 10, United States Code, by the Department of Defense, and shall assess the usefulness of granting similiar authority to the Federal Aviation Administration. The Comptroller General shall submit a report on the results of the study, along with any comments of the Administrator of the Federal Aviation Administration, to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate within 6 months after the date of enactment of this Act.

SEC. . BUY-AMERICAN REQUIREMENT.

(a) DETERMINATION BY ADMINISTRATOR.—If the Federal Aviation Administration, with the concurrence of the Secretary of Commerce and the United States Trade Representative, determines that the public interest so requires, the Administration is authorized to award to a domestic firm a contract made pursuant to the issuance of any grant made under this Act that, under the use of competitive procedures, would be awarded to a foreign firm, if—

(1) the final product of the domestic firm will be completely assembled in the United States;

(2) when completely assembled, not less than 51 percent of the final product of the domestic firm will be domestically produced; and

(3) the difference between the bids submitted by the foreign and domestic firms is not more than 6 percent.

In determining under this subsection whether the public interest so requires, the Administration shall take into account United States international obligations and trade relations.

(b) LIMITED APPLICATION.—This section shall not apply to the extent to which—

(1) such applicability would not be in the public interest;

(2) compelling national security considerations require otherwise; or

(3) the United States Trade Representative determines that such an award would be in violation of the General Agreement on Tariffs and Trade or an international agreement to which the United States is a party.

(c) LIMITATION.—This section shall apply only to contracts made related to the issuance of any grant made under this Act for which—

(1) amounts are authorized by this Act (including the amendments made by this Act) to be made available; and

(2) solicitations for bids are issued after the date of the enactment of this Act.

(d) REPORT TO CONGRESS.—The Administration shall report to the Congress on contracts covered under this section and entered into with foreign entities in fiscal years 1990 and 1991 and shall report to the Congress on the number of contracts that meet the requirements of subsection (a) but which are determined by the United States Trade Representative to be in violation of the General Agreement on Tariffs and Trade or an international agreement to which the United States is a party. The Administration shall also report to the Congress on the number of contracts covered under this Act (including the amendments made by this Act) and awarded based upon the parameters of this section.

(e) DEFINITIONS—For purposes of this section—

(1) the term "Administrator" means the Administrator of the Federal Aviation Administration;

(2) the term "domestic firm" means a business entity that is incorporated in the United States and that conducts business operations in the United States; and

(3) the term "foreign firm" means a business entity not described in paragraph (2).

Mr. ROE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The CHAIRMAN pro tempore. The gentleman from New Jersey [Mr. ROE] will be recognized for 15 minutes, and the gentleman from Florida [Mr. LEWIS] will be recognized for 15 minutes.

The Chair recognized the gentleman from New Jersey [Mr. ROE].

Mr. ROE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, at the outset, let me say I rise in very strong support of this legislation, and I want to give my regards and compliments both to the gentleman from California [Mr. ANDERSON] and the gentleman from Minnesota [Mr. OBERSTAR] and all the others who have worked so hard, as well as the gentleman from Pennsylvania [Mr. CLINGER] and the gentleman from Arkansas [Mr. HAMMERSCHMIDT], our ranking member.

Mr. Chairman, the language I propose adding to H.R. 5170, as title 3, is the text of H.R. 4949, the Federal Aviation Administration Research, Engineering and Development Authoriza-

tion Act of 1990, a bill ordered reported by the Science, Space, and Technology Committee last month. The amendment, drafted as a stand alone act, contains our recommendations for those parts of the Federal Aviation Administration that fall within the jurisdiction of the Science, Space, and Technology Committee, namely, its research, engineering, and development activities.

In offering this amendment I would like to acknowledge the efforts of several members of the Committee on Science, Space, and Technology whose efforts were instrumental in bringing this amendment to the floor today. Mr. TORRICELLI, chairman of the Transportation, Aviation and Materials Subcommittee has been an articulate and effective spokesman for aviation research since assuming that chair earlier this year. This amendment reflects his leadership. Also, Mr. WALKER and Mr. LEWIS, ranking Republicans on the full committee and the Transportation Subcommittee, respectively, contributed their longstanding concern and dedication to air safety in fashioning this amendment.

The amendment contains authorization for appropriation from the trust fund of $255 and $268 million for fiscal years 1991 and 1992 respectively, amounts that are fully justified by the critical long-term needs for improved safety and enhanced capacity in the air transportation system.

The committee found unmet research needs across a wide spectrum of the FAA's activities. I will cite just one example.

Exactly 1 year ago today a United Airlines DC-10 suffered a catastrophic failure of its aft engine, leading to a crash landing at Sioux City, IA. While the majority of the passengers survived the crash, due to the skill of the pilot, 112 people lost their lives in this tragedy.

Subsequent investigation determined that the cause had been an undetected flaw in a vital part of the ill-fated engine. That flaw had existed since the part was manufactured 18 years earlier and had grown slowly over the years, continuing to escape detection, until it caused the engine to explode in flight.

The explosion severed all three of the redundant hydraulic lines which allowed the pilot to control the airplane and led directly to the crash.

This accident pointed out—in a tragic way—the need for expanded research in two areas. First, we clearly need better methods to detect the kind of material flaws that existed in the United DC-10, as well as to understand the effects of age on such flaws. Second, we clearly need better techniques to predict design errors such as this one where all backup capability was wiped away by the same failure that destroyed the primary system.

The amendment I am offering directs expanded research—from $.5 to $15 million—into both of these areas.

Elsewhere in the amendment we also included a modified version of the text of H.R. 2581, a bill that passed the House last year. That bill authorized the FAA to issue grants directly to universities for research projects in areas of interest to the agency. Currently, the only method available for dealing with academic institutions is the lengthy and formal process of awarding a competitive contract.

The new authority would ease this unnecessary burden and would encourage the FAA to make greater use of the talent at our research universities.

Finally, the amendment contains a buy America provision, relating to the FAA Research, Engineering and Development Act of 1990.

Mr. Chairman, the amendment I bring to the floor today represents a bipartisan consensus that the future needs of our air transportation system are important. All indicators point to increased congestion and reduced safety if we do not respond to those needs.

Happily, we have the resources—contributed by the traveling public—to do something before we have a series of additional tragedies.

All we need is the resolve to apply them. The Science Committee amendment is a realistic, long-term plan for doing that.

I strongly urge its adoption.

□ 1850

The CHAIRMAN. The gentleman from Florida (Mr. LEWIS) is recognized for 15 minutes.

Mr. LEWIS OF FLORIDA. Mr. Chairman, I yield myself such time as I may consume.

The pending amendment adding FAA R&D authorization to H.R. 5170 is one of the most far reaching and ambitious ever. It represents a bipartisan effort with strong support from both sides of the aisle.

I congratulate Chairman ROE and ranking member WALKER for their leadership and support in bringing this legislation before the House. I also thank Mr. TORRICELLI, subcommittee chairman, for his work and efforts to produce H.R. 4949, which is the text of this amendment, authorizing the Federal Aviation Administration research, engineering, and development programs for 1991 and 1992.

Contained within the FAA R&D Budget are several new research programs. One is the funding for H.R. 4887, the Aircraft Catastrophic Failure Prevention Research Act of 1990. The act recently passed the House unanimously. The program mandates FAA research to prevent accidents like Sioux City in 1989, and Aloha Airlines in 1988. Both occurred because of undetected cracks two decades old.

The second new program is research in drug and alcohol testing. The incident earlier this year in which Northwest Airline pilots were allowed to fly while intoxicated, as later tests showed, is intolerable.

The flying public is placed at risk because FAA has no research program to scientifically determine and detect safe levels of alcohol, drugs or other substances in pilots and air traffic controllers.

I do not know what the safe levels are but my own analysis of the problem leads me to believe that the only safe level of blood alcohol content for pilots is zero. But only scientific research mandated in this bill, will determine this.

This legislation establishes a research program to accomplish these critical tasks. The flying public must be protected from pilots and air traffic controllers who abuse alcohol and drugs. This research is the first step in providing that protection. The next step will be to enact standards by FAA.

There are other excellent programs and policy direction contained in the bill before us including long-term research programs, enhanced airport security, and new efforts in human factors research.

As you know, the staff are responsible for much of the detailed work necessary to bring this legislation before the House. I would like to recognize the efforts of Steven Alvania, John Doyle, and Tony Taylor on the majority side, and Dave Clement and Gail Giedzinski (pronounced ge-zin-ski) of the minority staff.

I urge my colleagues to support this very good legislation.

Mr. Chairman I reserve the balance of my time.

Mr. ROE. Mr. Chairman, I yield 3 minutes to the distinguished chairman of the Committee on Public Works and Transportation, the gentleman from California [Mr. ANDERSON].

Mr. ANDERSON. Mr. Chairman, I thank the gentleman for yielding me this time. Mr. Chairman, my colleague who chairs the Science, Space, and Technology Committee—and who also sits next to me on the Public Works and Transportation Committee—is to be commended, along with Mr. TORRICELLI, Mr. WALKER, AND Mr. LEWIS, for developing the Federal Aviation Administration Research and Development authorization. The amendment offered represents a comprehensive package to continue the R&D programs necessary to further improve the safety and efficiency of our Nation's aviation system.

I want to particularly note the funds dedicated to noise research, aging aircraft, and air traffic control training research. These are all programs of vital interest to the Committee on

Public Works and Transportation, and I applaud the Science and Technology Committee's efforts. I urge adoption of the amendment.

Mr. LEWIS of Florida. Mr. Chairman, I yield myself such time as I may consume.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. LEWIS of Florida. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. Mr. Chairman, I rise in support of the amendment and commend the gentleman from New Jersey [Mr. ROE] and the gentleman from Florida [Mr. LEWIS] and all who had a hand in crafting this amendment. It basically adds a dimension to the bill that we have before us, which is an essential one, that is, the reauthorization of research and development.

I think this also addresses some specific activities which our committee has been very interested in and in which it has similar concerns, such as noise research, tiltrotor technology, aging aircraft, aviation security, human factors, aviation weather, accident prevention research, satellite technology, applications, and a whole host of things which I know the gentleman from New Jersey agrees are mutual concerns of our two committees.

So, Mr. Chairman, I think this is a very excellent addition to the bill, and we certainly support the amendment.

Mr. LEWIS of Florida. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. ROE. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from New Jersey [Mr. TORRICELLI], chairman of our Subcommittee on Transportation, Aviation, and Materials.

Mr. TORRICELLI. Mr. Chairman, I rise in support of the amendment offered by my chairman, the gentleman from New Jersey [Mr. ROE].

I would like to thank all those whose hard work brought us to this point, especially Mr. ROE for his leadership. I would also like to commend Mr. WALKER and Mr. LEWIS, ranking Republicans of the full committee and the Transportation, Aviation, and Materials Subcommittee, respectively for their longstanding concern and active involvement with air safety issues.

The Transportation Subcommittee, which I chair, found the administration's request for FAA research failed to address some of the most serious long-range issues facing the public generally and the aviation community in particular.

For example, many Members of Congress face the justifiable and continuing outrage of their constituents who have the misfortune of living in a neighborhood near an airport. Those people would most certainly not judge as adequate an FAA noise program, consisting largely of producing a pamphlet to describe its intricate and confusing method of measuring aircraft noise. Clearly aircraft noise is an unresolved problem, and much more is needed.

This bill directs the FAA to conduct research and to devise supplementary noise prediction techniques so that airport planners and airport communities can work together to reach reasoned agreements. We have also asked FAA to develop models that can simulate the effect of contemplated changes in approach and departure patterns.

The committee is also concerned that the FAA is lagging behind in developing the concepts, air traffic control procedures, and infrastructure needed for a civil version of the tiltrotor aircraft. The bill provides for expanded research on the civilian use of tiltrotor aircraft, a step that will increase system capacity by allowing flights directly from city center to city center. This research will also include determination of the system infrastructure required to support an economically viable tiltrotor fleet.

Other areas where we recommend additional research include alternatives to the thermal neutron analysis [TNA] airport security devices for detecting explosives in checked baggage. The present technology is expensive, heavy, slow, and not able to find small amounts of explosive, such as the bomb used in the Pan Am tragedy.

The bill also requires expanded research into:

Applications of satellite technology, aimed at improving air traffic control functions in the next century.

Advanced ATC automation that could greatly increase system capacity by lessening the current dependence on human controllers.

New controller training technologies and methods that can streamline the current labor intensive system.

Scientifically credible standards for alcohol and drug levels in pilots and controllers.

Human factors—meaning the design of advanced systems that make the best possible use of both human and machine abilities, when integrated together.

Improved dissemination of weather data to enhance safety, and aging aircraft nondestructive inspection technologies.

Mr. Chairman, these are minimum needs if we are to accommodate the expected growth in demand for air travel and the same time maintain, let along improve, the level of safety.

The amendment also authorizes the FAA, for the first time, to award research grants to colleges and universities and to establish centers of excellence for continuing research in areas deemed to be beneficial to the long-term growth of aviation. Currently the FAA, in dealing with academic institutions must award a competitive contract, a much more cumbersome method.

Finally, the amendment calls on the General Accounting Office to evaluate certain proposals for procurement reform—such as multiyear contracting—and to report its findings to the committee.

Mr. Chairman, reporting H.R. 4949 was a bipartisan effort to ensure that the FAA can be appropriated adequate funding to perform the research we all feel is absolutely essential for sustaining and improving our aviation system and its technological infrastructure. Without adequate research, the aviation system will not be able to cope with the forecast traffic demands, will not be able to accommodate the airborne technologies that will be introduced with next generation of aircraft, and will not be able to compete with the rapidly evolving air traffic control systems of many other countries.

We cannot allow that to happen. I urge Members to support adoption of this amendment.

□ 1900

Mr. ROE. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey [Mr. ROE].

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. TRAFICANT

Mr. TRAFICANT. Mr. Chairman, I offer three amendments.

The Clerk read as follows:

Amendments offered by Mr. TRAFICANT: At the end of title I of the bill, add the following new section:

SEC. 116. BUY AMERICA.

(a) GENERAL RULE.—Notwithstanding any other provision of law, the Secretary of Transportation shall not obligate, after the date of enactment of this Act, any funds authorized to be appropriated to carry out this Act, section 106(k) of title 49, United States Code, or the Airport and Airway Improvement Act of 1982 (other than section 506(b)) for any project unless steel and manufactured products used in such project are produced in the United States.

(b) LIMITATIONS ON APPLICABILITY.—The provisions of subsection (a) of this section shall not apply where the Secretary finds—

(1) that their application would be inconsistent with the public interest;

(2) that such materials and products are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality;

(3) in the case of the procurement of facilities and equipment under the Airport and Airway Improvement Act of 1982 that (A) the cost of components and subcomponents which are produced in the United States is more than 60 percent of the cost of all components of the facility or equipment described in this paragraph, and (B) final assembly of the facility or equipment described in this paragraph has taken place in the United States; or

(4) that inclusion of domestic material will increase the cost of the overall project contract by more than 25 percent.

(c) CALCULATION OF COMPONENTS COSTS.—For purposes of this section, in calculating components' costs, labor costs involved in final assembly shall not be included in the calculation.

Conform the table of contents of the bill accordingly.

At the end of title I of the bill, add the following new section:

SEC. . PROHIBITION AGAINST FRAUDULENT USE OF "MADE IN AMERICA" LABELS.—If the Secretary of Transportation determines that any person intentionally affixes a label bearing a "Made in America" inscription to any product sold in or shipped to the United States that is not made in America, the Secretary shall declare that person ineligible to receive a Federal Contract or Grant in conjunction with the issuance of any contract made under this Act for a period of not less than 3 years and not more than 5 years. The Secretary may bring action against such person to enforce this subsection in any United States district court.

At the end of title I of the bill, add the following new section:

( ) RESTRICTIONS ON CONTRACT AWARDS.—No person or enterprise domiciled or operating under the laws of a foreign government may enter into a contract or subcontract made pursuant to this Act if that government unfairly maintains, in government procurement, a significant and persistent pattern or practice of discrimination against United States products or services which results in identifiable harm to United States businesses, as identified by the President pursuant to section 305(g)(1)(A) of the Trade Agreements Act of 1979.

Mr. TRAFICANT (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. TRAFICANT. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. TRAFICANT. Mr. Chairman, these are Buy American amendments that have been approved by both the majority and minority, staff and chairman respectively, and I appreciate that very much in an effort to maintain a Buy American Program within reason.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. TRAFICANT. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, I rise in support of the amendment. This amendment applies Buy America provisions to the Federal Aviation Administration programs very similar to the provisions that apply to our surface transportation programs. The surface transportation Buy America provisions have worked well since adopted by the Congress in 1982. There is no reason why we should not apply these provisions to the aviation programs.

I urge that the amendment be adopted and I commend the gentleman for his effort.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. TRAFICANT. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. Mr. Chairman, I thank the gentleman from Ohio [Mr. TRAFICANT] for yielding, and I would indicate that we in the minority support the amendment.

Mr. Chairman, we have just had an opportunity to see two out of the three amendments for a very brief time this evening, so I have not studied the details, but we have the assurance of the gentleman from Ohio that, if there are problems with these, we will have his support in correcting them in conference.

Mr. TRAFICANT. The gentleman from Pennsylvania is correct.

Mr. CLINGER. With that assurance, Mr. Chairman, we support the gentleman from Ohio [Mr. TRAFICANT], and I commend him.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. TRAFICANT. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, I thank the gentleman from Ohio [Mr. TRAFICANT] for yielding.

Mr. Chairman, one of the amendments offered by the gentleman from Ohio is now law and has been statutory law in the Federal Highway Program since 1982. It has been tremendously successful in assuring that all of the steel that goes into the Federal Highway Program is American steel. All of the rebar, all of the I-beams on bridge construction, all of the guardrails, and fencing and fenceposts along the entire Federal highway system in America is American steel.

Mr. Chairman, it saved 50,000 jobs in the steel industry, as was demonstrated by the hearings the gentleman from Pennsylvania [Mr. CLINGER] and I held a few years ago in the Investigation and Oversight Committee on the effect of the buy-America language, so this is a tremendously successful program.

In addition, Mr. Chairman, the other two provisions the gentleman from Ohio [Mr. TRAFICANT] has offered will strengthen an already important program of our Federal Government which is included, as the gentleman has indicated, in other legislation adopted by the House earlier this year.

Just for further clarification I wanted to point out that the subcommittee checked with the FAA logistics office on how procurements are conducted, and we found from 1968 to the present time the FAA has acquired for air traffic control and other technology equipment some $3 billion in contracts. Of that procurement number only two contracts for a value of $270,000 involved procurement of foreign products.

Mr. Chairman, the language of the gentleman from Ohio [Mr. TRAFICANT] will strengthen an already effective program, and I commend him for offering it. He is a vigilant surveyor for the landscape of American jobs.

Mr. TRAFICANT. Mr. Chairman, I appreciate those comments, and I want to thank the minority, the minority staff, and our side of the aisle for support on this particular legislation.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Ohio [Mr. TRAFICANT].

The amendments were agreed to.

AMENDMENT OFFERED BY MR. RINALDO

Mr. RINALDO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RINALDO: At the end of the bill, add the following new title:

TITLE III—ENVIRONMENTAL IMPACT AND SAFETY IMPLICATIONS OF CHANGES IN AIRCRAFT FLIGHT PATTERNS

SEC. 301. EXPANDED EAST COAST PLAN.

(a) ENVIRONMENTAL IMPACT STATEMENT.—Not later than 180 days after the date of the enactment of this Act, the Administrator of the Federal Aviation Administration shall issue an environmental impact statement pursuant to the National Environmental Policy Act of 1969 on the effects of changes in aircraft flight patterns over the State of New Jersey caused by implementation of the Expanded East Coast Plan.

(b) AIR SAFETY INVESTIGATION.—Not later than 180 days after the date of the enactment of this Act, the Administrator shall conduct an investigation to determine the effects on air safety of changes in aircraft flight patterns over the State of New Jersey caused by implementation of the Expanded East Coast Plan.

(c) REPORT TO CONGRESS.—Not later than 180 days after the date of the enactment of this Act, the Administrator shall transmit to Congress a report containing the results of the environmental impact statement and investigation conducted pursuant to this section. Such report shall also contain such recommendations for modification of the Expanded East Coast Plan as the Administrator considers appropriate or an explanation of why modification of such plan is not appropriate.

(d) IMPLEMENTATION OF MODIFICATIONS.—Not later than 1 year after the date of the enactment of this Act, the Administrator shall implement modifications to the Expanded East Coast Plan recommended under subsection (c).

Conform the table of contents of the bill accordingly.

Mr. RINALDO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be consid-

ered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. RINALDO. Mr. Chairman, my amendment will require the FAA to issue an environmental impact statement and to conduct an air safety investigation of the effects of the expanded east coast plan on the State of New Jersey. The amendment will help thousands of people on the east coast who have been bombarded with aircraft noise since the implementation of the expanded east coast plan [ECCP] in early 1987. Hopefully, it will also ensure that the FAA does not repeat its mistakes and create another environmental nightmare in other regions of the country.

The FAA devised the EECP to address the growing problems of congestion and delays at major metropolitan airports along the east coast. Under the EECP, the FAA created new flight paths that were intended to disperse aircraft safely and efficiently. The plan has resulted in widespread noise pollution without carrying out its stated purpose.

In fact, the EECP has caused a barrage of loud jet noise over communities which never before experienced such problems. The residents of my district are particularly hard hit by these changes. Many of my constituents are awakened in the middle of the night by incredibly loud, low flying aircraft.

The General Accounting Office issued a report on the expanded east coast plan in August 1988. The report criticized the FAA for not anticipating the environmental impact of the plan. In addition, the GAO recommended that the FAA utilize special use airspace more efficiently. In my judgment, no persuasive reasons have been offered by the FAA on why air traffic in our region cannot bypass heavily populated areas to a greater degree.

The amendment would address the severe air noise problem caused by the expanded east coast plan. It would require the FAA to go back and issue an environmental impact statement based on an analysis of flight path changes it should have undertaken in the first place. Under current policy, the FAA does not issue an environmental impact statement for flight path changes over 3,000 feet in altitude. I feel strongly that this policy must be changed. As originally drafted, my amendment stipulated that, in the future, the FAA should issue an environmental impact statement for all major flight path changes over urbanized areas to an altitude of 10,000 feet. However, I have deleted the section and limited the scope of the amendment to an environmental impact statement of the expanded east coast plan over the State of New Jersey.

We should at the very least provide some relief to those people who are still suffering because the FAA failed to conduct an environmental review of the expanded east coast plan, and send a message to the FAA that environmental considerations demand more attention when major air route changes are proposed.

My amendment would also require an investigation of air safety over New Jersey since the implementation of the EECP. Air travel safety is not confined to the skies. It also applies to the millions of people whose homes are under the new flight paths of the expanded east coast plan. People living in the affected areas deserve assurances that new flight paths designed to expedite air traffic actually enhance, to the greatest degree possible, the safe passage of these aircraft over their communites. It is clear that far too many air traffic routes converge over New Jersey. A safety investigation is definitely needed to determine whether these new flight paths are safe. Mr. Chairman. I urge adoption of my amendment.

Mr. Chairman, I want to certainly commend the gentleman from California [Mr. ANDERSON] and the gentleman from Minnesota [Mr. OBERSTAR] in particular for his hard work in getting the entire bill to the floor, and I also want to commend the gentleman from Arkansas [Mr. HAMMERSCHMIDT], the ranking member, and certainly the gentleman from Pennsylvania [Mr. CLINGER] for their cooperation in working with me on this amendment. I can say without any equivocation or hesitation that it has the support of the entire New Jersey congressional delegation, other elected officials in our State, concerned citizens organizations who have been pressing the FAA and the Department of Transportation to take steps to rectify the air noise problem caused by the EECP. Nothing meaningful has been done by the FAA to date, and this will get that ball moving forward, and I want to commend my colleagues in the delegation on both sides of the aisle.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. RINALDO. I yield to the gentleman from California [Mr. ANDERSON], the very distinguished chairman of the full committee.

Mr. ANDERSON. Mr. Chairman, I rise in support of the amendment. It is clear that FAA should have done an environmental impact statement on the air route changes made 2 years ago, known as the east coast plan. The EIS wasn't done at that time, but the need for one continues. An EIS will go a long way toward trying to resolve the difficult issues created by the east coast plan.

I urge adoption of the amendment.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. RINALDO. I yield to the gentleman from Minnesota.

□ 1910

Mr. OBERSTAR. Mr. Chairman, I compliment the gentleman from New Jersey on his persistence in pursuing this issue. The gentleman has been vigorous in advocating action on the noise issue. He has been a very effective spokesman for his constituents on this matter.

As I said in an earlier exchange with the gentlewoman from New Jersey, it was the gentleman's letter signed by all Members of the New Jersey delegation that brought home this issue very forcefully to the committee.

We are going to have hearings, as I indicated earlier, in September in general on the noise issue and specifically with respect to the New Jersey problem.

With respect to this issue, the FAA, I think, made a serious mistake in not undertaking at least an environmental assessment and surely an environmental impact statement on the east coast plan. They claim that one was not needed on flights above 3,000 feet.

The gentleman's amendment will require that environmental impact statement to be undertaken. It is one that will require a forum for the resolution of the issues that he and his constituents have brought to our attention, and other Members of the New Jersey delegation, including the gentleman from New Jersey [Mr. TORRICELLI] and the gentleman from New Jersey [Mr. ROE], who have been vigorous advocates on this issue as well, and have a deep and genuine concern for this issue, so I am happy to accept the amendment.

Mr. RINALDO. Mr. Chairman, I want to thank the committee chairman for his very kind comments and for the cooperation that he accorded me in this matter.

Mr. TORRICELLI. Chairman, will the gentleman yield?

Mr. RINALDO. I yield to my very distinguished friend, the gentleman from New Jersery [Mr. TORRICELLI].

Mr. TORRICELLI. Mr. Chairman, I thank the gentleman for yielding to me.

I, too, want to offer my compliments for the gentleman's initiative. After years of frustration, this is a day when our citizens in our State and elsewhere can begin to see some real progress.

The committee bill is now going to develop the technologies to anticipate the noise impact by establishing models so this does not happen again, and now with the gentleman's very significant leadership in requiring environmental impact statements. If the FAA thinks such statements are now required for aircraft, such as we are

experiencing in New Jersey, then the FAA does not understand the impact of aircraft noise after this long debate.

We have asked, we have been patient, but now it is time for us to assume leadership ourselves. By the gentleman's amendment, he is providing exactly that leadership.

Mr. Chairman, I urge adoption of the amendment, and more than that, I thank the gentleman for taking the leadership in doing this.

Mr. RINALDO. Mr. Chairman, I certainly want to thank the gentleman for his cooperation and all the help the gentleman has afforded. The gentleman has worked with the delegation on every matter involving the FAA and this particular problem.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. RINALDO. I yield to the gentleman from Pennsylvania, the ranking minority member of the subcommittee.

Mr. CLINGER. Mr. Chairman, I thank the gentleman for yielding to me.

We are pleased on the minority side to support the gentleman's amendment. I want to commend him indeed for the very strong leadership that he has provided. I can assure the gentleman that the members of the subcommittee are very sensitive to the very real concerns which the gentleman has brought to our attention with regard to the noise problems that they are beset with in the State of New Jersey. I think this is a very appropriate amendment to begin to focus the attention of the FAA on what is a continuing problem, and for that reason we are very pleased to support the amendment.

Mr. RINALDO. Mr. Chairman, I want to thank the gentleman once again for his cooperation, and yield back the balance of my time.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from New Jersey [Mr. RINALDO].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BUSTAMANTE

Mr. BUSTAMANTE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BUSTAMANTE: After section 114 of the bill, insert the following new section:

SEC. 115. ENGINE CONDITION MONITORING SYSTEMS.

(a) STUDY.—The Administrator of the Federal Aviation Administration shall conduct a study of the potential use of engine condition monitoring systems on aircraft. In conducting such study, the Administrator shall evaluate—

(1) the availability of technology for such systems;

(2) the capabilities of such systems in terms of enhancing safety and reducing maintenance costs associated with civil and military aircraft;

(3) the commercial viability of developing computer software to enable maintenance workers to efficiently use data gathered by such systems;

(4) the costs and benefits of using such systems as compared to engine fault detection methods which rely on the use of data relating to historical performance and statistical failure;

(5) the types of aircraft engine failures which may be prevented by using such systems; and

(6) the operational reliability of such systems.

(b) REPORT TO CONGRESS.—Not later than 12 months after the date of the enactment of this Act, the Administrator shall transmit to Congress a report containing the results of the study conducted pursuant to this section together with such legislative and administrative recommendations as the Administrator considers appropriate.

Redesignate section 115 of the bill as section 116.

Mr. BUSTAMANTE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BUSTAMANTE. Mr. Chairman, this amendment is noncontroversial. It would authorize an FAA study of commercial applications of engine condition monitoring systems, or EMS for short. The U.S. Air Force has found EMS to be, and I quote, "instrumental in detecting impending engine failure."

This technology's potential safety value to civilian aviation warrants its further study. I urge the adoption of my admendment.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. BUSTAMANTE. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman very much for yielding to me.

Mr. Chairman, we have reviewed the amendment and we support it. It is my understanding that engine condition monitoring systems are used in military aircraft and this technology may have some beneficial application in the civil sector. This amendment simply directs an FAA study of the issues involved. I urge adoption of the amendment.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. BUSTAMANTE. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. Mr. Chairman, I thank the gentleman for yielding to me. We have had an opportunity to examine the gentleman's amendment. We think it makes a very constructive addition to the bill and we are pleased to support it.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. BUSTAMANTE. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, I thank the gentleman for offering the amendment. He has brought to the committee a very important advance in the cause of safety aboard aircraft, especially in monitoring engines. I think a great deal of benefit can inure to civil aviation from the initiative the gentleman has offered here.

We will accept the amendment and follow the FAA very carefully in carrying out this study, and if necessary, hold appropriate hearings upon the conclusion, or at least a committee discussion on the conclusion of that study.

Mr. BUSTAMANTE. Mr. Chairman, I thank the gentleman very much, and I yield back the balance of my time.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Texas [Mr. BUSTAMANTE].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. TORRICELLI

Mr. TORRICELLI. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. TORRICELLI:

After the heading for title I of the bill, insert the following new section:

SEC. 101. CONSTRUCTION OF FIREFIGHTING TRAINING FACILITIES.

Section 503(a)(2) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2202(a)(2)) is amended—

(1) by striking "and" at the end of subparagraph (B);

(2) by striking the period at the end of subparagraph (C) and inserting "; and"; and

(3) by inserting after subparagraph (C) the following new subparagraph.

"(D) any acquisition of land for, or work involved to construct, a burn area training structure on or off the airport for the purpose of providing live fire drill training for aircraft rescue and firefighting personnel required to receive such training by regulations of the Department of Transportation, including basic equipment and minimum structures to support such training in accordance with standards of the Federal Aviation Administration.".

Redesignate subsequent sections of title I of the bill accordingly.

Mr. TORRICELLI (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. TORRICELLI. My amendment seeks to facilitate the training of aircraft rescue and firefighting personnel by allowing for the establishment of regional centers for this purpose.

Training facilities must have the capability of providing safe, repetitive, and realistic aircraft-oriented fire experiences to reinforce basic and advanced techniques for rescue and firefighting.

However, the use of actual jet fuel as the trainer burn medium is not a viable alternative, due to its contribution to unacceptable pollution levels, always risking a shutdown by the EPA.

Fortunately, we have an alternative. The technology exists to provide accurate fire simulation with clean-burning fuels, such as propane.

New simulators are capable of simulating various types of exterior and interior aircraft fires such as wheel-well, engine, fuel spill, passenger cabin, and the galley. They can satisfy the FAA's training requirements in an environmentally acceptable manner.

Of course, training facility equipment is not cheap. A firefighting trainer can cost between $2 million and $5 million. Thus, it is impractical to install one of these simulators at each of our Nation's approximately 650 certified airports.

A better plan, which would result in substantial cost savings, is to establish regional centers for the training of airport rescue and firefighting personnel.

In addition, regional training centers would prevent training-related activities, such as horns and truck sirens, from interfering with airport operations, thereby reducing noise pollution at airports. Within about 10 years, it is believed that regional centers could be in operation to serve all major American airport areas.

But under current law, airport and airway improvement funds [AIP] can only be used for certain on-site improvements at airports.

My amendment would authorize these funds for land acquisition, construction, and equipment for regional burn area training structures to provide live fire drill training for aircraft rescue and firefighting personnel which are required to receive such training by DOT regulation.

This amendment has the support of Chairman OBERSTAR, Chairman ROE, and the FAA.

I also want to mention that this amendment has the strong support of the American Association of Airport Executives, which conducts educational schools to enhance the skills of airport rescue and firefighting personnel.

Many of these schools are cosponsored with the FAA and I would expect the FAA to continue to work closely with AAAE and other groups so that they may expand their programs to even more airport personnel.

For the safety of the flying public, the protection of air and water quality, and substantial cost savings to the taxpayer, I urge my colleagues to support this amendment, and to allow us to begin to provide the benefits of simulation for airport safety and fire prevention as we have in so many other areas.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. TORRICELLI. I am happy to yield to the distinguished committee chairman, the gentleman from California.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman for yielding to me.

I support the amendment of the gentleman from New Jersey. This amendment will make eligible for Airport Improvement Program grants the acquisition of land and construction of airport firefighter training facilities on or off the airport. By making grants for off-airport facilities, the possibility of facilities being constructed for the use by numerous airports becomes much more likely. This could result in substantial savings to the Federal Government.

I urge adoption of the amendment.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. TORRICELLI. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. Mr. Chairman, I just want to ask the gentleman from New Jersey a couple questions about the amendment for clarification.

I note that in certain correspondence which we received concerning the gentleman's amendment, the gentleman estimates the facilities would cost approximately $2 million to $5 million each and that approximately 100 such centers could be in operation over a span of years. If we multiply that out, it comes to a rather expensive price tag of between $200 million to $500 million for these training facilities.

□ 1920

Is that what the gentleman intends with respect to making this type of training facility eligible for AIP funds?

Mr. TORRICELLI. Actually the concept is to be able to reduce the amount to be spent on training rather than to increase it. What we envision is the idea that on a regional basis around America these centers could be established rather than to have them on hundreds of airports or even 100 airports, instead, it could be a far smaller number and have them centered around the country so they would be available to the firefighting personnel of airports in that entire region in combinations of States.

Mr. CLINGER. If the gentleman will yield further, we are really looking at in the neighborhood of 10 to 12 perhaps?

Mr. TORRICELLI. We are looking at a far smaller number, not anywhere near what was estimated.

Mr. CLINGER. I think that the other point that I wanted to make with regard to the amendment, I think we should try, in striving to implement this amendment, to make maximum use of the existing firefighting academies for airport firefighters rather than to undertake the construction of new facilities, particularly at a cost of $2 to $5 million

Mr. TORRICELLI. This in no way is intended to replace or lessen the role of firefighting academies. They are still an integral part of the process. It is simply to expand what we are now limited in doing on actual airport property.

Mr. CLINGER. I thank the gentleman very much for that explanation. I think our concern obviously is that we do have limited funds for developing capacity. We would hope and anticipate that this amendment would not result in a serious erosion of that ability or capacity.

Mr. TORRICELLI. I thank the gentleman for his support for the amendment.

The CHAIRMAN pro tempore (Mr. PICKETT). The time of the gentleman from New Jersey [Mr. TORRICELLI] has expired.

(At the request of Mr. OBERSTAR and by unanimous consent, Mr. TORRICELLI was allowed to proceed for 1 additional minute.)

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. TORRICELLI. I am happy to yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, the gentleman has brought to the committee's attention a new technology for training firefighters that would result in less smoke, less environmental impact than current methods that use standard fuels, the addition of propane fuel, that would mean a greatly reduced environmental impact which is a valuable contribution.

The idea of regional training centers, I think, is very important. I support the concept. We already do have a National Fire Academy at Emmitsburg to serve the whole Nation. What we understand with the gentleman's amendment, though, is there will be a relatively small number of these training centers strategically located. I would not want to put a number around that, but the idea is to serve perhaps the east coast and the west coast and perhaps something in the center of the United States.

Mr. TORRICELLI. I actually have avoided citing a number, because I am not sure.

The CHAIRMAN pro tempore. The time of the gentleman from New Jersey [Mr. TORRICELLI] has again expired.

(At the request of Mr. OBERSTAR and by unanimous consent, Mr. TORRICELLI was allowed to proceed for 1 additional minute.)

Mr. TORRICELLI. Mr. Chairman, I am not certain that I or Members of this body are prepared to say what that number might be, but it is our intention and, indeed, the FAA would be frustrating that intention if they du-

plicated what we are now providing in training at individual airports by now providing off-airport sites on an equal basis. The hope, rather, is that airports can operate regionally and save those funds and have these common facilities. That is very much the intention.

Mr. OBERSTAR. If the gentleman will yield further, the judgment and the flexibility as to the designation of these centers would be within the FAA?

Mr. TORRICELLI. It would entirely.

Mr. OBERSTAR. I thank the gentleman, and in that spirit, I accept the amendment.

Mr. TORRICELLI. I thank the gentleman for his support.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from New Jersey [Mr. TORRICELLI].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. CLINGER

Mr. CLINGER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CLINGER: At the end of the bill, add the following new title:

TITLE III—GEODETIC NAVIGATION INFORMATION

SEC. 301. TRANSFER OF FORMAT OF GEODETIC NAVIGATION INFORMATION.

Not later than 2 years after the date of the enactment of this Act, the Administrator of the Federal Aviation Administration and the Administrator of the National Oceanic and Atmospheric Administration shall complete the transfer of geodetic coordinate navigation information from NAD-27 format to NAD-83 format.

Conform the table of contents of the bill accordingly.

Mr. CLINGER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. CLINGER. Mr. Chairman, I am offering this amendment on behalf of our colleague, the gentleman from Oregon [Mr. SMITH], who was unable to be with us this afternoon. I am including in the RECORD his statement.

Mr. Chairman, very briefly, this amendment directs the FAA Administrator and the Administrator of the National Oceanic and Atmospheric Administration to complete the transfer of coordinate navigation data to provide more accurate information to airmen.

The present navigation charts are based on data which is more than 60 years old. We think this is a very essential amendment as we are moving into where we need more precise navigational equipment. There is state-of-the-art equipment available. This greater reliance on precision navigational approaches to airports makes it all the more important that navigational charts by updated.

The estimated cost of this amendment would be $1.7 million to complete the effort and, frankly, Mr. Chairman, the effort is to encourage the FAA to complete a project that has been underway for some time.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I am happy to yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, I support the amendment. It directs the FAA to update its navigation data to conform to the latest sophisticated information. This is a program to which the FAA is committed. The amendment serves to give this program visibility so that it can be accomplished on a timely basis.

I urge adoption of the amendment.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I am happy to yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, I take this opportunity to compliment the gentleman from Oregon on his amendment which the gentleman has offered on his behalf on aeronautical mapping. It is really a needed service and something that we ought to have, the updating of maps. They have not been updated since the 1930's.

The gentleman from Oregon has been very vigorous in pursuit of this objective. I am happy to see the amendment offered and happy to accept the amendment.

Mr. CLINGER. I thank the gentleman for his support.

Mr. DENNY SMITH. Mr. Chairman, this amendment would direct the Federal Aviation Administration and the National Oceanic and Atmospheric Administration to complete the update of geodetic navigation information. The current navigation data is over 60 years old, and is off by nearly 350 feet in some places in the continental United States. Completing this transition is important because as extremely accurate Earth-referenced navigation systems such as Loran–C and GPS continue to grow, they will demand the higher accuracy available with the updated charts.

This amendment is small and technical in nature, but it is vital to the development of Earth-referenced navigation. The FAA recently announced that they will soon publish the first 20 nonprecision Loran–C approaches, which will provide the spark to ignite an explosion in the use of Loran–C for aviation navigation. This project needs to be finished before this happens, so that we can prevent having to republish approaches in the future, and avoid the confusion of changing maps after the approaches are already in use.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. CLINGER].

The amendment was agreed to.

Mr. OBERSTAR. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I want to take this opportunity to compliment our colleagues on the Transportation Appropriation Subcommittee, particularly Chairman LEHMAN, with whom I have spent many, many hours discussing the Airport Improvement Program, the F and E Program, the Operations and Maintenance Program, and how we could together work out a way to draw down the surplus of the trust fund, increase funding for operations and maintenance, and increase funding to serve the needs of airport capacity.

We have worked out that formula. It was included in our subcommittee version of the bill and then in the Transportation Appropriation Subcommittee version of the bill, then in our full committee version of the bill, and then the appropriation full committee version of the bill, and now the transportation appropriation bill has passed the House. We had intended our bill should come first, but by a glitch in the House schedule we were not able to come up prior to the appropriation bill.

The chairman and the ranking member, the gentleman from Pennsylvania [Mr. COUGHLIN], have been very cooperative in helping us to attack this issue of increasing the funding to address the needs of airport capacity and the facilities and equipment account as well as the problem of funding operations and maintenance out of the trust fund. We have found a way to do that. We have worked out comity between our two committees. It all inures to the benefit of civil aviation as a very important economic sector, which it is.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I am happy to yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Chairman, I know I speak on behalf of Chairman LEHMAN and certainly I speak on behalf of myself when I just say thank you and congratulations to the distinguished chairman and to the distinguished ranking member, my colleague and friend, the gentleman from Pennsylvania [Mr. CLINGER], for a bill that, indeed, moves us into the 21st century, and we are moving into the 21st century, and the foresight, the vision that our chairman, the gentleman from Minnesota [Mr. OBERSTAR], has had, and the distinguished ranking member has had, in moving us in that direction and moving our aviation transportation system into the 21st century which is one that we appreciate and admire.

I would also want to congratulate the chairman of the full committee, the gentleman from California, and the gentleman from Arkansas for their efforts in accomplishing this and

hope for the speedy enactment of the legislation.

□ 1930

Mr. OBERSTAR. Mr. Chairman, reclaiming my time, I thank the gentleman from Pennsylvania [Mr. COUGHLIN] for those kind remarks. I want to compliment the Committee on Appropriations' Subcommittee on Transportation on its crafting of the aviation section of the appropriation bill. I was not able to be here on the floor the day the bill was considered because I was chairing a hearing on passenger safety along with the gentleman from Pennsylvania [Mr. CLINGER]. In the Committee on Appropriations report, the Administrator of the FAA is directed to issue a final rule in 270 days on whether commuter aircraft slots at O'Hare Airport should be made available for service with large aircraft, jet aircraft. The language in the committee report does not direct the Department to take particular action, other than to issue a final rule.

Behind that is a larger story and a larger issue, a major economic issue. I cannot let this opportunity pass to clarify the record and to express my concern that the Department of Transportation might overreact and take this language as a directive to adopt a proposal of American Airlines to make commuter aircraft slots available for service with small jets with 100 seats.

Mr. Chairman, there are a number of problems with this proposal. It is an attempt to convert the $20,000 value into up to a $400,000 value without directly addressing it in legislative language, and attempting through language in this report to achieve something that they have not even attempted to accomplish through the ordinary and standard procedure of submitting to the Department of Transportation the appropriate application for conversion of those commuter slots to jet aircraft slots.

I have gone to the Department of Transportation and discussed this with the Secretary. The Department is prepared to act with dispatch, with vigor, as soon as the application is made, but they should not be allowed to have their cake without baking it first.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Chairman, we are aware of the problem the gentleman from Minnesota [Mr. OBERSTAR] is discussing. It is one I think we can resolve.

The CHAIRMAN pro tempore (Mr. PICKETT). The time of the gentleman from Minnesota [Mr. OBERSTAR] has expired.

(By unanimous consent, Mr. OBERSTAR was allowed to proceed for 2 additional minutes.)

Mr. OBERSTAR. Mr. Chairman, I yield further to the gentleman from Pennsylvania [Mr. COUGHLIN].

Mr. COUGHLIN. Mr. Chairman, this is a problem which I think can be resolved in conference. We certainly want to work with the distinguished chairman to do that, and pledge to do that.

Mr. OBERSTAR. Mr. Chairman, I thank the gentleman from Pennsylvania [Mr. COUGHLIN] for that observation.

Mr. Chairman, I have previously discussed the strong cooperative effort between our committee and the Appropriations Committee to develop a program which will make the trust fund work. In this regard I deeply appreciate the cooperation of the Appropriations Committee, in particular subcommittee Chairman BILL LEHMAN and ranking minority member LARRY COUGHLIN, in crafting the aviation sections of the DOT appropriations bill. Without in any way detracting from my appreciation, I am taking this opportunity to express my reservations about one matter covered in the Appropriations Committee report on the DOT appropriation bill.

In the Appropriations Committee report, the Administrator of the Federal Aviation Administration is directed to issue a final rule in 270 days on whether commuter aircraft slots at O'Hare Airport should be available for service with large aircraft. I note with approval that the language in the committee report does not direct the Department to take any particular action, other than to issue a final rule. However, I am concerned that DOT may overreact and take the language as a directive to adopt a proposal of American Airlines to make commuter aircraft slots available for service with small jets with 100 seats. There are a number of problems with this proposal, and I would like to call these problems to the attention of the Department and my colleagues.

First and foremost, enacting American's proposal would vindicate American in thumbing its nose at the regulatory process. If American wants changes in the DOT regulations on what type of aircraft may be used for commuter slots at O'Hare Airport, American should file a petition for rulemaking with the Department proposing these changes. To date American has not filed a petition, even though it has been specifically told by the Department that this is the proper approach to follow. Instead American has followed the back door route of lobbying assistants to the Secretary of Transportation and also trying to get congressional committees to put pressure on the Department to adopt American's proposal. I know, because they asked me to have a directive to DOT included in the committee report on the authorizing bill. I refused to do so, and suggest that American follow regular procedures and file a petition for rulemaking.

Asking American to follow normal procedures is not just a formality. There are a number of serious problems with American's proposals which need to be thoroughly aired, as they would be in the regular rulemaking process.

First, the proposal would give American windfall profits by increasing the value of its commuter slots from approximately $20,000 to $400,000 or more.

Second, under American's proposal, commuter slots which are currently used for service with piston aircraft of 75 or fewer seats could be used for service with 100-seat jet aircraft. This jet service would have to use one of O'Hare's two parallel jet runways, unlike the current piston aircraft service which uses separate commuter runways. An increase in operations on jet runways could create serious congestion and delay at O'Hare which already has one of the worst congestion problems in the Nation.

In addition, if the commuter slots become available for service with jet aircraft, American may choose to abandon the small cities currently served with these slots and use the slots for more lucrative jet service to larger cities.

My point in raising these issues is not to suggest a final decision but to point out that there are complex issues. Had American proceeded in the regular manner, these issues could have been thoroughly considered in a DOT rulemaking proceeding. I expect the Department to undertake the necessary review and that the Department will not take the Appropriations Committee's report language as a directive to enact American's proposal.

Mr. ANDERSON. Mr. Chairman, it is my understanding that there is at least one additional amendment that would require a rollcall vote. Recognizing that, Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Ms. SLAUGHTER of New York) having assumed the chair, Mr. PICKETT, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5170) to amend the Airport and Airway Improvement Act of 1982 to authorize appropriations for fiscal years 1991 and 1992, to improve aviation safety and capacity, to reduce the surplus in the airport and airway trust fund, to authorize the Secretary of Transportation to grant authority for

the imposition of airport passenger facility charges, and for other purposes, had come to no resolution thereon.

ORDER OF BUSINESS

Mr. AuCOIN. Madam Speaker, I ask unanimous consent that my 60-minute special order for today and that of the gentleman from California [Mr. DELLUMS] be reversed.

The SPEAKER pro tempore (Ms. SLAUGHTER of New York). Is there objection to the request of the gentleman from Oregon?

There was no objection.

CALVIN KING: WORKING TO HELP OTHERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas [Mr. ALEXANDER] is recognized for 5 minutes.

Mr. ALEXANDER. Madam Speaker, the decade of the 1980's was characterized as the "me generation." It was a time when greed and personal aggrandizement nearly became a national virtue.

But even in these times, there were people who looked beyond themselves—who reached out to their fellow men and sought to help make things better.

Calvin King is one of those people.

He lives in Fargo, a small community in my district.

In recognition of his efforts, Calvin King has just received a $240,000 fellowship grant from the John D. and Catherine T. MacArthur Foundation of Chicago.

This man has spent years helping minority and disadvantaged farmers stay in business.

It is a well-known fact that black farmers have been losing their land at an alarming rate. Working mostly small plots, they were unable to compete growing traditional crops.

Calvin decided that the best chance these farmers had was to grow nontraditional crops, including vegetables, and to participate in the marketing of those commodities.

He founded the nonprofit Arkansas Land and Farm Development Corp. at Fargo in 1980 and directs its today.

Calvin and his organization have helped hundreds of farmers directly by debt restructuring, gaining access to credit,and referrals to legal services. He has also developed and administers training programs to help farmers convert to nontraditional crops and improve their management skills.

Through his efforts two vegetable cooperatives have been started to help farmers increase their cash flow and to aid market distribution.

Many of the farmers Calvin King has assisted would not be living on their land today if he and his organization had not been there to assist them.

Recently, I traveled to Fargo to participate in a ceremony honoring Calvin King on the occasion of his receiving the Agriculture Department's prestigious Partnership Award of outstanding contributions to rural development, minority communities, limited resource farmers,and historically black colleges and universities.

It is gratifying to see Calvin's work recognized by USDA and now by the MacArthur Foundation.

Calvin has been quoted as saying he would use the money from the MacArthur Foundation to establish an educational trust for his children and to continue his work supporting small family farms and minority family farms.

Even in this, his concern for others shows through.

I offer congratulations to Calvin King and those who have worked with him to make the Arkansas Land and Farm Development Corp., such a success. And, I know I am joined by those farmers and farm families whose lives Calvin King has touched.

FEDERAL JUDGESHIP ACT OF 1990

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. BROOKS] is recognized for 5 minutes.

Mr. BROOKS. Madam Speaker, today I am introducing the Federal Judgeship Act of 1990, legislation to authorize 54 additional Federal judgeships—nine for the circuit court of appeals and 45 for the district courts. The bill would also convert to permanent status six district court judgeships currently classified as "temporary."

Congress last addressed this issue in 1984, when it created 85 new appellate and district court judgeships. Changes in the courts' caseload since then require careful examination. According to statistics compiled by the U.S. Judicial Conference, the total annual number of cases filed in Federal district courts actually declined slightly between 1985 and 1989. At the same time, however, there has been a significant increase in some districts—particularly those with a high concentration of drug prosecutions. Indeed, in some districts the soaring number of drug cases has produced a staggering workload that threatens to undermine our efforts to bring drug criminals to justice.

My home State of Texas vividly illustrates the dramatic impact of drug prosecutions on Federal courts. Last year, the western district of Texas was flooded with 77 drug case filings per judgeship—4½ times the national average. The situation was nearly as bad in the southern district, with 73 drug case filings per judgeship. By comparison, in fiscal year 1985, the western and southern districts were faced with only about 26 and 28 drug case filings, respectively.

And mounting drug caseloads result in more than just long hours for judges. Civil cases in such districts can languish on the court's docket for years as criminal cases consume more and more of the judges' time. The bottom line is that without additional judgeships, the courts in these districts could soon lapse into a state of judicial gridlock.

The Federal Judgeship Act provides much needed relief to these courts. Among the high drug caseload areas receiving additional judgeships under the bill are districts in Florida, New York, New Mexico, Oregon, West Virginia, and Texas. The bill also authorizes new judgeships for districts that have been spared the worst of the drug case onslaught, but are in need of additional resources because of significant growth in their nondrug caseload.

The judicial conference periodically sends to Congress recommendations for the creation of new Federal judgeships. These recommendations are based, in part, on complicated statistical formulas intended to reflect the workload of the circuit and district courts. The Federal Judgeship Act draws upon the work of the judicial conference. While the bill proposes a smaller number of additional judgeships than recommended by the judicial conference, it targets these new positions to the circuits and districts most in need of reinforcements.

I urge my colleagues to join the effort to assure prompt passage of this important legislation.

UNDER PAYMENT OF TAXES BY FOREIGN-OWNED SUBSIDIARIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. STARK] is recognized for 5 minutes.

Mr. STARK. Madam Speaker, I was very disturbed to hear the findings of the staff of the Ways and Means Subcommittee on Oversight regarding the taxes paid by many U.S. subsidiaries of foreign corporations, and to hear those findings corroborated in 2 days of oversight hearings last week.

At a time that the Congress and President of the United States are spending many hours in a budget summit to identify ways to get through the budget crisis, we are told that one segment of the corporate community is almost free of taxation. Further, we are told that this segment should be paying somewhere in the neighborhood of $13 to $50 billion a year in taxes. That would go a long, long way to reducing the deficit.

Further, it seems that those foreign-owned subsidiaries that are paying their fair share are doing so out of the goodness of their hearts, rather than because our laws lead them to it. There is something terribly wrong with this system.

The subcommittee heard both IRS and Treasury say that the laws are adequate and that operational adjustments would take care of the deficiencies in the system. The Commissioner stated that locality-based pay would allow IRS to hire and retain qualified staff. With all due respect, I doubt that U.S. Government pay can ever compete with private sector pay. It is for this reason that I think we must develop legislative proposals which would be easier to administer. I'd suggest that we look to those employees who testified before the subcommittee for their ideas; they did not seem quite as certain that the current law could, in fact, be adequately administered.

For starters, I think we should consider the following:

First, do we need to legislate a separate appropriation of funds to the audit of foreign-owned firms operating in the United States? IRS said no, but if we did, it would ensure adequate audit coverage of this potentially abusive area.

Second, do we need to legislate interagency cooperation? Testimony presented in last week's hearings indicated that IRS, Customs, and Commerce don't coordinate very much in these cases. At the very least, perhaps we need to amend some disclosure provision of existing law to allow full coordination between agencies.

Third, do we need to simplify the law? This is where I think we need to involve those employees who testified before the subcommittee who work with this law every day. It's obvious that we need to do something drastic: Do we need to implement a system of unitary tax? Do we need to design penalties with teeth, perhaps even 100 percent of any underpayment? Should we stop allowing companies who make purchases from related foreign corporations to deduct those purchases or limit them according to a prearranged formula? I honestly don't know, but I'm going to find out.

I do know that any changes in the law need to be made with the goal of developing a law that does not require the services of squads and platoons of economists and tax lawyers to determine whether the taxpayer is paying their fair share of taxes to the United States.

Madam Speaker, I thank the subcommittee for bringing this issue to our attention and for so thoroughly defining the problem for us. This is the time for the Congress of the United States to develop a solution. I hope that those who agree with me and who have suggestions for dealing with the complex problem will get in touch with me to discuss their suggestions.

ST. JUDE, MAN OF THE YEAR

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio [Ms. OAKAR] is recognized for 5 minutes.

Ms. OAKAR. Madam Speaker, today I rise to salute a great humanitarian and philanthropist, Mr. Gilbert R. Chagoury.

Gilbert Chagoury was born of Lebanese parents in Nigeria. Mr. Chagoury's generosity is well known, especially in Lebanon, providing care, food, and shelter for the children and orphans affected by the war.

Madam Speaker, on July 21, Gilbert Chagoury will be honored in Los Angeles at the Century Plaza Hotel by the St. Jude Children's Research Hospital. Mr. Chagoury will be named Man of the Year for his many generous financial gifts to that important institution. Such gifts are necessary to further the important and lifesaving research being done by that institution for stricken children all over the world. The hospital was founded by the great entertainer and humanitarian, Danny Thomas.

Madam Speaker, Gilbert Chagoury is also a dedicated family man. For him, performing good works for the St. Jude Children's Research Hospital was a way of thanking God for the health of his own children and his brothers and sisters and their families.

Several days ago Mr. Chagoury was honored by His Holiness Pope John Paul II with the honor bestowed upon him by Papal Nuncio Archbishop Paul Tabet as the commander of St. Gregory the Great.

We salute him as a successful businessman with a kind and generous heart.

TRIBUTE TO DR. KARL MENNINGER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas [Mr. SLATTERY], is recognized for 5 minutes.

Mr. SLATTERY. Madam Speaker, Dr. Karl Menninger, long considered the elder statesman and dean of American Psychiatry, died yesterday in a Topeka, KS, hospital. Dr. Menninger played a major role in bringing the practice of psychiatry into the mainstream of modern medicine.

For over 40 years Dr. Karl was the guiding genius of the Menninger Clinic in Topeka, one of the world's leading psychiatric research, teaching, and treatment facilities, which he founded with his father and brother.

Karl Augustus Menninger was born July 22, 1893, in Topeka, KS. His higher education began with Topeka's Washburn College, then the University of Wisconsin. He graduated from Harvard Medical School in 1917, then completed his internship at Kansas City General Hospital.

Dr. Menninger's career began with teaching at Tufts and Harvard medical schools. While teaching he worked at the Boston Psychopathic Hospital and continued his studies at Harvard under one of the eminent psychologists of that period Earnest Southard.

After Southard's death, Karl Menninger returned to Topeka, KS, where he practiced medicine with his father. In 1925, modeling after the Mayo Clinic in Rochester, MN, Karl's father, Dr. C.F. Menniger, and Karl's brother, Dr. Will Menninger, established their clinic on a farm just outside Topeka's city limits.

The Menninger Clinic was based on what was then a revolutionary concept. Previously, psychiatric treatment had been conducted one-on-one over long period—perhaps 5 to 7 years. The Menninger idea was to provide a total environment for its clinic patients in which there would be a family atmosphere, physical exercise, and medical doctors from various disciplines who could give patients comprehensive care.

The first clinic building was an old farmhouse with beds for 13 patients. Although the institution expanded to 39 buildings, set on 2 campuses totaling 430 acres, and to a staff of 900, the mixture of treatment and kindness persists to this day as a therapeutic tool.

The clinic also became a teaching center, drawing hundreds of would-be psychiatrists from around the world. Morever, it was adopted as the model for scores of private and public psychiatric hospitals.

It was in this environment that Dr. Karl began a career in writing and lecturing, which was launched with his first book, "The Human Mind," in 1930. Although written for medical students, its style appealed to thousands of lay readers for whom it explained psychiatry in clear and understandable terms. By the end of his career, he had written 13 books including: "The Crime of Punishment" in 1968; "Man Against Himself"; "Love Against Hate"; and one of my favorites, "Whatever Became of Sin."

During World War II, the Government asked Dr. Menninger for help in assessing the need for psychiatric care for servicemen. In 1945, he agreed to help establish the Winter Veterans' Administration Hospital in Topeka as a psychiatric teaching center and a pilot hospital for the VA. He organized the psychiatric staff and later became senior consultant in psychiatry. The hospital became the VA's premier psychiatric facility.

In 1965, he resigned as operating director of the Menninger Foundation, but he stayed on as chairman of the board. He continued to keep an ambitious writing and lecture schedule and to arrive at the office at 8:30 each morning until an operation for a brain tumor in 1976, and two subsequent strokes forced a reduction in his workload.

In his eighties and even into his nineties, he was outspoken on the dangers of a nuclear holocaust. He described the fighting among nations as "the single greatest mental health problem in the world." And Dr. Menninger, throughout his life, was an outspoken proponent of prison reform.

As a humanist, Dr. Menninger's interests were wide and ranging. In fact for him, psychiatry had a role in all human endeavors. He was convinced that psychiatry could not divorce itself from the problems of the world. As a result of this passionate belief, he was involved in a variety of issues.

At one time be belonged to: the American Indian Defense Association, the Kansas State Historical Society, the American League to Abolish Capital Punishment, the Planned Parenthood Federation and the Council on Freedom From Censorship.

Noting the trends in American society in his final few years, Dr. Menninger became a sharper critic. Speaking in New York he was to say:

> Most of my life has been spent in treating persons one by one. But as I become increasingly aware of the extent of misery and hopelessness in our society, I think more of preventing unnecessary suffering at the source—which is society—before individuals are forced to take the wrong road.

Dr. Menninger was held in great esteem by his colleagues. Noted psychoanalyst Erik Erikson once said of Dr. Menninger's writings that "Karl Menninger translates Freud into American literature." Others said Dr. Menninger was "more Freudian than Freud." And the American Psychiatric Association called him "America's greatest living psychiatrist."

In 1981, Dr. Menninger received the Medal of Freedom, the Nation's highest civilian award, from President Carter. With his father and his brother, he was represented in the Wilson Memorial Window of the Healing Arts, dedicated in 1979 at Washington Cathedral. With the exception of Albert Schweitzer, Dr. Menninger was the only living subject to have been represented in a window of the cathedral.

Dr. Karl challenged me, he encouraged me, and as a good friend must, he never hesitated to let me know when he thought I was wrong.

I will miss him deeply. As a world famous psychiatrist, author, and humanitarian, Dr. Karl Menninger was truly a giant of his era.

I extend my deepest sympathy to Jean, Dr. Karl's wife of 49 years and the entire Menninger family.

Our State, our Nation, and people around the world share your loss and mourn the passing of a great American.

□ 1940

THE B-2 BOMBER: NOT TO BE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon [Mr. AUCOIN] is recognized for 60 minutes.

Mr. AUCOIN. Madam Speaker, over the past decade I have actively supported the B-2 bomber. I have spoken for it in my district, in the Defense Appropriations Subcommittee, and on the floor of this House.

But the world has changed.

Our relations with the other superpower, thanks to Mr. Gorbachev, are far better than anyone would have predicted when the B-2 program began. And they continue to improve.

The Soviet defense budget is shrinking where we had expected it to grow. And so is ours.

It was the growing Soviet military machine that we thought would produce a massive high-technology air defense in the 1990's. And it was this new Soviet defense we thought would nullify our existing bombers and create the need for the B-2. Now it seems most likely that the new Soviet air defense won't happen.

Here at home, we're desperately trying to dig ourselves out of the deficit created by the past decade of economic mismanagement. So we have to squeeze every cent we can find out of the defense budget. We simply can't affort to build tomorrow's forces to meet yesterday's requirements.

In light of all this, we don't need the B-2 to meet a threat that most likely won't exist. In addition, investigation has convinced me that we can perform the air-breathing deterrent mission cheaper and better, against any level of threat. We can do that with a standoff cruise missile carrier, evolved from a wide-body transport aircraft.

And so Madam Speaker, today I announce my active support for the Kasich-Dellums amendment to end the B-2 program.

In one sense, there's nothing new about the idea of the standoff cruise missile carrier that I suggest. For more than 20 years, strategic analysts have understood that it can do the penetrating bomber's job cheaper and better. This was true in 1970, it was true in 1980, and it's true in 1990.

Ten or twenty years ago, the standoff bomber got a 10 on strategy but a 1 on politics. It was a good idea that wasn't going to happen. But to things have changed.

First, the manned bomber has lost its masculine mystique. It's been unmanned. In earlier years, the macho sex appeal of the manned penetrator was politically invincible. Who would vote to kill a sleek penetrator and substitute a fat widebody that looks just like the plane that carried Aunt Minnie and her kids to Dubuque? Only about a hundred or so members of this body, mainly liberal Democrats.

But now we have been joined by large numbers of conservative Republicans, led by the gentleman from Ohio [Mr. KASICH]. Because of their courage and intellectual independence, the cost-effective bomber force that was once a pipe dream may now be achievable.

Second, the terrible budget crunch in which we find ourselves greatly increases the importance of the standoff bomber's unique budgetary flexibility. The standoff bomber puts us at a three-pronged fork in the road. It lets us take whichever road goes where we need to go, whenever we need to go there.

If the Soviets don't upgrade their air defenses, that would let us take road one. On this road, we needn't do anything with our bomber force. Our present B-52's and B-1's will work fine.

If the Soviets improve their defenses moderately, we switch to road two. We convert our existing B-1B's to an all-standoff role, equipping them with advanced cruise missiles. [ACM's].

I've never been wild about the B-1. But the fact is we have it. We've paid for it, and it makes a first class cruise missile carrier. Its problems with electronic countermeasurements, birds flying into the engines at low altitude, and so forth don't matter much for the standoff mission.

Putting advanced cruise missiles on the present B-1B fleet would give us about half the additional capability of a B-2 of widebody standoff force.

If the cold war resumes, or for some other reason the Soviets go all-out for air defense, we can switch to road three. This means a modern standoff cruise missile carrier, which I suppose we'll call the "B-3." It can give us B-2 capability at one third the cost.

The unique virtue of the widebody cruise missile carrier is that it lets us start down the lowest-cost road. And at the same time it lets us keep the option of hopping across to one of the other roads wherever the situation requires it. We don't have to take a high-cost road unless there's a clear and compelling need for it—which today there is not.

We have the choice because neither wide-body airliners nor cruise missiles are going away. They'll both be in production for many years, for other purposes. We can now begin to leisurely research program to put them together. And if we later see international developments that tell us we need to put the pedal to the metal, we can do that at the time.

The B-2 also has us at a fork in the road. But from the B-2 fork, all the roads lead to bad places. The problem is the B-2 is an ongoing high-cost program we can't use for anything else. So the B-2 doesn't let us wait and see.

On B-2 road one, we go ahead as planned. But the cost of ths trip is more than we can afford, and more than the American people want to pay.

On the second B-2 road, we stretch the program out. But then both the program cost and the unit cost go still higher. We can't afford that either.

On B-2 road three, we reduce the number of airplanes we buy. But the cost per airplane goes way up and the sticker shock gets worse.

The B-2 might have been better named the B-22, after the novel catch 22. Whichever road we take with the B-2, the American taxpayer loses. The only cost-effective solution is to finish the research and development, turn out the planes already contracted for, and stop. That's what the Kasich-Dellums amendment does, and why it should pass.

Let us now turn to specific comparisons of the B-2 against a B-3 standoff bomber. We need to look at four questions.

First, from what aircraft should the B-3 be derived?

Second, how does its cost compare with that of the B-2?

Third, how does its effectiveness compare with that of the B-2?

Fourth, what are its arms control ramifications?

1. AIRCRAFT SELECTION

I turn first to the question of which widebody aircraft is best suited to the standoff bomber role.

A standoff carrier needs large lift and internal volume, combined with long range and endurance at low life cycle cost. For survivability, it needs to be hardened against nuclear effects. It needs to be able to take off quickly if its base comes under first strike attack from submarine-launched ballistic missiles.

In 1979, the Air Force's Aeronautical Systems Division [ASD] at Wright-Patterson Air Force Base did a thorough and capable study of the question.

At the time, the plan was to carry large numbers of air launched cruise missiles [ALCM's] in large rotary launchers filling the body of the airplane. The DC-10 didn't compete well; it had a structural floor cutting through the fuselage that left no room for a large rotary launcher. The 747 carrying 80 missiles and the L-1011-500 carrying 44 missiles were about equally attractive. For base escape, either aircraft would have been built with the most powerful engines available and hardened to B-1A standards or better.

Now, more than a decade later, technology has moved on and a number of key aspects have changed:

First, the ALCM has been replaced by the advanced cruise missile, the ACM. This missile, which is just now entering deployment on B-52's, has much longer range, better stealth, and better accuracy than the ALCM. But it is also larger and heavier.

Second, the L-1011 is out of production, so it is no longer a candidate.

Third, the civilian world is producing a new generation of magnificent wide-body transports. These airplanes are more reliable and fuel efficient, need less maintenance, have longer range, and fly with smaller crews than their older brothers from 1979. They include the 747-400, the MD-11, and the 767.

The C-17 military transport might also be considered. It costs more to buy, but it has the advantage of being able to disperse to a larger number of fields. This adds to its survivability.

Fourth, a large rotary launcher probably is no longer the best way to carry cruise missiles in a wide body aircraft. A better solution is a rectangular "stack pack" with a conveyor system to take missiles to a single launch port in the rear of the aircraft. This is a good thing, because for civilian safety the new generation of transports has been required to have structural floors. These would have needed expensive redesign to accommodate a large rotary launcher.

Fifth, the KC-10 program has shown that we can save a great deal of money in adapting a civilian aircraft to military use. We can do this by not making changes unless we really have to. Much of what we call military specification isn't necessarily better than commercial specification; it's just different. If we don't change anything that doesn't need to be changed, we can get an airplane that's just as good but cheaper.

At this point I see no compelling case for one wide body candidate over the others. In the cost comparison that follows, I will use the 747 as a notional B-3 standoff cruise missile carrier only because this is the only strong candidate from the 1979 ASD study that is still in production. We know more about it.

2. COST COMPARISON OF B-2 VS. B-3/747

I turn now to the cost comparison between the B-2 and a notional standoff B-3 based on the 747-400. I estimate that the standoff carrier can give us comparable capability at one third the cost, saving 19 billion current dollars.

At the end of this discussion I will insert in the RECORD a table that lays out the cost comparison in full detail.

My cost analysis follows three ground rules:

First, I state all costs in today's dollars. This avoids confusion from differing schedules.

Second, I have done a decision cost analysis of the Kasich-Dellums amendment. That is, I don't ask whether it would be cheaper to build the B-2 from scratch or a standoff B-3 from scratch; we don't have that option. Instead, I write off all the R&D cost on the B-2, as well as the production cost of the first 14 aircraft. I then ask how much it will cost us to buy the rest of the B-2 fleet—that is, the aircraft Kasich-Dellums would cancel. I compare that with the cost of a B-3 fleet of comparable capability. This is the real decision Congress must make.

Third, when in doubt I have chosen assumptions which favor the B-2. So my conclusion, that we can save $19 billion by switching to the standoff bomber, is very conservative. The real number is likely to be higher.

Let's first calculate the cost of the remaining B-2 force: the fleet which would be canceled by the Kasich-Dellums amendment.

According to the U.S. Air Force as reestimated by the Congressional Budget Office, remaining B-2 acquisition cost is $37.4 billion. From that I subtract $4.7 billion for the remaining research and development, which will still be needed under Kasich-Dellums. This leaves $32.7 billion.

If we cancel the B-2, obviously we will have cancellation costs. The procurement specialist on the Defense Appropriations Committee staff tells us these have already been paid for under the terms of the B-2 contract. On the other hand, B-2 advocates are floating staggeringly high cancellation cost projections, running up to $4.5 billion. Giving the B-2 the benefit of the doubt, I allow $4 billion for cancellation.

This brings the B-2 decision cost to $28.7 billion, or $470 million for each of the 61 bombers left to buy.

Each B-2 would carry 20 SRAM II missiles. A SRAM II costs $590,000 each, according to the Air Force. Weapons for these B-2's would therefore cost a total of $720 million.

This means the weaponized additional B-2 force would cost $29.4 billion, carrying 1,220 weapons. Alert rate for the B-2 is projected at 55 percent, which would give us 671 weapons on alert.

Cost per alert weapon is thus $44 million. This is the key bottom line figure.

Now let's compare that with a B-3/747 standoff cruise missile carrier.

The first step is to calculate how many 747's we would need to carry the same number of alert weapons as 61 B-2's.

I have been unable to obtain an official estimate of the alert rate which could be economically maintained with a 747-based B-3. But Boeing tells me their 747 fleet spends about 55 percent of its life in flight. From that I set a notional ground alert rate of 70 percent, based on the high reliability of the basic airplane and on the fact that the standoff mission doesn't need as many training flight hours as the penetrator mission. I admit this is very rough and somewhat arbitrary, but I have no choice other than to give it my best shot. When a more authoritative estimate becomes available, I will be happy to use it.

In order to maintain 671 weapons on alert with a 70 percent alert rate, the B-3/747 force would need 959 nominal weapons. According to Northrop, the maker of the B-2, a 747 would carry 48 advanced cruise missiles per aircraft. So we would need 20 B-3/747's, of which 14 would be on alert at any given time.

Basic price of a 747-400 is $125 million. This includes some commercial equipment which wouldn't be needed and could be deleted, reducing the cost. But since I've not been able to obtain cost figures on this equipment, I make no allowance for it.

In support of the ASD study of the late 1970's, the aircraft manufacturers estimated the cost to turn their aircraft into cruise missile carriers. For reference I have used Lockheed's estimate of its L-1011-500 conversion, only because I happen to have detailed original records of that estimate in my files.

This estimate includes research, development, and production cost of nuclear hardening to B-1A levels for electro magnetic pulse [EMP], gust, overpressure, thermal effects, and transient electrical effects [TREE]. It includes high power engines with simultaneous quick start for quick takeoff. It includes development and production of weapon launchers, installed offensive avionics, and provisions for defensive avionics. It includes missile integration and nonrecurring tooling.

But it does not include defensive avionics because it was not—and still is not—clear what role defensive avionics would play in a standoff carrier. In

fact it isn't clear that defensive avionics will be needed at all.

The Lockheed L-1011-500 estimate was for a planned force of 117 aircraft. Adjusting that to a 20-aircraft buy, the cost of modifying a transport for the cruise missile bomber role is 115 percent of the basic aircraft cost. For the 747, that is $144 million modification cost per aircraft.

We are now up to $247 million per aircraft.

Is this 1978 modification plan a sound basis for a 1990 projection? In most respects, it appears to be. But there is some uncertainty regarding the cost of nuclear hardening.

On the one hand, modern airliners are inherently harder than their older counterparts. This is because of improved design for resisting lighting strike and so forth. And if we chose the 747, we would gain from having already developed and built two nuclear-hardened versions: the E-4B airborne command post and the new Air Force One. Both of these factors should lower the cost of hardening. But I have been unable to get any offical estimate of how much. So I have arbitrarily assumed that the two 747 nuclear hardening programs already flying will only reduce the R&D cost of nuclear hardening a 747 cruise missile carrier by 20 percent.

On the other hand, it is now possible to harden to higher than the B-1A levels envisioned in 1979. If we do this, it will run up the cost. I have no magic answer to the question of exactly how hard a cruise missile carrier should be. But I think this is a good place to err on the side of moderation. I have yet to see a piece of military equipment that could not be made 10 percent better for twice the cost; we'd all like to have that extra 10 percent but there has to be a place to stop.

Somewhat arbitrarily, I assume that increased hardening and other factors would require another $2 billion for research and development, or $100 million per aircraft.

Let me stress the extreme high-cost assumption I am making here. For modifications above and beyond those the Air Force decided were necessary in 1979—that is, for modifications which may not be needed at all—I assume an R&D cost equal to 80 percent of the price of the basic aircraft.

After charging the B-3 with this very steep slush fund, we have a total modification cost of $244 million per aircraft. Adding the $125 million for the basic 747, we have $369 million per aircraft.

To this we must add 48 advanced cruise missiles at $2.8 million each. That is an official Air Force cost. This adds $134 million per 747, bringing the cost for a weaponized airplane to $503 million, slightly above the B-2's $482 million.

But to any B-2 advocates who may be listening, don't start jumping for joy just yet. Your case is about to crumble.

We get a lot for our money with the standoff B-3. We get more alert and more weapons per aircraft.

Adjusting for the difference in alert rates, the cost per weaponized alert bomber is $711 million for the B-3/747: well below the B-2's $877 million. That's step one.

Step two is adjusting for the fact that it only takes 20 B-3/747's to carry as many weapons as 61 B-2's. So the B-3/747 weaponized force would cost only $9.9 billion versus $29.4 billion for the remaining B-2's. That's a ratio of 3 to 1 in favor of the widebody.

Adding it all up, the B-3/747 force would cost $19 billion less than the remaining B-2 force.

On a per alert weapon basis, the B-3/747 is $13 million, versus $44 million for the B-2. Again, a 3 to 1 cheapness advantage for the widebody.

3. MISSION COMPARISON

Let us now ask whether a standoff bomber can do the job. The nine issues most commonly raised here are man in the loop, crisis stability, nonnuclear mission, recallability, yield, accuracy, aircraft quantity, arms control verifiability, and barrier defense.

Need for a man in the loop is the traditional argument for a penetrating bomber as opposed to a standoff carrier. Some say we need to have a man riding all the way to the target, to make the last-minute decisions only a human can make.

I'm not convinced. In the F-117A bombing of Panama, and the *Vincennes* tragedy, we had men in the loop and we'd have been better off if we hadn't. The machinery worked fine, but at the last minute the men on the spot made major wrong decisions. I know they were under pressure; it's not my purpose today to criticize them. But B-2 pilots in a global nuclear war will be under even greater pressure.

I don't say there won't be times when a man in the loop would be good. But there's no persuasive case that it's a net asset, much less worth $19 billion.

Crisis stability is always a question we should take seriously. Any air-breathing weapon, penetrating bombers and cruise missile carriers alike, is more stabilizing that a ballistic missile.

The air-breathing weapons are too slow for a Pearl Harbor type surprise attack. They take perhaps 8 hours to reach their targets, where ballistic missiles take 5 to 30 minutes. Moving away from ballistic weapons and into air-breathing weapons would be one of the best ways to back off the the nuclear hair trigger.

One of Northrop's top executives, a very capable gentleman, argued to me that there's a secondary difference among air-breathing weapons. He argued that a penetrating bomber force is more stabilizing than a standoff force. His reasoning went like this:

Both the B-2 and the advanced cruise missile are so stealthy that, even though they would take hours to reach target they might do it completely undetected. If they could do that, they could attack by surprise. A cruise missile force could theoretically attack all its targets at the same instant, thus doing the entire attack by surprise.

But a penetrating bomber couldn't do that, because it has to hit its targets one at a time in series, spread over several hours. The nuclear explosion on its first target would make further surprise attack impossible.

I was happy to hear that industry is thinking about such subtle points of crisis stability. But I believe the basic premise in implausible. Both the B-2 and the ACM are easily detectable by low-frequency radar, which both sides already have. This radar lacks the precision for tracking or interception, but it works fine for detection. So neither the B-2 nor the ACM can be used for surprise attack.

Nonnuclear attack is not a relevant question on the Kasich-Dellums amendment.

It seems implausible that we would risk both the cost and technological security of a B-2 just to rattle the poles on Qadhafi's tent. There is no reason why this or any other conventional mission can't be done from standoff with the long-range conventional cruise missiles we are developing.

But to whatever extent B-2's would be genuinely useful and desirable for nonnuclear bombing, the limited force of 14 airplanes provided by Kasich-Dellums would be more than enough to do it.

Recallability is another long-standing argument for a manned penetrator. According to this argument, the President can call back a manned bomber right up to the time it reaches target. But a cruise missile can't be recalled after launch.

I see no reason why this need to true. Presumably the penetrating bomber recall signal is an encrypted computer message. If we can send that message to a penetrating bomber, I don't know why we can't send an encrypted self-destruct message to a cruise missile.

More importantly, this scenario misstates the fundamental nature of recallability.

The advantage of a recallable deterrent is that it gives the President options in a crisis. He can flush his bombers—whether they're standoff or penetrators—safely airborne and hold them at the fail-safe point while he

negotiates to end the crisis. So the question is how long can an aircraft endure at the fail-safe point before the President has to decide to recall it, send it on to its target, or lose it.

The time from launch to decision is the useful measure of recallability. The time from decision to impact is much less important; it's not time the President can do anything with.

Assuming a strategic nuclear shooting war hasn't begun, tankers are available and fuel isn't the problem. Engine oil is the problem. Today, the airborne endurance of our bombers is about 24 hours. After that, they run our of engine oil. but the weight and space needed for more engine oil is small. Any large airplace can easily carry enough oil for half a week in the air. The real limiting factor is crew endurance.

Here's where the wide-body standoff bomber does much better than the penetrator. The standoff bomber has space for crew bunks, and even a spare crew. There's no way a penetrating bomber can match that.

Large explosive yield is sometimes cited as a bomber requirement. B-2 advocates argue that there are some targets against which a megaton weapons, which cannot be carried by a cruise missile, is the most effective way to attack. This may well be true, but its a secondary question, not essential to deterrence or retaliation. It's not worth $19 billion. Deterrence doesn't require us to take out every target anybody can dream up.

Accuracy has also been cited to me as a B-2 advantage. At one point, the Air Force B-2 advocates tried to tell me the B-2 is more accurate than the ACM. But when I got the numbers I found this not to be the case.

Aircraft quantity is a point that seems intuitively unsettling. Do we want to concentrate our air-breathing deterrent in only 14 alert airplanes? Isn't that too vulnerable?

In fact, it's no more vulnerable than the B-2. Vulnerability doesn't depend on the number of aircraft. It depends on the number of bases. One 747 at a base has about the same number of alert weapons as three B-2's at a base. In either case, one quick-striking enemy nuclear warhead on the base would cost us that number of weapons.

Here the 747 has an advantage. If we have three or four B-2's on alert at a given base, they have to queue for takeoff. This increases the risk to the last B-2's A single-based 747 doesn't have this problem.

Arms control verifiability is kind of a silly point, but B-2 advocates bring it up so I'll deal with it. According to this argument, the Soviets would never believe us if we told them we had only 20 747 standoff bombers. They fear that any commercial 747 could be a standoff bomber in disguise.

This is nonsense, for two reasons.

First, because a 747 would be the largest strategic weapon in history. Monitoring the factory gate, and tagging each airplane that came out, would be far easier than the portal monitoring we do now under the INF treaty.

Second, because challenging the number of deployed standoff bombers would be the easiest verification task in the world. If a Soviet inspector saw a commercial 747 he believed to be a secret cruise missile launcher, he could satisfy his anxiety but just buying a ticket and and walking onto the plane's next fight.

Barrier defense is probably the most complex issue for any standoff bomber, so I've saved it for last.

A barrier defense is a "picket line in the sky." It consists of AWACS-type radar aircraft, combined with long range fighter-interceptor aircraft using air-to-air missiles. These aircraft would be refueled in air and kept aloft as long as possible in a crisis.

The purpose of a barrier defense is not just to shoot down the enemy's offense; it is also to reduce his target coverage. A penetrating bomber is relatively vulnerable during refueling, so it must refuel outside the reach of the barrier defense. And a cruise missile carrier is neither fast nor stealthy; it has to stand back out of harm's way, and launch its missiles from outside the reach of the barrier defense. Therefore, if the barrier defense can reach out far enough, it can place some of its nation's assets out of range of the offense.

B-2 advocates say an all-standoff force would let the Soviets forget about defense in depth, and concentrate all their assets on setting up a northern barrier.

This is actually an admission of weakness on the part of the B-2.

The Soviets could shoot at the B-2 during its entire flight. They could use both barrier defense and defense in depth. But defense in depth against advanced cruise missiles is hopeless. Once launched, the ACM's are so stealthy and numerous, the defense would have no hope. So the defense would rely on a barrier because it had no choice.

The 1979 ASD study examined the question of cruise missile carrier versus bomber defense in a highly constructive and competent way. But that was more than a decade ago, and some of their findings may be obsolete.

So I asked the Air Force for an update briefing. To my astonishment, they told me they couldn't provide any such briefing because they hadn't examined the question.

The Air Force did give me an intelligence briefing on the nature and probable future of Soviet barrier defense. But on the key issue of what we could do to counter the barrier, and how well the possible countermeasures might work, the Air Force could tell me nothing.

Madam Speaker, think of it. Here the Department of Defense is asking the taxpayers to buy the B-2 bomber, the second biggest program in the budget after SDI. And it hasn't even looked at the alternatives.

My colleagues, I don't know how you feel about this. For my part, as a member of the Defense Appropriations Subcommittee, I find it categorically unacceptable.

But calling an atrocity by name doesn't make it go away. I found myself with no updated executive branch analysis. I had to take the 1979 study and update it on my own as best I could. My conclusion is that a cruise missile carrier force, properly planned, will give any barrier defense fits.

We don't need to bring all our cruise missiles in over the North Pole. Some cruise missile carriers can fly out over the Mediterranean, or use other routes. Certainly, these routes are longer and less desirable. But as long as we present some threat of coming through them, the Soviet defense will have to disperse itself over a large perimeter.

The barrier defense aircraft the Soviets will have in the foreseeable future don't have enough range and endurance to degrade an American standoff system with ACM's.

A Soviet barrier defense would use what NATO calls Mainstay AWACS-type aircraft, combined with MiG-31 and SU-27 interceptors. The specific data on these Soviet aircraft are classified. But I can say here that I am satisfied that such a barrier defense would not significantly reduce our target coverage. Neither would it, as B-2 advocates have claimed, cause the ACM to stand so far back over the water that it misses its first navigation point and gets lost.

It may be that, at some point in the more distant future, the Soviets might develop and deploy a more far-reaching barrier defense. I find that unlikely for a government that's threatened with disintegration because it can't put basic consumer necessities on the store shelves. But if I'm wrong, at that point we would have several countermoves available.

One would be to extend the range of the cruise missile. After all, we won't be frozen at the present design forever.

A second option would be self-contained AWACS suppression. The ACM has generous range and payload; there seems no reason why we could not make an AWACS-killing ACM variant, using radar-seeking guidance. Of course this would sacrifice some B-3 payload and it would cost money; it would be better if we didn't have to do it. It is also true that the defense could defeat our AWACS suppression

by turning off or pulling back. But if he does that, we come forward and launch our missiles and we win.

This raises a point sometimes overlooked in discussions of barrier defense. An air-defense barrier is not like a wrought-iron fence that you put up and forget about. It needs constant active support from tankers and so forth, and by its radiation it must constantly advertise its position. In contrast, the offense needs only a temporary opening to come forward. If the defense pulls back even briefly, the offense sees that happening, comes forward, and launches.

Another offensive option would be to equip the small Kasich-Dellums B-2 force for counter-air and use it as an AWACS-killer or interceptor-killer, escorting the large-payload standoff bombers. The B-2's stealth and range would make it well suited to this mission.

In sum, barrier defense is a significant problem, but not an insurmountable one.

ARMS CONTROL CONSIDERATIONS

I turn now to the question of force levels in a START environment. Essentially, START counts a strategic air-launched cruise missile as one-half of a ballistic missile warhead against the limit of 6,000 warheads. but if counts a bomber-carried weapon as only one-twentieth of a ballistic missile warhead. This means we can have more weapons if we put them on penetrating bombers. B-2 advocates say this means we must go with their airplane.

I find this argument underwhelming, for three reasons:

First, it goes against the basic philosophy of START. This is supposed to be a Strategic Arms Reduction Treaty. Does it make sense, then, to insis on using it for strategic arms maximization?

Second, the number of weapons involved is small. Under the START formulation, shifting from B-2 to B-3 would cost us 537 ballistic missile warheads, which is 9 percent of our total permitted wareheads. Considering that we all know we have more warheads than need, that our target list is inflated beyond all reason, this does not seem an intolerable penalty.

Third, START was not handed to Moses on stone tablets. If we really need to, we can renegotiate it. True, this may involve delay in completing the treaty. I support START and our distinguished and capable negotiator Richard Burt. But I must also say that the benefit of START, as is now drawn, is not so overwhelming that delay would be unacceptable. On the contrary and apart from the bomber issue, a persuasive case can be made that START's crisis stabilizing benefit is so thin it needs time-consuming strengthening in any case.

In sum, the B-2 is idea whose time is past. We now need to adjust the defense program accordingly.

The Kasich-Dellums amendment is the way to do it. I urge members to support this amendment when the House takes up the Defense authorization bill in September.

DECISION COST FOR RECALLABLE DETERRENT

Millions of fiscal year 1991 dollars for acquisition, Bush vs. Kasich-Dellums w/B-3/747. Comparison of unprocured B-2 forces vs. B-3/747 with equal number of alert warheads.

Summary of findings: For equal number of alert warheads, a B-3/747 fleet is more cost-effective than B-2 completion by a factor of 2.96; in fiscal year 1991 dollars the B-3/747 is cheaper than the B-2 by $19 billion.

Program decision cost	B-2 decision	B-3 747	B-2/B-3 ratio
Remaining acquisition (USAF estimate)	$35,800	$7,255	
CBO non-inflation adjustment	1,600		
Adjust for remaining R&D for B-2	−4,700		
Adjust for B-2 cancellation cost (nominal)	−4,000		
Decision cost for bomber force	28,700	7,255	3.96
Add cost of weapons	720	2,684	
Decision cost for weaponized force	29,420	9,939	2.96
Decision cost per alert warhead	44	15	2.96
How many B-3/747's do we need to match the unprocured B-2's?			
Weapon	SRAM	ACM	
Warheads/bomber	20	48	.42
B-2's remaining to be procured	61		
Warheads on those B-2's	1220		
Bomber alert rate	55%	70%	.79
Alert warheads (B-3 set to equal B-2)	671	671	1.00
B-3/747 warheads needed		959	
B-3/747s to provide that No. of warheads		20	
Weapon cost:			
Cost per bare weapon (USAF figure)	.59	2.80	.21
Weapon cost per aircraft	12	134	.09
Bomber cost:			
Non-sunk cost per aircraft (DoD, Boeing figures; no credit for deleted commercial equipment)	613	125	4.90
CMCA mod cost factor from 1979 study		111%	
CMCA mod unit cost from 1979 study		138	
Additional R&D		2,000	
R&D per aircraft		100	
Total mod cost per bomber		238	
Decision cost per bomber	613	363	1.69
Adjust for remaining B-2 R&D cancellation costs	−143	0	
Adjusted for decision cost per bomber	470	363	1.30
Weaponized alert bomber cost			
Adj. decision cost per weaponized bomber	482	498	.97
Ajd. decision cost per deployed warhead	24	10	2.33
Bomber alert rate	55%	70%	
Adj. decision cost per alert weaponized bomber	877	711	1.23
Adj. decision cost per alert warhead	44	15	2.96

START allows	150	ALCM carriers.
Carrying	20	ALCMs each.
Counted as	10	ACLMS each.
A B-3/747 would thus count as	3	ACLM carriers.
The proposed force would count as.	598	warheads against the 6,000 ceiling.
And would count as	60	ALCM carriers.
Which would leave space for	30	additional B-3/747s.
Or space for	90	B-1 or B-2 ALCM carriers.
Alternatively, a force of	61	B-2 bombers.
would count as	61	against the 6,000 warhead ceiling.
So changing to the B-3/747 would count.	537	additional warheads against the ceiling.
lowering our BM warhead quota by.	9%	
B-1B Alternative

□ 2000

Madam Speaker, I see my friend, the gentleman from Ohio [Mr. KASICH] is on his feet, and I would be pleased to yield to him at this point.

Mr. KASICH. Madam Speaker, there is a point I would like to make. I do not want to interrupt the gentleman's statement, because it is incredibly thorough, but I think that is a very important statement the gentleman just made about the conventional mission of this plane. No. 1, we are building all these conventional systems now that cost megabucks, and those are designed to be used in a conventional role.

□ 2010

Mr. Speaker, I never understood the argument of using a strategic weapon in a conventional role unless the people who advocate it want to cancel all the other systems that we are going to use conventionally, but, in addition to that, to me the future is

smart standoff capability which gave us greater precision, as the gentleman pointed out, in Panama and during the *Vincennes* crisis. And this is the new direction that I would hope that people on both sides of the aisle would begin to look and think about, and that is the standoff smart weapon that provides great accuracy, and does not risk our pilots and accomplishes the same goal.

Mr. Speaker, this has been a very difficult point to communicate to people, but one that I think is critical as we look at the threats into the next century.

Mr. AUCOIN. Mr. Speaker, I appreciate the contribution of the gentleman from Ohio [Mr. KASICH], and I also appreciate his contribution on this issue, and it has been an example of leadership and independent thinking that is all too rare in this House. I think not only his constituents, but taxpayers everywhere in America, will be grateful to the gentleman for the leadership he has shown.

Mr. Speaker, I yield again to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. Mr. Speaker, I would just like to make a quick comment on the point the gentleman makes on the issue of the accuracy of the advanced cruise missile versus the B-2, and of course we cannot discuss this here because of its highly classified nature. It is one of the frustrations that I have had with my colleagues, like the gentleman from Kansas [Mr. SLATTERY], have had in being able to communicate this information to the membership here so that no one could doubt that we have a very accurate, highly reliable, effective deterrent that we are developing now that has accuracy that was beyond our real understanding, and I think it is a critical point the gentleman makes.

Mr. AUCOIN. Mr. Speaker, I appreciate the gentleman from Ohio [Mr. KASICH] underscoring that point. I urge all Members who may read this RECORD to take upon themselves to get a classified briefing on that question of accuracy. I think, if they do, they will see that on accuracy that is a nonissue.

I yield to the gentleman from Kansas [Mr. SLATTERY] who is also a leader in this issue.

Mr. SLATTERY. Mr. Speaker, one point that I would make is that, as we move into the 1990's, this question of accuracy becomes even more tilted toward the advanced cruise missile, and we are going to be making enormous advances in that area that are going to make that alternative even more attractive than it is today.

Mr. Speaker, I would just really like to commend the gentleman from Oregon [Mr. AUCOIN] for a tremendous effort which he has made in really thoroughly analyzing this whole question. I know personally what an agonizing decision this has been for him, and I am very impressed with the thoughtful analysis that he is presenting here this evening, and I just commend the gentleman for his work on it.

Mr. AUCOIN. Mr. Speaker, I thank the gentleman from Kansas [Mr. SLATTERY]. I thank him for the leadership he has given on this issue from a very early point.

□ 2020

Mr. KASICH. Mr. Speaker, will the gentleman yield?

Mr. AUCOIN. I am happy to yield to my friend, the gentleman from Ohio.

Mr. KASICH. Mr. Speaker, I know the gentleman will be interested to learn that Senator MCCAIN and I have made a request of the GAO to do an independent analysis of the targeting strategy of the Pentagon, and that is designed to take a look at how many weapons they think we need to use.

It is interesting to note that when General Chain came to Capitol Hill and about within 60 days after his testimony the Secretary of Defense talked about a change in the number of targets. It is a constantly changing number.

I think the point the gentleman makes here is very good.

Mr. AUCOIN. The gentleman is on a subject that I have given a lot of thought to as well. The truth is that when we debate these issues we frequently hear that, well, we have to have this weapons system with its warheads or whatever in order to meet the requirement.

□ 2030

Sometimes Members just take it for granted that, "By gosh, we have got to do that then; that is the requirement." But what people do not seem to remember and what seems to be absent in a lot of these discussions, on the floor and in the committee, is that no one has has ever debated what the requirement is.

What we have are uniformed officers and civilian national security advisers who decide, looking at the map of some adversary, how many targets we are going to finger in our arsenal, and then that becomes the requirements. That is never debated on the floor. No one knows what these targets are. They are decided in that fashion.

We are then served up the requirement, and Members of Congress have often marched in good faith lockstep forward in this endless insane spiral of borrowed-money spending, funding weapons systems that meet the requirement, never really realizing what it is that we are targeting in meeting that requirement, and never discussing the basic assumptions behind that targeting plan.

That is all done behind closed doors. Few Members of Congress even have an idea what those targets are. But with the number that we do have today, I cannot imagine many barns in the Soviet Union that would be exempt from the targeters in the American military establishment.

I yield to my friend, the gentleman from Kansas [Mr. SLATTERY].

Mr. SLATTERY. I thank the gentleman very much.

I just commend my friend, the gentleman from Oregon, for his thoughtful analysis of this. I deeply appreciate the time that he has spent in compiling all of this information, and I think it is going to add tremendously to the debate that we will have either in late July or in early September as we take up the armed services appropriation bill or the defense authorization bill.

You know, as a member of the Committee on the Budget, I got involved in this debate this year, and I commend our friend, the gentleman from Ohio, and our friend, the gentleman from California [Mr. DELLUMS], for their leadership last year in really raising at the first stage the very thought-provoking questions about this weapons system, and this year when the Committee on the Budget reconvened and we were looking at these incredible deficits that we are now really seeing the administration acknowledge and say they are just out of control, it became very clear to this gentleman that we were going to have to make some significant changes in our defense budget.

It is one thing to say you are going to bring down the defense budget sort of in the abstract. It is another thing when you have to start looking at it and saying what it is that you are going to change, what is it that you are going to terminate. And in doing that, as a member of the Committee on the Budget, I looked at this B-2 and concluded, as the gentleman has concluded, the bottom line, it just was not worth what the American taxpayers were being asked to pay for it.

I just hope that we are going to find 218 colleagues who are going to agree with us that we can serve at least $35 billion over the life of this aircraft, computing from the number now that the Pentagon is talking about, and put it in the bank, apply it to the deficit reduction.

I find it really interesting that here we are the day after we have debated in a rather emotional manner the constitutional amendment requiring a balanced budget. It will be interesting to see how many of our colleagues are really prepared to come down now and start making some of these tough choices and about a weapon system like this that, in my opinion, just simply is not needed.

So, again, I commend the gentleman for taking this time this evening, and I am glad I listened to all of what he said. I appreciate again his thoughtful analysis of this.

Mr. KASICH. If the gentleman will yield further, let me say a couple of things.

First of all, the gentleman from Kansas [Mr. SLATTERY], who we just heard from, has been absolutely invaluable in this whole debate. In fact, I think, as the gentleman from Oregon would admit, if the gentleman from Kansas [Mr. SLATTERY] asked him one more time about his position on the B-2 bomber, he would probably slug the gentleman from Kansas [Mr. SLATTERY]. It is persistence beyond belief.

Mr. SLATTERY. I hope it was not that bad.

Mr. KASICH. We were aggressive on it, and I would say the pickup and momentum of our fight this time can be attributed to the gentleman from Kansas [Mr. SLATTERY] and the gentleman from Pennsylvania [Mr. RIDGE].

Mr. SLATTERY. If the gentleman will yield further, my friend from Pennsylvania and I just had to make up here in the last half of this effort in vigor what we lacked in foresight perhaps a year ago when the gentleman from Ohio and our friend from California originally offered this proposal.

Mr. KASICH. The reason why I think this analysis is so important and the position of the gentleman from Oregon is so important is that I have been in the House for 8 years. The gentleman from Oregon knows that he and I have been on the opposite side of defense issues a number of times, but what I really wanted to say is I always maintained to my conservative colleagues on this side of the aisle that the gentleman from Oregon [Mr. AUCOIN] was the most formidable opponent that we ever had in these defense debates, and this analysis, I mean, I know that people who are watching probably are saying, "I do not understand all the things he is talking about," but this is an incredible analysis, and the gentleman, of course, wants to compliment the staff that worked on this, because these numbers are amazing, and the charts are just excellent. And that is why the gentleman from Oregon [Mr. AUCOIN] is one of the most formidable debaters on defense issues. It is because of the kind of extensive analysis that he always does.

I think, to the gentleman from Kansas, that his support in this debate is critical to getting those 218 votes, because he carries with him so many people who say, "Well, I do not know quite what to do. LES, what do you think?" And it is because he has such a fine reputation.

I can imagine that we are going to be on the other side of defense issues again in the future just like we have in the past.

Mr. AUCOIN. Well, when we are, I will remind you of your remarks tonight.

I appreciate the gentleman from Ohio's mention of staff effort that went into the analysis I have presented tonight. Each of us in the House owes a great deal to the efforts of our staff. I am fortunate to have many talented and tireless professionals on my own staff.

But I am particularly fortunate to have Mr. Robert Sherman as my Appropriations Committee associate staff member. Bob is, in the judgment of many Members, one of the very best defense analysts on Capitol Hill. He worked with me for the better part of 2 months—doing the computer runs, interviewing specialists, thinking through strategic arguments—to make the analysis possible.

The tables accompanying my remarks are his work. I am indebted to him for his loyalty, his intellectual honesty, his acumen—and his dedication to a secure and peaceful world.

Mr. KASICH. I have told the gentleman this before about what a formidable debater he is. It kills me to get up here and have to debate him, because he is a tough guy.

The thing that is so amazing as we stand here tonight is last year here was the gentleman from Oregon [Mr. AUCOIN] on the left, and here I was on the right, and I am trying to kill a weapon, and he is saying, "JOHN, you cannot do that yet." So I am glad that we are both here in 1990, working together and plugging away. What I think this represents is, you know, the world is turned upside down, and alliances and positions of people in this House have changed.

I hope that this debate is really going to represent the first truly bipartisan debate that is going to yield some very positive things for a critical view of defense. I think we have lacked that in the House.

I think that this may set the stage in the 1990's for some intelligent decisions made on defense based on policy, not based on port-barrel and parochial interests.

But I have the highest regard for the gentleman from Oregon, and I deeply appreciate his statement tonight, because it is a very powerful one.

□ 2040

Mr. AUCOIN. I want to thank the gentleman for his very generous words and tell him how much I respect the work he does. I think he knows that.

Mr. SLATTERY. I do not know that I can add to his eloquent compliment of the gentleman's work, but needless to say I would like to associate myself with the remarks of the gentleman from Ohio [Mr. KASICH].

There are a lot of Members that I think are struggling with this question of having once supported the B-2, as I did when I first came to Congress in 1983, when at that time we were looking at a cost of approximately $250 million per airplane. It compared quite favorably with the cost of the B-1 at that time.

At that time there was a school of thought that we ought to forego production of the B-1 and go immediately to the B-2.

Mr. AUCOIN. Which in fact was my position.

Mr. SLATTERY. I was sympathetic to that position also.

Mr. AUCOIN. That was then; this is now.

Mr. SLATTERY. There are three big things that have happened since then. One of them is the changes in the world, which really on the list of importance I would say ranks third.

The other point that I would make is the cost of this thing has obviously gone up dramatically. Depending on what kind of numbers you are looking at, it has at least doubled, tripled, or quadrupled, again depending on the numbers you are looking at.

In addition to that, again in 1983, there were a lot of people that thought we were going to have a balanced budget by 1985, 1986; we passed the Gramm-Rudman, and we thought we were going to have a balanced budget by 1990.

The reality is we are not making much progress on the deficit, to make a long story short.

So those factors all come together to really justify a reexamination of this initial decision that we made. I hope that Members will acknowledge that and say the world has changed, the cost of this plane has gone up dramatically, the deficit is not coming down. In fact, it is going up, if we are honest about the savings and loan mess and honest about Social Security, and we have to acknowledge that. We have to make some of these kinds of hard choices now.

Again, I look forward to working with the gentleman from Oregon [Mr. AUCOIN] as this measure comes to the floor probably in early September. The gentleman has added tremendously to the debate here this evening with his very thoughtful analysis.

Mr. AUCOIN. I want to thank the gentleman from Kansas [Mr. SLATTERY]. There are three points I would like to highlight that the gentleman has touched on, just to bring them into focus.

No. 1, my focus tonight was to explain to Members that it is possible to have a conversion on an issue, based on new information and changing events and new analysis. I have gone through that.

A year ago, as the gentleman from Kansas [Mr. SLATTERY] indicated, I felt and stated it was premature to cut funds or to kill the B-2 bomber. My message tonight is that it is not premature any longer, and a combination of circumstances and further analysis makes it possible to say there are better, less costly alternatives to the B-2. That is point No. 1.

The second point is that by taking the time tonight, and I have seldom done this in the 16 years I have served in this House, to spread over the pages of the RECORDS in this way the analysis I have done, I hope I can show the Members that will refer to this that there are military security arguments that are powerful, that lead one from a security standpoint, irrespective of the budget, to a cruise missile carrier as opposed to a penetrating bomber.

The third point is the point the gentleman is making, and I would embellish it by saying, the budget issue, our security more than ever before is going to be based on the economic foundations of this country.

If we continue on this borrowing binge that we have been on in which we have this disinvestment in the United States because of Government borrowing, sucking up funds that are saved for investment, we are going to find ourselves at this point in world history on the short end of the stick and become a second-rate economic power.

From that economic base, all other power is derived. With the emergence of a united Germany, with the enormous force of that economic entity emerging in Europe, and with the force that we have seen in the Japanese economy, I think it is time for a wakeup call for the American Government, for our partners on the other side of Pennsylvania Avenue, the executive branch, and the membership of this House, because we need to get serious about getting our deficit under control and to invest in our economic base.

SAVINGS AND LOAN CRISIS: THE OTHER HALF OF THE PROBLEM

The SPEAKER pro tempore. The gentleman from Pennsylvania [Mr. KANJORSKI] is recognized for 60 minutes.

Mr. KANJORSKI. Madam Speaker, after hearing the presentation of the prior speaker I am not sure that he set the flavor for what I will address today, because I will hardly discuss the B-2 bomber or the nuclear defense of the United States. But I am not at all uncertain that what I intend to discuss is not at least as important in the long-term to the American people and American taxpayers.

Madam Speaker, I am a novelty in the House of Representatives. I did not hold office as a State legislator, State senator, councilman, mayor, Governor, or other elected office. I came originally to the House of Representatives as a person who had never held elected office before just three short terms ago, in January 1985.

I ran for the Congress of the United States because I believed, and still do believe, that the United States is the only nation on the Earth that has proven its ability to govern ourselves rationally, reasonably, and with the highest amount of individual freedom, of any nation on Earth.

It is because I recognize the importance of this quality in the American experiment of democracy that I rise here today. I do not normally make extensions of remarks nor closing speeches at the end of the day, such as this, but something disturbs me very deeply, and I want to deliver a message to the American people.

When I came to the Congress in January 1985, and took my oath of office, I was assigned to the Committee on Banking, Finance and Urban Affairs of the House of Representatives. Little did I know in 1985 that by the year 1988, that committee would have jurisdiction over one of the largest financial scandals America would ever see, and that by 1990, that scandal and that expense has grown to proportions that has affected the very confidence of the Government of the American people in their elected representatives, even as high as their respect, honor, and question of the man who occupies the highest office in this Nation.

I guess I want to speak to a few of those issues. I think what has happened in the savings and loan crisis is indeed scandalous. I would hope I could spend a few moments analyzing what I see has happened, what some potential responses should be of this body, this Government, and the American people, and third, I would hope that I could put to rest some of the things that have happened in this House and are appearing on a daily basis in the newspapers of our Nation; and that is a compulsion, and almost an insane desire to find some one person at fault for an entire problem that defines one's singular responsibility, and two, is not by a longshot, a singular problem.

Let me say that in the course of sitting on the Banking Committee I have traveled across America, up and down, north and south, east and west, and gone through numerous hearings that have exposed the Lincoln Savings & Loan disaster and the machinations of a man named Charles Keating. I have sat through the hearings in the Rayburn Building that have exposed the Silverado disaster and the unscrupulous activity of insiders, as well as the naivete of outside directors, and most certainly disastrous conclusions and judgments that have led to a billion dollar cost to the American taxpayer.

□ 2050

I have attended countless hearings and have heard people cry up and down, "It wasn't our fault. We had nothing to do with it. It just happened." Or, "It just grew like Topsy."

At the time, other people came before us who were either regulators, sometimes senior executive branch officials like Mr. Gray, or Mr. Wall, sometimes their top attorneys and assistants who have indicated that they knew all along there was some problem and that they could show us that somewhere in Nebraska or somewhere in Idaho they made a speech 3, 4, or 5 years ago indicating there would be something wrong in the savings and loan industry and because now that that prediction has come, about anyone who failed to act on it is responsible for some sort of negligent malfeasance or misfeasance in office or, worse than that, criminal activity.

Oh, that life were so simple; oh, that we would foresee the future so well.

I think I have a slight potential of seeing what may be over the horizon, and it scares the hell out of me, and that is the reason I rise here today. This is not just an S&L scandal or an S&L bailout. Regardless of how we would like to believe that this is all attributable to conspiracy, criminality, mismanagement or what-have-you, a portion, perhaps too great a portion—certainly too great a portion is due to that. But no one of credibility has indicated it is anywhere beyond 50 percent attributable to that.

So I stand here today and pose the question: Well, if we could attribute 50 percent of this disaster and all of this activity to mismanagement, fraud, abuse, criminality, what accounts for the other half of this problem? I think that is the serious element that is missing in the entire S&L debate today. No one seems to be asking that question.

Madam Speaker, I am a member of the committee, and I am not sure that we have had sufficient information given to us, developed or analyzed, to indicate that we still know what is responsible for the other reasons.

But most people seem to categorize them as economic reasons. I think that is a fairly decent categorization.

Why did we lose, whether it is $50, $75, $100, $150, $200 or $300 billion in the S&L scandal? If half of that is attributable to fraud, why did we lose that other 50 percent of that huge figure to economic reasons? And have we stopped the hemorrhaging?

I submit, Madam Speaker, that we have not. As a matter of fact, I had the occasion to meet with bankers in Pennsylvania several weeks ago in my home district, and I met with bankers in California about a week after that. It caused me to ask the question about something that disturbed me about 3,

4, 5 years ago at the height of the S&L problem. If you all remember back then we used to read those tremendous ads in all the newspapers across the land, "Send your $5,000, send your $10,000 or send your $100,000 and get 'this astronomically high interest rate.'" And, "Don't worry, because it is Federally insured."

We did not pay an awful lot of attention to it as individuals, the banking community did not pay a lot of attention to it, certainly the Congress did not pay sufficient attention to it.

The regulators obviously did not read the newspapers or watch television, because literally hundreds of billions of dollars were attracted by this exceptionally high interest rate into certain institutions in this country, most of them in the Southwest and in the West and in the South. But by far most of them, in the State of Texas.

And they were paying exorbitant fees where anyone who had anything to do with the banking business could very easily have asked the question: What does it take to operate a financial institution? What can you get for money you lend out? And that sets the amount you can afford to pay for the money you take in. In other words, I am talking about the economic spread between what a bank takes in as deposits, what it costs to manage those funds and what it has to pay to depositors in interest, and what it can charge borrowers who borrow those same funds.

Well, in those go-go days of 3 or 4 years ago in Texas and California, they were often paying 9, 10, 11, sometimes as high as 12 and 13 percent for money. They were turning right around when the prime rate was not significantly higher than that and they were lending that money out. There is little reason as to why there was a debacle or failure, because the spread, the difference between what they could get on the money they loaned out and what they were paying for it to come in was not sufficient to cover banking and financial costs.

Having had the pleasure in my other life, before serving in Congress, of being on the board of a small bank in Pennsylvania, it was our understanding that if you were going to make money in a bank, you had to get at least 2 to 2¼ percentage points more than for the money when you lent it out than you paid for it, when you borrowed from the depositors.

So, as an example, if you were to pay 5-percent interest to depositors, you had to lend it out at at least 7¼ percent to break even. If you did not get that 2¼ percentage point spread, you did not have enough money to pay for the bank, pay for the taxes, pay for the lighting, and pay for the salaries.

Madam Speaker, life has not changed a great deal since then. Some banks operated a little more efficiently, some a little less efficiently. But the spread is around that figure of 2 percentage points to 2½ percentage points, generally. That is where it sits. That is the spread you have to have.

The thing that made me rise today to talk about this is that in reading the New York Times, we all know that the prime rate in America right now is about 10 percent, some areas as low as 9½ percent. But the New York Times runs an ad today, not for a go-go savings and loan in Texas but a conservative Yankee bank in Connecticut, and that bank wants to pay 8.65 annual interest rate to attract money, when we know the prime rate is at best 10 percent. So they have discovered a new way of doing business, that they can have a spread of only 1.45 percent, less than 1½ percentage points, take money in and lend it out at that spread and apparently still make money.

Well, if they have come up with that, they should patent it and let it be sold across America, because that alone would make them a fortune.

The fact of the matter is what this advertisement indicates to me is there is a bank in trouble, sinking funds to cover its position that it needs in the marketplace, and it is paying a premium price above what it can afford to pay on those funds.

I would not worry about this if it were only a single Connecticut bank in the New York Times, but if you pick up any Philadelphia paper, if you pick up any New York paper, if you pick up any California paper, you will see the same type of ad, advertising 8.5, 8.7, 8.75 percent for money that can only be loaned out at a prime rate of about 10 percent; money that the banks know that they are taking in today and will lose money on tomorrow but they are doing it to have equity, to have a position to meet the demands for the money already in the marketplace.

It is reminiscent of just 3, 4 years ago in the savings-and-loan crisis, where the savings-and-loans were running out and paying 1 or 1½ percentage points more for money than they could possibly lend it out for and were in fact losing money on every dollar taken in.

Now, this does not subject the depositor to a problem. When you read an ad like this in the New York Times or any other newspaper and you have $100,000 or less to invest, you do not have to worry about whether the bank is a shrewd business bank, whether it knows what it is doing, whether it has good loans or bad loans, because you are not depending on this bank's business ability or business acumen, you are relying on the insurance fund known as BIF, Bank Insurance Fund, which used to be called the FDIC.

□ 2100

We are relying on their support and their insurance fund, and knowing full well if that fund is not enough, that the full faith and credit of the U.S. Government is guaranteed to support those deposits as they go belly up.

I suggest that there is a possibility that we may have bank difficulty. I would call to the attention of the Members of the House and the American people, that the front page of the Washington Post just this morning indicated one of the oldest banks in the city of Washington today is in an insolvent position, and does not know whether it will be able to survive as an institution. That was the headline on the bottom half of the first page.

If we look across the country we have had more failures in banking institutions in the last 2 years than at any other time in our history since the creation of Federal deposit insurance, and yet day in and day out we are hearing Members from both sides of this aisle trying to place blame on the savings and loan bailout like it was a conspiracy of elected officials to cause that to occur, or that there is something that they could have done to prevent the economic reason for the failure. That is what I am addressing.

There is enough blame to go around, and it would be an analysis that would consume for more than my hour to find out who is at fault for the fraud, abuse, or corruption, the ill-fated regulation, the failure to inspect, the concept of deregulation, and all those things. That must be left for another day. That issue certainly will be, and has been, addressed.

Instead, I raise the question tonight of who knows why the economic failure occurred in the savings and loan? Have we really found out? Do we know why the FDIC isurance fund is now in its weakest position since its inception 50 years ago? On a proportional basis, it has less money in the fund today to protect more dollars than at any time in its history. Yet, what are we doing to prevent the potential of a banking crisis in this country? That the banks would start to fail, fail for liquidity, and would have to go to the fund and exhaust the fund, and would have to come to the taxpayers? Do we have any idea of what the cost of such a sequence of events would be? Again, do we have any idea what would cause that?

Certainly, somewhere in America tonight there is fraud, there is corruption, there is abuse in the banking as in any other industry. However, if there is a failure, could we stay here tonight and say that it is fraud, abuse, failure, and mismanagement that caused it, or is there an economic virus within our system that may potentially cause that failure, may have caused part of the S&L failure, and could it

cause a part of any other failure in our system?

I submit Madam Speaker, in fact, there is a virus in our land, and that virus is something we have ignored too long. We have had a tendency to watch the American financial system and gauge whether it is healthy or unhealthy by indicators that no longer may be proper thermometers of our temperature. We are looking at the stock market and what we do not realize, that the stock market in New York is no longer a national market. It is a world market. It does not necessarily reflect good or bad financial conditions just in the United States, but reflects financial conditions worldwide and is impacted by events worldwide. However, I do suggest that there is a market that is screaming out for notification, that is in trouble, and all Members are sitting back and not paying attention to it.

That market is the domestic real estate market, both commercial, multifamily, and residential. It is not uniform across the land yet. But clearly it has been in place and started in New England more than 18 months ago. I have talked with people who tell me that there are some homes for sale in the New England area, on the beaches of Cape Code, and other places, that there is no reasonable price that can be obtained for the purchase of those homes. The fact is that people are taking half, and sometimes as low as a quarter of the original asking price because there is no market for the sale. I recently have been in New York City, and I have talked with some of the financial leaders of New York, and they tell me the real estate market in New York has dropped by 10 percent in just the last year. If that is the case, that would have already consumed most of the equity put up by investors when they started to build those properties 1 year or 2 years ago. I have been to California, and I get the same reports in some sections of California, I received the same report in some sections, particulary the large populated areas of Pennsylvania. I get the same reports from areas in Midwest, and I certainly know for a fact that in Arizona and in Florida, where the S&L's have had a disaster, real estate is very soft.

Madam Speaker, right here in Washington, DC, which has been on a real estate kick for a number of years, we have seen this problem. For the first time, we are reading of real estate developers that are insolvent, unable to perform, and foreclosures. I suggest we potentially may be in the clutches of a financial disaster the likes of which we have not seen in many years as the result of a free fall in the domestic real estate market of the United States. No one can prove that. Certainly I do not suggest that I have the empirical evidence to prove it. I merely have very strong indicators from all the industry.

I had the occasion just 2 days ago to speak to a combined group of insurance company executives. I made this very same proposition to them. It was my feeling and my analysis that we are, in fact, in a crash situation in the real estate market in this country, and that as it went to every one of our institutions, it could cause problems not only in the S&L's, which it has, but in the banks and the pension funds and in the insurance companies. After about 15 or 20 minutes of this discussion, we stopped, and the question was posed to the executives present, is there anyone in this room that would like to refute that argument or even challenge the validity of that argument? Most people admitted it was their perception, from their limited view of where they were doing business that, indeed, real estate as a market has fallen and fallen precipitously in the last 6 months to a year. If that is the case, if even the outside potential of that exists, what could it mean to America? I tell Members one thing, Madam Speaker, it could make the S&L bailout look like kid's play. Because we are talking about something now that could go to the Federal banking institutions and wipe out a fund that has already been depleted down to $14 billion. If we had to run in and take care of the portfolios of the commercial banks in this country that are heavily invested in this point in risky real estate, we could be talking another taxpayer payout to support the banking institution of hundreds of billions, perhaps as high as trillions of dollars. If only it would stop there.

But how many Americans realize that their pension funds are highly invested in supporting mortgages and investments in real estate across America? And that their pension funds are only so secure, and gain such income as those real estate investments are secure? How many people realize that insurance companies are major investors in mortgaged money to build buildings, and major owners of real estate in this country? And that their insurance policy would not be very secure if, indeed, the insurance companies were not able to get the liquidity necessary or to sell the real estate that they are now invested in, if they needed that money? Madam Speaker, we are talking potential of trillions of dollars of loss and an economic catastrophe in the country that could make the Great Depression seem like nothing. I do not want to predict that that is absolutely going to happen, and certainly do not. I am not here to suggest that I have the absolute empirical evidence or factors that it is happening. God forbid. I hope it is not. However, I will tell Members this, Madam Speaker, that although I am firmly convinced that neither the President, his son, nor the Members of this Congress on either side caused the total S&L debacle, because I was there, perhaps we did not take certain perceptive actions sometimes we did not see the right thing, but there were huge economic causes for that disaster. I can see that over the years, I can see now there are economic factors awake in the land that could cause the same disaster to occur in the banking industry, the pension fund industry, and the insurance industry. What is the Congress of the United States and the President of the United States doing about it to prevent this potential eventuality?

□ 2110

Well, I will tell you as a member of the Banking Committee what I think. I do not think we are doing anything, and certainly not nearly enough.

I do not want to criticize my committee, and I certainly do not. Chairman GONZALEZ has worked harder and put in more hours than any man in the House that I know of. He has held hearings in Texas, in California, in Washington, and all across our Nation. You name the city and he has been there with his committee. I have been there many of the times with him. He holds untold hearings in the House when we are in regular session to try and find out the facts.

Is it the subcommittee chairman, Mr. ANNUNZIO, who is responsible? Certainly not. He, too, is holding extensive hearings with his subcommittee, both here in Washington and throughout the country. Then who is at fault?

Madam Speaker, we are at fault. We are all at fault, because to my knowledge there is not a Member of the House of Representatives who would be classified as a financial expert of the highest order, who could sell his services as a consultant to the major financial institutions of this country and be worth a great deal of money.

We are generalists, Madam Speaker. We are farmers, we are lawyers, we are businessmen, we are engineers. We even have a doctor or two. But we are not financial experts, and what this crisis, whether we look at the savings and loan crisis or we look at the potential bank crisis, demands of this country today is the best minds America could assemble.

First, we should assemble all the data we have and find out where we are weak and what more we need. We need to analyze that data as critically as possible, with the best case scenario and the worst case scenario, to determine whether or not there is a virus loose in the land and whether it has anything to do with the economic difficulty that is being reflected in the real estate market across the country and whether or not that market of natural forces will turn around. Or

could it precipitate an economic disaster in the short or interim period that would be so catastrophic as to set off the whole economic force and direction of the United States?

If there is even a small likelihood or possibility that that could occur, we are being less than diligent in not assembling in this country today the finest financial minds to determine what the facts are, what alternative positions this Congress and this Government could take and this country could take, and make the people aware of those facts.

It is going to be too late, Madam Speaker, when pensioners a year from now or 2 years from now come and ask me why they no longer get their pension checks when they thought they were guaranteed a pension because they contributed all their lives. It would not help for me to tell them, "We are very sorry, but insurance companies aren't insured and they went bankrupt," or "the pension funds aren't fully insured and they went bankrupt," or "yes, your investment was insured, but it was insured with billions of dollars of other investments that are tied up in the bank crash," the bank crash that may occur.

If we think the American people are dissatisfied today with the discovery that there is a savings and loan debacle, if we think they are awfully annoyed because they do not understand all the ramifications and the reasons and the causes of it, if they are not satisfied that we have not put all the crooks in jail, I say to you that we can forget all those things, because now we would know there are other causes for the savings and loan disaster that may be still out in the land and may be eating away at our financial fabric, and we are sitting like the three monkeys, hearing no evil, seeing no evil, and speaking no evil.

Well, I have decided to be the third monkey and take the tape off my mouth and speak some evil, even if it shakes up some financial markets in this country or disturbs some influential industrial people in this country who are in the financial institutions and part of the monied interests of this country, because somebody has got to tell the American people that it would be, oh, so simple to say that the losses we suffered in the S&L's were only due to some crooks and those crooks got away with it because regulators did not do their job.

In fact, that did happen. We lost billions of dollars because there were dishonest people performing dishonest functions and the regulators who were supposed to catch them either were not hired or were not qualified or were not inplace and did not catch them, and now the disaster has occurred that is going to cost the taxpayers of America billions of dollars. That did happen, but that does not satisfy the American people as to why they should pay that loss. And further, it is not going to satisfy the American people to find out that if we had an anticipation that this could occur in other industries and there were certain preventive activities we could have undertaken now to prevent any of the loss from occurring, certainly to prevent a major part of the loss from occurring, we did not do it, just as we know that when we passed the FIRREA, the support bill to provide the bailout for savings and loan depositors, that we needed other provisions in that bill to have a softer landing for the American taxpayer, but we could not get the consensus to do that. We could not get the bailout on budget, so we paid more interest money to borrow the money so the President and his administration would not be embarrassed.

Some of us, myself included, voted against the bill for that reason alone. But we had other reasons as well. We knew that the American people had not been told the full truth about the savings and loan disaster, just as they have not been told the full truth today about other industries.

How many of the American people know that the majority of the savings and loan losses that occurred in this country in 1987, 1988, 1989, and 1990 were not from federally chartered savings and loans? They were not like the savings and loans that do business in my little district in Pennsylvania. There were State-chartered savings and loans that were given powers by legislators in the individual States, particularly Texas, that were regulated by the regulators employed in Texas and working for the Texas State government, not the Federal Government, regulators who were not adequately prepared and did not make audits or examinations sometimes for as long as 5 or 6 years.

But we did have some Federal involvement. In order to try to protect depositors, we extended Federal deposit insurance so if those depositors went down there and put their money in those S&L's, even though they were State-chartered, State-regulated, and State-controlled, if there was a loss there, the Federal Government and the Federal Deposit Insurance Corporation would pay the loss. And indeed we are, to the tune of hundreds of billions of dollars, depending on whether we say it is $100 billion, $200 billion, or $300 billion.

The fact is that for the 4 years I mentioned, about 75 percent of the institutions and 75 percent of the loss is losses that occurred in State-chartered, State-regulated institutions, most of them in the State of Texas.

What happened in Texas? Texas is a phenomenal story. Everybody was a "go-go." They found out you could go down and get a charter in Texas and have little regulation, and if you wanted to have your own investment bank or, as some people called it, your own piggybank, they went down to Texas. They built billions of dollars worth of highrise apartment buildings, billions of dollars worth of hotels, and billions of dollars worth of highrise apartments and shopping centers. They only missed one thing—they did not have the billions of dollars to pay for them.

So they went belly up, and Uncle Sam guaranteed to support the depositors' money that was acquired from all over this country as a result of these ads: "Send your money to Texas and get 10 to 11 percent." And people from Pennsylvania and New York and all over this country did exactly that.

Then when the savings and loans ran out of money and could not pay the depositors' money back, it became the responsibility of the insurance fund to do it. When the insurance fund was wiped out in 1988, and they had no further funds, because of the full faith and credit of the U.S. Government, it became the responsibility of the U.S. Government to pay the funds, which we did.

It is interesting, however, when we look at the story, because Texas had more money injected in it as a result of savings and loan activity in 1987, 1988, and 1989, three times more money than the United States invested in all Europe under the Marshall plan. Over $60 billion from all over this Union, from 37 States, went in to help just 13 States, but primarily Texas. About 60 percent of the loss was in Texas alone.

It sounds like I am Texas-bashing. I am really not. It just seems to me that way back in 1988, 1987, and 1986 I sat as a member of the Banking Committee and I had the officials of the U.S. Government, Mr. Wall and Mr. Gray, come before my committee and they told us, "Congress we've got a problem, but our problem isn't that much."

□ 2120

They said, "If you could come up with a bill that would give us $2 billion over a period of 7 years for each of those 7 years, about $14 billion, have no problem."

We met on it. We cogitated about it. We said, "We don't understand the regulation, and we don't micromanage these things, but they are the executives that do." They needed the money; they got it. We passed the bill.

We passed a different bill than they asked for though. We said, "Let's not stretch this over 7 years. We're going to give you $5 billion a year for the next 2 years, and come back and tell us what the need is then."

Mr. Speaker, we gave them that $10 billion, and they went about closing some savings and loans in Texas, and

the Southwest and other areas of the country.

Then in the summer, about this time of year, of 1988, if my colleagues will recall, about 3 months before a Presidential election, the administrators and the regulators came back to the Congress and testified, and they said, "We underestimated the bailout. That $10.8 billion that you gave us 2 years ago is not going to be enough. We're going to need about $12 to $15 billion more, and if you could put that together, it solves the whole problem."

Needless to say, Mr. Speaker, a lot of us were not too happy about that, but recognizing that we and the American people, to protect the savings of average Americans and that average savings, of about $8,000 a person, that put their money in these institutions and did not study the responsibility or the ability to invest this money because at the door we said, "If you put your savings in this institution, you're insured up to a hundred thousand dollars." We had to honor the commitment to put additional funds in the insurance fund to protect these savers.

Mr. Speaker, we set about preparing to do that, but we were hearing other stories. Regulators were calling us up on the telephone and saying, "Mr. Congressman, what those people in Washington are telling you is not the truth. There are savings and loans out here in the West and in the Southwest that are literally losing a billion dollars an institution. Check it out."

We did, and we took our hearings to California, and we took them to Arizona, and we looked into it, and we found out those people out there in the field were not altogether wrong.

So, we called the head of the responsible regulatory agency of the U.S. Government under the President of the United States before the committees of Congress, and he told us, now in October, 30 days before the election, "It probably was slightly underestimated. Instead of $12 to $15 billion"; I think he remembered the figure exactly, Mr. Wall said that they recalculated it; "$22 billion." That is the figure. "If you come up with $22 billion in October of 1988," 30 days before the election for the presidency of the United States, "the problem will be solved."

Quite frankly, Mr. Speaker, we thought that was a little high on the committee, but we were willing and able, and we wanted to make our commitment. We set about again structuring the legislation to accomplish this constantly urging the President of the United States at that time, who was the deregulator of all deregulators, Mr. Reagan; we said, "Send up legislation. Let us give you the authority and let us give you the funding to move."

They did not want to do that. They did not want to propose any legislation. I suspect why. I could be wrong.

Mr. Speaker, I suspect that Mr. Reagan did not want to admit that deregulation, lax regulation, and lax supervision were starting to cause what appeared to be a great financial disaster, and 30 days before a Presidential election he did not want to have anything to do with it, and, since he only had 3 more months to serve as President, he did not want to have anything to do with it, and, as is custom with a President, if something good is said about a President and the bad facts of a situation are ignored, they tend to disappear because, after all, he had spent 8 years as President of the United States, and he got elected to balance the budget, and he failed to balance the budget every year for 8 years and had taken the debt of the United States from $900 billion, when he took office, to over $3 trillion when he was leaving office, three times the accumulated debt, and nobody held him responsible for that. So, why talk about the S&L scandal?

Mr. Speaker, he was right. He did not talk about it. The American people went and elected a President. President George Bush was elected.

Just 4 weeks ago in testimony before the Banking Committee a regulator of the Silverado Savings and Loan in Denver, CO, told us that the State wanted to exercise closure in the end of October 1988, and they received a telephone call from Washington, DC, a highly placed official with the authority to give direction, but conveniently forgot who that individual was who told them not to take action to close the Silverado Savings and Loan prior to the November election. In response to that order and request they took no further action and let Silverado continue to exist for at least another 36 days, until early December.

Mr. Speaker, as all my colleagues know, when they eventually closed Silverado, after the election, it cost the American taxpayer more than $1 billion.

Now, even if it was nobody's fault, in order to not have that issue presented to the American people before the election there had to be a loss between the time they actually closed the institution and the time the local regulators who knew it best wanted to close it, of at least an additional $30 to $40 to $50 million lost in that 36-day period that was lost through no other reason than not to have a negative impact on the Presidential election.

Anyway, the election was held on November 4, and in America we only have two candidates. One wins, and, when he does, he becomes President of the United States; not a Republican President, not a Democratic President, but a President of all the people, and, Mr. Speaker, the President of the United States is my President, too.

In response to that President I want to say this: That I was most impressed that, when he came to office, he took certain action, but I do want to end this story. There is another date here.

Mr. Speaker, the Banking Committee met a month after the election, in December 1988. Mr. Wall then comes before the committee and said, Gentlemen, I don't know how it happened, but I was only here 60 days ago. I remember being here in July, 4 months ago, and I said it was $15 billion, and then I was here 2 months ago in October, and I said it was $22 billion, and I don't know how we made this mistake, but now we calculate that it's probably $35 billion.

Mr. Speaker, I was starting to lose faith in the regulators' capacity to add, and subtract and to multiply. I could not understand how in a period of 4 months or 5 months anybody could miss the books by three times, going from $15 billion to $40 or $45 billion in 6 months.

Well, now to give credit: Mr. Bush came into office. He was not going to cook the books. He could not cook the books really. He looked at it and knew how bad it was. His first or second order was to send a program up to Congress to get the S&L's bailed out, and he did it, and within weeks a proposal came up to the Congress, and we went full steam ahead with hearings, and meetings and discussions, amd we put together an extensive piece of legislation that has subsequently become known as the S&L bailout.

Mr. Speaker, that is an unfortunate misnomer of terms because it is not a savings and loan bailout. It is a depositors' bailout. The U.S. taxpayers, through their Government, gave their full faith and credit to support the insurance fund that insures the depositors that put their money in the savings and loans across the country.

□ 2130

But needless to say, the press had a field day. It was a bailout, and if you call something a bailout, people get the misconception that it is the owners who are getting bailed out. And they can get mighty annoyed; but still they did not understand the full impact of the amount; but when the administration came up in January and February with its proposal, it now recognized that it was no longer the $15 billion as it estimated in July, the $22 billion that it estimated in October, the $30 billion that it estimated in December, but in fact it was a full-blown $100 to $200 billion disaster.

And do you know what? The administration convinced me. I turned to my colleagues on the committee and I said, "I know it is underestimating this."

You know the saying, "Lie to me once, shame on you; lie to me twice, shame on me." This was the fourth time, and I was not going to have

shame on me this time. I knew they were lying. Not only did I know they were lying, but by that time we had extensive hearings. We had them in. We were going over the books. It was not unusual to see Vernon losing $2 billion, Silverado losing $1 billion, Lincoln losing $2½ billion. That is $5 billion right there, just those three. We knew there were over 4,000 savings and loans. We knew there were more than 1,000 who were in trouble and there could be as many as 1,500.

So the underestimations were very clear. We did not know what the outside amount was going to be because we did not know how fast we could clear it. We did not know a couple other things. We did not know how the real estate market would hold up. We did not know what kind of people we could get in place and in what time to manage the disaster, and we were not at all certain that the executive branch had its house in order to do any better on this job than it did for the last 8 years in regulating and supervising the job; but we did try to work in a bipartisan way and we put a bill together. That bill has been in action, and now we have heard all the criticism, everything from the failure to prosecute, to people who have walked away with fortunes; but most recently and most disturbing, Madam Speaker, Senator METZENBAUM in the Senate just this last week discovered a savings and loan buyer from Arizona who owned a company and had pled guilty for that company of fraud in securities, and he was able to buy 15 failed S&L's in Texas with only $1,000 dollars of his own money. He borrowed $70 million from two companies, one of which he owned and the other he had influence in.

Now that the picture has been examined and we guaranteed him $1,700,000,000 of the taxpayers' money for this deal. Who is we? The Chairman of the Federal Home Loan Bank Board. He did it at the 11th hour in December before the law changed. He wanted to get rid of as many of these institutions as they could and so he wrote in a deal for as many institutions as they could.

What did they do? They did not have regard for the American people. They did not even want to tell us, and would not disclose to the Congress of the United States or the taxpayers, the details of deals they made. To this day, we still do not know all of the ramifications of the deals that they made. We are just starting to look at those deals, and let me tell you, some of them are frightening. We will be uncovering skeletons for many years to come.

Why did we not know about those deals? First, we did not have cooperation; second, when we started to have oversight who did we call before our committee for oversight? The same officials who had come up before in many instances who had lied to us, misled us, given us the wrong facts over and over again. They appeared before us all year.

I do not know about you, my fellow Members, Madam Speaker, usually a person only gets to lie to me once. He certainly does not get to lie to me twice, but for us to sit here in Congress and allow these officials to tell us anything they want, to not disclose the information to us we need, and for the Congress to lack the resources and ability to make the examination ourselves, I think that is grossly negligent on our part. I think it is foolhardy on our part to think that these officials would now turn around after a pattern of lying for years and tell the Congress or the American people the truth, and I think as Representatives of the American people in Congress assembled it is our responsibility to find out what the facts are, get to the truth; and most of all, to publish that truth openly to the American people.

It is not a national security secret why this money was lost. It is important for every voter and every American to know what happened, whether it was an economic disaster, and if so, what portion was attributable to that; if it was fraud and corruption, and if so what portion is attributable to that, who was responsible, who was paid, how were they paid, how are these people now living, are they going to pay the money back, have they been able to hide this money and buy million-dollar homes and escape with that wealth that the taxpayer will have to pay?

Should we change the rules? Are our rules too lenient? Do we have enough investigators in the field? Are we doing sufficient auditing? Is the real estate market going to fall and cause collapse of other institutions unrelated to fraud, corruption, and abuse?

How will we know these facts? Well, we are not going to know these facts by being penny-wise and pound-foolish, by thinking that we could appropriate in one crime bill the Senate passed, I think last week, $300 million to the Attorney General to prosecute, when we have already given him $75 million to prosecute, and he has not spent that.

We had testimony before our committee by his Assistant Attorney General that, well, Congressman, he answered my question, he said, "We haven't done that because don't you know how long it takes to hire investigators, how long it takes to hire Federal attorneys?"

I said, "Mr. Attorney General, we gave you the money 9 months ago."

He said, "Well, it takes 3 months to advertise."

I said, "Have you ever thought about the fact that when the President asked for this 1½ years ago, and we told the President we were going to provide it, why didn't they start lining up the FBI agents and investigators and attorneys general across the country and Federal attorneys to prosecute 1 year ago, 1½ year ago?" He could not even assure me we had enough prisons to house all the S&L criminals.

They did not do it because they were disorganized. They did not want to do it for one reason or another. They were not prepared to do it, or maybe it is just plain old bureaucratic governmental malaise. I do not know what it is, but I can tell you this, Madam Speaker. Just throwing money at this disaster, whether it is for criminal prosecution, regulation, or for the bailout, is not going to solve the problem, no more than we won the war on poverty by just throwing money at it.

It is going to take informed, rational minds, with a willingness to find out what the true problems are, unrelated and independent of whether they are positive or negative to your own personal interests, political interests, or otherwise, and then work out a scheme and a plan that is bipartisan in nature, not blame-finding or fault-finding, but to save money for the American people; but most of all, to prevent a potential catastrophe, that if that virus is out there in the land and does exist, it could be just around the corner. Then it will not be important who was at fault or whose son was a director or who was the prosecutor. We will be in the throes of a gigantic economic depression in this country at the very time that the world has changed over and the American institutions and the American system seems to have won out, and we will not be able to have the money for the activity, to be the players. It will be most ironic.

I was a boy of 4 years old when the Second World War occurred. I remember having the measles on December 7, 1941, listening to a radio and the announcement of the callup of the National Guard and the Reserves. They were first reporting the deaths that occurred at Pearl Harbor.

□ 2140

I did not know what war was at 4 years of age, but I did remember that for the 4 years after that it was pretty rough, pretty tough. A lot of the kids that used to live around me went off and they did not come home to play ball anymore or anything else. They came home in boxes.

We fought, interestingly enough, two nations, the Empire of Japan and Nazi Germany, and we literally in 5 years rendered those two nations senseless and economically barren. We leveled Nagasaki and Hiroshima with atomic bombs and killed over 100,000 people. We bombed and fire-bombed Dresden and other German cities

where there was not a building standing or the capacity for any industrialization, and most of us that saw that aftermath of the Second World War said that never again will these two powers ever be able to rise up and be world powers for good or for bad in our lifetime.

Lo and behold, here we are in 1990, and the two strongest economic powers in the world today are our adversaries of the Second World War. They seem to be getting along so well that when the Soviet Union has asked for aid, the President indicates that he cannot provide any for political reasons, but not only for political reasons, for economic reasons. When you have a deficit of $230 billion a year and you have a national debt of $3.2 trillion, you are not in a very good mode to pull out your checkbook and start writing checks for your recent enemy or potential enemy, and certainly we cannot expect to do that.

But worse than that, we cannot play in the world economic ballgame. We do not have enough money to develop the technology to do the research that our own scientists are doing. The nation of Japan now purchases 90 percent of the American patents every year, the strongest developer of American patents. The nation of Japan educates five times as many engineers as the United States even though their population is less than half of the United States.

The anticipated income of the Japanese worker at the year 2000 is expected to be $90,000 a year. The anticipated income of the West German worker in the year 2000 is expected to be $70,000 a year, and the anticipated income of the average American worker is anticipated to be $35,000 a year, about half as much as our enemy of 45 years ago, West Germany, and even less than half as much as the Empire of Japan, our enemy of 45 years ago.

Madam Speaker, these are the reasons I had to come down tonight. I am a lawyer by profession, I am not an economist, but I think I have the ability to perceive problems when I see them, and all of my life I have been involved in watching economic trends and financial trends and investments.

Speaking for myself alone, not just as a Congressman, I am damn worried. I think we have problems in this country that go far beyond the S&L crisis or a need for a little adjustment of income and cutting of the budget. We have got deep economic problems that are affecting the real estate market of this country, that are putting in jeopardy not only the savings and loan institutions but the banks, the insurance companies, and the pension funds, and if we do not do something mighty damn quick, we may just have the strongest, heaviest, worst, and hardest financial disaster this country has ever seen.

I am here to say to my colleagues tonight, I am here to say to the President of the United States and anybody else who will listen to me, that if there is even a slight chance of this analysis being correct, it is the obligation now of this Congress and of this Government to put together the greatest minds we have financially in this country, to open up and study the disaster in the savings and loan industry and expand it to the entire financial sector of our economy and to determine what the strengths, the weaknesses are, and if there is any legislation that is necessary to change what may potentially occur and to anticipate the worst that could occur and to try and put into effect the measures that could shore up our system if a catastrophe should occur, whether it be a reconstruction finance corporation to hold real estate assets until they recover, and there is a need for that, or other actions. But something has to be done. Ignoring the problem, not financing the study of the problem, walking out and saying, "Well, we are doing what we think should be done," or worse than that, to try and find blame, whether it is on either side of the aisle in this House or whether it is in the executive branch, the regulatory agencies, and the supervisors, or even attacking the son of the President of the United States, when all is said and done, we will vent oursleves of a lot of annoyance, a lot of frustration.

But what will we have accomplished? We will have been talking about something that is already history.

What I am suggesting is we not only stop talking about history but start studying history. Use the S&L scandal and the debacle that occurred as a laboratory. Let us find out if it could spread. Let us find out if it has spread. Let us find out what the ramifications to our entire economic system would be if, indeed, it has spread, and what, if anything, we as the Government of this country can do about it.

I do not think there is a nobler cause than we are called to in the year 1990 to perform.

Mr. President and members of the Republican Party and the Democratic Party of this House, this is not the time to point fingers and to be fancy about who is at fault for what, when, and where. It is not the time to excite and frighten the American taxpayer or scare the living hell out of them. It is the time to be firm, steady as you go, analytical, executive. It is a time to be real American individuals and solve our own problems in our own way by facing up to them and finding what the end result should be.

I thank the Speaker for her indulgence.

PERSONAL EXPLANATION

Mr. MINETA. Madam Speaker, on July 18, I was called away by an unexpected personal emergency.

I ask unanimous consent to enter into the RECORD how I would have voted on yesterday's House business if I was present.

No on the Frenzel amendment to H.R. 5268, appropriations for rural development, agriculture, and related programs.

No on the Dannemeyer amendment to H.R. 5268.

No on the Penny amendment to H.R. 5268.

No on the Walker amendment to H.R. 5268.

Yes on final passage of H.R. 5268.

Yes on House Resolution 433, providing for the consideration of H.R. 5258, the Balanced Budget Act of 1990.

No on the motion to recommit H.R. 5258.

Yes on final passage of H.R. 5258, the Balanced Budget Act of 1990.

The SPEAKER pro tempore (Ms. SLAUGHTER of New York). Is there objection to the request of the gentleman from California?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mrs. BENTLEY (at the request of Mr. MICHEL) for after 1 p.m. today and Friday, July 20, on account of official business.

Mr. DANNEMEYER (at the request of Mr. MICHEL) for today and tomorrow, on account of official business.

Mr. BAKER (at the request of Mr. MICHEL) for today and tomorrow, on account of illness in the immediate family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. KASICH) to revise and extend their remarks and include extraneous material:)

Mr. WOLF, for 30 minutes, on July 20.

(The following Members (at the request of Mr. AUCOIN) and to include extraneous matter:)

Mr. SLATTERY, for 5 minutes, today.

Mr. ALEXANDER, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. BROOKS, for 5 minutes, today.

Mr. STARKE, for 5 minutes, today.

Ms. OAKAR, for 5 minutes, today.

Mr. FALEOMAVAEGA, for 60 minutes, on July 20.

Mr. LAUGHLIN, for 60 minutes, on July 25.

Mr. KANJORSKI, for 60 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. GILMAN, on Natcher/Conte amendment, today, in the Committee of the Whole, on H.R. 5257.

(The following Members (at the request of Mr. KASICH) to revise and extend their remarks and include extraneous material:)

Ms. SCHNEIDER.

ADJOURNMENT

Mr. MINETA. Madam Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 48 minutes p.m.), the House adjourned until tomorrow, Friday, July 20, 1990, at 10 a.m.

SENATE ENROLLED JOINT RESOLUTIONS

The SPEAKER announced his signature to enrolled joint resolutions of the Senate of the following titles:

S.J. Res. 276. Joint resolution designating the week beginning July 22, 1990, as "Lyme Disease Awareness Week."

S.J. Res. 281. Joint resolution designating September 13, 1990, as "National D.A.R.E. Day."

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3587. A letter form the Assistant Secretary for Territories and International Affairs, Department of the Interior, transmitting a draft of proposed legislation to eliminate "substantial documentary evidence" requirement for minimum wage determination for American Samoa; to the Committee on Education and Labor.

3588. A letter from the Administrator, General Services Administration, transmitting an informational copy of a report of Building Project Survey for Beaver County, PA, pursuant ot 40 U.S.C. 606(a); to the Committee on Public Works and Transportation.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XXIV, reports of committees were delivered to the Clerk for printing and reference to the proper calender, as follows:

Mr. ROE: Committee on Science, Space, and Technology. H.R. 3533. A bill to amend the Earthquake Hazards Reductions Act of 1977 to improve the Federal effort to reduce earthquake hazards, and for other purposes; with an amendment (Rept. 101-464, Pt. 2). Referred to the Committee of the Whole House on the State of Union.

Mr. DIXON: Committee on Appropriations. H.R. 5311. A bill making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1991, and for other purposes (Rept. 101-607). Referred to the Committee of the Whole House on the State of the Union.

Mr. HEFNER: Committee on Appropriations. H.R. 5313. A bill making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1991, and for other purposes (Rept. 101-608). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DIXON:

H.R. 5311. A bill making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1991, and for other purposes; committed to the Committee of the Whole House on the State of the Union and ordered to be printed.

By Mr. ROE:

H.R. 5312. A bill to establish a uniform Federal system for the review and authorization of releases into the environment of genetically modified organisms, to promote research into and collection of data regarding the effects of such releases, and for other purposes; jointly, to the Committees on Science, Space, and Technology, Energy and Commerce, and Agriculture.

By Mr. HEFNER:

H.R. 5313. A bill making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1991, and for other purposes; committed to the Committee of the Whole House on the State of the Union and ordered to be printed.

By Mr. ANDERSON (for himself, Mr. HAMMERSCHMIDT, Mr. NOWAK, and Mr. STANGELAND):

H.R. 5314. A bill to provide for the conservative and development of water and related resources, to authorize the U.S. Army Corps of Engineers civil works program to construct various projects for improvements to the Nation's infrastructure, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. ANDERSON (for himself, Mr. MINETA, Mr. BORSKI, and Mr. WISE):

H.R. 5315. A bill to provide off-budget treatment for the highway trust fund and the airport and airway trust fund, if such treatment is provided for the Social Security trust fund; jointly, to the Committees on Public Works and Transportation, Government Operations, and Rules.

By Mr. BROOKS:

H.R. 5316. A bill to provide for the appointment of additional Federal circuit and district judges, and for other purposes; to the Committee on the Judiciary.

By Mr. IRELAND (for himself, Mr. FASCELL, Mr. YOUNG of Florida, Mr. LEHMAN of Florida, Mr. BILIRAKIS, Mr. BENNETT, Mr. GRANT, Mr. HUTTO, Mr. GOSS, Mr. NELSON of Florida, Mr. SHAW, Mr. GIBBONS, Mr. MCCOLLUM, Mr. SMITH of Florida, Mr. LEWIS of Florida, Mr. JOHNSTON of Florida, Mr. JAMES, Ms. ROS-LEHTINEN, and Mr. STEARNS):

H.R. 5317. A bill to prohibit the Secretary of the Interior from issuing oil and gas leases on certain portions of the Outer Continental Shelf off the State of Florida; to the Committee on Interior and Insular Affairs.

By Mrs. KENNELLY:

H.R. 5318. A bill to amend the Internal Revenue Code of 1986 with respect to the treatment of charitable contributions of appreciated property by S corporations; to the Committee on Ways and Means.

By Mr. ORTIZ:

H.R. 5319. A bill to establish in the State of Texas the Palo Alto Battlefield National Historic Site, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. PEASE (for himself, Mr. CARDIN, Mr. COYNE, Mrs. JOHNSON of Connecticut, Mrs. KENNELLY, Mr. MATSUI, and Mr. RUSSO):

H.R. 5320. A bill to improve the administration of the antidumping duty and countervailing duty laws: to the Committee on Ways and Means.

By Mr. RINALDO:

H.R. 5321. A bill to amend the Job Training Partnership Act to encourage the establishment of business-education compacts to reduce student dropout rates, increase productivity, and improve worker skills and job opportunities; to the Committee on Education and Labor.

By Mr. SIKORSKI (for himself and Mrs. MORELLA):

H.R. 5322. A bill amending certain provisions of title 5, United States Code, relating to the Senior Executive Service; to the Committee on Post Office and Civil Service.

By Mr. WOLPE (for himself, Mr. HORTON, Ms. KAPTUR, Mr. KANJORSKI, Mr. LAFALCE, Mr. LEACH of Iowa, Mrs. KENNELLY, Mr. CONTE, Mr. ECKART, Mr. OBERSTAR, Mr. GALLO, Mr. KLECZKA, Mr. GEJDENSON, Mr. OBEY, Mr. VANDER JAGT, Mr. STUDDS, Ms. SNOWE, Mr. BOEHLERT, Mr. ROTH, Mr. HAMILTON, Mr. JONTZ, Mr. SOLOMON, Mr. HENRY, Mr. KASTENMEIER, Mr. VISCLOSKY, Mr. MOODY, Mr. FORD of Michigan, Mr. HERTEL, Mr. SAWYER, Mr. NEAL of North Carolina, Mr. BONIOR, Mr. ENGEL, Mr. LIPINSKI, Mr. CARR, Mr. MCNULTY, Ms. LONG, Mr. WEISS, Mr. CLARKE, Mr. HEFNER, Mr. MCCLOSKEY, Mr. SOLARZ, and Mr. SHAYS):

H.R. 5323. A bill to amend the Federal Deposit Insurance Act to require States in which the failure of State-chartered savings associations has involved a disproportionately large share of the thrift resolution costs to pay a State thrift deposit insurance premium as a condition of future Federal deposit insurance; to the Committee on Banking, Finance and Urban Affairs.

By Mr. YATES:

H.R. 5324. A bill authorizing appropriations for the U.S. Holocaust Memorial Council; jointly, to the Committees on Interior and Insular Affairs, House Administration, and Post Office and Civil Service.

By Mr. APPLEGATE:

H.J. Res. 624. Joint resolution proposing an amendment to the Constitution of the United States to permit the States to propose or ratify an amendment to the Constitution by referendum; to the Committee on the Judiciary.

By Mr. GEPHARDT (for himself, Mr. GRAY, Mr. BONIOR, Mr. HOYER, Mr. FAZIO, and Mr. DELLUMS):

H.J. Res. 625. Joint resolution designating August 6, 1990, as "Voting Rights Celebration Day"; to the Committee on Post Office and Civil Service.

By Mr. MARTINEZ (for himself, Ms. PELOSI, Mr. FUSTER, Mr. LANTOS, Mr. PORTER, Mr. BERMAN, Mr. APPLEGATE, Mr. LANCASTER, Mr. MACHTLEY, Mr. EVANS, Mr. FAUNTROY, Mr. MANTON, Mr. BROWN of California, Mr. BATEMAN, Mr. HALL of Ohio, Mr. ORTIZ, Mr. WAXMAN, Mr. DE LUGO, Mr. BUSTAMANTE, Mr. LEHMAN of Florida, Mr. LAGOMARSINO, Mr. PARRIS, Mr. HYDE, Mr. BLAZ, Mr. PANETTA, Mr. RICHARDSON, Mr. LEVINE of California, Mr. FISH, Mr. MATSUI, Mr. STOKES, Mr. PALLONE, Mr. FEIGHAN, Mr. CONTE, Mr. GALLEGLY, Mr. RANGEL, Mrs. UNSOELD, Mr. NCNULTY, and Mrs. MORELLA):

H.J. Res. 626. Joint resolution designating June 3, 1991, as "Democracy Day"; to the Committee on Post Office and Civil Service.

By Mr. MINETA (for himself, Mr. ANDERSON, Mr. HAMMERSCHMIDT, and Mr. SHUSTER):

H.J. Res. 627. Joint resolution designating Labor Day weekend, September 1 through September 3, 1990, as "National Drive for Life Weekend"; to the Committee on Post Office and Civil Service.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 41: Mr. SLATTERY, Mr. MCMILLEN of Maryland, and Mr. LEVIN of Michigan.

H.R. 446: Mr. SMITH of Iowa, Mr. HUBBARD, Mr. VOLKMER, Mr. WOLPE, Mr. LEACH of Iowa, and Mr. ROHRABACHER.

H.R. 733: Mr. BURTON of Indiana, Mr. EMERSON, Mr. GORDON, Mr. HUBBARD, Mr. JENKINS, Mrs. JOHNSON of Connecticut, Ms. KAPTUR, Mr. LANCASTER, Mr. MCMILLEN of Maryland, Mr. MADIGAN, Mr. PANETTA, Mr. PAYNE of Virginia, Mr. SCHUETTE, Mr. SKEEN, Mr. SLATTERY, Mr. VALENTINE, and Mr. WHITTAKER.

H.R. 1804: Mr. BILIRAKIS.

H.R. 2188: Mr. DEWINE, Mr. DURBIN, and Mr. SERRANO.

H.R. 2437: Mr. HAMILTON and Mr. QUILLEN.

H.R. 2460: Mr. DWYER of New Jersey, Ms. KAPTUR, and Mr. CHAPMAN.

H.R. 2816: Mr. OBERSTAR.

H.R. 2853: Mr. DARDEN, Mr. GUARINI, and Mr. TORRES.

H.R. 3050: Mr. SIKORSKI.

H.R. 3129: Mr. QUILLEN, Mr. RITTER, Mr. SABO, Mr. DENNY SMITH, Mr. TAYLOR, Mr. VOLKMER, Mr. WHEAT, Mr. WISE, Mr. BILIRAKIS, Mr. CALLAHAN, Mr. COLEMAN of Missouri, Mr. CLAY, Mr. CLINGER, Mr. ENGLISH, Mr. FUSTER, Mr. GORDON, Mr. GRANT, Mr. HERGER, Mr. JACOBS, Mr. LAGOMARSINO, Mr. LEWIS of Florida, Mr. MCCLOSKEY, Mr. MCEWEN, Mr. MCNULTY, Mr. MILLER of Ohio, Mr. MURTHA, and Mr. PASHAYAN.

H.R. 3212: Mr. JOHNSTON of Florida.

H.R. 3252: Mr. GORDON, Mrs. SAIKI, Mrs. BOXER, Ms. PELOSI, and Mrs. KENNELLY.

H.R. 3643: Mr. OWENS of Utah.

H.R. 3799: Mr. OWENS of Utah.

H.R. 3831: Mr. MCNULTY and Mrs. KENNELLY.

H.R. 3930: Mr. MANTON.

H.R. 3978: Mr. WISE, Mr. WEISS, and Mr. VENTO.

H.R. 3998: Mr. FISH.

H.R. 4026: Ms. SCHNEIDER.

H.R. 4121: Mr. SAXTON.

H.R. 4223: Mr. BARNARD and Mr. SLAUGHTER of Virginia.

H.R. 4224: Mr. BARNARD, Mr. BEILENSON, Mr. CAMPBELL of Colorado, Ms. MOLINARI, Mr. PAYNE of New Jersey, Mr. RAHALL, and Mr. ROYBALL.

H.R. 4274: Mr. CAMPBELL of Colorado.

H.R. 4389: Mr. GUARINI, Mrs. JOHNSON of Connecticut, and Mr. KOSTMAYER.

H.R. 4518: Mr. MILLER of California.

H.R. 4670: Mrs. BOXER.

H.R. 4690: Mr. LAGOMARSINO, Mr. QUILLEN, Mr. SYNAR, and Mr. GILLMOR.

H.R. 4714: Mr. WALGREN, Mr. HUGHES, and Mr. MARTINEZ.

H.R. 4755: Mr. EDWARDS of California.

H.R. 4772: Mr. LAGOMARSINO, Mr. STENHOLM, Mr. RAVENEL, Mr. RINALDO, and Mr. JOHNSTON of Florida.

H.R. 4824: Mr. OWENS of Utah.

H.R. 4840: Mr. SOLARZ, Mr. RAVENEL, Mr. SOLOMON, Mr. POSHARD, and Mr. CHAPMAN.

H.R. 4930: Mr. CRAIG, and Mr. SHUMWAY.

H.R. 4958: Ms. KAPTUR, Mr. GEJDENSON, and Mr. EMERSON.

H. Res. 414: Mr. SMITH of New Jersey and Mr. QUILLEN.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3950

By Mr. BOEHLERT:

—In section 201(e)(4)(C)(i) of the Agricultural Act of 1949, as added by section 402 of the bill, strike "7 billion" and insert "6 billion".

—Strike section 403 and insert the following:

SEC. 403. MILK MANUFACTURING MARGIN ADJUSTMENT.

No State may use a greater allowance than that provided for in Federal programs to establish a Grade A price for milk for manufacturing butter, nonfat dry milk, or cheese.

By Mr. KOSTMAYER:

—At the end of title XVI, insert the following new section:

SEC. 1618. AGRICULTURAL RESOURCE CONSERVATION DEMONSTRATION PROGRAM.

(a) DEFINITIONS.—As used in this section:

(1) ELIGIBLE LOAN.—The term "eligible loan" means loans with terms of not less than 10 years made by lending institutions to State trust funds to further the purposes of this section. No principal payments shall be due on such loans for the first 10 years after each is made and the principal amount shall be paid by the State trust fund at the end of the tenth year. For each such eligible loan, each State trust fund shall be entitled to receive an interest rate subsidy from the Secretary as provided in subsection (b)(2).

(2) ELIGIBLE STATE.—The term "eligible State" means any State which, on or before August 1, 1991—

(A) operates or administers a land preservation fund which invests funds in the protection or preservation of farmland for agricultural purposes; and

(B) works in coordination with the governing bodies of counties, towns, townships, villages, or other units of general government below the State level, or with private nonprofit or public organizations, to assist in the preservation of farmland for agricultural purposes.

(3) LENDING INSTITUTION.—The term "lending institution" means any Federal or State chartered bank, savings association, cooperative lending agency, or other legally organized lending agency.

(4) PROGRAM.—The term "program" means the farmland preservation program established under this section.

(5) SECRETARY.—The term "Secretary" means the Secretary of Agriculture.

(6) STATE.—The term "State" means any State of the United States, the Commonwealth of Puerto Rico, and the Virgin Islands of the United States.

(7) STATE TRUST FUND.—The term "State trust fund" means a trust fund or an account established by an eligible State, approved by the Secretary to participate in the program, in which Federal funds received under this section are deposited for use by such trust fund.

(8) ALLOWABLE INTEREST RATE.—The term "allowable interest rate" refers to an interest rate which shall be the current average rate of interest which each State pays on 10-year notes or other similar obligations of the State, or a comparable interest rate as determined by the Secretary.

(b) ESTABLISHMENT OF PROGRAM BY THE SECRETARY.—

(1) IN GENERAL.—The Secretary shall establish and administer a program, which shall be known as the "Agricultural Resource Conservation Demonstration Program", to provide Federal guarantees and interest rate assistance for loans made by lending institutions to State trust funds. Under the program, the Secretary shall guarantee the timely payment of the principal amount and interest due on eligible loans made by lending institutions to State trust funds and shall subsidize the interest on such loans at the allowable interest rate for the first 5 years in accordance with regulations set forth under paragraph (2). Each State trust fund shall pay the rate of interest, and the principal at the end of the tenth year, as set forth in the loan agreement regarding each eligible loan.

(2) MANDATORY ASSISTANCE TO EACH STATE TRUST FUND.—The Secretary shall—

(A) fully insure or guarantee each eligible loan made by lending institutions to each State trust fund under regulations issued by the Secretary; and

(B) subject to the availability of funds for such purpose, annually pay to each State trust fund an amount calculated by applying the allowable interest rate to the amount of each loan the State trust fund receives, as determined under regulations issued by the Secretary, during each of the first 5 years after each such loan is made.

(3) REGULATIONS.—The Secretary shall issue proposed and final regulations, under the prior public comment provisions of section 553 of title 5, United States Code, setting forth—

(A) the application procedures for eligible States;

(B) the factors to be used in approving applications;

(C) procedures for the prompt payment of the obligations of the Secretary under paragraph (2);

(D) recordkeeping requirements for approved State trust funds;

(E) requirements to prevent program abuse and procedures to recover improperly obtained funds;

(F) rules permitting State trust funds to act as revolving funds or to otherwise accumulate additional capital, based on investments, to be subsequently used to promote the purposes of this section; and

(G) any other rules necessary and appropriate to carry out this program.

(d) APPLICATIONS.—In applying for assistance under this section an eligible State shall—

(1) prepare and submit, to the Secretary, an application at such time, in such manner, and containing such information as the Secretary shall require;

(2) agree that the State trust fund will use any funds provided by the Secretary under this section in a manner which is consistent with this section and the regulations issued by the Secretary; and

(3) agree to comply with any other requirements set forth in agreements with the Secretary or as the Secretary may prescribe by regulation.

(e) ADMINISTRATION.—

(1) ANNUAL APPLICATIONS.—Eligible States may apply for Federal assistance under this section on an annual basis.

(2) MATCH AND MAXIMUM AMOUNT.—The total amount of any guarantees provided by the Secretary under this program shall not exceed an amount that is equal to double the amount that each eligible State makes available for acquiring interests in land to protect and preserve important farmlands for future agricultural use but in no event

shall the total Federal share exceed $10,000,000 in any fiscal year for any State.

(f) REPORT.—Not later than September 30, 1992, and annually thereafter, the Secretary of Agriculture shall prepare and submit to the Committee on Agriculture of the House of Representatives and the Committee on Argiculture, Nutrition, and Forestry of the Senate a report concerning the operation of the program created under this section.

(g) DURATION OF PROGRAM.—The program established under this section shall expire on September 30, 1996, except that any financial obligations of the Secretary entered into under this section on or before such date shall continue to be met as required by this section.

(h) IMPLEMENTATION AND EFFECTIVE DATE.—The Secretary shall issue final regulations to implement this section within 160 days after enactment of this section. This section shall take effect on October 1, 1990.

By Mr. LIGHTFOOT:

—Page 829, line 2, strike the closing quotation marks and period; and after line 2, insert the following:

"(i) BID-BACK PROGRAM.—

"(1) ESTABLISHMENT.—The Secretary may establish and implement a bid-back program to remove the least highly erodible cropland from the conservation reserve established under this subtitle if the net result of such bid-back program is at least the same total level of erosion reduction of lands currently enrolled in the program at a cost to the Federal Government that is equal to or less than the cost to the Federal Government of maintaining such land in the reserve.

"(2) LIMITATION.—The program established under paragraph (1) shall be effective in only those counties that have 20 percent or more of their cropland enrolled in the conservation reserve under this subtitle.

"(3) APPLICATION PERIOD.—During the 60-day period beginning on the date which is 6 months after the date of enactment of this subsection, the Secretary shall accept applications to enroll highly erodible lands in or remove lands from the conservation reserve. After the 60-day period, the Secretary shall determine, on a county-by-county basis, which lands to enroll and which lands to remove from the conservation reserve in order to achieve the purposes of paragraph (1).

"(4) NOTICE.—Before the 60-day period referred to in paragraph (3), the Secretary shall notify, by general public notice, farmers and ranchers who have highly erodible land of the bid-back program established under this subsection.".

By Mr. MILLER of California:

—At the end of Part I of Subtitle I of Title XIII, add the following new section 1371A:

SEC. 1330. COMMUNITY RIGHT TO KNOW ACT.

(a) REQUIREMENTS.—(1) Any person using pesticides for agricultural production, including postharvest treatment of agricultural products, or other commercial purposes shall maintain records of each pesticide application. Such records shall include at least the product name, amount and rate of application, method of application, target pest, crop or site treated, date and approximate time of application, and location of application of each pesticide used for at least a 2-year period after such use.

(2) A commercial applicator shall provide a copy of records maintained under subsection (a)(1) to the person for whom the pesticide application was provided within 15 days of the application.

(b) ACCESS.—Information maintained under subsections (a) and (f) shall be made available to any Federal, State, or local agencies that deal with pesticide use or any health or environmental issues related to the use of pesticides, on the request of such agencies. Information maintained under this section by any government agency shall be subject to public disclosure under section 552 of title 5, United States Code.

(c) HEALTH CARE PERSONNEL.—When a health professional determines that pesticide information maintained under this section is necessary to provide medical treatment or first aid to an individual who may have been exposed to such pesticides, upon request persons covered by this section shall immediately provide record and label information to that health professional.

(d) PENALTY.—The Secretary of Agriculture and the Administrator of the Environmental Protection Agency shall be responsible for the enforcement of subsections (a), (b), and (c). Violation of these subsections shall be subject to a penalty not to exceed $500.

(e) FEDERAL OR STATE PROVISIONS.—The requirements of this section shall not affect provisions of other Federal or State laws.

(f) SURVEYS AND REPORTS.—The Secretary of Agriculture and the Administrator of the Environmental Protection Agency, shall survey the records maintained under this section to develop and maintain a data base that is sufficient to enable the Secretary and the Administrator to publish annual comprehensive reports concerning agricultural and nonagricultural pesticide use. Such reports shall be filed April 1 of each year.

(g) REGULATIONS.—The Secretary of Agriculture and the Administrator of the Environmental Protection Agency shall promulgate regulations implementing this section within 180 days after enactment of this provision.

(h) SHORT TITLE.—This section may be cited as the "Community Right to Know Act of 1990".

By Mr. SMITH of Iowa:

—Page 824, after line 18, insert the following:

"(4) Section 1232 (a)(6) of the Act is further amended by inserting before 'agrees with the Secretary' the phrase 'is the United States, a State or local government or an agency of the United States, a State or local government, or'."

By Mr. RAVENEL:

—Page 273, after line 10, insert the following new section:

SEC. 1105A. AMENDMENTS TO THE DISASTER ASSISTANCE ACT OF 1989.

(a) DOUBLE CROPPING OF NONPROGRAM CROPS GROWN IN A PRESIDENTIAL DISASTER AREA.—Section 104(a) of the Disaster Assistance Act of 1989 (Public Law 101-82; 103 Stat. 570) is amended by adding at the end the following new paragraph:

"(5) DOUBLE CROPPING.—

"(A) TREATED SEPARATELY.—In the case of a 1989 nonprogram crop that is historically double cropped by the producers on a farm, the Secretary shall treat each cropping separately for purposes of determining under paragraph (1)—

"(i) whether the crop was affected by damaging weather or related conditions in 1989; and

"(ii) the total quantity of the crop that the producers are able to harvest.

"(B) APPLICATION OF PARAGRAPH.—This paragraph shall—

"(i) apply only in the case of a 1989 nonprogram crop that is grown in a county declared to be a Presidential disaster area for that crop; and

"(ii) not apply in the case of a replacement crop described in section 110.".

(b) EXCLUSIONS FROM HARVESTED QUANTITIES.—Section 104(a)(4) of that Act is amended by adding at the end the following new sentence:

"For a 1989 nonprogram crop that is grown in a county declared to be a Presidential disaster area for that crop, the exclusion required by the preceding sentence shall be 100 percent.".

(c) APPLICATION OF AMENDMENTS.—Section 152(a) of that Act is amended by adding at the end the following new paragraph:

"(3) EXTENDED APPLICATION PERIOD.—In the case of producers of a nonprogram crop affected by the amendments made to section 104(a) of subtitle A by section 1105A of the Food and Agricultural Resources Act of 1990, the Secretary shall—

"(A) allow such producers to submit applications for payments under section 104 until December 31, 1990; and

"(B) in the case of applications submitted by such producers before the date of the enactment of that Act, recompute (not later than 90 days after such date) the payment to such producers under section 104 in light of those amendments.".

By Mr. ROTH:

—At the end of title XVIII, insert the following:

Subtitle E—Animal Protection

SEC. 1861. SANCTIONS.

(a) The last sentence of section 16(c) of the Animal Welfare Act (7 U.S.C. 2164) is amended by inserting immediately after "Act" where it first appears the following: "and the regulations and standards promulgated thereunder".

(b) The Animal Welfare Act (7 U.S.C. 2131 et seq.) is amended by adding at the end the following new section:

"SEC. 28. Whenever the secretary has reason to believe that any dealer, carrier, exhibitor, or intermediate handler is dealing in stolen animals, or is placing the health of any animal in serious danger in violation of this Act or the regulations or standards promulgated thereunder, the Secretary shall notify the Attorney General, who may apply to the United States district court in which such dealer, carrier, exhibitor, or intermediate handler resides or conducts business for a temporary restraining order or injunction to prevent any such person from operating in violation of the Act or the regulations and standards. The court shall, upon a proper showing, issue a temporary restraining order or injunction without bond. Such injunction or order shall remain in effect until a complaint pursuant to section 19 is issued and dismissed by the Secretary or until an order to cease and desist made thereon by the Secretary has become final and effective or is set aside on appellate review. Attorneys of the United States Department of Agriculture may, with the approval of the Attorney General, appear in the United States district court representing the Secretary in any action brought under this section.".

EXTENSIONS OF REMARKS

TRIBUTE TO THE U.S. COAST GUARD BICENTENNIAL CELEBRATION

HON. C. THOMAS McMILLEN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. McMILLEN of Maryland. Mr. Speaker, I rise today to pay tribute to the U.S. Coast Guard bicentennial celebration. The State of Maryland, the city of Baltimore and the friends of the Baltimore Maritime Museum are hosting this celebration, providing the citizens of Maryland with an opportunity to appreciate the dedicated work of the Coast Guard. On hand will be the cutter *Taney,* the only remaining warship afloat from Pearl Harbor, the Coast Guard tall ship *Eagle,* and a flotilla or ardent supporters.

Indeed the people of Maryland understand full well the role that the Coast Guard plays in their lives, protecting fisheries, ports and waterways, fighting pollution, instructing the people in boating safety, deploying in search and rescue missions, and in drug interdiction. In 1790 the U.S. Congress authorized the beginning of this invaluable organization with the Revenue Cutter Service. Today, the Coast Guard is a multifaceted service which epitomizes its 200 year motto, "Semper Paratus." "Always Ready."

I urge my colleagues to stand with me and recognize the brilliant achievements of the women and men in the Coast Guard who are involved daily in law enforcement, military readiness and maritime safety activities. Congratulations to native Marylander, Adm. J. William Kime, who assumed command in May, and the whole of the Coast Guard on their bicentennial celebration.

A TRIBUTE TO MR. HARRY FORDEN

HON. CHARLES ROSE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. ROSE. Mr. Speaker, I rise to pay tribute to Mr. Harry Forden, Sr., a civic leader and humanitarian who has touched the lives of many individuals in Wilmington, NC. General Electric recently honored Harry with its Phillippe Award, an honor that is bestowed to General Electric employees who have been instrumental in heading projects that aid the handicapped, elderly or disadvantaged communities. A recent edition of a General Electric newsletter, the Fuels & Flight News, highlights the work and life of Harry. I would like to submit this article, which is entitled "NF&CM's Harry Forden receives GE's Phillippe Award," to the RECORD:

NF&CM'S HARRY FORDEN RECEIVES GE'S PHILLIPPE AWARD

The Phillippe Award is a fitting memorial to the late Gerald L. Phillippe, former Chairman of the Board of General Electric. Phillippe encouraged voluntarism in meeting problems of our society and personally exemplified its importance and effectiveness.

The Phillippe Award began in 1970 and has since become a coveted honor bestowed to GE employees who have been instrumental in heading projects that aide the disadvantaged, handicapped, elderly, and minorities—to name a few.

One such recipient is our own Harry Forden. Harry is currently a Material Operator and has been employed with GE for 20 years. Harry was nominated for the Phillippe by several coworkers for his 25 years of work in the Wilmington community.

Harry, just three years ago, led the development of an organization called 'Citizens for Progress'. It is now an integral part of the Wilmington community—feeding senior citizens and the less fortunate of our area. The program is in conjunction with Harry's church, St. Phillips AME, located in downtown Wilmington. Harry has held many positions and presently is a Sunday School teacher with the church. As part of receiving the Phillippe, Harry was able to designate $1000 to qualifying charitable organizations of his choice.

Harry's civic accomplishments include serving for 25 years as the Democratic Party's precinct chairman (Ward 1). During his tenure, he was instrumental in registering scores of voters and making sure they got to the polls.

Harry was once very much like the people he is dedicated to serving. Said Harry, "I was born in poverty and my parents couldn't afford to give me the things they would have liked. So I've worked all my life. I started work at age 8, in a local corner grocery store. I was basically raised by a German couple who owned the store. While working there, and for many years thereafter, I couldn't help but notice all the less-fortunate people who live in our area. Just seeing all the need, I got involved whenever and wherever I could." Concluded Harry, "Knowing I might have helped in some small way makes me feel good."

Harry has two children, a son (Harry, Jr.) who runs a dry goods store in downtown Wilmington and a daughter (Wanda) who works with a computer business in New York City. He has three grandchildren.

CONGRATULATION TO JESSICA PATI RANDALL

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Ms. SCHNEIDER. Mr. Speaker, today, I rise to congratulate Jessica Pati Randall of Harrisville, RI, as my State's winner of the Veterans of Foreign Wars "Voice of Democracy" Scholarship Program.

The Voice of America Scholarship Program has been growing steadily since it began 43 years ago. This past year, more than 137,000 students in over 8,000 schools participated.

The VOA has long served as a beacon of hope for those who have been oppressed. Communication and an awareness of the liberty others enjoy were critical in the Eastern European revolutions of 1989. It has truly been an amazing year for the world and for this country.

As Jessica's representative in Congress, it is my distinct honor to include her speech, entitled "Why I Am Proud of America," in today's proceedings of the U.S. House of Representatives:

WHY I AM PROUD OF AMERICA

(By Jessica Randall, Rhode Island winner, 1989/90 VFW Voice of Democracy Scholarship Program)

Why am I proud of America? I'm proud of its cultural diversity and tolerance of differences. Wherever one goes from town to town, each place has its own identity, yet each is also very "American". From the largest, booming cities to the smallest, slowest towns, every community and region is different.

For instance, the city of Goldville, California is a thriving, new community with condominiums and Corvettes, and the people, for the most part, are rich. The warm, beautiful climate makes this city a wonderful vacation area. In contrast, the town of Villevielle, Louisiana is an old, traditional Cajun town with dusty roads and wet marshes, and the families have been situated there for several generations. An easy going atmosphere is evident in the way people act. Although these are two very different communities in two very different regions, both are American. Although daily customs are bound to be different for the inhabitants of each place, the people of these two communities all will identify themselves as Americans.

Why is every region different? Because the original settlers of each region came from different parts of the world, and, in many cases, their traditions have lived on. Recently, however, smaller regions have changed culturally due to many people who have immigrated here from foreign countries. All the new customs, habits, traditions and perspectives are mixed together in what is often called the "melting pot" or, America.

Sometimes the mix blends favorably, and cultural tolerance is immediate. Sometimes the mix clashes and separates, leaving a bad taste in everyone's mouth. But we all keep trying to sweeten the ingredients, and eventually the mixture will blend.

This mixture is the embodiment of the famous quotation associated with the Statue of Liberty which reads ". . . Give me your poor, your tired, your huddled masses, yearning to breath free . . . " According to

these words, America welcomes those people who wish to come live their lives here. Most people from foreign countries live very differently from the "American way". Even though they live in this country, many retain their traditional identities and each helps to cut another facet in the gem that we call American Culture.

I know that the pride I feel for my country comes from the freedom of ethnic expression and individuality we Americans have. I may, if I wish, sit next to someone wearing the traditional costume of his or her homeland on the bus. I may stop and talk to my neighbor, even if she happens to talk to her family in a language I don't know.

Here in America one finds a diversity in nationalities, whether they be from immigration or generation. Mexicans, Indians, American Indians, Italians, Irish and French are just a few of the many nationalities that come to mind. This self-identification is still another form of cultural distinction that a majority of Americans use today, as well as being proud to call themselves Americans.

This freedom to practice one's traditional values and cultural individuality is a wonderful privilege given to us as Americans. That's what America is all about. That's why I'm proud to be an American, and that's why I'm proud of America.

THE STUDENT LOAN DEFAULT SCANDAL WILL NOT FIX ITSELF—WE NEED ACTION

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mrs. ROUKEMA. Mr. Speaker, the special interests are at it again. They want you to believe that action is not necessary this year on student loan defaults. Others will say that the Roukema amendment to H.R. 5115, the Excellence in Education Act, is designed to eliminate career schools from the Federal student aid programs. That is ridiculous. These same people voted in 1988 to accept the default measures contained in my amendment.

I will be the first one to tell you that most career schools are reputable and do a good job of training students for needed occupations. The good trade schools have no basic objection to my amendment. They say it will help get rid of the bad apples that tarnish the image of career schools.

Ask yourself this question: Why would anyone not want to get rid of the schools that are abusing the Student Loan Program and costing the Treasury and taxpayers billions of dollars every year?

The plain trust is that if Congress does not take swift action to bring down the rate of student loan defaults, public and congressional support for the program may evaporate. Before voting on the Roukema amendment, every Member ought to read the committee report on the labor, HHS, education appropriations bill. In the section of the report dealing with student loans, the committee clearly states that neither students nor taxpayers are well served by the current system of student aid. The Appropriations Committee says that the authorizing committee should be working on proposals to restore integrity and efficiency to the Federal aid programs. My amendment contains those proposals.

In addition, the Appropriations Committee says that the critical problem of student loan defaults unduly burdens the Treasury and undermines basic support for Federal student aid programs and orders the Department of Education to report to Congress twice-yearly on student loan defaults.

The Department of Education estimates that the total amount of outstanding student loan defaults will reach $7.8 billion in 1990. The estimate for 1991 is $8.7 billion. We need to pass the Roukema amendment this year to restore integrity to student loans and cut out another source of waste in Government spending. Vote "yes" for fiscal responsibility. Vote "yes" on the Roukema amendment.

COMMENDING MYRA CASHION FOR HER PERFECT ATTENDANCE RECORD

HON. W.G. (BILL) HEFNER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. HEFNER. Mr. Speaker, I recently came before the House to congratulate and commend two young men from my district who graduated from high school this year with perfect attendance records.

It has just come to my attention that there is another young citizen of my district who has also made that remarkable achievement, and I am very proud to come before the House today to recognize her.

Myra Cashion of Woodleaf graduated in June from West Rowan High School having not missed a single day of school in 13 years. The drive and determination Myra demonstrated in the classroom also extended to a host of school activities, including the Octagon and Monogram Clubs, the Future Homemakers of America, and team sports such as basketball and softball.

I am very proud of young people like Myra who recognize the value and importance of education and who truly commit themselves to learning.

I want to share with my colleagues an article about Myra that appeared in her local newspaper the Salisbury Post. I know I speak for all of us when I congratulate this fine young woman for her achievement and wish her well as she continues her education:

WEST STUDENT ENDS 13 PERFECT YEARS

Myra Cashion knows for sure why she's never missed a day in 13 years of school. Her mother, Peggy, is a bus driver.

"She took me," Myra laughs.

Miss Cashion will graduate today from West Rowan High School with perfect attendance. Today is also her 18th birthday.

She never missed a day of school at Woodleaf Elementary, West Rowan Junior High or West High.

That meant going to school sick once in a while, but being in school every day paid off, Miss Cashion says.

"It helped this year because I got to exempt exams," she says.

Miss Cashion lives with her mother and father, Houston, on Cool Springs Road in Woodleaf.

She plans to study business and computer programming at Mitchell Community College in Statesville.

Miss Cashion played on the basketball and softball teams in high school. She was a member of the Octagon and Monogram clubs and the Future Homemakers of America. She played tennis and softball in junior high. She was selected the most valuable softball player.

She is one of three students reported to achieve perfect attendance for 13 years. Jonathan Partee of Salisbury High and Stephen Sloan of South Rowan were featured in The Post in May.

WHAT THE JOB CORPS MEANS TO ME

HON. LAMAR S. SMITH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. SMITH of Texas. Mr. Speaker, at this time I would like to insert a memo for the RECORD. Eighteen-year old Kenneth Having, a resident of San Antonio, TX, was recently announced as the first-place winner of a national essay writing contest on the theme "What Job Corps Means to Me." Mr. Having was a high school drop-out until Job Corps turned his life around. He has recently been accepted as a full-time student at San Antonio Community College, where he will start in the fall.

This is a copy of his essay:

WHAT JOB CORPS MEANS TO ME

It was extremely cold that night in October. The same night that drop-out kid with no home and almost no hope for a future decided that something must be done with his life. He had been without money or food for days and with no home for months. The teen shelters, church organizations, and Salvation Army already had more than the maximum amount of occupants. With no hope of support or help from his family, what was this scared adolescent to do? He had disappointed his family. His own brother was ashamed of him. The situation seemed hopeless. It was back to the bus bench on a busy street corner for a night's sleep, if the passerby would not awaken or torment him which happened routinely.

The next morning, the boy tried feverishly, everything he could think of to get help. Through the Texas Employment Commission, he learned of the Job Corps. This was a chance for a new beginning. The boy's spirits were raised and for the first time in years, he felt good about himself. The next step was to talk to his family. When his mother found that he had actually tried to do something legal, logical, and good for his life, she was so proud of her son that she cried. His brother once again looked up to him.

The boy went to the Job Corps and received a vocational skill, diploma, studies in a foreign language, music classes, and more! Most of all, however, he learned to respect himself and others. Soon, this was not enough. He joined clubs, extra classes, the school newspaper, and had high hopes and plans for a college education. This kid had friends, too; real friends. The kind of friends a mother would approve of. No longer did

he run with the bad crowd. You are known by the company you keep, and it was time this young man be known as a hard working, honest, contributive human being. He even made friends with teachers, instructors, and others who had authority over him, which was extremely odd considering someone who had always despised authority and would never listen to anything others would ask of him.

The young man established discipline for himself, too. He learned that appointments were to be met, dates were to be kept, and work was to be done. If he wanted to make things happen, he would need to have discipline for himself. If he wanted his life to change, then he, too, would have to change. This was indeed the time to grow up. There would now be many opportunities and more open doors for this young adult who now wanted so much to be successful in life and to be the best he could possibly be in anything that he did.

This young man finally became what I am today. I am proud of myself. Words cannot express the way I feel every morning when I see my face in that mirror. I feel totally different and physically, I look different. I have a haircut, clean shave, nice-looking clothes, and I am no longer as thin as I was before. Now, I can give someone a good first impression; the same impression I have of myself. I am no longer the person I was before and have absolutely no desire to become that person again.

Admittedly, I must say it is very hard work, but nothing in this world is free. You must come to a turning point in your life when you grow up. To me, Job Corps is the best place to do this. Without the help of the Job Corps I cannot tell exactly where I would be right now. My best guess would be jail, dead, or still living on the streets. Thanks to the Job Corps, that night in October will never exist for me again. The bench will never again be what I call my bed. The Job Corps has taught me to let my best come out and to strive for my goals; to make a new, better life and a good living. It is truly a way out and a way up.

TIME TO EXPLORE NEW LAB MISSIONS

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. EDWARDS of California. Mr. Speaker, our colleague PETE STARK, has initiated legislation that calls for a feasibility study of a peacetime conversion at the Lawrence Livermore Laboratory. According to a Valley Times July 15 editorial, "There is no need for these valuable reservoirs of scientific knowledge and resources to be devoted so fully to national defense."

Changes in the world are taking place that should facilitate the movement toward a peace-oriented economy. Clearly, it is time to bring our research facilities up to date, and see that our research efforts reflect the decreasing need for military buildups. As the Valley Times editorial points out, the Stark bill would help out in this needed process of conversion by providing a valuable model for how we can "apply our scientific resources to the Nation's most pressing needs."

I commend the Valley Times editorial to the attention of my colleagues, and encourage their consideration of the far-sighted proposal offered by the gentleman from California.

The editorial follows:

TIME TO EXPLORE NEW LAB MISSIONS

Rep. Pete Stark's bill to study "new missions" for Lawrence Livermore Laboratory is a positive step that should help ensure the laboratory a place of prominence among national research facilities well into the 21st century.

Stark's proposed legislation would create a 15-member panel of scientists to examine and priortize the nation's most pressing non-military scientific challenges.

They would report their findings to the president and Congress by Jan. 1, 1992.

Although Stark's bill specifies only Lawrence Livermore Lab, the panel's laundry list of national research needs could easily be applied to other labs and facilities whose major emphasis is currently defense-related work.

With the rapid and far-reaching changes in the Soviet Union and Eastern Europe, there is no reason for these valuable reservoirs of scientific knowledge and resources to be devoted so fully to national defense.

We can understand if lab officials react with skepticism to Stark's measure. The Livermore Democrat has never been viewed as a friend of the lab, a reputation he has earned through his opposition of numerous defense programs undertaken by lab personnel.

He astounded and angered many Valley residents last year when he suggested that the lab be closed for safety and economic reasons.

With this proposal, however, Stark is initiating a positive and responsible move that will benefit the lab and its employees by preparing for the brave new world we are entering.

Rather than simply reacting to budgetary changes that Congress is certain to mandate in the next few years, Stark's panel will allow leaders in Washington and Livermore to seize the opportunity to apply our scientific resources to the nation's most pressing needs.

It is important to understand that Stark's measure was not conceived in a vaccuum. Secretary of Energy James Watkins appointed a blue-ribbon panel in April that will advise him on the future mission of the nation's laboratories. He said that panel's job is to "sustain the department's national laboratory complex as an intellectual resource."

Stark's commission would simply focus on the specific circumstances in Livermore.

Criticism that this bill is a recycled version of Alameda County's Measure A, a nuclear-free zone initiative that was soundly defeated by the voters in June, completely misses the mark.

The Times opposed that ballot measure because of its severe economic impact on the county and its presumptuous and dangerous contention that a group of Alameda County residents was qualified to establish national defense policies.

Stark's bill would empower 15 eminent scientists to recommend program changes at Lawrence Livermore lab.

Although his proposal says that the panel must include suggestions for converting the lab from military to civilian purposes, the important decisions on implementation of these suggestions will be made by other government officials.

Defense-related research, including nuclear weapons work, now comprises approximately 75 percent of the lab's programs. Although some of this work will continue to be necessary for many years to come, it is just as certain that Congress is going to shift large amounts of money into energy, medical and environmental research.

Diversification on a greater scale than currently exists at Livermore will be essential.

Stark's bill should not be seen as a threat to the lab, its employees or the Valley. Instead, it represents an opportunity to enhance the worth of one of the nation's most valuable research facilities.

SUSPEND ALL AMERICAN AID TO KENYA FOR HUMAN RIGHTS VIOLATIONS—STATEMENT OF RANDALL ROBINSON OF TRANSAFRICA

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. LANTOS. Mr. Speaker, the wave of democracy that has swept from Warsaw, Prague, and Budapest to Beijing, is moving inexorably across the African continent. This tide of popular sentiment for free market economies, fair multiparty elections and individual liberties cannot be held back, despite the best efforts of the region's dictators.

We welcomed Nelson Mandella to the Congress as a genuine hero, a man of integrity and candor. We look forward to the inevitable liberation of the black South African majority from the bondage of apartheid. The South African experience shows us that withholding economic aid sends a clear and powerful message that the United States will not tolerate the denial of internationally recognized human rights.

We are now faced with another nation laboring under the yoke of political repression. Kenya, is sinking into the morass of single party rule, police-state disregard for individual liberties and economic stagnation under President Daniel T. arap Moi. The people of Kenya yearn for freedom and the United States Government must respond.

Today, the distinguished Senator from Massachusetts [TED KENNEDY] and I are introducing legislation to suspend United States Government aid to Kenya until human rights and democracy are restored. TransAfrica has also called for suspension of United States aid.

Mr. Speaker, I would like to enter the statement of Randall Robinson, executive director of TransAfrica, and TransAfrica's letter to President Bush regarding Kenya into the CONGRESSIONAL RECORD. I encourage my colleagues to study this reasonable agenda for change in Kenya and to support the fight for democracy throughout the world.

STATEMENT OF RANDALL ROBINSON, EXECUTIVE DIRECTOR, TRANSAFRICA, JULY 19, 1990

For many years, TransAfrica and other national black organizations have beseeched the Congress and the Administration to impose sanctions against South Africa.

As we undertook that effort, we always believed that human rights observance must be measured by a single yardstick. African American organizations believe that repression is repugnant and intolerable notwithstanding the race of the regressors or those repressed.

Hence we call upon the Administration and Congress now to suspend all American aid to the government of Kenya until:

(1) All political prisoners have been released;

(2) The operation of a free press is permitted;

(3) The exercise of individual rights and freedoms are guaranteed;

(4) multiparty democracy is allowed;

(5) The Preservation of Public Security Act (allowing indefinite detention) is repealed.

You have before you the letter we have sent to the President to this effect:

TRANSAFRICA,
Washington, DC, July 18, 1990

President GEORGE BUSH,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: We are writing to you to express our grave concern about the deteriorating situation in Kenya. As you know, Kenya, a country with a long history of friendship with the United States, has been traumatized by the arrests of key members of its young pro-democracy movement. Subsequent protests have led to at least 28 deaths (an unofficial tally puts it at 63) with scores injured. From all indications, President Moi is determined to crush the movement by any means possible—including the unrestrained use of force. We cannot stand by while these human rights abuses continue.

As African-American leaders, we strongly support the people of Kenya in their quest for justice and a pluralist democracy with freedom of association and expression. They are looking to the United States for moral support through example, and we urge you to provide it.

We are aware of the steps already taken by your administration. We, however, believe that more should be done urgently. Specifically, we request that you call on the Moi regime to do the following:

1. Release all political prisoners immediately and unconditionally;

2. Guarantee the security of the proponents for a pluralist democracy;

3. Guarantee the exercise of internationally recognized human rights for all Kenyans;

4. End the harassment of the press; and

5. Move toward multi-party politics.

WHY I AM PROUD OF AMERICA

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. MORRISON of Connecticut. Mr. Speaker, I am proud to submit for the RECORD the text of the winning script, from the VFW Voice of America Broadcast Scriptwriting Contest, entitled "Why I am Proud of America." The Connecticut winner is Ms. Amanda K. McKenna of Woodbridge. Ms. McKenna is a senior at Amity Regional Senior High School, which is in my district. I would like to extend my sincere congratulations to Ms. McKenna for a well-written, thoughful piece and wish her the best in her college career. Mr. Speaker, I would also like to commend VFW for sponsoring this contest, which has been in existence for over 40 years. This year over 137,000 students competed for 12 scholarships:

WHY I AM PROUD OF AMERICA

(By Amanda K. McKenna, Connecticut winner, 1989/90. VFW Voice of Democracy Scholarship Program)

As we ran out of the school driveway I felt the familiar sense of release that cross-country practice always brings. School, teachers, confining skirts were paces behind. We were a team of girls running down the road, talking and laughing, as the crisp fall air smacked our cheeks. There was a shared feeling of contentment, of ambition, of happiness. Stretching our legs until they could extend no further, we were free.

Today, running down the road, I felt the sensation that has been simultaneously haunting and comforting me over the last few months. I am becoming a patriot. The word pauses before it rolls off my tongue. I struggle for a moment, not sure if it is the term I am looking for. It seems so definite, so extreme. Falling in love with one's country is an individual experience. One is not born a patriot. One does not become a patriot subconsciously, as one becomes a chocolate addict or a football fan. Rather, becoming a patriot is a gradual process. For me, pride in my nation is new. What has caused it? It has come partly, from taking a small moment to look around, and recognize the gifts that being an American has given me. And partly it has come from the patriotism I have found in others, particularly my grandfather.

Last spring I wrote a lengthy term paper about the American Prisoners of War in World War II. I chose this subject because my grandfather, while serving as a tail gunner on a B-17 Bomber was taken prisoner by the Germans. As I learned about his thirteen months of captivity, and other prisoners' experiences, I was shocked by the horrors they endured, and amazed by their strength. Poor food, terrible living conditions, and inhumane treatment were all part of the prisoners' daily lives. And these sufferings, though immense, did not include the prisoners' greatest torture; their loss of freedom. It was this that made them prisoners, and this that made prison life so difficult to bear, and this that made them not bitter, but incredibly faithful Americans. My grandfather states (and I quote) ". . . how we take for granted our freedoms of speech, religion, and press. When suddenly these rights are taken from you, you are left at the mercy of the enemy . . ." His words have left an indelible impression on my mind.

As a prisoner my grandfather was denied his most fundamental rights. The Constitution and the Bill of Rights guarantee that we shall never be involuntarily ruled. The violation of freedom is the violation of an individual's control of his or her existence. Our lives are filled with choice. Where to live, what to believe in, who to associate with. Freedom is like the oxygen in the air we breathe. Ingrained in each moment, its existence is forgotten. Taken away for an instant, its significance is immediately clear.

As a prisoner my grandfather never lost hope. Removed from his country physically, he held onto the nation's spirit. America is a land of success, of holding on to the bitter end and achieving victory. In prison camp, determination kept my grandfather alive. In freedom, it must make us push beyond what has been given us, to achieve our fullest potential. The "American dream" may be cliche. But its basic meaning, that through hard work a goal can be achieved, is, and forever shall be, applicable to every American's life. Being born in this country, one is born into the "land of the free, and the home of the brave". And with that first blessing, comes great responsibility to seize opportunities, to find dreams, and to embrace freedom . . . utilizing it to the fullest, making it one's own.

I look at my teammates. Smiling faces, buoyant steps, and steady, long strides. On this beautiful day we are light-hearted and carefree. Our running is regulated by our own legs, our own hearts. The speed, the distance, they are in our control. Similarly we, as Americans, control our destiny. I want to be President of the United States. It is my dream. Hard work, careful thinking and a little bit of luck will be necessary to realize it. But nothing stands in my way. Imagine that. As I run down the road, my mind clicks over what it means to be an American, America's stable government, prosperous economy, and advanced technology, make me comfortable. But it is freedom that makes me proud. Freedom, for all its far-stretching influence, is an individual thing. It lets each of us choose, prosper, and dream. I am proud of my dream. Proud of the nation that someday I want to lead. And proud that nothing, at all, can stop me.

LET THE PAST SPEAK TO THE FUTURE

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. SOLARZ. Mr. Speaker, momentous events are, even as we speak, transforming the face of Europe and fundamentally altering the way in which we think about our military security, about the future of democracy, and about international peace. To take just the latest example, the West German chancellor has recently returned from the Soviet Union, where he secured President Gorbachev's agreement to the inclusion of a united Germany within the North Atlantic Alliance. Not even the most visionary would have dared, a year ago, to predict this extraordinary development, or any of a dozen other dramatic events of the past year.

Surrounded by epic transformation, it is essential that we stop to consider exactly what has changed, and what remains the same. It is necessary to ask ourselves how we and our friends around the world ought to respond to the succession of surprises that history has thrown our way.

I recently had an opportunity to read a speech by Edgar Bronfman, the president of the World Jewish Congress and an individual known far and wide for his understanding of world affairs and his ability to separate the peripheral from the fundamental.

Mr. Bronfman's address, delivered in Berlin 2 months ago on the 45th anniversary of the allied victory over nazism, offered precisely the sort of insightful, reasoned analysis of the underlying meaning of events, and the interconnections between the past and the future,

that the world needs. And so, Mr. Speaker, because I believe that my colleagues would benefit from reading the words of this wise and compassionate man, I ask leave to place Mr. Bronfman's speech into the RECORD.

We are gathered together in Berlin on the anniversary of the defeat of Nazism, a victory for all mankind. We also recognize the defeat of another form of totalitariansim, the Stalinist dictatorship of East Germany. This victory, too, is a victory for all mankind, and we salute the people of East Germany for having broken their own chains.

We are in Berlin, a city of historic significance which may become the capital of a unified Germany, a Germany now able to build on its best traditions and to build from the lessons of its worst traditions. A Germany dedicated not to the enslavement, but to the betterment of mankind. But we must all remember that Berlin was also the capital of the Third Reich, the womb of Hitler, a Satan whose name is associated forever with unspeakable horror. And we must never forget that as the Allied armies advanced from the East and from the West, they saw with their own eyes the remnants of the concentration camps, the horrors of the Holocaust.

We will visit Wannsee, the place where eleven despicable men and a woman decided to exterminate every Jew in the world. The site of the formulation of the "Final Solution."

We have memories. We have tears and there is anguish. We have hopes and fears and uncertainties. There are many Jews who could not bring themselves to be in this city because of the anguish, the pain that Berlin signifies. I speak with great empathy when I tell you that I understand the intensity of their anger and their bitterness. But, we are here for a reason. We are here because we have something to say to the new Germany.

I should like to be able to put the past behind, to go on to the future, but I cannot. I must, just as all of us must, contemplate what happened, deal with the past. The Jewish people cannot forget. And the German people must not forget. Nor can you and we allow the world to forget. Inevitably, the questions of forgiveness and of reconciliation arise. Reconciliation is possible if we speak the truth. And, the truth is that only the six million Jews who were murdered can forgive. But they are dead. The pain of that memory—yours because it is part of your history, ours because it is the worst thing that ever happened to us—is the only real bridge between us, the only road to reconciliation.

Forty-five years have gone by; you are another generation of Germans, just as we are another generation of Jews. I stand before you as President of the World Jewish Congress full of mixed emotions. Let us now talk of the future and let me tell you what the Jewish people now ask—no demand—of the new Germany.

We Jews have always believed that we have a special mission—"To be a light unto the Nations." Germany almost destroyed European Jewry, and with it, that special light. Now you have a special obligation to us.

It is not that we speak of collective guilt. Nor do we say that this generation be blamed for that which was done by another. We do demand, nonetheless, an admission of collective responsibility. The new Germany must forever teach what happened, so the lowest point ever reached in man's inhumanity to man, can never occur again.

The Jewish people recognize the Federal Republic has become a true democracy. But democracy not only means free elections and governance by the majority. It must mean first and foremost the freedom of every man, woman and child. It must mean that all minorities are guaranteed protection under the law. The new Germany must forever be a true democracy, for the world has learned that free peoples cannot tolerate fascist monsters. Socialism has failed, as an economic system for sure. But its real ignominy lies in the fact that it robbed mankind of freedom. So, of course, did fascism. Only democracy can guarantee freedom to everyone.

The new Germany must always have a special relationship with the State of Israel. Israel was born out of the ashes of the Holocaust. The Jewish people remember today the plight of those who craved shelter from the Nazi slaughterhouses, and were refused entry in country after country around the world. We remember that an unbelieving and perhaps uncaring world did nothing, not even would it bomb Auschwitz.

An ashamed world sanctioned the State of Israel, and as the Federal Republic of Germany rebuilt itself, it gave great substance to the building of the Jewish State. When East Germany threw off the shackles of communism, its first freely elected parliament unanimously apologized for their part in the Holocaust, and vowed to compensate the victims, as had the Federal Republic.

The German people must always support Israel. You must never help those who would destroy the Jewish State. The new Germany must adhere to the Federal Republic's stance on nuclear arms proliferation. Germany must never be a nuclear power, nor must any German help another who should desire to become a nuclear power. Germany must never have chemical or biological warfare capability, nor other means of mass killing and destruction nor help any third party attain such a capability. Let us remember the poison gas plant in Libya, and let us again insist that Germany enact strong legislation to prevent such threats against mankind and against Israel, and vigilantly enforce that legislation. Never, never strengthen the enemies of Israel!

A unified Germany will at first have great difficulties. It will be hard to erase the stagnation of socialism quickly. But we know that what will eventually emerge is a strong and powerful nation state, the most economically powerful in Europe, and an economic leader of the world. The Jewish people are concerned for the use of that strength and that power.

German history is aggressive and nationalistic. A strong and powerful Germany invokes fear. Not just Jewish fear, but fear from all your neighbors, all who suffered during the fascist period. The history of German aggression makes it critical that the new Germany guarantee again and again the sanctity of borders.

Just as there will soon be a unified Germany, there will be a unified Europe. Germany must commit itself to being a part of that Europe. You must willingly cast off forever your aggressive nationalism and become truly European. You must help rebuild much of what was destroyed during the Nazi period. Eastern Europe, having thrown off the bonds of socialism, now struggles to make its new democracy work. You must help. There can be no backsliding to totalitarianism.

When in the past you put aside that aggressive nationalism, you produced culture that is still envied. In German history there is Beethoven and Bach, Hegel and Schiller, Durer and Bechmann. Great musicians and great philosophers, great poets and great artists. This is the time, then, when the world would wish a new German renaissance.

As I stand here, before the German people, before the Jewish people, and the world, I acknowledge that which the Federal Republic has accomplished. A democratic society has been established on a strong educational base, the nation has signed the non-proliferation treaty and has become a strong ally integrated into Europe, with a system of laws which forbid xenophobia and other extremes of political behavior. Not only has the Federal Republic paid reparations to the Jewish people, it has frankly admitted the unspeakable crimes of the past.

The path for the new Germany should be clear. The Jewish people pray that you will prove that the world has nothing to fear; that you will follow that path away from your worst traditions and towards the best traditions of which you are so capable. The great challenge is to build a Germany firmly rooted in peace and respect for universal human values.

THE TIME IS RIGHT FOR A SOLUTION TO THE CYPRUS DISPUTE

HON. OWEN B. PICKETT

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. PICKETT. Mr. Speaker, at a time when the wall that divides Germany has come down, and when so many people all over the world are emerging from oppression for the first time, it is indeed tragic that we will this week mark yet another anniversary of the Turkish invasion and occupation of Cyprus.

For the residents of this small and beautiful island, the invasion has meant nothing but hardship and broken dreams.

Some 200,000 Greek Cypriots were displaced from their homes, and many have never resettled. Another 1,500 Greek Cypriots were killed or remain missing. And today—16 years after the invasion—25,000 Turkish troops remain on the island, giving Turkey the dubious distinction of being the only democracy that occupies a foreign nation.

For 16 years, Greek Cypriots and their friends around the world have been forced to accept this intolerable situation. Negotiations conducted under the good offices of the Secretary General of the United Nations and supported by the United States have bogged down and been disrupted by the thoughtless and provocative action of Turkish Cypriots and their leader, Mr. Denktash.

It was Mr. Denktash who in 1983 unilaterally declared the Turkish Republic of Northern Cyprus. And it was Mr. Denktash who last year shocked the world when he invited Turkish residents of Bulgaria to resettle on the island. Obviously, these moves have not been helpful.

With the rest of the world coming quickly to realize the futility of using armed might to suppress freedom loving people, the time is right for a renewed effort by the United States to

press for a diplomatic solution to this longstanding problem. I urge the Bush administration and Secretary of State Baker to do just that. And I will certainly do everything in my power to support their efforts.

CONGRATULATIONS, UNION VOLUNTEER FIRE DEPARTMENT

HON. HAROLD L. VOLKMER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. VOLKMER. Mr. Speaker, on April 16 of this year, a tragic accident occurred in my district when a tanker truck collided with a pickup truck on Route 44, killing 4 men. This horrible accident would have been much worse had it not been for the quick response of the Union Volunteer Fire Department in Union, MO.

Today, the Union VFD is celebrating 100 years of service to the citizens in and around Union. It was on July 19, 1890, that the Union Board of Aldermen established a fire company for the city of Union.

Over the last century, the Union Volunteer Fire Department has been there for the citizens on numerous occasions: When fires occurred at the Bouebeuse Shoe Factory in 1941, and at the gas bulk plant in 1949. The Union Fire Department responded to the fires at William's Theater in 1971 and at the Triple D Laundry in 1980. They were there in 1982, when V.J. Kent's warehouse caught on fire and exploded.

It was also in 1982, when the town of Union flooded, that the Union Volunteer Fire Department helped the local citizens to sandbag the town, tied down propane tanks to keep them from floating away, and after the floodwaters receded, helped the citizens pump the water out of their basements.

Mr. Speaker, I am proud that the Union Volunteer Fire Department is a part of my district. I ask my colleagues to join me in wishing the Union VFD a happy 100th birthday.

CONGRATULATIONS TO JOSE ARREDONDO, THE RECIPIENT OF THE 1990 HISPANIC CHAMBER OF COMMERCE PROFESSIONAL COMMUNITY SERVICE AWARD

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. STARK. Mr. Speaker, I rise today to congratulate Mr. Jose Arredondo for his outstanding contribution to the Hispanic community of Alameda County in California's Ninth Congressional District. Mr. Arredondo is the recipient of the 1990 Hispanic Chamber of Commerce Professional Community Service Award.

Mr. Arredondo was born and raised in Oakland, CA. He attended Oakland public schools and received a B.A. in sociology in 1974 and a M.S. in counseling in 1976 from California State University, Hayward. Mr. Arredondo has been with the Spanish Speaking Citizen's Foundation for the past 10 years and currently serves as the executive director. Mr. Arredondo's duties include the implementation of foundation policies and procedures; program development; planning, and overall management of the foundation. His other responsibilities include representing the foundation at community events and presentations to funding sources; acting as liaison with other nonprofit agencies; fiscal control and management of the foundation; personnel/consultant recruitment and hiring; overall supervision of staff and fundraising activities; proposal writing; grants management; labor/employee relations, including contract negotiations; and, finally, public relations.

The Spanish Speaking Citizen's Foundation is a nonprofit, multiservice organization incorporated in 1965. The mission of the foundation is to empower the individual and the community to improve the quality of life while enhancing the community's Hispanic cultural heritage. The foundation provides a number of comprehensive bilingual programs including employment services; career development; educational enrichment; counseling; recreation and special activities; and information and referrals.

Mr. Arredondo is responsible for the establishment of a number of innovative programs. These include the SSCF After-School Year Round Tutorial Program, the Annual Summer School for Hispanics, the Azteca Baseball Team, the Educational Run for High School Scholarships, and, the Aztec Run and Summer Job Programs for Youth. Through these programs, hundreds of youths between the ages of 10 and 21 receive tutoring in math and English; career and work experience; cultural and arts programs; and leadership skills. In addition, Mr. Arredondo is also responsible for the implementation of a new subtutorial and counseling unit that focuses specifically on high risk youth and youths that are on or have been on probation.

Mr. Speaker, I would like to take this opportunity to commend Mr. Jose Arredondo for his dedication to the Hispanic community and, to congratulate him on receiving the 1990 Hispanic Chamber of Commerce Professional Community Service Award. He certainly deserves our respect and admiration.

OFFSHORE OIL DRILLING REVISITED

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. IRELAND. Mr. Speaker, today, I am introducing, with the support of the entire Florida delegation, my second bill related to a ban on offshore oil drilling south of 26 degrees north latitude in the Eastern Gulf of Mexico off the coast of Florida. The proposal is the same as one I sponsored last year at this time which simply banned offshore oil drilling in this area. Because of certain developments since last July, it is necessary to take this proposal one step further.

President Bush recently issued his decision relative to the offshore oil and gas development program in the Gulf of Mexico south of Naples. His conclusions were based on more than a year of study by a special task force set up by the President to carefully consider the environmental, social and economic issues involved with oil and/or gas drilling off the Florida coast. I, among others applauded the President's decision to cancel Lease Sale 116, Part II—covering the area south of 26 degrees north latitude—and excluded the area from consideration for any lease sale until after the year 2000.

It is unfortunate that despite years of arguing about the environmental sensitivity of this area the Department of the Interior had in the past sold leases in this area. This lack of foresight on the part of the Department has created a situation whereby oil companies were encouraged to spend and the Department was happy to collect, funds for leases which they cannot now explore. Consequently, as part of the President's decision, he directed that the Department of the Interior begin the process of canceling the existing leases off Florida and called the discussion with the State of Florida concerning its participation in a joint Federal-State buy back of the leases.

Why, I ask, Mr. President, should the State of Florida participate in buying back leases it did not sell nor gain any revenue from? In my mind, it amounts to a unique brand of extortion, with our Federal Government putting the squeeze on the State for something Florida had no part in and did not want.

The bill I am introducing today is the same as H.R. 2945, but adds one provision. That is, "it is the sole responsibility of the United States to buy back such leases."

My bill will assure that Florida will not be forced to pay what amounts to ransom in order to protect the precious natural resources of our coastal waters. Mr. Speaker, the United States adheres to a policy which says it does not succumb to and pay the extortion demands of terrorists—neither will the State of Florida.

TRIBUTE TO OPERATION RELEAF FOR THE VIRGIN ISLANDS

HON. RON de LUGO

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. DE LUGO. Mr. Speaker, recently a St. Croix news reporter asked her fellow islanders: "What can regulate the climate, absorb noise, give shade and oxygen, cut carbon dioxide and provide a God-given, solar-powered air conditioner?"

Her answer. "Trees." You see, Mr. Speaker, when Hurricane Hugo's 200-miles-per-hour-plus winds hit the island of St. Croix last September 17–18, what was once lush-green tropical vegetation was—within a matter of hours—turned into thousands of leafless, twisted, black/brown hulks of tree trunks and broken tree limbs. Our army of nature-given regulators of climate, noise, shade, and oxygen had been almost totally destroyed.

But today, I am paying tribute to a unique plan to restore those storm-battered trees and have entire neighborhoods become responsi-

ble for the replanting, pruning, and pouring of loving care on the entire island's native trees, flowers, and bushes. This flora restoration program is being sponsored by the St. Croix Environmental Association; a group commonly referred to on the island as "S-E-A."

They call their effort "Virgin Islands ReLeaf." It is patterned after the 2-year old global reLeaf project which attempts to get communities around the world to plant trees to combat the effects of global warming and the "Greenhouse Effect."

Virgin Islands ReLeaf was officially initiated on April 15, the 20th anniversary of Earth Day, under the leadership of Joan Eltman, SEA's program director. According to Eltman, the idea for a tree restoration program was fueled by the fact that persons initially came to her offering her cash donations and checks on the street with the explanation that they had heard she was "doing something with trees."

Virgin Islands ReLeaf is emphasizing first the planting of native species of trees. But with few native seeds available after the hurricane SEA has organized tree-recognition workshops so that residents of the island can find the trees and tree seeds themselves. One of the local tree nurseries has even agreed to donate a pot and some soil to each child that brings native seeds to the nursery. A team of 10 tree experts—all volunteers—advises residents on how they can rescue and replant trees they find.

Under the ReLeaf Community Planting Program church and school groups, tenant associations, neighborhood block associations and social clubs and groups are collectively learning the fundamentals of the planting and care of trees. Householders are encouraged to plant young tree saplings in their yards next to dead trees in order that their lawns not continue to have that bare, just-struck-by-hurricane look.

There are plans to take the ReLeaf Program into the schools, with teachers' booklets containing lessons explaining to students the importance of trees.

Mr. Speaker, the focus of the ReLeaf efforts extends far, far beyond the island of St. Croix, however, for, beyond the very admirable and necessary efforts being made to reLeaf the island on the local level, the Virgin Islands ReLeaf participants are well aware that, by planting more trees and lowering the soil temperature, ordinary citizens can help fight global warming; one of the phenomena that scientists have told us is linked to the growing intensity of hurricanes.

CHILDRESS PRISON GROUNDBREAKING

HON. BILL SARPALIUS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. SARPALIUS. Mr. Speaker, today a group of State, county, and local officials will gather in Childress, TX, to break ground and begin construction of a new State prison in Childress. For the people of that fine city, it will represent the culmination of many years of hard, dedicated work.

A prison a cause for celebration? You bet. To understand just what this means to the people of Childress, you must understand the circumstances that led them to petition the Texas Department of Criminal Justice to construct a prison in their community.

The 1980's, Mr. Speaker, dawned full of promise for the people of Childress and all of Texas. We were coming off the most prosperous decade in the State's history, and there was no reason to believe the next 10 years would be any less fulfilling.

As we all know now, the 1980's were a disappointment for those of us in the Lone Star State. The serious downturns in both the agriculture and the energy sectors dealt us a severe blow. At the height of our economic problems, in the mid-1980's, unemployment statewide soared to more than 10 percent and communities everywhere saw their services, their very standards of living strained to the limit.

We could have wallowed in self-pity, but that is not the Texas way. As the old saying goes, we had no choice but to pull ourselves up by our bootstraps. We needed to diversify, to bring in new industries that would supplement agriculture and energy. The people of Childress are very resourceful, and they realized a prison would fit the bill perfectly.

A correctional facility like the one being built in Childress will employ 300 people with an annual payroll of $7 million. That translates into a significant economic impact on Childress and Childress County. This economic impact is not transitory either. A prison is not subject to the same market forces that affect other industries because the need for space to house prisoners will remain high for the foreseeable future.

It was, then, with this wisdom, foresight and commitment that Childress began to petition the Department of Criminal Justice to build this prison in their home. Last year, in receiving TDCJ approval, they realized their goal. Today, that abstract goal begins to take concrete shape.

Mr. Speaker, I ask my colleagues in the House to join with me in congratulating the people of Childress on their hard work and wishing them the best as they begin to build a brighter economic future for themselves and their children.

THE REFUGEE PROBLEM IN THE MIDDLE EAST

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. GREEN of New York. Mr. Speaker, I should like to address an issue raised during the House debate of the fiscal year 1991 foreign operations appropriations bill last month. With regard to the United States policy in the Middle East, I wish to make the following point.

I am concerned because much of the debate currently surrounding Israel excessively focuses on the West Bank and Gaza, ignoring the historical problems which have resulted from the Arab world's failure to resettle its refugees.

As many recall, when the Arab nations rejected the 1947 U.N. Partition Resolution, two refugee populations were created, one Arab and one Jewish. At that time, some 800,000 Jewish refugees fled from the Arab States, fearing an uncertain future. The majority of those refugees were absorbed by fellow Jews and ultimately became citizens of Israel. Others found sanctuary in the United States, Canada, and Europe.

In contrast, nearly 600,000 Arab refugees remained homeless, because the Arab nations refused them sanctuary. Arab governments throughout the Middle East left the task of caring for the refugees to the world community. Since that time, Arab governments have, with the exception of Jordan, denied those refugees the opportunity to participate in the political and economic lives of the countries where they have come to rest. They have been repeatedly told that they will be returned to Tel Aviv, Haifa, or wherever their families had lived in Israel—and today we are speaking of children, grandchildren, even great-grandchildren, still left isolated by their Arab hosts in the lands where they have come to live.

Those refugees are not going back to Israel. The West Bank and Gaza cannot viably support most of them. The oil rich Arab States can. There can be no Mideast solution until the Arab States deal with their refugee problem the way the Israelis did with theirs.

If the PLO is truly serious about recognizing Israel, we must insist that their representatives are asked the question, "How do you and the Arab nations that support you propose to resettle your refugees just as Israel resettled Jewish refugees from the Arab countries?" That question must be answered before there is ever going to be any settlement of the Mideast dispute.

THE 50TH ANNUAL FOURTH OF JULY FESTIVAL OF FREEDOM

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Ms. OAKAR. Mr. Speaker, I am pleased today to call attention to the upcoming 50th annual Fourth of July celebration in my hometown of Cleveland, OH. The origin of what is now known as the "Festival of Freedom," can be traced to the year 1938 when 260,000 persons, 80,000 of whom packed Cleveland Municipal Stadium, gathered for a "Festival of Beauty and Fire," culminating in a $4,000 fireworks display, "* * * the greatest ever seen in Cleveland," according to the Plain Dealer.

The festivals continued through the years of the Second World War, helping to stimulate Cleveland's "Win the War" spirit. Through the 1940's, the Festival of Freedom became a Cleveland tradition, growing into what the Plain Dealer called, "the largest mass observance of Independence Day in the Nation."

Larger fireworks shows and music accompaniment have helped attract record crowds in recent years—375,000 in 1988—including 2,500 boats which anchor in Lake Erie off Edgewater Park. This year, a 30-minute fire-

works show costing approximately $60,000 will entertain the hundreds of thousands of festivalgoers.

The festival has proven to be an enduring celebration. Neither world wars nor major construction could force the cancellation of the pageant. In fact, the festival has been forced to cancel only twice in its history, both times due to heavy rains.

Mr. Speaker, I am pleased to note that after half a century the Festival of Freedom is still totally underwritten by Greater Cleveland businesses, organizations, and individuals—a ringing testimonial to the pride of my community. A volunteer group of Cleveland business people, the Cleveland Independence Day Association remains as the event's sponsor; the State of Ohio and the city of Cleveland are cosponsors.

This year's festival promises to be bigger and better than any of the preceding events. It is truly family fun in the best tradition of America and I look forward to taking part in my hometown's celebration of my country's independence.

THE MONEY IS THERE

HON. BEN NIGHTHORSE CAMPBELL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. CAMPBELL of Colorado. Mr. Speaker, it is my understanding the military, in particular the Army Materiel Command [AMC], is considering giving a 21-day furlough to many of its employees, some of whom live in my district, because of a budget shortfall for the rest of this fiscal year of $108 million.

The AMC is threatening that, unless Congress appropriates more money, those layoffs will take place.

I have a suggestion where to find the money to make up this shortfall. The Pentagon is sitting on a $50 billion plus slush fund. This fund is made up of money appropriated but squirreled away to be spent on what it wants to spend the money on, not what Congress legislates. The argument we constantly hear from the military about lack of money seems pretty hollow in light of the exposure of this slush fund; $108 million shortfall? Come on, the money is there, it is just not being spent. Spend it on the personnel and not play games with their lives, Pentagon.

THE 100TH ANNIVERSARY OF SWISHER COUNTY, TX

HON. BILL SARPALIUS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. SARPALIUS. Mr. Speaker, I rise to commemorate the 100th anniversary of Swisher County, TX. A celebration will be held on Saturday, July 21, in Tulia to recognize that anniversary. The festivities that day will include the Prairie to Pride Parade and a barbecue for more than 5,000 people. Later that day a memorial will be dedicated to the centennial celebration of Swisher County.

I am always proud to recognize the achievements of my friends in Swisher County, and I am looking forward to being able to participate in their centennial celebration.

The 100th anniversary of Swisher County is all the more impressive when you look at how the county began. The first building in Swisher County was a log cabin constructed by Col. Charles Goodnight in 1883. The cabin was used as a line camp and headquarters for the colonel's new Tule Ranch. In December 1886 J.H. Parrish became the first actual settler in Swisher County. The J.H. Settle family settled nearby shortly thereafter.

The first commissioner's court was established on July 17, 1890, and the first county election was held on November 4 of that year. J.H. Settle was elected as the first county judge and Frank Scott was elected sheriff and tax collector. The county's first courthouse was completed in September 1890 at a cost of $2,000.

The Panhandle of Texas was a true frontier during the 1880's. It took a lot of courage and dedication to settle the land in those days. The settlers who came to the area were willing to sacrifice and work hard in the hope of one day making a better life for themselves and their families.

The 9,500 people who live in Swisher County today still possess many of the qualities of those pioneers. They grow wheat, grain, sorghum, cotton, soy beans, corn, and cattle, and they have developed Swisher County into one of the richest agricultural counties in the State.

Mr. Speaker, I urge the other Members of this House to join with me and all the residents of the 13th District of Texas in congratulating Swisher County on its 100th birthday.

SUSPEND ALL AMERICAN AID TO KENYA FOR HUMAN RIGHTS VIOLATIONS—STATEMENT OF SENATOR EDWARD M. KENNEDY

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. LANTOS. Mr. Speaker, the cause for human rights throughout the world has precious few heroes. I would like to take this opportunity to pay tribute to two genuine leaders in the field: Gibson Kuria, a prominent human rights attorney in Kenya, and our distinguished colleague from the other body, Senator EDWARD M. KENNEDY.

Mr. Kuria, an important leader of those seeking to reestablish democratic institutions and respect for human rights throughout Kenya. His outspokenness has resulted in physical attacks upon him, his wife, and young daughter, and in his imprisonment and torture. Mr. Kuria has fled to the United States to plead for our aid in restoring fundamental human rights in his homeland.

Mr. Speaker, Senator EDWARD M. KENNEDY, true to a long and lasting family tradition of support for human rights, has taken up the Kenyan cause. I would like to insert his statement introducing legislation calling for a suspension of United States economic and military aid to the Government of Kenya until there is a restoration of human rights and democratic institutions. I encourage my colleagues in both Houses of Congress to study Senator KENNEDY'S eloquent and insightful comments:

STATEMENT OF EDWARD M. KENNEDY

During the past few weeks, government security forces in Kenya arrested, detained, assaulted, and killed peaceful advocates of human rights and democratic reforms. This escalating cycle of violence and repression in Kenya is a deep concern to all friends of democracy.

The United States should not be backing governments that deny the most basic rights to their citizens. If we are true to our heritage, we should stand with the forces of freedom, not those who deny it.

Therefore, I am introducing legislation calling on the Administration to suspend military and economic assistance to the Government of Kenya. The resumption of this assistance would be conditioned on the restoration of democratic freedoms and the release of all persons arrested and detained for the peaceful expression of their views.

Kenya was once a model of political stability in Africa. But today, its constitution and its democratic tradition are threatened by the government's repression of the rights of its citizens.

President Moi has mounted a harsh compaign against those who speak out against the government, who oppose the nation's single-party system, or who call for free expression. The President has emphasized his opposition to a pluralistic democracy. He has vowed to hunt down political dissidents "like rats."

In recent weeks, the repression has intensified. Security forces have arrested and detained more than 1,500 people. Hundreds of people were injured, and at least 22 were killed, when security forces fired into crowds and used clubs against demonstrators protesting the government crackdown.

Among those detained are former Cabinet Ministers Kenneth Matiba and Charles Rubia. Gitobu Imanyara, the editor of a publication that criticized President Moi, has also been taken into custody.

The government crackdown compelled Gibson Kuria, one of the world's most courageous champions of human rights, to seek refuge in the U.S. Embassy in Nairobi. Although the Kenyan government permitted Mr. Kuria to leave the country after a few days, his leadership is needed by his fellow countrymen. His forced exile is a distressing commentary on the tragic situation in his native land. We look forward to working with him to bring about the day when he can return home to a free and democratic Kenya.

Kenya is the largest recipient of U.S. aid in sub-Saharan Africa. It is scheduled to receive $46 million in aid this year, including $11 million in military assistance. The Administration has requested $42 million in aid for Kenya in 1991, $16 million of which is in military aid and economic assistance.

Americans should not send these tax dollars to a government that denies its citizens their basic rights. It is time to suspend all military and economic assistance to the Government of Kenya, until it restores fundamental civil and human rights

Gibson Kuria and other brave Kenyans at the forefront of democratic and human

rights reforms are entitled to the individual freedoms guaranteed under the Constitution of Kenya. I urge Congress to ask the Administration to support them in their cause.

ALICE K. ROMERO

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. RICHARDSON. Mr. Speaker, today many people in northern New Mexico remember Alice Kelley Romero, who died recently in Santa Fe at age 84. Alice Romero was not a person of financial wealth, power, or position, but she deeply touched the lives of many rural children, many now highly successful adults who credit her with directing them toward their goals.

Born and raised in Bloomington, MN, Alice Kelley's pioneering spirit led her to Truchas, NM, at the age of 26 to teach at the Presbyterian Day School. The school drew youngsters from many of the nearby villages because of the dedication and enthusiasm of Miss Kelley and other staff members. Many of them still have fond memories of that time and of the kindness and high expectations shown by their young teacher from such a different culture and background.

In time, Alice Kelley married Rev. Epifanio Romero, of Truchas, and dedicated most of her time to the raising of their three children, but she was continuously active in Christian education and other church and community work. Until shortly before she suffered a disabling stroke earlier this year, she was always among the first to volunteer her help to those in need. In an area where vastly different cultures live in relative harmony, she claimed to have no memory of a single incident of prejudice or hostilty. In all likelihood, she did not see what was incomprehensible to her.

Mr. Speaker, I ask my colleagues to join me today in honoring Alice Kelley Romero as a kind, courageous woman who did her best for the children of her community. History will not remember her name, but those children will never forget her.

STATE THRIFT DEPOSIT INSURANCE ACT

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. ROTH. Mr. Speaker, there are many tough issues in the savings and loan mess, but none is more important to the American taxpayer than who will pay the bill. Today, I am joining with several of my colleagues to propose a critically important change in the cleanup, which will inject a much-needed element of fairness for the taxpayers of Wisconsin and some 36 other States.

The reality is that most of the thrift failures are concentrated in a handful of States. But the $500 billion cost is being thrust on the taxpayer. That means that the cost is distributed in line with Federal tax payments around the country, with no relation to who caused the problem.

This is unfair. Wisconsin and 17 other Midwest and Northeast States account for nearly half of Federal tax revenues each year. But 90 percent of the failures have occurred in the South and West. In short, our States are footing the bill for a problem they did not create.

A study last month by Cleveland State University, clearly demonstrates that as presently operating, the Government's cleanup will produce a massive transfer of taxpayer funds from the Midwest and Northeast to the South and West. The study estimates that $592 for each Wisconsin citizen will go to the cleanup, while Texas will receive some $4,775 per person. Yet, Texas is responsible for 72 percent of the problem. That is not fair, and our bill will help rectify this injustice.

The American people understand this situation. Everywhere I go in northeast Wisconsin, people ask me why we have to pay for the crimes and mismanagement in Texas, Arizona, California, and the other States which let their S&L's run wild. It is only fair for them to take some of the burden off our constitutents. This bill is my first step toward that goal.

One of the most articulate arguments for our bill was written in an editorial in the Green Bay Press Gazette, which I am inserting in the CONGRESSIONAL RECORD for my colleagues to read.

Last year, a group of us tried to offer a similar plan, but our amendment was blocked. However, in a few months, Congress will be asked to approve more rescue funds. Our message to the House is: You will have to deal with our bill if you want any more taxpayer money. The American people understand issues of fairness, and fairness is on our side.

[From the Green Bay Press Gazette, Apr. 12, 1990]

STRAINING—WISCONSIN HANDED AN UNFAIR BURDEN IN FEDERAL S&L BAILOUT

The savings and loan bailout strains the limits of sharing and fairness that are essential parts of being a nation.

The latest estimate of the cost of cleaning up the fouled nest of amoral highrollers in the southwestern United States is $326 billion through the 1990s. The total could go even higher—to an estimated $500 billion—if a slow economy devalues real estate held by defunct S&Ls.

But even at the lower figure, the cost to Wisconsin taxpayers will be about $3.5 billion—or roughly $750 for every person in the state. We can all dream about what that much money could buy for us as either state or private spending.

Wisconsin residents have to pay their share of the S&L bill. This state is part of the United States and the federal government has guaranteed all the people that money deposited in banks and savings and loans is safe.

But this mess is not Wisconsin's fault. Savings and loan institutions here are well-managed. Only two of them are part of the still-rising total of 400 institutions taken over by the U.S. government.

There are three groups at fault:

Wheeler-dealers in Arizona, California, Florida and Texas—particularly Texas—steered S&Ls away from home mortgages and other safe investments in search of quick riches. Those people should be hunted down and prosecuted.

Federal officials acted too slowly to diagnose and treat the mess. The S&L episode is convincing evidence of the need for strict federal regulation of those who handle money that does not belong to them.

The nation's top elected officials erred twice. Following President Reagan's lead, Congress rushed to deregulate financial institutions without providing ample safeguards against the quick-buck crowd. Officials then refused to act on a serious problem until it turned into a multi-billion-dollar disaster.

We have no desire to promote factionalism, to pit one region of the country against another. But those suntanned cynics in Texas and a few other states owe the rest of us.

They owe us better understanding than they have shown in the past that this is one nation. Their politicians—especially those in Congress—owe an apology for stripping Wisconsin and other states of tax resources that could be used to solve local problems. They owe the nation better, less greedy, behavior.

FIFTIETH ANNIVERSARY OF THE DICKENS ELECTRIC COOPERATIVE, INC.

HON. BILL SARPALIUS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. SARPALIUS. Mr. Speaker, I rise to commemorate the 50th anniversary of the Dickens Electric Cooperative, Inc. Today, members from parts of seven counties will meet and hold festivities to celebrate that anniversary.

The cooperative was granted a corporate charter by the Texas Secretary of State on February 10, 1940. Five years later the Dickens Electric Cooperative energized its first 17 miles of line. Mr. Joe Rose and Mr. John Sharp, along with many others, helped develop a power system which enabled the area to pull away from the effects of the Great Depression and World War II.

Don't underestimate for a minute what the founders of that cooperative were trying to do. Think about the times. This country, and especially rural America, was trying to recover from the economic devastation of the 1930's.

Rural electric cooperatives were organized to modernize rural areas, and to provide them with the tools to grow economically. Those cooperatives played a major role in making rural America what it is today.

The celebration today is evidence of how well rural electrification has worked. The Dickens Electric Cooperative, Inc. has grown to serve more than 2,800 customers and has improved the way of life for its members. The cooperative has also helped to grease the wheels of modern industry by providing power for west Texas oil fields.

Mr. Speaker, I urge the other Members of this House to join with me and all the residents of the 13th District of Texas in congratulating the Dickens Electric Cooperative, Inc. on its 50th anniversary.

NOT ONE PENNY MORE FOR WASHINGTON

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. HUBBARD. Mr. Speaker, I would like to share with my colleagues an outstanding editorial which recently appeared in the Paducah Sun written by the newspaper's editor, Jim Paxton of Paducah, KY.

Jim Paxton has written the best article I have read describing the savings and loan fiasco and reflecting the popular views of the American public.

There have been several editorials in the Washington Post, the New York Times, Chicago Tribune, and other daily newspapers, but Jim Paxton's editorial is the best I've read.

One thing for sure, the headline of the editorial reflects the views of my western Kentucky constituents—"Not One Penny More for Washington." My constituents do not want higher Federal taxes.

I urge my colleagues to read and consider Jim Paxton's editorial. It follows in its entirety:

NOT ONE PENNY MORE FOR WASHINGTON

(By Jim Paxton)

It was not so long ago that I was fit to be tied over the fact that the saying "I won't raise taxes" was not merely a popular campaign slogan in Kentucky—it was a prerequisite for even being a candidate.

This was despite the fact that Kentucky had not had a significant revenue increase in 20 years, its teachers were among the worst paid in the nation, its prisons had been or were in danger of being taken over by various court systems, and counties were closing jails and landfills left and right with no money to replace them.

In Kentucky, the time had arrived for a tax increase—how big an increase is something that could well be debated to the end of time but we definitely had to do something.

So if I feel that way about money for state government, I obviously am understanding about President Bush's statements last week that the federal government also needs more money and has to raise taxes, right?

Wrong. At the risk of sounding like the populist rhetoricians I have so freely bashed on the state level in recent years, my position on a federal tax increase is this:

Not one penny more for Washington.

As one congressman I heard on the radio deftly put it:

"Offering the federal government more tax money is like asking an alcoholic if he wants another drink."

His point is that although new taxes would in theory be applied to shrink the budget deficit, Congress's abysmal record of pouring new monies into so-called entitlements and other pet projects makes it highly doubtful how much, if any, new tax money would actually go towards deficit reduction.

If we could be assured every penny would go toward permanent deficit reduction, things might be different, but the fact is, the federal government has forfeited the public trust. It has behaved like children who skipped school, went to the mall and maxed out their parents' credit cards while they were at work. Not only should it have its credit cards taken away, it should be locked in its room until it comes up with a way to make good.

When it comes to federal taxes, we are not undertaxed. Almost all of us pay between a fourth and a third of our income to the federal government, and that doesn't even include Social Security. That's enough, don't you think?

When I was a reporter in Lexington some dozen years ago, I was sent to cover a most unusual meeting. It was an assembly of a political group whose goal it was to abolish the federal government. I was somewhat taken aback at the time, because the gentleman who was the main speaker was one of those people who sort of foamed at the mouth—literally—once he got going, and at the end of his speech, he asked the crowd, which included a good number of elderly folks, for money.

And although I have in no way come around now to that gentleman's way of thinking, I have come to this conclusion:

Where the federal government is concerned, less is better.

That's part of my thinking in the debate concerning the National Endowment for the Arts, and whether or not the government should fund it. Of late, that debate has centered around the sometimes murky line between art and pornography, and whether creators of the former should be punished for misdeeds by purveyors of the latter.

I see it differently. I see the NEA as a nonessential government service. Granted, it's a nice thing to have, but it's not up there with highways and airports and locks and dams. The country could survive without it. And the fact is, the government is paying for it with money it literally does not have.

The federal government also has proven time and again that it is a lousy administrator of our monies. That's not rhetoric; that's a fact.

Consider a recent Baltimore Sun article about the government's efforts to cut taxpayers' losses by selling off properties seized from failed S&Ls in the ongoing "bailout." As part of it, the government recently sold Stonebridge Ranch in Texas to a Japanese investor. That foreign buyer got a going concern—an office, housing and recreational complex with golf courses and the works—that an S&L had paid $330 million to build—for $61 million. We, the taxpayers, will pay the $270 million difference (81.5 percent of the total cost).

You, I, everyone in your family, in fact everyone in the United States will pay about $1 each to retire just this one debt against this one project that now is owned by a foreigner. And there are a couple of thousand like it.

And all because Congress and the S&L regulators got together in the last decade and decided to let the S&L's take a lot more risks, with a lot less supervision.

It is time to put this type of fiscal irresponsibility to an end. It is time to put the federal government on a diet—a cash diet—to teach it that it cannot simply keep turning around and looking to the tax coffers to remedy its bungling. And it is time to get the government out of the business of being all things to all people and back to the basics of providing transportation systems, a federal court system, an army, and not much else.

The people in Washington have been slow to perceive public sentiment of late, it seems, but I believe there is a message enroute from the taxpayers, and the message is this:

The money you are getting is all that you are going to get; make do with it, or else you're fired.

A SALUTE TO JUDGE PAUL R. DONALDSON

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. STOKES. Mr. Speaker, on July 25, 1990, friends of Judge Paul R. Donaldson will gather to pay tribute to him for over 40 years of public service. This affair will be held at Landerhaven and an overflowing crowd is expected to come out on that occasion.

Judge Donaldson, who has presided in the Shaker Heights Municipal Court since 1982, has made many friends across the spectrum of political parties, race, and religion. He is highly respected throughout our community. As a judge he has earned respect for his professionalism, knowledge of the law, and his evenhanded administration of justice. A major part of his successful and distinguished career is his beloved wife, Kathleen, who also serves as his bailiff.

Mr. Speaker, I request that all of the Members of the House join me in a special tribute to an outstanding jurist on this occasion. I include herewith a copy of Judge Donaldson's personal profile.

PERSONAL PROFILE OF JUDGE PAUL R. DONALDSON

Born: February 11, 1926, Shaker Heights, Ohio.

PROFESSIONAL EXPERIENCE

Judge, Shaker Heights Municipal Court (1982-Present).

Admitted to practice before the United States Supreme Court, Sixth Circuit Court of Appeals, Federal District Court for Northern Ohio, and all Ohio Courts.

Director of Law, City of Shaker Heights (1973-1981).

Chief Prosecutor, City of Shaker Heights (1957-1981).

Assistant Director of Law, City of Shaker Heights (1957-1973).

Legal Counsel, Shaker Heights Board of Education, Library Board, and Recreation Board (1973-1981).

Assistant Legal Counsel, Shaker Heights Board of Education, Library Board, and Recreation Board (1957-1973).

Police Officer and Sergeant, Shaker Heights Police Department (1950-1957).

Instructor, Ohio Peace Officer Training Council, Courthouse Security, Bailiffs, Basic Police Course, Criminal Law, Search and Seizure, etc.

Instructor, Supreme Court of Ohio, Courthouse Security.

PROFESSIONAL AFFILIATIONS (FORMER AND PRESENT)

American Bar Association, Housing and Urban Renewal Committee, Liaison Committee with National Institute of Municipal Law Officers (NIMLO), Transportation, Traffic and Parking Committee.

American Judges Association, Member, Board of Governors.

American Judicature Society, Chairman, Court Security Committee.

Association of Trial Lawyers in Criminal Cases.
Bar Association of Greater Cleveland.
Case Western Reserve University Law-Medicine Center Instructor in Criminal Law.
Cleveland-Marshall Law School Alumni Association of Cleveland State University.
Cuyahoga County Bar Association, Municipal Courts Committee.
Cuyahoga County Law Directors' Association, Treasurer and Past President.
Cuyahoga Regional Information System (CRIS).
Delta Theta Phi Law Fraternity.
Kent State University, Lecturer in Municipal Law.
Legal Aid Society of Cleveland.
Metropolitan Crime Bureau of Cuyahoga County.
National Committee on Uniform Traffic Laws and Ordinances.
National Institute of Municipal Law Officers (NIMLO), Regional Vice-President; Chairman, Committee on Traffic, Parking and Transportation.
Northern Ohio Municipal Judges Association, Secretary-Treasurer.
Ohio Association of Municipal/County Judges, Inc.
Ohio Municipal Attorneys' Association, Past President; Contributing Author, Municipal Attorneys' Desk Book.
Ohio State Bar Association, Supreme Court Committee on Uniform Practice and Procedure in Traffic Courts.
Suburban East Bar Association.

CIVIC AND PUBLIC ACTIVITIES (FORMER AND PRESENT)

Christ Episcopal Church.
Citizens League of Greater Cleveland.
Cleveland-Marshall Law Alumni Association, Honorary Trustee.
Family Service Association District Committee, Former Chairman.
Fernway Association.
Lomond Association.
Ludlow Community Association.
Moreland Community Association.
National Municipal League.
Ohio Municipal League.
Shaker Heights Kiwanis Club, Past President.
Shaker Heights Fraternal Order of Police Associates (FOPA), Past President.
Shaker Heights Youth Center, Board of Trustees.
Suburban Community Hospital, Board of Trustees.
The Shaker One Hundred, Inc., Executive Director.
United Appeal of Greater Cleveland, Former Area Director.
Veterans of Foreign Wars.

AWARDS

Superior Judicial Award, Ohio Supreme Court 1982, 1983, 1984, 1985, 1986 (No awards given to any court since 1986).
Hall of Fame, Shaker Heights High School, inducted 10-9-86.

EDUCATION

Cleveland-Marshall College of Law, Cleveland State University, Juris Doctor Degree.
Wittenberg College, Springfield, Ohio.
John Carroll University, University Heights, Ohio.
Northwestern University, Evanston, Illinois.
Shaker Heights Public Schools.

MILITARY SERVICE

U.S. Air Force, South Pacific Theater of Operations (1943-46).

BIOGRAPHICAL LISTING

Who's Who in American Law, 2nd and 3rd editions.

THE FLIGHT ATTENDANTS

HON. JIM LIGHTFOOT

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. LIGHTFOOT. Mr. Speaker, some of you may have glanced in the Washington Post this morning or watched the morning news before coming to work only to see a reminder that 1 year ago today the tragic accident of United flight 232 from Denver to Chicago occurred in Sioux City, IA. Many lives were lost tragically in this crash; however, many lives were saved through the combined efforts of the captain, flight attendants, ground crew, hospital personnel, Sioux City residents, and passengers themselves.

On this particular day, I would like to bring attention to one special group of people involved with flight 232 whose efforts and qualifications go unnoticed on a daily basis—the flight attendants. This extends not only to those of the Sioux City accident but to all who make each and every flight as enjoyable and comfortable as possible. It was because of their professionalism and safety consciousness that so many people survived the accident of 1 year ago today.

In light of the accident, by congressional appointment the date of July 19 was reserved for those flight attendants who attend to, care for, and direct their passengers in the many different, and often dangerous situations confronting them. It is for this reason that I would like to make notice today that the flight attendants' services are sincerely valued.

I know my colleagues join me today in thanking you, the flight attendants, for the job you do, and the job you do well.

INTRODUCTION OF THE COUNTERVAILING AND ANTIDUMPING DUTY ACT OF 1990

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. PEASE. Mr. Speaker, on behalf of Representatives CARDIN, COYNE, NANCY JOHNSON, KENNELLY, MATSUI, RUSSO, and myself, I am introducing the Countervailing and Antidumping Duty Act of 1990. Our bill responds to the complaint that our trade laws are too cumbersome and costly for our domestic industries to use effectively.

To remedy this situation, we are proposing a number of small modifications to our antidumping and countervailing duty laws. The combination of these technical changes will give our trade laws the tune-up they need.

Besides making key improvements to our trade laws, our bill would also send a strong message to our trading partners that we are serious about maintaining a strong set of antidumping and countervailing duty laws.

I urge you to give our bill serious consideration. The text follows:

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Countervailing and Antidumping Duty Amendment Act of 1990".

SEC. 2. PETITION INITIATION AND DETERMINATION.

Sections 702 and 732 of the Tariff Act of 1930 (19 U.S.C. 1671a and 1673a) are each amended—

(1) by striking out ", and which is accompanied by information reasonably available to the petitioner supporting those allegations" in subsection (b)(1); and

(2) by striking out "and contains information reasonably available to the petitioner supporting the allegations" in subsection (c)(1).

SEC. 3. ADMINISTRATIVE REVIEW OF DETERMINATIONS.

Section 751 of the Tariff Act of 1930 (19 U.S.C. 1675) is amended—

(1) by inserting at the end of subsection (a)(1) the following: "The review must be completed by the 180th day after the day on which the request for the review was received by the administering authority.";

(2) by redesignating subsection (f) as subsection (g); and

(3) by inserting after subsection (e) the following:

"(f) SUSPENSION OF ANTIDUMPING DUTY ORDER IF NO DOMESTIC SUPPLY OF MERCHANDISE AVAILABLE.—

"(1) IN GENERAL.—The administering authority may, after appropriate notice, suspend the application of an antidumping duty order (if the order is not based on a determination referred to in section 731(2)(B)) to merchandise covered by the order if the administering authority determines that—

"(A) merchandise of that class or kind is not produced in the United States;

"(B) the need in the United States for merchandise of that class or kind is real and reasonable;

"(C) the specifications for merchandise of that class or kind is reasonable; and

"(D) no producer in the United States is capable of producing, or willing to produce, merchandise of that class or kind.

"(2) PROCEDURES.—The administering authority shall establish procedures—

"(A) governing the form and content of requests for determinations under paragraph (1); and

"(B) providing opportunity for the annual review of any suspension placed in effect under paragraph (1) to determine if the reasons on which the suspension is based still pertain.".

SEC. 4. MATERIAL INJURY.

(a) LONG LEAD TIME FACTOR.—The last sentence of section 771(7)(C)(iii) of the Tariff Act of 1930 (19 U.S.C. 1677(7)(C)(iii)) is amended by inserting ", including contracts with long lead time," after "competition".

(b) DETERMINATION OF THREAT OF INJURY.—Subparagraph (7) of such section 771(7) is amended—

(1) by redesignating clauses (iii) and (iv) as clauses (iv) and (v), respectively, and

(2) by inserting after clause (ii) the following:

"(iii) STANDARD FOR DETERMINATION.—The presence or absence of any factor which the Commission is required to evaluate under

this subparagraph shall not necessarily give decisive guidance with respect to the determination by the Commission of the threat of material injury.".

SEC. 5. DUAL PRICING OF IMPORTS.

Section 773(a)(4) of the Tariff Act of 1930 (19 U.S.C. 1677b(a)(4)) is amended by adding at the end the following new sentence: "No allowance shall be made to account for differences in import costs that are based on whether the end product made from the import is sold in the home market or exported.".

SEC. 6. REPORT, AND ACCESS TO DATA, REGARDING COUNTERVAILING AND ANTIDUMPING DUTY COLLECTIONS.

Section 777(a) of the Tariff Act of 1930 (19 U.S.C. 1677f(a)) is amended by adding at the end thereof the following:

"(5) REPORT, AND ACCESS TO DATE, REGARDING COLLECTIONS.—

"(A) ANNUAL REPORT ON COLLECTIONS.—Not later than__days after the close of each calendar year, the administering authority shall prepare, and make publicly available, a report setting forth the amount of duties collected during that calendar year under each countervailing duty order and antidumping duty order.

"(B) ACCESS TO COLLECTION DATA.—Upon receipt of an application from an interested party that initiated a petition that resulted in a countervailing duty order or antidumping duty order, the administering authority shall make available the data regarding the payment of duties under the order. Subsection (c) applies to the disclosure of any such data that is proprietary information.".

SEC. 7. COMPENSATION AWARDS.

(a) DEFINITIONS.—As used in this section:

(1) The term "affected domestic producer" means any manufacturer or producer within the domestic industry with respect to which an affirmative injury determination was made in connection with an antidumping order.

(2) The term "antidumping order" means an antidumping duty order published under section 736 of the Tariff Act of 1930.

(3) The term "Commission" means the United States International Trade Commission.

(4) The term "dumped merchandise" means merchandise with respect to which an antidumping duty is imposed under an antidumping order.

(5) The term "dumping period" means the period of time during which foreign merchandise subject to an antidumping order was sold, or offered for sale in the United States at less than fair value and applied by the Commission for purposes of making a determination under section 735(b) of the Tariff Act of 1930 with respect to the domestic industry that produced a like or directly competitive products.

(b) APPLICATION PROCEDURES.—The Commission shall prescribe procedures governing when and the form and manner in which affected domestic producers may apply to the Commission for compensation under this section.

(c) COMPENSATION DETERMINATION.—

(1) Upon receiving a timely application under subsection (b), the Commission shall determine if the applicant—

(A) is an effected domestic producer; and

(B) suffered economic injury during the dumping period as a result of the sale, or offer for sale, in the United States of the dumped merchandise.

(2) If the Commission makes affirmative determinations under paragraph (1) (A) and (B), it shall—

(A) determine the monetary value of the economic injury that was suffered by the applicant; and

(B) issue to the applicant a compensation award stating the amount of money which is payable to the applicant from the appropriate special compensation account established under subsection (d).

(d) SPECIAL COMPENSATION ACCOUNTS.—

(1) On the date an antidumping order takes effect, the Secretary shall establish in the Treasury of the United States a special compensation account with respect to that order.

(2) The Secretary shall deposit into a special compensation account one-half of all antidumping duties that are collected under the antidumping order with respect to which the account was established.

(3) The monies in a special compensation account shall be available, to the extent provided for in advance in appropriation Acts, for the payment of compensation awards issued under subsection (c)(2) in conjunction with the antidumping order with respect to which the account was established.

(4) The Secretary shall by regulation prescribe the time and manner in which payment of compensation awards from special compensation accounts will be made. If the amount of compensation award claims made at any time exceed the amount of monies in the special compensation account, the Secretary shall make pro rata payments of the claims. After all compensation awards have been paid from a special compensation account, the Secretary shall terminate the account, and any monies remaining therein deposited into the general fund as miscellaneous receipts.

(5) Upon the termination of a special compensation account, all antidumping duties collected under the antidumping order with respect to which the account was established shall be deposited into the general fund of the Treasury as miscellaneous receipts.

DEDICATION OF THE NIXON LIBRARY

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. DANNEMEYER. Mr. Speaker, today marks the dedication of the Nixon Library in Yorba Linda, CA, a city which I am privileged to represent and which is, of course, the birthplace of the 37th President of the United States.

This will be the first time since 1981—the funeral for Anwar Sadat—that four living U.S. Presidents are appearing together.

It has been 16 years since Richard Nixon left the White House in disgrace. In the years to come, the memory of Watergate will fade and it is the international achievements of President Nixon which will be remembered.

I have been honored to address the gathering in Yorba Linda and am attaching my statement at the dedication.

REMARKS BY HON. WILLIAM E. DANNEMEYER

Honored guests, we gather at an historic juncture along our nations path of destiny.

The greatness of a civilization rests not so much upon its conquests as with the chronicles of its people. As history is the narrative of human events, libraries are the repositories where knowledge of those events are preserved for the education of future generations.

Today we honor one of only forty men who have led the United States from fragile infancy to international preeminence. Each one has variably contributed to the development of our political, economic, and social institutions. Some have exercised ascendant abilities to steer our nation around dangers and exploit unique opportunities for progress. A few, possessed of superior intellect and acute vision, have helped forge our nation's destiny at critical points in time.

History will record that Richard Nixon has left a profound imprint on world affairs, one which has indeed altered the course of history and led us to where we are today in the international community. This library, then, does more than commemorate the life and service of the man; it memorializes his accomplishments and commends them to the children of tomorrow with the hope that they may gain from them an understanding of the history of this nation, and share in the knowledge that monuments of learning are more durable than monuments of power.

A CONGRESSIONAL SALUTE TO COACH STAN SMITH

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. ANDERSON. Mr. Speaker, I rise today to pay tribute and acknowledge my respect for an outstanding citizen and leader of the South Bay Community. On July 21, 1990, Coach Stan Smith will be honored by friends and former players for his many years of dedicated service to the Gardena High School sports program. This occasion gives me the opportunity to express my sincere appreciation for all that he has done for South Bay youth.

Coach Stan Smith, a graduate of Loyola University and the University of Southern California, first joined the staff at Gardena High School in 1950. During the early 1970's, I had the distinguished pleasure of representing Stan Smith and Gardena High School, in the House of Representatives. I can attest to the outstanding program, and the many successful individuals that came out of Gardena as a result of Coach Smith's leadership. His extraordinary career at Gardena, included two city football championships, and numerous league championships. Coach Smith was a man, however, who focused on much more than teaching just athletic skills.

To most who have coached athletics, success is measured in wins and losses. In the case of Stan Smith, however, success has always been viewed as a player's performance both on and off the field. Throughout his coaching career at Gardena High School, Coach Smith prided himself on developing players for successful careers beyond high school. Among his many outstanding players were Doc Ellis of the Pittsburgh Pirates; Enis Cabell, who played for both the Houston Astros and the Los Angeles Dodgers; Charlie Evans, who played for both the Washington Redskins and the New York Giants; Winland

Hall of the San Francisco 49er's; and Don Horn of the Green Bay Packers. While these are names that many of us recognize in the world of professional athletics, there are many other unrecognized names that now enjoy successful careers, aided by Coach Smith.

Stan Smith ended his coaching career in 1977, but he is still remembered and respected by all who know him. The fact that his family, friends, and former players have gathered to honor Coach Smith, serves as a testimonial to the devotion so many have for him. On this special and most deserving occasion, my wife, Lee, joins me in extending our heartfelt thanks and congratulations to him. We wish Coach Smith, his wife Connie, their children, Louise, Bruce, Craig, Sally, Jacqueline, Mark, and Ellen, all the best in the years to come.

DON'T VOTE, LET ME MAKE THE DECISIONS ABOUT YOUR FUTURE

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. UDALL. Mr. Speaker, I have always been most proud of my home State, Arizona, for several dozen reasons, which for sake of brevity and budget, I will not enumerate here today. However, like many Arizonans, I was hard pressed to gloat when it was announced that our State ranked 41st in voter turnout in the Nation.

There is no simple answer to the problem: the House has addressed motor voter and same day registration proposals, and directed that Federal and State agencies provide registration opportunities. Like many of my colleagues, I've taped radio and TV spots encouraging people to register and vote, often hoping people would do so just to keep me off the air. Still, Arizona and at least nine other States, saw more than 1 in 3 residents over 18 years of age fail to register to vote. This is a tragedy.

A political writer from the Arizona Republic recently devoted her column to the problem. Keven Willey took the time to debunk many myths about voter registration. She noted over a dozen different locations where an individual can register. Ms. Willey advised her readers how simple it is to register to vote. In short, many of the excuses most commonly given by those not registered were refuted.

I ask that Ms. Willey's column be made part of the CONGRESSIONAL RECORD. I believe that it is a substantial contribution to Arizona's effort to move away from the ranks of the disenfranchised.

DON'T VOTE, LET ME MAKE THE DECISIONS ABOUT YOUR FUTURE

(By Keven Willey)

Everybody seems all upset about how Arizona ranks ninth-worst in the nation in voter turnout. Sounds like a big to-do over nothing to me.

I don't care that more than one out of every three Arizonans over 18 fails to register to vote. That voter turnout in the United States is nearly the lowest of any democracy worldwide.

Having so few people involved just makes my vote more important.

I like that.

That means the causes I think are important (light rail, a King holiday, campaign-finance reform) are more likely to get attention. And the causes I don't like (the Grand Prix, limits on politicians' terms and legalizing concealed weapons) will bite the dust.

It means that the candidates I like (actually there aren't too many of these: sometimes Sam Steiger, sometimes Fife Symington) are more likely to win. And the candidates I don't like (Evan Mecham) are less likely to win.

If enough people don't register to vote, I could have my way on just about everything. I would like that just fine. You might not, but if you don't care enough to register to vote, why should anybody care?

NO COMPLAINING

Are you worried that by registering to vote you might be tapped for jury duty? That the whole world will have access to your unlisted phone number?

Can't find your birth certificate or some other proof of identification? Too busy to register? You don't understand politics and find it all too confusing to even try?

Fine. I'll do all the deciding for you. I'll take care of everything. I promise. Trust me.

But don't blame me if things go wrong. If you are careless enough to believe any one of the excuses offered above justifies your abandon, don't come complaining to me about how things worked out.

No vote, no voice. That's my motto. That goes especially for complaining. Don't want to hear it.

EXCUSES EXPLODED

Am I sounding a bit strident? Good. Guess what:

You don't have to list your phone number when you register to vote. There's a space for it on the form, but if you don't want the number to become part of the public record, you can just leave it blank.

And while you might get tapped for jury duty if you register to vote, you are just as likely to get tapped if you drive. Most counties pull names from both registration rolls and driver's license records for juries. So if you drive but haven't registered to protect yourself from jury duty, forget it. Chances are they've already got your number.

Besides, I've been registered to vote for more than 14 years, and I have never been called for jury duty. (Now I'll get summoned tomorrow.) My mother has been registered to vote in one county for 28 years, and she's never been called either.

As for that birth certificate, you don't need it. In fact, you don't need any proof of identification when you register to vote. All you do is sign a line at the bottom of the form swearing that all the information is true.

If it's not, and elections officials find out about it, it's a felony. So don't get creative. But don't use the old birth-certificate excuse as a reason for not voting either.

LOTS OF OPPORTUNITIES

And this too busy/too confusing stuff is bunk. You can register to vote at any justice court, state Motor Vehicle Division licensing office (if you need a license), the county election office or at either major party's headquarters.

In some areas, you can even register at libraries and city halls. Chances are if you call either party and ask them, they will send somebody to your home to register you.

You can register to vote the day you move into the state. In some counties, if you've just moved across town, you can call the recorder's office and they will send you a special change-of-address card that you can return, postage-paid, in the mail.

Sure, politics sometimes is confusing. In fact, it almost always is. But we all have opinions. You can start small. Vote first on the issues you feel strongest about. Taxes, transportation. The more attention you pay to those issues, the more you will learn about others.

It's really easier than you think. All it takes is glancing through the newspaper. Or listening to the news on TV or radio. Better yet: Attend a candidate's forum. It might take an hour, but you would be surprised how much you can learn simply by seeing a candidate in action in person.

But hey, don't lose any sleep over this. If you don't want to register to vote, that's fine by me. I'm happy to do your work for you.

My way.

OTIS PITTS: WELL-DESERVED RECOGNITION FOR A JOB WELL DONE

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. LEHMAN of Florida. Mr. Speaker, we in North Dade have long known the value of Tacolcy Economic Development Corp. and its dedicated, effective leader, Otis Pitts.

Now the entire Nation has been made aware of the contribution that Otis Pitts has made to our community, because the MacArthur Foundation has named him a fellow this year. The honor places Otis Pitts in the company of some of the most creative and productive individuals in our country.

My own experiences working with Otis on transportation and housing issues in Dade County confirm the wisdom of the MacArthur board of directors. I know how concerned he has been and how hard he has worked to solve the problems of those in our community who need help the most. I also know what a big difference his intelligence, drive and vision have made in the lives of our people. Characteristically, Otis Pitts shares the credit for his achievements, but there can be no doubt that he is a special person who has made special contributions.

Mr. Speaker, I would like to share with my colleagues an article and editorial from the Miami Herald which provide additional information about Otis Pitts. I know my colleagues join me in offering him our warmest congratulations and best wishes for continued success.

LIBERTY CITY DEVELOPER WINS GRANT

(By Kimberly Crockett)

Otis Pitts, the former Miami policeman turned developer who helped bring new shopping and housing to Liberty City after the devastating 1980 riots, has won a $295,000 MacArthur Foundation Fellowship.

The prestigious award recognizes "people with promise" who have made significant

contributions to society, said Ken Hope, the MacArthur Foundation program director.

Pitts, president of the Tacolcy Economic Development Corp., learned that he was one of 36 recipients this year during a phone call from Hope Friday.

"He was very quiet, then he took a breath and said, "You're kidding," recalled Hope. "It does change their lives."

"I was flabbergasted," Pitts said Monday from Chicago, where the awards will be formally announced today. "The hair was standing up on my back."

The fellowships are unique because recipients are nominated by anonymous individuals designated by the MacArthur board of directors. Fellowship winners, selected by the foundation board are free to use the awards as they wish, Hope said.

"It's a gift and gifts tend to keep giving." Hope said. "They will give it back to society in different ways."

The MacArthur Foundation is the legacy of Chicago banker and philanthropists John D. and Catherine T. MacArthur, who left the bulk of their estate to help exceptionally talented individuals.

Awards usually range between $150,000 and $375,000. Several poets, literary critics and academicians, including Stanford University population studies professor Paul Ehrlich and writer Susan Sontag were among this year's winners.

Fellows were selected for their proven ability and future potential in improving society, Hope said, All the winners have illustrated a track record of commitment and success.

Pitts, 48 grew up in Liberty City and patrolled its streets as a Miami police officer. In 1974 he joined the Tacolcy Community Center, which provides social services to the black community, but it was the McDuffie riots in 1980 that changed his life.

In the aftermath of the violence, Liberty City didn't need any more social service handouts, Pitts felt. It needed economic opportunities. Two years later, Pitts founded the Tacolcy Economic Development Corp., mostly to revitalize the commercial area near Northwest 62nd Street and Seventh Avenue, hard hit by the riots.

"Once we got started, if the efforts were to be successful, we had to address other problems like why people were leaving the area and the housing problems," Pitts said.

Though the corporation Pitts has expanded the job market, increased the level of entrepreneurial activities and built low-income housing.

Pitts said he is uncertain how he will use the money. However, he hopes to produce informational brochures about the corporation and aid others in setting up similar corporations.

"I'm overwhelmed by it all," Pitts said. "I feel it is something you never earn by yourself, It's a challenge to rededicate myself."

REWARD AND "CHALLENGE"—THE GRANT TO OTIS PITTS

Independence has been a hallmark of Otis Pitts' career as a community developer and activist. That characteristic, which is the key to his success in bringing retail and residential development back to Liberty City after the 1980 riots, has cost him the support of some politicized factions in the black community.

Now, however, thanks to an enlightened grant of a $295,000 MacArthur Foundation Fellowship, Mr. Pitts' independence is secured. So is his ability to continue to explore ways for low-income black neighborhoods to work their way out of poverty with jobs and growth instead of trying to beg their way out with handouts.
